This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

O

47TH CONGRESS, 2d Session. } HOUSE OF REPRESENTATIVES. { MIS. DOC. No. 4.

A LIST

OF

REPORTS TO BE MADE TO CONGRESS

DURING THE

SECOND SESSION OF THE FORTY-SEVENTH CONGRESS

BY

PUBLIC OFFICERS.

PREPARED BY THE

CLERK OF THE HOUSE OF REPRESENTATIVES.

DECEMBER 4, 1882.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1882.

LIST OF REPORTS

To be made to Congress at the first session of the Forty-seventh Congress by public officers; prepared in obedience to a standing rule of the House of Representatives.

Officer, and nature of the report.	By what authority.	Section or page.	When expected to be made.
BY THE HEAD OF EACH DEPARTMENT.			
A detailed statement of the manner in which the contingent fund for his department, and for the bureaus and offices therein, has been expended, giving the names of every person to whom any portion thereof has been paid; and if for anything furnished, the quantity and price; and if for any service rendered, the nature of such service, and the time employed, and the particular occasion or cause, in brief, that rendered such service necessary; and the amount of all former appropriations in each case on hand, either in the Treasury or in the hands of any disbursing officer or agent; and he shall require of the disbursing officers, acting under his direction and authority, the return of precise and analytical statements and receipts for all the money which may have been, from time to time, during the next preceding year, expended by them.	Revised Statutes..... Stats. at L., vol. 18.....	sec. 193 p. 96	Annually. At the beginning of each regular session.
A report of the names of the clerks and other persons that have been employed in his department and the offices thereof, stating the time that each clerk or other person was actually employed and the sums paid to each; also whether they have been usefully employed; whether the services of any of them can be dispensed with without detriment to the public service; and whether the removal of any individuals and the appointment of others in their stead is required for the better dispatch of business.	Revised Statutes.....	sec. 194	Annually.
NOTE.—The heads of departments, in communicating estimates of expenditures and appropriations to Congress, or to any of the committees, thereof, shall specify, as nearly as may be convenient, the sources from which such estimates are derived and the calculations upon which they are founded, and shall discriminate between such estimates as are conjectural in their character and such as are framed upon actual information and applications from disbursing officers. They shall also give references to any law or treaty by which the proposed expenditures are, respectively, authorized, specifying the date of each, and the volume and page of the Statutes at Large or of the Revised Statutes, as the case may be, and the section of the act in which the authority is to be found.			

List of reports—Continued.

Officer, and nature of the report.	By what authority.	Section or page.	When expected to be made.
Whenever the head of a department, being about to submit to Congress the annual estimates of expenditures required for the coming year, finds that the usual items of such estimates vary materially in amount from the appropriation ordinarily asked for the object named, and especially from the appropriation granted for the same objects for the preceding year and whenever new items not theretofore usual are introduced into such estimates for any year, he shall accompany the estimates by minute and full explanations of all such variations and new items, showing the reasons and grounds upon which the amounts are required, and the different items added. The head of each department, in submitting to Congress his estimates of expenditures required in his department during the year then approaching, shall designate not only the amount required to be appropriated for the next fiscal year, but also the amount of the outstanding appropriation, if there be any, which will probably be required for each particular item of expenditure.			
Except when a different time is expressly prescribed by law, the various annual reports required to be submitted to Congress by the heads of departments shall be made at the commencement of each regular session, and shall embrace the transactions of the preceding year	Revised Statutes.....	sec. 195	
A detailed statement required of expenditures for contingent expenses in any department or bureau of the government for preceding fiscal year.	Stats. at L., vol. 19	p. 306	Beginning of the session.
A statement showing in detail the number of buildings rented for the use of their respective departments or the subordinate bureaus or offices thereof in the city of Washington, the annual rental paid for and cost of heating and lighting each, the appropriations from which said expenses are respectively paid, and also to submit estimates, specifically, for the rental and other expenses of such of said buildings as may be necessary for the use of the government for the fiscal year ending June 30, 1884.	Stats. at L., first session Forty-seventh Congress.	.....	In their annual estimates.
BY THE PRESIDENT OF THE UNITED STATES.			
The Chief of Engineers shall, as Superintendent of Public Buildings and Grounds, and as Superintendent of the Washington Aqueduct, annually submit the following reports to the Secretary of War:	Revised Statutes.....	sec. 1812	To accompany the annual message of the President.

First. A report of his operations for the preceding year, with an account of the manner in which all appropriations for public buildings and grounds have been applied, including a statement of the number of public lots sold or remaining unsold each year, of the condition of the public buildings and grounds, and of the measures necessary to be taken for the care and preservation of all public property under his charge.			
Second. A report of the condition, progress, repairs, casualties, and expenditures of the Washington Aqueduct and other public works under his charge.			
Directed to report his action under the provision of section 3 of the act entitled "An act making appropriation for the current and contingent expenses of the Indian Department, and for fulfilling treaty stipulations with various Indian tribes, for the year ending June 30, 1879, and for other purposes," approved May 27, 1878.	Stats. at L., vol. 20	p. 87	During the session.
A report of appropriations made for the several Indian tribes which have been diverted to other uses for the benefit of said tribes, respectively.	Stats. at L., vol. 20	p. 315	At next session thereafter.
A report in detail of any diversion of funds which has been made under authority of section 6 of Indian appropriation bill approved February 17, 1879.	Stats. at L., vol. 20	p. 316	At next session thereafter.
BY THE SECRETARY OF STATE.			
A statement containing an abstract of all the returns made to him, pursuant to law, by the collectors of the different ports, of the seamen registered by them, together with an account of such impressments and detentions as shall appear by the protests of the masters to have taken place.	Revised Statutes	sec. 207	Within ten days after the commencement of each regular session.
A statement, in a compendious form, of all such changes and modifications in the commercial systems of other nations, whether by treaties, duties on imports and exports, or other regulations, as shall have been communicated to the department, including all commercial information contained in the official publications of other governments, which he shall deem sufficiently important.	Revised Statutes	sec. 207	Annually.
A synopsis of so much of the information which may have been communicated to him by diplomatic and consular officers during the preceding year as he may deem valuable for public information; specifying the names of any consuls or commercial agents who may have been remiss in transmitting commercial information.	Revised Statutes	sec. 207	Annually.
A full list of all consular officers	Revised Statutes	sec. 208	Annually.
A report of any rates or tariffs of fees to be received by diplomatic or consular officers which may have been prescribed by the President during the year preceding.	Revised Statutes	sec. 208	Annually.
A statement of such fees as may have been collected, accounted for, and re-	Revised Statutes	sec. 208	Annually.

List of reports—Continued.

Officer, and nature of the report.	By what authority.	Section or page.	When expected to be made.
ported by the various diplomatic and consular officers during the preceding year			
A statement of the lists of passengers arriving in the United States from foreign places, returned to him quarter-yearly by the collectors of customs.	Revised Statutes.....	sec. 208	Annually.
A statement of the names of any consular officers, not citizens of the United States, to whom salaries have been paid during the year preceding, together with the circumstances under which they were appointed.	Revised Statutes.....	sec. 208	Annually.
NOTE.—The annual statement of expenditures from the contingent fund, required to be made by the Secretary of State, must include all the contingent expenses of foreign intercourse and of all the missions abroad, except such expenditures as are settled upon the certificate of the President.			
The President is authorized to prescribe, from time to time, the rates or tariffs of fees to be charged for official services, and to designate what shall be regarded as official services, besides such as are expressly declared by law, in the business of the several legations, consulates, and commercial agencies, and to adapt the same, by such differences as may be necessary or proper, to each legation, consulate, or commercial agency; and it shall be the duty of all officers and persons connected with such legations, consulates, or commercial agencies to collect for such official services such, and only such, fees as may be prescribed for their respective legations, consulates, and commercial agencies, and such rates or tariffs shall be reported annually to Congress.	Revised Statutes	sec. 208	Annually.
BY THE SECRETARY OF WAR.			
A statement of the appropriation of the preceding fiscal year for the Department of War, showing the amount appropriated under each specific head of appropriation, the amount expended under each head, and the balance which, on the thirtieth day of June preceding such report, remained unexpended. Such reports shall be accompanied by estimates of the probable demands which may remain on each appropriation.	Revised Statutes.....	sec. 228	Annually.

...ment of the expenditure of the moneys appropriated for the contingent expenses of the military establishment.				each regular session.
Whenever the Secretary of War invites proposals for any works, or for any materials or labor for any work, he shall report to Congress, at its next session, all bids therefor, with the names of the bidders.	Revised Statutes.....	sec.	230	During the session.
Full statement of all existing facts tending to show to what extent the general commerce of the country will be promoted by the several works of improvements contemplated by such examinations and surveys, to the end that public moneys shall not be applied excepting where such improvements shall tend to subserve the general commercial and navigation interests of the United States.	Revised Statutes.....	sec.	231	In connection with the reports of examinations and surveys of rivers and harbors hereafter made by order of Congress.
An abstract of the returns of the adjutants-general of the several States, of the militia thereof.	Revised Statutes.....	sec.	232	On or before the first Monday in February of each year.
Directed to forward to Congress, to accompany his annual report, a report of all inspections made by the inspection department of the Army, as to the necessity, economy, and propriety of all disbursements made by disbursing officers of the Army; also whether the disbursing officers of the Army comply with the law in keeping their accounts and making their deposits.	Stats. at L., vol. 18.....	p.	33	With his annual report.
A report of the examination and estimated cost of the improvement of the Calumet River, in the State of Illinois, from its mouth to the fork of the Calumet Lake.	Stats. at L., first session Forty-seventh Congress.	p.	195	No time specified.
The report of a board of engineers to examine in detail the mouth of the Columbia River, in Oregon, with plans and estimates for its permanent improvement.	Stats. at L., first session Forty-seventh Congress.	p.	206	During the session.
A detailed statement of the work done, the expenditures made, together with such recommendations as he may deem proper relative to the improvement of the Mississippi River.	Stats. at L., first session Forty-seventh Congress.	p.	208	In his annual report.
A report of what amount he finds due Charles McCafferty and D. and C. P. Dull, contractors, for locks in the Great Kanawha River. Also upon what terms the franchise and property of the Little Kanawha Navigation Company can be obtained.	Stats. at L., first session Forty-seventh Congress.	p.	209	No time specified.
A report of the number of persons employed, and the amount paid to each, in the Signal Office.	Stats. at L., first session Forty-seventh Congress.	p.	239	Annually.
A report of the number of persons employed to carry into effect the various appropriations for rivers and harbors, fortifications, &c.	Stats. at L., first session Forty-seventh Congress.	p.	240	Annually.
To report a detailed estimate of the force required for the Signal Service for the fiscal year commencing July 1, 1883; of the officers and other employés that will be necessary, and their compensation, respectively, and	Stats. at L., first session Forty-seventh Congress.	p.	319	No time specified.

List of reports—Continued.

Officer, and nature of the report.	By what authority.	Section or page.	When expected to be made.
the amount that should be appropriated for labor when the employés cannot be specifically estimated for, &c.			
Statement of what volumes of the Official Records of the War of the Rebellion heretofore published have not been furnished to libraries, organizations, and individuals, &c.	Stats. at L., first session Forty-seventh Congress.	p. 320	No time specified.
BY THE SECRETARY OF THE TREASURY.			
A report on the subject of finance, containing estimates of the public revenue and public expenditures for the fiscal year then current, and plans for improving and increasing the revenues from time to time, for the purpose of giving information to Congress in adopting modes of raising the money requisite to meet the public expenditures.	Revised Statutes.....	sec. 257	Annually.
A report containing a statement of all contracts for supplies or services which have been made by him or under his direction during the year preceding, and also a statement of the expenditure of the moneys appropriated for the discharge of miscellaneous claims not otherwise provided for, paid at the Treasury.	Revised Statutes.....	sec. 257	Annually.
A report of the rules and regulations established by him to secure a just, faithful, and impartial appraisal of all goods, wares, and merchandise imported into the United States, the actual value thereof, and the number of square yards, parcels, or other quantities thereof, together with his reasons for making such rules.	Revised Statutes.....	sec. 257	Annually.
A report containing a full and complete statement in detail of the amounts collected from seamen and the amounts expended for sick and disabled seamen, under the authority of the laws creating and administering a hospital-tax for the benefit of sick and disabled seamen.	Revised Statutes.....	sec. 257	Annually.
A statement of the amount of money expended at each custom-house during the preceding fiscal year, and of the number of persons employed, and the occupation and salary of each person at each custom-house during the same period.	Revised Statutes.....	sec. 228	At the commencement of each regular session.
A report containing the results of the information collected during the preceding year, by the Bureau of Statistics, upon the condition of the agriculture, manufactures, domestic trade, currency, and banks of the several States and Territories.	Revised Statutes.....	sec. 259	First Monday in January.

Reports which may be made to him by the officers charged with the examination of the accounts of the Department of War and the Department of the Navy, respectively, showing the application of the money appropriated for those departments for the preceding year.	*Revised Statutes*	sec. 260	At the commencement of each regular session, accompanying his annual statement of the public expenditures.
An abstract, in tabular form, of the separate accounts of moneys received from internal duties or taxes in each of the respective States, Territories, and collection districts, required by section two hundred and thirty-nine to be kept at the Treasury.	Revised Statutes	sec. 261	Annually, during December.
A copy of each of the accounts kept by the superintendent of the Treasury building of all amounts expended under the head of contingent expenses for the several bureaus of the Department of the Treasury, and of all amounts paid for furniture and repairs of furniture, and of the disposal of old furniture.	Revised Statutes	sec. 262	At the commencement of each regular session.
The Secretary of the Treasury shall cause the annual report on the statistics of commerce and navigation required from the Chief of the Bureau of Statistics to be prepared and printed according to law, and to be submitted to Congress at as early a day in each regular session as practicable, and not later than the first Monday in January.	Revised Statutes	sec. 263	
The number and names of the persons employed during the last preceding fiscal year upon the Coast Survey and business connected therewith; the amount of compensation of every kind respectively paid them, for what purpose, and the length of time employed; and shall report a full statement of all other expenditures made under the direction of the Superintendent of the Coast Survey.	Revised Statutes	sec. 264	Annually.
The Secretary of the Treasury from time to time shall establish such rules and regulations, not inconsistent with the laws of the United States, to secure a just, faithful, and impartial appraisal of all merchandise imported into the United States, and just and proper entries of such actual market-value or wholesale price thereof, and of the square yards, parcels, or other quantities, as the case may require, and of such actual market-value or wholesale price of each of them. The Secretary of the Treasury shall report all such rules and regulations with the reasons therefor. NOTE.—The Postmaster-General shall furnish a copy of his annual estimates to the Secretary of the Treasury prior to the first of November in each year, which shall be reported to Congress by the latter in his regular printed estimates. NOTE.—The manner in which all moneys for the life-saving service shall have been expended shall accompany the annual finance report.	Revised Statutes	sec. 2949	During the session.

Officer, and nature of the report.	By what authority.	Section or page.	When expected to be made.
merce and navigation of the United States with foreign countries to the close of the fiscal year.			
A report of all claims allowed by the Quartermaster-General, Commissary-General, and Third Auditor of the Treasury, brought before them under the act of July 4, 1864, and the acts amendatory thereof.	Stats. at L., vol. 18	p. 75	At the commencement of each session.
A detailed estimate of appropriation required for the expenses for the preparation, issue, and reissue of certain securities of the United States.	Stats. at L., vol. 18	p. 109	Annually.
A report in detail of al payments by him to make suitable compensation n certain cases under the customs-revenue laws.	Stats. at L., vol. 18	p. 186	Annually.
A detailed statement of the various sums of money refunded under the provi ions of the act relating to the revenue approved March 3, 1875, together with copies of the rulings under which repayments were made.	Stats. at L., vol. 18	p. 470	In his annual report.
A detailed statement of the expenditures for the preceding fiscal year of all sums appropriated for cont ngent expenses of the Independent Treasury.	Stats. at L., vol. 19	p. 306	Beginning of the session.
Directed to report investments in other than 5 per cent. bonds of the United States, under the provision of section 3 of the act entitled "An act o alter and amend the act entitled An act to aid n the construction of a railroad and telegraph ine from the Missouri River to the Pacific Ocean, and to secure to the government the use of the same for postal, military, and other purposes,' approved July 1, 1864, and also to alter and amend the act of Congress approved July 2, 1864, in amendment of said first-named act, approved May 7, 1878.	Stats. at L., vol. 20	p.	No time specified.
Directed to con inue to receive, examine, and consider the validity and justice of all claims under appropriations the balances of which have been exhausted or carried to the surplus fund that may be brought before them within a period of five years, and report the amount due to each claimant to the Speaker of he House of Representatives.	Stats. at L., vol. 20	p. 130	At the commencement of the session.
An annual report of the expenditures of the moneys appropriated for the maintenance of the life-saving service and of the operations of said service during the year.	Stats. at L., vol. 20	p. 164	Annually.
A tabular statement showing in detail the receipts and expenditures in the naval service under each appropriation as made up and determined by the proper officers o he Treasury Department upon the accounts of disbursing officers rendered for settlement, also an account of balance in	Stats. at L., vol. 20	p. 167	Annually.

port of any amounts lost or unaccounted for by voucher.			
A report of property belonging to the United States leased by him, at his discretion, for a period not exceeding five years.	Stats. at L., vol. 20	p. 383	Annually.
Directed to transmit to Congress the annual report of the National Board of Health, with statement of expenditures under the act to prevent the introduction of contagious diseases into the United States.	Stats. at L., first session Forty-sixth Congress.	pp. 6, 7	Annually.
A detailed statement showing how the several sums appropriated for contingent and miscellaneous purposes have been expended, and also giving the amount received under section 3687 of the Revised Statutes, and also a statement showing in detail how the money appropriated under said section has been expended.	Stats. at L., vol. 20	p. 226	Annually.
A report of the amount that has been paid out for arrears of pay and bounty during the fiscal year ending June 30, 1881.	Stats. at L., third session Forty-sixth Congress.	pp. 419, 443	At the commencement of each regular session.
A report of the results of the investigation and examination, and the amount or amounts found to have been properly expended under the provision of the act approved June 27, 1882, authorizing the Secretary of the Treasury to examine and report the amount of all claims of the States of Texas, Colorado, Oregon, Nebraska, California, Kansas, and Nevada, and the Territories of Washington and Idaho, for money expended, &c., for suppressing Indian hostilities.	Stats. at L., first session Forty-seventh Congress.	p. 112	Earliest practicable period.
A report of the amount of waste paper sold from the accumulation in the office of the Auditor of the Treasury for the Post-Office Department.	Stats. at L., first session Forty-seventh Congress.	p. 228	No time specified.
A report of the number, class, &c., of officers at ports of entry, and amount required for contingent expenses.	Stats. at L., first session Forty-seventh Congress.	p. 256	Annually.
Report relative to the propriety of selling the Bridewell Dock property, at Chicago.	Stats. at L., first session Forty-seventh Congress.	p. 305	During the session.
Report. First, as to a suitable plot of ground belonging to the United States upon which a suitable fire-proof building can be erected, to be used for the safekeeping of records of the executive, legislative, and judicial departments, which are not required for constant reference; second, the probable cost of such building, with plans and specifications for same.	Stats. at L., first session Forty-seventh Congress.	p. 306	During the session.
An itemized estimate for the year thereafter, commencing July 1, 1883, for engraving and printing bureau for the force of employés, that can be individually and specifically appropriated for, &c.	Stats. at L., first session Forty-seventh Congress.	p. 308	During the session.
To report the balance equitably due under the provisions of the act entitled "An act to authorize the auditing of certain unpaid claims against the Indian bureau, by the accounting officers of the Treasury," approved August 7, 1882.	Stats. at L., first session Forty-seventh Congress.	p. 346	No time specified.

List of reports—Continued.

Officer, and nature of the report.	By what authority.	Section or page.	When expected to be made.
BY THE DEPARTMENT OF JUSTICE.			
A report of business of the Department of Justice for the last preceding fiscal year, and of any other matters appertaining thereto that he may deem proper, including a statement of the several appropriations now or which may hereafter be placed under its control, the amount appropriated and a detailed statement of the amounts used in defraying the expenses of the United States courts in each judicial district; also, the statistics of crime under the laws of the United States, and a statement of the number of causes, civil and criminal, pending during the preceding year in each of the several courts of the United States.	Revised Statutes.....	sec. 384	At the commencement of each regular session.
A report of the names of all persons employed or retained as attorneys or counselors at law to assist any district attorneys in the performance of their duties, stating where and upon what business each was employed, and the compensation paid to each.	Revised Statutes.....	sec. 385	Annually.
A register of the statutes of the United States and reports of the Supreme Court shall be kept, under the authority of the head of the Department of Justice, showing the quantity of each kind received by him from the Secretary of the Interior, and it shall be his duty to cause to be entered in such register, and at the proper time, when, where, and to whom the same, or any part of them, have been distributed and delivered, and to report the same to Congress.	Revised Statutes.....	sec. 387	Annually.
A report by the Attorney-General, in detail, of the items, accounts, and causes of expenditure of the contingent expenses of his department.	Stats. at L., vol. 18.....	p. 109	Annually.
A statement of all payments or expenditures during any fiscal year, out of any appropriation fund subject to requisitions by the Attorney-General.	Stats. at L., first session Forty-sixth Congress.	p. 44	In his annual report.
BY THE POSTMASTER-GENERAL.			
A report of all contracts for carrying the mail made within the preceding year, giving in each case the name of the contractor; the date and duration of the contract; the routes embraced therein, with the length of each; the time of arrival and departure at the ends of each route; the mode of transportation; and the price to be paid, together with a copy	Revised Statutes.....	sec. 413	Annually.

A report of all land and water mails established or ordered within the preceding year, other than those let to contract at the annual letting, giving in each case the route or water-course on which the mail is established; the name of the person employed to transport it; the mode of transportation; the price to be paid; and the duration of the order or contract.	Revised Statutes	sec. 413	Annually.
A report of all allowances made to contractors within the preceding year above the sums originally stipulated in their respective contracts, and the reasons for the same, and of all orders made whereby additional expense is incurred on any route beyond the original contract price, giving in each case the route; the name of the contractor; the original service provided for by the contract; the original price; the additional service required and the additional allowance therefor.	Revised Statutes	sec. 413	Annually.
A report of all curtailments of expenses effected within the preceding year, giving in each case the same particulars as in the preceding report.	Revised Statutes	sec. 413	Annually.
A report of the finances of the department for the preceding year, showing the amount of balance due the department at the beginning of the year; the amount of postage which accrued within the year; the amount of engagements and liabilities; and the amount actually paid during the year for carrying the mail, showing how much of the amount was for carrying the mail in preceding years.	Revised Statutes	sec. 413	Annually.
A report of the fines imposed on and the deductions from the pay of contractors, made during the preceding year, stating the name of the contractor; the nature of the delinquency; the route on which it occurred; when the fine was imposed; and whether the fine or deduction has been remitted; and for what reason.	Revised Statutes	sec. 413	Annually.
A copy of each contract for carrying the mail between the United States and foreign countries, with a statement of the amount of postage derived under the same, so far as the returns of the department will enable it to be done.	Revised Statutes	sec. 413	Annually.
A report showing all contracts which have been made by the department, other than for carrying the mail; giving the name of the contractor; the article or thing contracted for; the place where the article was to be delivered or the thing performed; the amount paid therefor; and the date and duration of the contract.	Revised Statutes	sec. 413	Annually.
A report on the postal business and agencies in foreign countries	Revised Statutes	sec. 413	Annually.
A report of the amount expended in the department for the preceding fiscal	Revised Statutes	sec. 413	Annually.

Officer, and nature of the report.	By what authority.	Section or page.	When expected to be made.
year, including detailed statements of expenditures made from the contingent fund.			
NOTE.—Directed to furnish a copy of his annual estimates to the Secretary of the Treasury prior to the first of November in each year.			
An estimate of the amount that will be required for the ensuing fiscal year under each of the following heads:	Revised Statutes.....	sec. 3668	Annually.
First. Transportation of the mails.			
Second. Compensation of postmasters.			
Third. Compensation of clerks in post-offices.			
Fourth. Compensation of letter-carriers.			
Fifth. Compensation of blank agents and assistants.			
Sixth. Mail depredations and special agents.			
Seventh. Postage-stamps and envelopes.			
Eighth. Ship, steamboat, and way letters.			
Ninth. Dead letters.			
Tenth. Mail-bags.			
Eleventh. Mail-locks, keys, and stamps.			
Twelfth. Wrapping paper.			
Thirteenth. Office furniture.			
Fourteenth. Advertising.			
Fifteenth. Balances to foreign countries.			
Sixteenth. Rent, light, and fuel for post-offices.			
Seventeenth. Stationery.			
Eighteenth. Miscellaneous.			
Such estimates shall show the sums paid under each head, and the names of the persons to whom payments are made out of the miscellaneous fund; but the names of persons employed in detecting depredations on the mail and of other confidential agents need not be disclosed.			
[illegible]			

cease at the end of the next session of Congress, unless such route is established a post-route by Congress.			
A report relating to the operating receipts and expenditures of such railroads, in connection with the cost of mail transportation and the proper compensation to be paid for the same.	Stats. at L., vol. 20	p. 358	In his annual report.
A report of the proceeds of sales of waste paper	Stats. at L., third session Forty-sixth Congress.	p. 412	No time specified.
BY THE SECRETARY OF THE NAVY.			
A statement of the appropriations of the preceding fiscal year for the Department of the Navy, showing the amount appropriated under each specific head of appropriation, the amount expended under each head, and the balance which, on the thirtieth day of June preceding such report, remained unexpended. Such reports shall be accompanied by estimates of the probable demands which may remain on each appropriation.	Revised Statutes	sec. 429	Annually.
A statement of all offers for contracts for supplies and services made during the preceding year, by classes, indicating such as have been accepted.	Revised Statutes	sec. 429	Annually.
A statement showing the amounts expended during the preceding fiscal year for wages of mechanics and laborers employed in building, repairing, or equipping vessels of the Navy, or in receiving and securing stores and materials for those purposes, and for the purchase of materials and stores for the same purpose; and showing the cost or estimated value of the stores on hand, under this appropriation, in the navy-yards at the commencement of the next preceding fiscal year; and the cost or estimated value of articles received and expended during the year; and the cost or estimated value of the articles belonging to this appropriation which may be on hand in the navy-yards at the close of the next preceding fiscal year.	Revised Statutes	sec. 429	Annually.
A statement of all acts done by him in making sale of any vessel or materials of the Navy; specifying all vessel sand materials sold, the parties buying the same, and the amount realized therefrom, together with such other facts as may be necessary to a full understanding of his acts.	Revised Statutes	sec. 429	Annually.
Estimates of the claims and demands chargeable upon and payable out of the naval pension fund.	Revised Statutes	sec. 3667	Annually.
NOTE.—To be submitted to Congress by the Secretary of the Treasury.			
All proposals for naval supplies shall be preserved and recorded and reported by the Secretary of the Navy to Congress. The report shall contain a schedule embracing the offers by classes, indicating such as have been accepted. In case of a failure to supply the articles or to perform the work by the person entering into such contract, he and his sureties shall	Revised Statutes	sec. 3720	At the commencement of each regular session.

Officer, and nature of the report.	By what authority.	Section or page.	When expected to be made.
be liable for the forfeiture specified in such contract as liquidated damages, to be sued for in the name of the United States.			
A report of the facts and reasons governing his action in suspension of work, &c., at navy-yards.	Stats. at L., first session Forty-seventh Congress.	p. 289	During the session.
The report of the Naval Advisory Board to examine and report on completing engines, &c.,	Stats. at L., first session Forty-seventh Congress.	p 293	At the next session.
Also report of proceeds of all sales of materials, &c.....	Stats. at L., first session Forty-seventh Congress.	p. 296	Annually.
A report, with name, of such condemned vessels as have been stricken from Navy Register.	Stats. at L., first session Forty-seventh Congress.	p. 297	No time specified.
A report of the finding of the court of inquiry to investigate as to the circumstances of the loss of the exploring steamer Jeannette.	Stats. at L., first session Forty-seventh Congress.	p. 9	No time specified.
BY THE SECRETARY OF THE INTERIOR.			
First. A report showing the nature, character, and amount of all claims presented to him during the preceding year under laws or treaty stipulations for compensation for depredations committed by Indians, whether allowed by him or not, and the evidence upon which his action was based.	Revised Statutes.....	sec. 445	Annually.
Second. A report showing the quantity and kind of the copies of public journals, books, and documents which have been received by him for distribution on behalf of the government, and showing also the time when, the place where, and the person to whom any of the same have been distributed and delivered during the preceding year.	Revised Statutes.....	sec. 445	Annually.
A tabular statement of the items paid out up to November 1, in each year, of the appropriations made for the Indian Department for the fiscal year previously ending, each item being placed under the appropriation from which it was paid in such manner as to show the disposition made of each appropriation and the amount unexpended of each; also the itemized statement of the salaries and incidental expenses paid at each agency for the said year, and the appropriations out of which paid, and the number of Indians at each agency.	Stats. at L., vol. 18.....	p. 450	On the first day of the session.
An account of the amount received, the amount expended, and the amount	Stats. at L., vol. 19.....	p. 380	Annually.

remaining on hand at the end of each fiscal year, arising from water-rents, under the act in relation to the Hot Springs Reservation in Arkansas.			
Directed to transmit the annual report of the operations of the Geological Survey.	Stats. at L., vol. 20.....	p. 395	With his annual report.
A report in detail of any diversions which shall be made under authority of section 4 of the Indian appropriation bill approved May 17, 1882, with the reasons therefor; also of his action under the provisions of section 5 of same act.	Stats. at L, first session Forty-seventh Congress.	p. 88	During the session.
Directed to report names and locations of libraries and other public institutions designated to receive census reports under the provisions of the bill to provide for the publication of the tenth census approved August 7, 1882.	Stats. at L., first session Forty-seventh Congress.	p. 345	At the next session.
BY THE TREASURER OF THE UNITED STATES.			
Fair and accurate copies of all accounts by him from time to time rendered to and settled with the First Comptroller, as also a true and perfect account of the state of the Treasury.	Revised Statutes.....	sec. 311	Third day of every session.
BY THE FIRST COMPTROLLER.			
A report of such officers as shall have failed to make settlement of their accounts for the preceding fiscal year within the year, or within such further time as may have been prescribed by the Secretary of the Treasury for such settlement.	Revised Statutes.....	sec. 272	Annually.
BY THE COMPTROLLER OF THE CURRENCY.			
The Comptroller of the Currency, in addition to the powers conferred upon him by law for the examination of national banks, is further authorized, whenever he may deem it useful, to cause examination to be made into the condition of any bank in the District of Columbia organized under act of Congress. The Comptroller, at his discretion, may report to Congress the results of such examination. The expense necessarily incurred in any such examination shall be paid out of any appropriation made by Congress for special bank examinations.	Revised Statutes.....	sec. 332	At his discretion.
A summary of the state and condition of every association from which reports have been received the preceding year, at the several dates to which such reports refer, with an abstract of the whole amount of banking capital returned by them, of the whole amount of their debts and liabilities, the amount of circulating notes outstanding, and the total amount of means and resources, specifying the amount of lawful money held by	Revised Statutes.....	sec. 333	Annually at the commencement of the session.

List of reports—Continued.

Officer, and nature of the report.	By what authority.	Section or page.	When expected to be made
them at the times of their several returns, and such other information in relation to such associations as, in his judgment, may be useful.			
A statement of the associations whose business has been closed during the year, with the amount of their circulation redeemed and the amount outstanding.	Revised Statutes.....	sec. 333	Annually at the commencement of the session.
Any amendment to the laws relative to banking by which the system may be improved, and the security of the holders of its notes and other creditors may be increased.	Revised Statutes.....	sec. 333	Annually at the commencement of the session.
A statement exhibiting under appropriate heads the resources and liabilities and condition of the banks, banking companies, and savings banks organized under the laws of the several States and Territories; such information to be obtained by the Comptroller from the reports made by such banks, banking companies, and savings banks to the legislatures or officers of the different States and Territories; and where such reports cannot be obtained the deficiency to be supplied from such other authentic sources as may be available.	Revised Statutes.....	sec. 333	Annually at the commencement of the session.
The names and compensation of the clerks employed by him, and the whole amount of the expenses of the bank ng department during the year.	Revised Statutes.....	sec. 233	Annually at the commencement of the session.
A report of his proceedings under the act entitled "An act amending the charter of the Freedman's Savings and Trust Company, and for other purposes."	Stats. at L., 3d, 46th.....	p. 327	By the tenth day of each annual session.
BY THE COMMISSIONER OF INDIAN AFFAIRS.			
A tabular statement showing distinctly the separate objects of expenditure under his supervision, and how much disbursed for each object, describing the articles and the quantity of each, and giving the name of each person to whom any part was paid and how much was paid to him, and for what objects, so far as they relate to the disbursement of the funds appropriated for the incidental, contingent, or miscellaneous expenses of the Indian service during the fiscal year next preceding each report.	Revised Statutes.....	sec. 468	Annually.
NOTE.—The Commissioner of Indian Affairs shall embody in his annual report the reports of all agents or commissioners issuing food, clothing, or supplies of any kind to Indians, stating the number of Indians present			

and actually receiving the same; also a tabular statement of all bids and proposals received for any services, supplies, or annuity goods for the Indian service, with a detailed statement of all awards of contracts made for any such services for which bids were received.			
All persons whatsoever, charged or trusted with the disbursement or application of money, goods or effects of any kind for the benefit of the Indians, shall settle their accounts annually at the Department of the Interior on the first day of October; and copies of the same shall be laid before Congress at the commencement of the ensuing session, by the proper accounting officers, together with a list of the names of all persons to whom money, goods, or effects have been delivered within the preceding year for the benefit of the Indians, specifying the amount and object for which they were intended, and showing who are delinquents, if any, in forwarding their accounts according to the provisions of this section; and, also, with a list of the names of all persons appointed or employed under this title, with the dates of their appointment or employment, and the salary and pay of each.	Revised Statutes.....	sec. 2091	At the commencement of the session.
A report of any case of hostilities by any tribe with which the United States has treaty stipulations which has occurred since his next preceding report.	Revised Statutes.....	sec. 2100	At each session.
BY THE COMMISSIONER OF PATENTS.			
A report giving a detailed statement of all moneys received for patents, for copies of records or drawings, or from any other source whatever; a detailed statement of all expenditures for contingent and miscellaneous expenses; a list of all patents which were granted during the preceding year, designating under proper heads the subjects of such patents; an alphabetical list of all the patentees, with their places of residence; a list of all patents which have been extended during the year; and such other information of the condition of the Patent Office as may be useful to Congress or the public.	Revised Statutes.....	sec. 494	Annually.
BY THE COMMISSIONER OF EDUCATION.			
A report embodying the results of his investigations and labors, together with a statement of such facts and recommendations as will, in his judgment, subserve the purpose for which the office was established.	Revised Statutes	sec. 518	Annually.
BY THE COMMISSIONER OF AGRICULTURE.			
A general report in writing of his acts to the President and to Congress, in	Revised Statutes	sec. 528	Annually.

List of reports—Continued.

Officer, and nature of the report.	By what authority.	Section or page.	When expected to be made.
which he may recommend the publication of papers forming parts of or accompanying his report, which shall also contain an account of all moneys received and expended by him. He shall also make special reports on particular subjects whenever required to do so by the President, or either house of Congress, or when he shall think the subject in his charge requires it.			
A report in detail to Congress of all moneys expended by him or under his direction.	Revised Statutes	sec.	On or before the 15th day of December in each year.
A detailed statement of the manner of the expenditure of the amounts appropriated in the agricultural appropriation bill approved March 3, 1881.	Stats. at L., 3d, 46th.....	p. 382	At the next regular session, to accompany his estimates.
Directed to report the place, quantity, and price of seeds purchased, from whom purchased, and the date of purchase.	Stats. at L., 3d, 46th.....	p. 383	
Required to account and report to the proper accounting officers of the Treasury in the same manner and at the same times as heads of the executive departments are now required by law to account and report.	Stats. at L., 3d, 46th.....	p. 385	
Directed to report an itemized account of expenditures made by the act appropriating $5,000 for packing, transporting, and arranging certain agricultural and mineral specimens, approved February 13, 1882.	Stats. at L., first session Forty-seventh Congress.	p. 3	No time specified.
Directed to present to Congress a detailed statement of the expenditures of all appropriations for said department for the last preceding fiscal year.	Stats. at L., first session Forty-seventh Congress.	p. 92	At the commencement of each regular session.
BY THE COMMISSIONER OF THE LAND OFFICE.			
A report of all cases of suspended entries of public lands, and of suspended pre-emption land-claims, and to adjudge in what cases patents shall issue upon the same, with a statement of the principles upon which each class was determined.	Revised Statutes	sec. 2452	At the first session after any such adjudications have been made.
BY THE COMMISSIONER OF INTERNAL REVENUE.			
The Commissioner of Internal Revenue shall estimate in detail, by collection districts, the expense of assessing and the expense of the collection of internal revenue, and submit the same to Congress.	Revised Statutes	sec. 3671	At the commencement of each regular session.
A detailed statement of how he expended the sum of one million five hun-	Stats. at L., vol. 20.....	p. 187	Annually.

dred thousand dollars appropriated for salaries of internal-revenue agents, &c., for the fiscal year ending June 30, 1879. A detailed statement as to how he has expended the appropriation for detecting and bringing to trial and punishment persons guilty of violating the internal-revenue laws; also a detailed statement of all miscellaneous expenditures in the division of internal revenue, for which appropriation is made in this act.	Stats. at L., vol. 21	p. 220	Annually.
BY THE CLERK OF THE COURT OF CLAIMS.			
A full and complete statement of all the judgments rendered by the court during the previous year, stating the amounts thereof and the parties in whose favor they were rendered, together with a brief synopsis of the nature of the claims upon which they were rendered. And at the end of every term of the court he shall transmit a copy of its decisions to the heads of departments; to the Solicitor, the Comptrollers, and the Auditors of the Treasury; to the Commissioners of the General Land Office and of Indian Affairs; to the chiefs of bureaus, and to other officers charged with the adjustment of claims against the United States.	Revised Statutes	sec. 1057	On the first day of every December session.
BY THE BOARD OF VISITORS TO THE MILITARY ACADEMY.			
It shall be the duty of the board of visitors to inquire into the actual state of the discipline, instruction, police administration, fiscal affairs, and other concerns of the Academy. The visitors appointed by the President shall report thereon to the Secretary of War, for the information of Congress, at the commencement of the session next succeeding such examination, and the Senators and Representatives designated as visitors shall report to Congress, within twenty days after the meeting of the session next succeeding the time of their appointment, their action as such visitors, with their views and recommendations concerning the Academy.	Revised Statutes	sec. 1328	Within twenty days after the meeting of Congress.
BY THE CONGRESSIONAL PRINTER.			
Report of the exact condition, and the amount and cost of the public printing, binding, lithographing, and engraving; the amount and cost of all paper purchased for the same; a detailed statement of proposals made and contracts entered into for the purchase of paper and other materials, and for lithographing and engraving; of all payments made, during the preceding year, under his direction; of the amount of work ordered and	Revised Statutes.....	sec. 3621	On the first day of each session.

Officer, and nature of the report.	By what authority.	Section or page.	When expected to be made.
done, with a general classification thereof, for each department, and a detailed statement of each account with the departments or public officers a detailed statement of the number of hands employed in the establishment, and the time each has been employed; and such further information, touching all matters connected with the printing office, as may be in his possession.			
Detailed estimates of the sums required for the support of the Government Printing Office.	Revised Statutes.....	sec. 3822	At the beginning of each session.
Directed in his annual report to make a statement of the cost of printing and binding done for the Patent Office.	Stats. at L., first session Forty-seventh Congress.	p. 335	In his annual report.
BY THE SUPERINTENDENT OF THE COAST SURVEY.			
The Coast Survey report shall be submitted to Congress each year, and shall be accompanied by a general chart of the whole coast of the United States, on as large a scale as convenient and practicable, showing, as near as practicable, the configuration of the coasts, and showing, by lines, the probable limits of the Gulf Stream, and showing, by lines, the probable limit to which the soundings off the coast will extend, and showing, by the use of colors and explanations, the exact portions of our coasts of which complete charts have been published by the Coast Survey; also showing such other parts of the coasts of which the triangulation, the topography and the soundings have been completed, but not published, and also such parts of the coasts of which the triangulation and topography, or the triangulation only, have been completed.	Revised Statutes.....	.....	Annually, during December.
BY THE LIBRARIAN OF CONGRESS.			
A report of the number and description of copyright publications for which entries have been made during the year.	Revised Statutes.....	sec. 4951	Annually.
BY THE REGENTS OF THE SMITHSONIAN.			
A report of the operations, expenditures, and condition of the institution..	Revised Statutes.....	sec. 5593	At each session.

BY THE BOARD OF MANAGERS OF THE NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS.			
A report of the condition of the National Home for Disabled Volunteer Soldiers.	Revised Statutes.....	sec. 4824	Annually, on the first Monday of every January.
BY THE SUPERINTENDENT OF THE COLUMBIA INSTITUTION FOR THE INSTRUCTION OF THE DEAF AND DUMB.			
A full and complete statement of all the expenditures made by virtue of any appropriation by Congress, including the amounts and the rates paid to the superintendent, and for teachers.	Revised Statutes.....	sec. 4867	At the commencement of every December session.
BY THE SECRETARY OF THE SENATE, THE CLERK OF THE HOUSE OF REPRESENTATIVES, THE SERGEANT-AT-ARMS, THE POSTMASTERS OF THE SENATE AND HOUSE, AND THE DOORKEEPER OF THE HOUSE.			
A statement showing the names of all the clerks and other persons who have been, during the preceding year, or any part thereof, employed in their respective offices, and those of the messengers of the respective houses; together with the time that each clerk or other person and each messenger was actually employed, and the sums paid to each. This statement must also show whether such clerks or other persons, or such messengers, have been usefully employed; whether the services of any of them can be dispensed with without detriment to the public service, and whether the removal of any particular persons, and the appointment of others in their stead, is required for the better dispatch of business.	Revised Statutes.....	sec. 60	At the commencement of each session.
A detailed statement, by items, of the manner in which the contingent fund for each house has been expended during the preceding year. This statement must give the names of every person to whom any portion of the fund has been paid; and if for anything furnished, the quantity and price; and if for any services rendered, the nature of such service and the time employed, and the particular occasion or cause, in brief, that rendered such service necessary, and the amount of all former appropriations in each case on hand, either in the Treasury or in the hands of any disbursing officer or agent.	Revised Statutes.....	sec. 60	At the commencement of each session.
NOTE.—Each of the statements required by the preceding section shall exhibit, also, the several sums drawn by the Secretary and Clerk, respectively, from the Treasury, and the balances, if any, remaining in their hands.			
The Secretary of the Senate and the Clerk of the House of Representatives shall each require of the disbursing officers acting under their direction or authority the returns of precise and analytical statements and receipts for all the moneys which may have been from time to time, during the	Revised Statutes.....	sec. 26	Annually.

Officer, and nature of the report.	By what authority.	Section or page.	When expected to be made.
next preceding year, expended by them; and the results of such returns and the sums total shall be communicated to Congress by the Secretary and Clerk, respectively.			
All expenditures of the Senate and House of Representatives shall be made up to the end of each fiscal year, and shall be reported to Congress.	Revised Statutes.....	sec. 63	At the commencement of each regular session.
The Secretary of the Senate and the Clerk of the House of Representatives shall prepare and publish a statement of all appropriations made during the session, a statement of the new offices created and the salaries attached to each, and a statement of the offices the salaries attached to which are increased, and the amount of such increase.	Revised Statutes.....	sec. 64	As soon as practicable after the close of each session.
The Secretary of the Senate and the Clerk of the House of Representatives, respectively, shall report to Congress a full and complete statement of all their receipts and expenditures as such officers, showing in detail the items of expense, classifying them under the proper appropriations, and also showing the aggregate thereof, and exhibiting in a clear and concise manner the exact condition of all public moneys by them received, paid out, and remaining in their possession as such officers.	Revised Statutes.....	sec. 70	On the first day of each regular session and at the expiration of their terms of service.
The Secretary of the Senate, the Clerk of the House of Representatives, the Sergeant-at-Arms, the Postmaster of the Senate and House of Representatives, and the Doorkeeper of the House of Representatives, shall, severally, make out and return to Congress a full and complete account of all property belonging to the United States in their possession, respectively, at the time of returning such account.	Revised Statutes.....	sec. 72	On the first day of each session and the expiration of their terms of service.
The Clerk and Doorkeeper of the House and the Secretary and Sergeant-at-Arms of the Senate, shall cause to be sold all waste-paper and useless documents and condemned furniture that have accumulated during the fiscal year, 1882, or that may hereafter accumulate in their respective departments or offices, under the direction of the Committee on Accounts of their respective houses, and cover the proceeds thereof into the Treasury, and report to Congress.	Stats. at L., first session Forty-seventh Congress.	sec. 337	No time specified.
BY THE ARCHITECT OF THE CAPITOL EXTENSION.			
The Architect of the Capitol Extension shall make out and keep, in proper books, a complete inventory of all public property in and about the Capi-	Revised Statutes.....	sec. 1383	On the first Monday of December.

tol, the Botanical Garden, and the President's House, adding thereto, from time to time, an account of such property as may be procured subsequently to the taking of the first inventory, as well as an account of the sale or other disposal of such property. And he shall submit an annual report of such inventories and accounts to Congress.				
BY THE COMMISSION FOR THE SALE OF THE PHILADELPHIA NAVY-YARD.				
A definite and specific report of all their doings under the authority of Congress.	Stats. at L., vol. 18	p.	394	At each regular session while said sale shall remain uncompleted.
BY THE GEORGETOWN AND TENNALLYTOWN RAILROAD COMPANY.				
A full report of the affairs, business, and condition of the said company for the year terminating December 31 preceding such report.	Stats. at L., vol. 19	p.	31	Annually.
BY THE WASHINGTON MONUMENT ASSOCIATION.				
A detailed report of their annual expenditures	Stats. at L., vol. 19	p.		Annually.
BY THE COMMISSIONERS OF THE DISTRICT OF COLUMBIA.				
A report of their official doings in detail under the provision of section 12 of the act entitled "An act providing a permanent form of government for the District of Columbia," approved June 11, 1878.	Stats. at L., vol. 20	p.	108	Before the first Monday in December.
A report of their action under the provision of the act entitled "An act to authorize the Commissioners of the District of Columbia to recommend a proper site for a Union Railroad Depot in the City of Washington, and for other purposes.	Stats. at L., 3d, 46th	p.	330	On the first Monday in December, 1881.
Directed to transmit to Congress the annual estimates at the same time that the regular annual estimates for expenses of the government are submitted by the Secretary of the Treasury, and with his action on the same, to be printed in the general book of estimates.	Stats. at L., 3d, 46th	p.	466	
A report of the number of overseers and inspectors required in connection with sewer or street works done under contracts authorized by appropriations.	Stats. at L., first session Forty-seventh Congress.	p.	139	Annually.
A statement of the disbursement of the sum appropriated by the joint resolution relative to filling up the ground south of the Capitol, along the line of the old canal. Approved April 1, 1882.	Stats. at L., first session Forty-seventh Congress.	p.	379	No time specified.
BY THE NATIONAL ACADEMY OF SCIENCES.

Officer, and nature of the report.	By what authority.	Section or page.	When expected to be made.
States on such general system as will, in their judgment, secure the best results at the least possible cost, and also to recommend a suitable plan for the publication and distribution of the reports, maps, and documents, and other results of said surveys.			
BY THE NATIONAL BOARD OF HEALTH.			
A report of its transactions, &c. NOTE.—This report is transmitted to Congress by the Secretary of the Treasury.	Stats. at L., vol. 20	p. 481	At the next session.
BY THE JOINT SELECT COMMITTEE RELATIVE TO ADDITIONAL ACCOMMODATIONS FOR THE LIBRARY OF CONGRESS.			
To report what practical and beneficial changes can be made in and of the Capitol building for the better accommodation of the Houses of Congress and of the Congressional Library, and what location for the Library would be suitable outside of the Capitol.	Stats. at L., vol. 21	p. 165	At the earliest practicable time.
BY THE COMMISSIONER OF FISH AND FISHERIES.			
A report whether any and what diminution in the number of the food fishes of the coast and lakes of the United States has taken place, and if so to what cause the same is due, and also whether any and what protective, prohibitory, precautionary measures should be adopted in the premises. NOTE.—The report upon the Berlin Exhibition, showing the recent progress and present condition of the fisheries and fish culture in foreign countries, to be made to the Secretary of State, who transmits the same to Congress.	Revised Statutes	sec. 4396	No time specified.
A report of the present condition of the European fisheries with information as to any methods by which those of the United States can be modified or improved, as well as any suggestions he may deem pertinent in regard to increasing the exportation of fishery products from the United States to foreign countries.	Stats. at L., first session Forty-seventh Congress.	p. 388	No time specified.

47TH CONGRESS, 2d Session. } HOUSE OF REPRESENTATIVES. { MIS. DOC. No. 5.

JUDGMENTS OF COURT OF CLAIMS.

STATEMENT

OF ALL JUDGMENTS RENDERED BY

THE COURT OF CLAIMS

FOR THE YEAR ENDING DECEMBER 3, 1881.

Transmitted in pursuance of section 1057 of the Revised Statutes of the United States.

DECEMBER 4, 1882.—Referred to the Committee on Appropriations and ordered to be printed.

The Clerk of the Court of Claims, in pursuance of section 1057 of the Revised Statutes of the United States, transmits to Congress the following statement of all judgments rendered by said court for the year ending December 3, 1881, the amounts thereof, the parties in whose favor rendered, and a brief synopsis of the nature of the claims upon which said judgments were rendered.

Respectfully submitted.

ARCHIBALD HOPKINS,
Chief Clerk Court of Claims.

47TH CONGRESS, 2d Session. } HOUSE OF REPRESENTATIVES. { MIS. DOC. No. 7.

DOCUMENTS IN FOLDING ROOM OF THE HOUSE, AND INVENTORY OF PUBLIC PROPERTY IN CHARGE OF THE DOORKEEPER OF THE HOUSE OF REPRESENTATIVES.

LETTER

FROM

THE DOORKEEPER OF THE HOUSE OF REPRESENTATIVES,

TRANSMITTING

A list of all documents in the folding room December 4, 1882, together with an inventory of all property under his control August 19, 1882.

DECEMBER 6, 1882.—Referred to the Committee on Accounts and ordered to be printed.

HOUSE OF REPRESENTATIVES, DOORKEEPER'S OFFICE,
Washington, August 19, 1882.

SIR: I have the honor to submit herewith a list of the property of the House now under my control as Doorkeeper thereof, in the various committee rooms, &c., at this date.

I have the honor to be, very respectfully,

W. P. BROWNLOW,
Doorkeeper House Representatives.

HON. J. WARREN KEIFER,
Speaker House of Representatives.

MEMORIAL

OF THE

MANUFACTURING COMPANY OF NEW YORK.

[To accompany bill H. R. 6986.]

MBER 11, 1882.—Referred to the Committee on the Judiciary and ordered to be printed.

he House of Representatives of the Forty-seventh Congress:

our memorialist begs leave to submit the following statement of claims against the United States and to ask that such relief be ted in the premises as may seem to be just and equitable.

brief statement of the basis and amount of the claims preferred nst the government of the United States by Henry L. Vilas, re- er of the Tice Manufacturing Company, an insolvent corporation: rior to 1867 the internal-revenue tax on whisky and manufactured its was very inadequately collected, and great frauds were perpe- ed by distillers and others in the matter of their returns and in the ection of manufactured spirits.

o correct this evil, and collect the revenue, Congress, in March, 7, authorized the Secretary of the Treasury to adopt and prescribe ter for use in distilleries. (See act of March 2, 1867, section 15.)

[Act of Congress, March 2, 1867, Section 15.]

And the Secretary of the Treasury is hereby authorized to adopt, procure, and scribe for use such hydrometers, weighing and gauging instruments, meters, or r means for ascertaining the strength and quantity of spirits subject to tax, or the prevention and detection of frauds by distillers of spirits, and to prescribe h rules and regulations as he may deem necessary to insure a uniform and correct em of inspection, weighing, and gauging of spirits subject to tax throughout the ted States. And whenever the Secretary of the Treasury shall adopt and pre- be for use any meter, or meters, it shall be the duty of every owner, agent, or erintendent of a distillery to make application to the collector of his district for h meter, or meters, to be used in his distillery, and the same shall be furnished, attached to the distillery, at the expense of the distiller, whose duty it shall be furnish all the pipes, materials, labor, and facilities necessary to complete such achment, in accordance with the regulations of the Commissioner of Internal Reve- . who is hereby further authorized to order and require such changes of, or additions distilling apparatus, connecting-pipes, pumps, or cisterns, or any machinery con- ted with, or used in or on, the distillery premises," &c., "as he may deem neces- ."—(14 Stat. at Large, p. 481.)

On April 17, 1867, the Commissioner of Internal Revenue, by letter that date, and approved and signed by the Secretary of the Treas- on April 18, 1867, "adopted and prescribed" the meter invented l patented by Isaac P. Tice of New York. (See letter of April 17, 7, E. A. Rollins, Commissioner, to I. P. Tice, and Circular Special 54, April 19, 1867.)

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE,
Washington, April 17, 1867.

SIR: The Secretary of the Treasury having decided to adopt the meter invented by you, and to prescribe the same for use in distilleries, you are hereby directed to proceed with their construction, provided you are willing so to do upon the following conditions:

First. Each set of meters will be tested by an officer detailed for the purpose before being removed from the factory, and again after being finally connected with the distillery, and no meter will be accepted which is not found to work satisfactorily when subjected to these tests.

Second. Public notice will be immediately given of the adoption of this meter, and all distillers will be required to make application to the collector as required by the statute, and to furnish adequate security for payment for such meter in the event of its being supplied; and as soon as the number thus making application can be ascertained you shall be advised.

Third. You will proceed immediately with the construction of the first set of meters, which shall be of such dimensions as to be suitable for use in a distillery of the medium capacity, for which it is intended to provide, and as soon as the same shall be completed and inspected, which shall be attached to a distillery to be designated by this office, and which shall be as near the place of manufacture as can be conveniently selected; and if at the end of one month from the time it is attached to the distillery there shall not have appeared sufficient reason for the government to decline the further use of the meter or system, the meter will be accepted and the distiller will be required to pay for the same. Pending this trial you will be at liberty to proceed with the construction of other meters, provided it is clearly understood that in the event of the failure of the experiment above required with the first meter, you shall not be entitled to any pay or to any claim upon the government for any expenses which you may have incurred.

Fourth. The Secretary of the Treasury holds himself at liberty at any time to adopt any improvement or modification of the meter or system, or at any time to revoke the order adopting the meter and to discontinue their manufacture on behalf of the government. If the first meter shall prove successful when subjected to the tests above set forth, and the government shall subsequently revoke the adoption of the meter and order a discontinuance of proceedings, you will be paid such sum as may be determined upon in the manner hereinafter stated for all instruments which you may have completed or have in process of completion at the time of such revocation; provided, that at no time shall you have more than twenty sets in process of manufacture at any one time, unless direction shall be given hereafter for the manufacture of a larger number.

Fifth. Three competent persons shall be selected, one by the Secretary of the Treasury, one by the Commissioner of Internal Revenue, and one by yourself, who shall together examine into the actual cost of the construction of the meter, including interest on necessary outlay, and the cost of attaching the same to a distillery, and who shall also determine what amount shall be added to such cost, in order to furnish a proper remuneration for the invention and manufacture of the meter. When the price of the first meter is thus determined, it shall form the basis for a price of other meters of similar capacity until such time as a re-examination shall be made, which may be done at any time at the instance either of the government or of yourself. It is understood that in every case the expense of transportation, and of attaching and superintending the attachment of the meter, will be added to the price fixed upon as at the place of manufacture.

Sixth. If any distiller who has made application for a meter shall fail to put his distillery in operation immediately after the meter is attached, so that it will be impossible to test the meter in actual operation, or shall decline to have it affixed upon completion, he will be required to pay for the meter precisely as if it had been tested and found to work successfully. The meter will then be tested whenever the distillery commences operations, and if not found to work satisfactorily, the distiller will be compelled to suspend operations until the defect is cured at his expense.

Very respectfully,

E. A. ROLLINS,
Commissioner.

ISAAC P. TICE, Esq.,
New York City.

Approved.
APRIL 18, 1867.

H. McCULLOCH,
Secretary of Treasury.

In this letter the entire conditions to be observed by Tice were set forth, and provision was made to pay Tice for all meters he might have

. in case the order should be revoked, not exceeding 20 sets, ice as should be determined by the commissioners selected, one Secretary of the Treasury, one by the Commissioner of Internal e, and one by Tice.

[Special No. 54.]

Announcing the adoption of a meter for distilleries.

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, D. C., April 19, 1867.

is hereby given that the Secretary of the Treasury has adopted and prescribed distilleries a meter invented by Mr. Isaac P. Tice, of New York, and that ns for the use of such meter will be issued in a few days.
ollector will notify every distiller who applies to make payment of the special ie year ending May 1, 1868, that he will not be allowed to continue in opera- the fifteenth day of May, unless he shall, before that time, have made ap- for a meter, and accompanied his application with adequate security for the of the necessary expense, which will probably vary, according to the size of lery, from six hundred dollars to fifteen hundred dollars.

E. A. ROLLINS,
Commissioner.

r this license, Mr. Tice, having not sufficient means of his own, a stock company under the manufacturing corporation laws of te of New York, known as the "Tice Manufacturing Company." rtificate in corporating the Tice Manufacturing Company.)

Certificate of Incorporation of the Tice Manufacturing Company.

E NEW YORK,
y and County of New York:

nown that we, whose names are hereunto subscribed, are desirous of form- mpany in pursuance of the provisions of an act of the legislature of the State ork entitled "An act to authorize the formation of corporations for manu- , mining, mechanical or chemical purposes," passed February 17, 1848, and al acts amendatory thereof, do hereby associate ourselves together as a body e and in pursuance of the provisions aforesaid, certify as follows:

. The term of the existence of said company shall be fifty years.
The number of trustees who shall manage the concerns of said company for year shall be five, and their names are, Jesse B. Badeau, Erastus I. Mead, D. Tice, Erastus E. Bouton, Martin R. Mead.
The operations and business of said company are to be carried on in the city, nd State of New York.
ness whereof we have hereunto set our hands this eighteenth day of June, and eight hundred and sixty-six.

JESSE B. BADEAU. [L. S.]
ERASTUS I. MEAD. [L. S.]
LEONARD D. TICE. [L. S.]
ERASTUS E. BOUTON. [L. S.]
MARTIN R. MEAD. [L. S.]

E NEW YORK,
y and County of New York:

eighteenth day of June, in the year one thousand eight hundred and sixty-six, e personally came Jesse B. Badeau, Erastus I. Mead, Leonard D. Tice, Eras- outon, and Martin R. Mead, to me severally known to be the individuals in, and who executed the foregoing certificate and severally acknowledged executed the same.

JOHN BOUTON,
Notary Public, New York City.

une 20, 1866.

STATE OF NEW YORK,
City and County of New York, ss:

I, William A. Butler, clerk of the said city and county, and clerk of the supreme court of said State for said county, do certify that I have compared the preceding with the original certificate of incorporation on file in my office, and that the same is a correct transcript therefrom, and the whole of such original.

In witness whereof, I have hereunto subscribed my name, and affixed my official seal, this first day of December, 1882.

[SEAL.] WM. A. BUTLER, *Clerk.*

To this company, on May 22, 1867, Mr. Tice assigned his patents and his contracts with, and rights under the government license, and such as he might thereafter receive, to said company. (See agreement of May 22, 1867, Tice to Tice Manufacturing Company.)

Know all men by these presents that I, Isaac P. Tice, of the city of New York, for and in consideration of one dollar and other valuable considerations me thereunto moving, to me in hand paid by the Tice Manufacturing Company, the receipt whereof is hereby acknowledged, have given and granted, and by these presents do give and grant unto said Tice Manufacturing Company, their successors and assigns, the full, free, and exclusive liberty, license, power, and authority to make, use, and sell to others to be used or sold, and to attach to distilleries or otherwise to put up ready for use all spirit meters for which, or for inventions or improvements in which I have obtained Letters Patent of the United States, or may hereafter obtain Letters Patent of the United States, and in making and selling to others such meters, the right to use and have the benefit of any and all inventions and improvements now or hereafter made by me in the principle or design of spirit meters, or applicable to their construction, within and for the United States and the Territories thereof for and during the whole terms not yet expired of such patent or patents obtained or to be obtained, and any extension or extensions thereof, and to receive to their own use any and all profits and advantages which shall or can be made from such making, use, sale, and attaching or putting up of the same within said territory, and that without any let, suit, trouble or hindrance of me, the said Isaac P. Tice, my executors or administrators, or any other person or persons claiming to hold and use said invention, inventions, or improvements from, by, or under me or them by virtue of said letters patent or otherwise.

And I do hereby covenant for myself, my executors, administrators, and assigns, with the said Tice Manufacturing Company, their successors and assigns, that I, nor they, will neither make, use, or sell said meters, inventions, or improvements, or license or empower any other person or persons whatever to make, use, or sell the same within or for said territory covered by this grant during the existence of this grant or license.

And I do hereby further covenant and agree that in case any person or persons shall infringe the said letters patent within the said territory covered by this grant, the said Tice Manufacturing Company, their successors and assigns, may and shall have the right, for their own benefit, in the name of me, my executors, administrators, or assigns, or otherwise, to commence, sue, and prosecute any and all suits and actions against any person or persons who shall be guilty of any such infringement, and for this purpose I do hereby constitute the said Tice Manufacturing Company, their successors and assigns, my true and lawful attorney or attorneys, irrevocable, at the cost and to the use of the said company, their successors and assigns, so to commence and prosecute all such suits and actions aforesaid.

And I do hereby further covenant and agree for myself, my executors, administrators, and assigns to and with said company, their successors and assigns, that I will use my best endeavors to secure to them the full benefit within and for the territory covered by this grant of the business of making, supplying, selling, and attaching spirit meters under the regulations of the United States Government now made or that may hereafter be made, and that I will execute to them any further instrument or instruments that their counsel learned in the law may deem necessary for the purpose of securing and rendering available to them the rights, property, benefits, and advantages intended to be secured or conveyed by these presents.

In witness whereof I have hereunto set my hand and seal this twenty-second day of May, one thousand eight hundred and sixty-seven.

ISAAC P. TICE. [SEAL.]

Witness:
LUTHER WISE.

[10 cents internal-revenue stamp canceled.]

ITY, COUNTY & STATE OF NEW YORK, *ss*:

On this the nineteenth day of August, one thousand eight hundred and sixty-seven, fore me came Isaac P. Tice, known to me to be the individual described in and who xecuted the above agreement, and acknowledged that he executed the same.

JOHN BOUTON,
Notary Public.

TATE OF NEW YORK,
City and County of New York, s s.:

I, William C. Conner, clerk of the city and county of New York, and also clerk of ie supreme court for the said city and county, the same being a court of record, do reby certify that John Bouton, whose name is subscribed to the certificate of the roof or acknowledgement of the annexed instrument and thereon written, was, at ie time of taking such proof or acknowledgement, a notary public in and for the ity and County of New York, dwelling in the said city, commissioned and sworn, id duly authorized to take the same. And further, that I am well acquainted with ie handwriting of such notary, and verily believe that the signature to the said cerficate of proof or acknowledgement is genuine.

I further certify that said instrument is executed and acknowledged, according to ie law of the State of New York, ——— 186-.

In testimony whereof, I have hereunto set my hand, and affixed the seal of the said ourt and county, the 21 day of Aug., 1867.

[SEAL.] WM. C. CONNER,
Clerk.

U. S. PATENT OFFICE.

Received for record Aug. 27th, 1867, and recorded in Liber V 9, page 53 of Transfers Patents. In testimony whereof, I have caused the seal of the Patent Office to be reunto affixed.

[SEAL.] A. M. ST NE,
Actg. Com'r of Patents.

The Tice Manufacturing Company thus stepped in to fill and carry at Mr. Tice's agreement, and to furnish meters, and did so to a large xtent, charging therefor the prices fixed by the commissioners, named r referred to in the Commissioners' letter of April 17, 1867, *i. e.*, by Villiam T. Duvall, of Georgetown, D. C., William P. Trowbridge, of ew York, and S. J. Knowles, of Massachusetts. (See price-list fixed y this commission.)

[Series 4, No. 5.]

Regulations and instructions relative to Tice meters.

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE,
Washington, March 30, 1869.

I. AS TO PROCURING AND ATTACHING METERS.

On the 16th of September, 1868, the Commissioner of Internal Revenue adopted and rescribed for use in distilleries the spirit-meter invented by Mr. Isaac P. Tice, of ew York, being the same that was adopted and prescribed by the Hon. Secretary of he Treasury on the 19th of April, 1867, under section 15 of the act of March 2, 1867, nd subsequently recommended for use by the commission appointed under the joint esolution of Congress approved February 3, 1868.

Section 3 of the act of July 20, 1868, provides that whenever the Commissioner of nternal Revenue shall adopt and prescribe for use any meter, every owner, agent, or uperintendent of a distillery must furnish and attach, at his own expense, such meer for use at his distillery, and furnish all pipes, materials, labor, and facilities ecessary to complete such attachment in accordance with the regulations of the Commissioner of Internal Revenue, who is also authorized to order and require such hanges of, or additions to, the distilling apparatus, connecting pipes, pumps, or isterns, or any machinery connected with or used in or on the distillery premises, nd prescribe such fastenings, locks, and seals as he may deem necessary.

The system which has been adopted involves the use of two meters: the first will e attached to the end of the worm *and will register the* entire product of the still; the second will *be placed upon the doubler in such a* position as to register the *quantity of low wines carried back to the doubler for* redistillation. If the still is

provided with such attachments that no low wines are discharged, and the distiller is prepared to report as taxable the entire product of the still, the second meter will not be required.

These meters are constructed of six different sizes, the prices and capacities being as follows:

Sample meter A	$200
Capacity, four gallons per minute.	
Sample meter B	250
Capacity, eight gallons per minute.	
These are intended for attachment to small copper stills.	
Meter No. 2	600
Capacity, three gallons per minute.	
Meter No. 3	800
Capacity, six gallons per minute.	
Meter No. 4	1,000
Capacity, eighteen gallons per minute.	

The capacity above given must be understood to be the maximum capacity per minute of each of the meters. Meter No. 1 is not now made, having been found too small for practical use; a larger size, No. 5, having a capacity of about 30 gallons per minute, is now being constructed, the price and exact capacity of which will be announced hereafter.

The meter adopted being the invention of Mr. Tice, and secured to him by letters patent, can only be made by him or under his license; and in order to guard against an unreasonable price being demanded of those who are bound by law to purchase it, the prices of the several sizes, under an arrangement made between Mr. Tice and the government, were determined by a committee, consisting of Wm. T. Duvall, of Georgetown, D. C., Wm. P. Trowbridge, of New York, and S. J. Knowles, of Massachusetts, all practical and skillful machinists, two of whom were designated by the government and one by Mr. Tice, and the sums hereinbefore named are the prices agreed upon by them for the meters delivered at the place of manufacture, as stated in the report of that committee.

Under the provisions of section 3 of the act of July 20, 1868, distillers are required to procure and attach such meters, and in making their applications therefor they must state the capacity of the still in cubic feet, and its utmost possible producing capacity per minute—that is, the greatest possible quantity of spirits that will pass from the worm in that time. The producing capacity here referred to must not be confined to high wines merely, but must show the entire quantity of spirits, whether high or low wines, which can or will pass from the worm in the time specified. The attention of distillers is especially called to this point, as the discharge from the worm is not uniform, and if the meter is not of sufficient capacity to measure and pass the largest quantity which the worm will discharge it will be flooded, and its operation thereby stopped until the meter is opened and the valve again placed in working order.

The application must also show the cubic contents of the doubler, the outside diameter of the worm at its lower extremity, the height and diameter of the tank in which it is placed, and the material of which the still, doubler, and tank are constructed. The diameter of the main pipe leading from the still to the doubler, as well as of the charging and discharging and blow-off pipes, including the pipe used for discharging the doubler, must also be given. There is also required a description of the foundations upon which the still, doubler, and condenser are respectively supported. If the still is provided with collapse valves, their number and diameter must also be stated.

This application will be made on Form 7, as heretofore prescribed, which will be furnished by the collectors of the several districts. At the time of making the application the applicant will furnish to the collector of his district a certificate of deposit in a United States depository for the amount of the price of the meter or meters, payable to the order of Mr. Tice, and the collector will certify upon such application that he has received such certificate, and forward the application to this office for transmission to Mr. Tice. And the applicant should also state the means of access to the distillery, whether by railroad, steamboat, or canal, and with what points the distillery is connected by either of these modes of communication. If there is any person carrying on the trade of coppersmith in the immediate vicinity, the collector will state the fact; and if not, he will state the distance to the nearest point at which the services of such artisan can be procured. Upon the receipt of the bill of lading, the collector will at once transmit the certificate of deposit to Mr. Tice, at his address, 314 Third avenue, New York City.

The expenses of transportation and attachment of the meters, and of any changes required to be made in the distillery, are to be paid by the distiller.

The distillers must furnish all lumber and other materials necessary for the attachment of the meter, and such workmen and assistants as may be required. The attachment will be made in such manner as to interfere as little as possible with the operation of the distillery; but in case the distiller neglects promptly to provide the materials and assistance required, or in any way attempts to delay or defeat the attachment, it will be the duty of the collector of the district to close the distillery until the meters are attached.

Where meters are being attached to several neighboring distilleries at the same time, the expenses incurred by Mr. Tice and his employés will be apportioned among the several distilleries according to the time employed in each.

Distillers of apples, peaches, and grapes, exclusively, are exempted from the provisions of law requiring distillers to procure and attach meters.

Examination of the applications on file has shown that the meters applied for by distillers are in many cases of too small capacity for the distillery.

It is well known that, in steam distilleries especially, stoppages frequently occur for a short time when the accumulated force of the steam drives over the alcoholic vapor, which is rapidly condensed and discharged from the worm with great force, in some cases accompanied by mash; and the question for the distiller to determine under this regulation is, what is the greatest quantity which will be discharged from the worm under such circumstances? If the meter is not sufficient to pass the product of the worm under any and all circumstances, it will be flooded, the discharge valve closed, and its operations stopped, the spirit filling the meter and flowing back into the worm. The effect will of course be the same as if the distiller should effectually close the outlet of the worm while the still is in operation.

If the distiller applies for a meter of too small capacity, its attachment will be attended with the result above stated, unless prevented by shutting off the steam in time. The cost of the delay and other expenses attending such an accident may be much more than the difference in the cost of the meters, aside from the fact that the distiller in such case would be compelled to procure a larger meter to prevent a recurrence of such accidents.

By the third paragraph of circular No. 69, distillers were required to procure and attach two meters in all cases, except where the still is provided with such attachments that no low wines are discharged, and the distiller is prepared to report as taxable the entire product of his still. In most of the applications but one meter is called for, although there is in the distillery a separation of low and high wines. If the two meters are attached, the distiller will be charged with the amount shown by the meter attached to the worm, deducting therefrom the amount of low wines shown by the other meter to have been returned to the doubler.

Distillers should be at once required to revise their applications for meters, and where the meters are too small, or only one is applied for when two are required, the applications should be at once corrected. If not so done, it will be understood that the distillers propose to stand upon their applications as made, and that they will take the entire responsibility as to the meters ordered by them being of sufficient capacity; and, where only one meter is applied for, that they assent to being taxed for the low as well as the high wines. All revenue officers will govern themselves accordingly. The manufacturer of the meters will be instructed to forward the meters of the sizes applied for, and to attach the same; and if any trouble arises on this account, the distiller, having been furnished with the precise size he asked for, will have no reason to complain of any one but himself.

Meters will now be delivered as fast as the corrected applications are received, and the manufacturer will proceed with their attachment as fast as possible. Collectors should at once notify all distillers who have not made application to do so immediately, and will report to the Commissioner the names of such as refuse or neglect to make such application. Whenever a certificate of deposit is forwarded to Mr. Tice, the collector will report the fact to this office, giving the amount, and name of the distiller who made the deposit.

Where collectors deposit their collections in a depository bank, the meter deposits will be made in such bank; but where they are required to deposit collections with an assistant treasurer or designated depositary, the meter deposits will be made in some responsible bank.

A daily report must be made by the storekeeper in charge of each distillery to the assessor of the district, setting forth the indications shown by the meter at the hour of 12 midnight, or at the time when the distillery ceases to operate for the day. And each assistant assessor who has a distillery in his division will examine each meter whenever he visits the distillery, and report to his assessor the indications of the meter as above directed. And assessors, in making their monthly computation on form No. 89, will use the information thus given in determining the production. Where but one meter is attached, they will charge the distiller with the full product of the worm, making no deduction for low wines returned to the still or doubler.

In distilleries where the product *of the first distillation is* singlings only, no meter

will be required for the singling still; but each doubling still will require one or two meters, depending upon the fact whether there is a separation of the low wines.

It must be understood, however, that there must be close connections between the singling and doubling stills in all cases, so that no access can be had by the distiller to the low wines at any point during their passage from the singling to the doubling still.

Collectors will furnish distillers promptly with a copy of these instructions, and if no corrections of the applications are made, will at once notify this office.

Where distillers continue to run, after the issue of these instructions, without making prompt application for a meter, the names of such distillers will be at once reported to this office.

Under the provisions of the law the distiller is required to furnish and attach meters at his own expense, and also to furnish all pipes, materials, labor, and facilities necessary to complete such attachment. The first duty of a distiller is, of course, to procure a meter. The manufacturer is not required to furnish the meters on credit, and ought not to be expected to do so. When he ships a meter to a distiller, in accordance with the application, the manufacturer is entitled to the pay for it. The law does not require the manufacturer to attach it, but, on the contrary, requires the distiller to attach at his own expense. Wherever changes are required in a distillery to facilitate the attachment, such changes must be made by the distiller. In order that the attachment may be made correctly and the meters properly adjusted, the manufacturer or some of his own workmen are required to superintend the attachment. When a distiller is notified by the manufacturer or his agents what changes are necessary, and what materials or assistance are required, he should furnish them promptly. It will be the duty of collectors to see that they do so, and in case of any unreasonable delay to close the distilleries until the attachment is completed.

Wherever it is practicable, an officer detailed by the Commissioner will supervise the attachment, and when no such detail is made the assessor will detail one of his assistants for that purpose. When the attachment of a meter is completed, it must be promptly reported to this office by such officer or assistant assessor. The presence of such officer, however, will not be understood as relieving either the collector or assessor of the district from the responsibility properly belonging to them.

A strict compliance with these instructions will be required of all officers of internal revenue. Whenever the manufacturer or his agents commence the attachment of meters in any district, the officers of such district are required to afford them every aid in their power, in order that the work may be completed as soon as possible. If there is any delay on the part of the distiller, or if any obstacles are interposed by him, or the manufacturer or his workmen fail to do their duty, prompt report must be made to this office.

All must understand that the requirements of the law in relation to meters and their attachment will be rigidly enforced.

C. DELANO,
Commissioner.

The company proceeded to manufacture and deliver meters under regulations prescribed by the Treasury and for which payments were duly made until February 3, 1868, when Congress passed a joint resolution appointing a commission to examine and report on meters for distilled spirits, to consist of five persons, to be appointed by the Secretary of the Treasury, &c., and suspending the further manufacture of meters pending the examination and report of such commission. (See Public Resolution No. 8, of February 3, 1868.)

[Public Resolution No. 8.]

JOINT RESOLUTION to provide for a commission to examine and report on meters for distilled spirits.

Be it resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That a commission, to consist of five persons, to be appointed by the Secretary of the Treasury, is hereby created, whose duty it shall be, in connection with the existing commission of the Academy of Science, to carefully examine all meter and mechanical contrivances or inventions that may be presented to them, intended to measure, test, and ascertain the productiveness of grain or other articles prepared for distillation, or the actual quantity and strength of distilled spirits subject to tax produced therefrom, giving due notice of the times and places where such examinations will be conducted, and that the commission shall meet and proceed to the per-

formance of their duties, under the instructions of the Secretary of the Treasury, at the earliest practicable day, and shall report in detail to the said Secretary, to be communicated to Congress, the result of their examination, with such recommendation as they may deem expedient and most to the interest of the government on or before the first of March next.

SEC. 2. *And be it further resolved*, That pending the action of said commission, and until their report shall be made, and a meter shall be by law adopted, all work on the construction of meters under the direction of the Treasury Department be, and is hereby, suspended; and in the mean time n[o] further contract for meters shall be made by the Secretary of the Treasury under the fifteenth section of the act entitled "An act to amend existing laws relating to internal revenue, and for other purposes," approved March second, eighteen hundred and sixty-seven.

SEC. 3. *And be it further resolved*, That the "Secretary of the Treasury is hereby authorized and directed to pay out of any money in the Treasury not otherwise appropriated the expenses incident to the carrying out of this joint resolution, and also a reasonable compensation for the services of such of the said commissioners as are not now officers of the United States or members of the said academy.

Approved, February 3, 1868.

DEPARTMENT OF STATE,
Washington, February 3, 1868.

A true copy.

R. S. CHEW,
Chief Clerk.

OFFICE OF INTERNAL REVENUE, *February* 3, 1868.

Respectfully referred to Isaac Tice, esq., calling his attention to the direction in the 2nd sec. that work on meters be suspended for a specified time.

E. H. ROLLINS,
Commissioner.

This resolution stopped all work by the company, after it had invested large capital in plant, machinery, employés, &c., and left the works idle until September following, a period of eight months; the company having $100,000 capital invested, and $50,000 of outstanding floating indebtedness, on which the company was compelled to pay interest.

The commission appointed by the Secretary of the Treasury were O. M. Poe, William Gurley, John White, D. M. Greene, and O. L. Bartlett, with whom were also associated two from the National Academy of Science, to wit, Prof. Joseph Henry and Prof. J. E. Hilgard.

These commissioners examined all inventions of spirit meters that were presented to them.

The Tice Manufacturing Company, at its own expense, leased a distillery at Georgetown, D. C., employed the necessary hands to run it, and at this place, during the spring and summer of 1868, the greater part of the experiments and tests of the commissioners were made at the expense of the Tice Manufacturing Company, aggregating about $5,000.

The commission unanimously reported in favor of the Tice meter as the best and most perfect meter submitted to them. (See Report of commission, April 3, 1867.)

[House Ex. Doc. No. 214, 40th Congress, 2d session.]

Letter from the Secretary of the Treasury, transmitting report of the commission to examine meters, &c.

MARCH 17, 1868.—Referred to the Committee of Ways and Means and ordered to be printed.

TREASURY DEPARTMENT,
March 17, 1868.

SIR: Herewith I have the honor to hand you a report from Joseph Henry, J. E. Hilgard, O. M. Poe, Wm. Gurley, John White, D. M. Greene, and D. L. Bartlett, constituting the commission *appointed under the joint resolution* of Congress, approved

February 3, 1868, "to carefully examine all meters and mechanical contrivances or inventions that may be presented to them, intended to measure, test, and ascertain the productiveness of grain, or other articles prepared for distillation, &c., &c., and to report in detail to the Secretary, to be communicated to Congress, the result of their examination, with such recommendation as they may deem expedient and most to the interest of the government."

I have the honor to be your obedient servant,

HUGH McCULLOCH,
Secretary of the Treasury.

Hon. SCHUYLER COLFAX,
Speaker of the House of Representatives.

REPORT.

SIR: The joint commission of the Academy of Science and that appointed by your letter of February 10, under the authority of the joint resolution of Congress, dated February 3, 1868, having given due notice of the time and place of their meeting, in accordance with instructions, proceeded to examine all meters and mechanical contrivances or inventions presented to them intended to measure, test, and ascertain the productiveness of grain or other articles prepared for distillation, or the actual quantity of distilled spirits subject to tax, and having closed their labors, now present the following report:

The organization of the commission, owing, as we are informed, to the difficulty in obtaining proper persons to accept the appointment, was not completed until the 10th of February. The time which has elapsed between this date and the 1st of March, when the commission was directed by Congress to report, has been too short to adequately test by actual experiment the many inventions which have been presented, and of which the efficiency can only be settled by months of actual working in a distillery. The commission have, however, devoted all their thoughts and time to the subject, and have arrived at the conclusions given at the end of this report.

At the first meeting Prof. Henry was chosen chairman, Mr. Gurley secretary. Subsequently Mr. Clancy, of the Treasury Department, was detailed as stenographer, and has made a record of all the discussions and proceedings for future use. It was resolved, before beginning the investigation, that the joint commission of the National Academy and that appointed under the resolution of Congress should conduct their investigations without reference to the labors of the preceding commission, in order that the results arrived at might, as far as possible, be independent conclusions resting on the positive knowledge of each individual member.

For this purpose, all the models and descriptions of machines which had been examined by the previous commission, as well as those which have since been submitted, were placed before the joint commission, and each inventor was called upon to give an oral exposition of his devices in the presence of his competitors, the latter, as well as the members of commission, having the privilege of asking questions and pointing out defects. These discussions, of which, as we have said, a full record has been kept, elicited information of much importance to the commission in their subsequent deliberations.

The mechanical difficulties which present themselves in the construction of a meter which will perform all the duties required are exceedingly great, and, after the application of all possible ingenuity, can only be approximately overcome. Not only is the instrument required to register automatically the quantity of liquid composed of alcohol and water which passes from the worm of the still, but also to afford the data for determining the amount of proof spirits contained in the compound. The quantity of spirits contained in a mixture of alcohol and water can only be determined by the less specific gravity of the compound as compared with pure water; but this is not the same as the average specific gravity of the two liquids, since there is a shrinking in bulk when alcohol and water are mingled. A quart of alcohol and a quart of water when mixed form a compound of less volume than the sum of the two; besides this, the specific gravity of the compound is largely affected by heat as well as by the quantity of spirits which it contains. Hence, for ascertaining the quantity of alcohol in a given amount of the mixture, recourse must be had to tables constructed by actual experiment, in which known quantities of alcohol are mixed with water, and the specific gravity taken at different temperatures. From these tables the quantity of spirits in a given amount of the mixture is determined by inspection, when the specific gravity and the temperature at which it is taken are known. A perfect meter is therefore required to furnish automatically a registration of the data for determining the quantity, the specific gravity, and the temperature of the liquid which passes through it, or to give the quantity and reserve samples, consisting of

ecise aliquot parts of the whole, for subsequent test with the hydrometer. In ad-
ion to the foregoing, the construction of the meter must be such as not to render
liable to derangement by the ordinary operations or accidents of the distillery, or
be tampered with for the purpose of fraud.
'or fulfilling these complex conditions, a large number of inventions have been sub-
ted to the commission, and had the time been extended this number would have
n largely increased, as several have been offered since the close of the investiga-
, and letters relative to others have continued to be received up to the date of
report.
he variety and number of devices which have been presented for solving the prob-
we have described is truly astonishing. They strikingly illustrate the prevalence
his country of the inventive faculty, and the commission cannot but regret that
uch time and labor as have been bestowed on the majority of these inventions
ild result in disappointment. It is not the province of the commission to decide
n the relative ingenuity displayed in the various attempts to solve the problem of
rfect meter, but to choose from the various inventions presented to them those
ch, under all conditions, are thought to best answer the purpose of the government.
he larger number of inventions submitted to the commission were represented by
wings and small models. Though these were sufficient in most cases to give a
r idea of the character of the proposed invention, they were not in themselves
ugh to enable the commission to decide with certainty as to the propriety of recom-
ding them to the government for adoption; and it was therefore decided that no
ntion could be selected for adoption unless it was submitted to actual trial in a
king distillery. In accordance with this resolution, after having given a patient
attentive hearing to the expositions of the different inventors, the commission
ired to the Potomac distillery, and proceeded to test by actual performance the
its of the several machines.
or the better conduct of the experiments, the commission was divided into sub-
mittees, to each of which a special duty was assigned. To General Poe was given
charge of the direction of the employés of the distillery, the attachment of the
ers, and the order of the trials. To Lieutenant Greene and Mr. Bartlett, the meas-
ment in each experiment of the actual product of the still. To Professor Hilgard
Mr. White, the duty of ascertaining the amount of proof spirits produced in each
eriment as indicated by the hydrometer; and to General Poe and Mr. Gurley, the
ication of the meters. To Mr. White, on account of his practical acquaintance with
process of distillation, was intrusted the superintendence of the operations of the
tillery.
'he Potomac distillery, where the several meters were tested, is a common American
-wine establishment, of a capacity of about three hundred bushels per diem. It
s not, however, in a working condition, and the commission were obliged to order
airs and alterations previous to the experiments, which largely increased the ex-
se of the investigation. A sufficient quantity of grain was purchased, the neces-
y hands employed, and all the operations carried on as is usual in the case of the
duction of spirits in a distillery of the capacity and character of the one described.

GENERAL DESCRIPTION OF INVENTIONS SUBMITTED.

The spirit-meters submitted to the commission may, for convenience, be divided
to two general classes:
A. Those which register the quantity and reserve samples for inspection to determine
e strength.
B. Those which register both quantity and strength, or the data requisite for ascer-
ining them.
These two classes may be subdivided according to the several modes in which those
ds are accomplished, and the following table gives, under the heads of such divis-
s, the names of the parties who have submitted their inventions, which are after-
rds more particularly described:

CLASS A.

Division (a.)—Meters which register the *weight* and reserve *samples* for inspection: G. Allen, Cox & Murphy, J. P. Tice.
Division (b.)—Meters which register the *volume* and reserve *samples* for inspection: ckett & Scott, M. Fleishman, M. Augenstein, G. T. Palmer, J. G. Allen.

CLASS B.

Division (c.)—Meters which register *volume* and *proof*: Siemens & Halske, J. P. Tice, S. Hutchinson, N. B. Clark, R. L. Howell, C. *Moegling.*

Division (d.)—Meters which register *weight* and *proof:* L. Brauer & Co., J. P. Tice, R. Creuzbaur.

Division (e.)—Meters which register *volume* and *weight:* R. W. Young, Horton & Milligan, J. P. Tice.

GENERAL DESCRIPTION OF THE SPIRIT-METERS.

Division (a)—Weighing and sampling meters.

Dr. J. G. Allen presented a description and drawing (Exhibit M) and a working model of an apparatus designed to register the weight of the liquor passing from the condenser by means of a pair of V-shaped cans on a rocking frame, and to deposit from each can a small portion in a glass tube containing an alcoholometer. Of such sample-tubes a series are arranged in a circle around the weighing can, each being filled in succession by means of a tubular arm attached to a slowly revolving central shaft moved by the tipping of the cans, and their number is sufficient to receive the samples of one hundred days' run of the still. While the last tube is filling, the first one is emptied by the lifting of a valve at the bottom by means of an arm attached to the central shaft, and so on, each in succession is emptied while the preceding one is being filled. The working parts of the apparatus are to be encased in an iron safe, while the glass tubes are exposed to view in order that the samples and their strength may be examined at any time during the period for which they are reserved, thus permitting all checks on their inspection that might be deemed requisite. Tampering with the samples by means of heating is sought to be guarded against by exterior glass casings surrounding the sample tubes, and by placing on top of each sample tube a valve, which is open only during the time that samples are delivered to the same. Dr. Allen stated that a full-sized meter of the largest class would occupy a space five feet in diameter and four feet high.

After a full discussion this apparatus was deemed worthy of a further consideration, and the model was set apart for trial at a distillery.

Messrs Cox & Murphy (Exhibit AA) presented a full-sized machine designed to register the weight of the spirits, and to reserve two samples for independent inspection by different officials. In this machine the liquor first enters into a reservoir, from which it is poured into the weighing buckets by means of a syphon, a valve in which is opened, when a float is raised to the top of the syphon and closed when the float touches the bottom of the chamber. This valve arrangement is intended to provide against blowing steam or impurities into the meter. The weighing is effected by means of four buckets arranged in a circle about an axis. The front bucket fills until its weight trips an escapement counterbalanced by a fixed weight, so adjusted as to make the bucket move with a load of ten pounds. When the movement has commenced, the valve in the syphon is closed and the supply cut off until the next bucket has come into place. As each bucket is emptied a small chamber in front is filled, from which the samples flow in a divided stream into two closed receivers. The mode of tripping the counterpoise by the escapement the commission consider inferior, in mechanical construction, to that of some other machines of similar character exhibited.

The commission decided that this instrument should be admitted to a practical test at a distillery; but as no sample-receivers or detailed plan for construction and safe-keeping of the same was submitted, this meter could only be tried as to the performance of its mechanical parts.

In connection with this meter was submitted a detailed scheme for the inspection of the two samples and the meter by three different officers, designed to prevent collusion in making false returns.

Mr. J. P. Tice presented a machine of this class, consisting mainly of a tilting weighing-can on a balance-beam, the same as used in his meter described below under division (*e*), and a sample-taker operated by the weighing-can, and so arranged that the sample-can is at all times completely closed, thus avoiding the danger of having the samples lowered by evaporation or condensation of steam. He also submitted drawings of a receiver for samples. As the machine was not provided with this portion of the apparatus, and as the operation of the weighing-can was sufficiently tested in the meter of division (*e*), no trials were made with this instrument.

Division (b)—Meters which register volume, and reserve samples for inspection.

Messrs. Pickett and Scott presented a printed description (Exhibit C), and full sized apparatus, as well as a model. This meter consists essentially of receivers o known cubic contents, which are filled and emptied by means of four-way cock moved by hand, and so arranged that one receiver is filling while the other is dis *charging*. Suitable registering apparatus attached to the cock records the numbe

easures, the counter moving forward by either motion of the handles. With movement of the cock a sample is also taken and delivered into a closed re- r. The inventors connect with the meter a steam-escape and guard-valve de- d to allow the required free passage of vapor and steam, but preventing the action of spirit.

vill be observed that this meter is not automatic, the discharge of the receivers effected by the four-way cock turned by hand. The merits of this invention fully discussed, and it was set apart for trial.

Stumpf spirit-meter, which for several years was used by the Government of ia, was presented by Mr. M. Fleishman, who also claimed to have made some vements in it, which were not, however, specified. In connection with the Mr. Fleishman submitted an automatic separator of high and low wines, which losed within the safe of the meter, and is designed to secure the discharge of all irits above a certain strength through the meter, and to prevent the distiller lischarging high-wines through the low-wines pipe, with the view of abstract- em on their passage to the doubler. This separating apparatus, although based rrect principles, is defective in mechanical design, and does not appear to the ission to have sufficient merit to be recommended for adoption.

Austrian meter itself consists of a wheel with four compartments, which are sively filled through a central drum; when the lowest compartment is just full irit partly fills the drum and overflows into the compartment at the side, when eponderance causes the wheel to turn, emptying the lower chamber through a w slit at the end which stood uppermost. Dippers at the rear side of the dip up from the basin into which the spirit is emptied small quantities as sam- which, as the dippers turn over, are dropped into a channel communicating he sample chamber. As this sample chamber has communication with the air, s not afford sufficient protection against tampering with its contents; moreover, is no provision against flooding the meter by closing its outlet, when the spirits an out through the vent at the back of the case, and the sample chamber will ed. Notwithstanding these obvious defects, the machine was set apart for trial, er to test the performance of the wheel, which is of a very promising character.

meter presented by M. Augenstein (described in Exhibit G) is very similar to ie just described, consisting of a well-known water-meter wheel in three com- ents, and an arrangement for dipping up samples by means of small brushes, neral arrangement of parts being alike in the two machines. The inferiority s one appeared so obvious that the commission did not deem it worth while to t a trial.

G. T. Palmer's meter, of which description with drawings (Exhibit O) were sub- l, but no model or machine, is designed on substantially the same principles as ustrian meter, with some variations in detail. It reserves two separate samples ich two independent inspections are provided for, and also provides for the au- ic separation of high and low wines, the latter being registered on separate ers by a change of connections.

J. G. Allen submitted a description and drawing (Exhibit M) of a meter belong- this division, which is similar to that described above under division (*a*) in the of preserving samples and exposing them to view in a series of glass tubes, but ich a large measuring receiver takes the place of the weighing-cans. This ap- us is claimed by the inventor to be particularly adapted to the measurement of w-wines which are to be returned to the doubler for redistillation. It is about et high, four feet long, and two feet wide, the greater part of which requires to ased in a safe so as to prevent interference with the mechanism. This is ex- e of the receiver, which likewise requires to be secured.

Division (c)—Meters which register volume and proof.

spirit-meter of Siemens & Halske, of Berlin, Prussia, registers the actual or ig gallons by means of a measuring-wheel, with three interior compartments, same general plan as the Austrian wheel, and records the corresponding gal- f alcohol by means of an alcoholometric float immersed in a chamber or well gh which all the spirits coming from the worm must pass. The float is counter- ed by a spring, and rises or descends according to the density of the spirits, ing correspondingly the position of an arm or pointer against which a properly l template is moved at each revolution of the wheel; the arc, through which nplate moves before it comes in contact with the pointer, measuring and record- ie proportion of alcohol contained in the liquor; the effect of temperature on nsity of the spirits sought to be compensated by the float being made expansi- means of corrugations, and filled with spirits of the average density of those are expected to be run through the meter. This instrument is therefore more lly adapted to measuring high-wines, the expansibility of which does not vary

much for different strengths, than for the whole run of an American still which produces a large proportion of low-wines.

As drawings and description only of this machine (Exhibit A) were submitted, no actual tests could be made; but, in the opinion of the commission, it possesses merit.

Mr. J. P. Tice exhibited drawings and model of a meter of this kind, described in his letters-patent No. 63,335. He did not offer this machine for competition, but rather as illustrative of the course of his inventions, and for the purpose of explaining the difficulties pertaining to the employment of a hydrometer in making a registry of proof.

Mr. E. S. Hutchinson presented a spirit-meter designed to make a continuous registry of the proof gallons (Exhibit Q). The *volume* is measured in a wheel or cylinder divided into two equal separate compartments, the upper one of which receives the liquor from the worm; just as it fills completely a preponderance on one side takes place in a manner, readily seen from the drawing, by which the cylinder revolves and brings the empty half uppermost, while the full compartment discharges itself. This cylinder is suspended on the short arm of a bent lever, and as it fills descends and raises a weight attached to the other arm to different elevations, according to the weights of the spirits contained. A long arm or pointer assumes a corresponding position, and as the measuring cylinder revolves, before any portion of the contents has been emptied, a template or curved scale of proper form is moved against the pointer, and registers on a dial a number of proof gallons corresponding to its position. A compensation for temperature, correct for each degree of strength of the spirits, is provided for in a manner not readily understood from verbal description, by a change in the support against which the pointer is pressed, effected through the expansion or contraction of a system of copper rods in the bottom of the meter. This meter is worthy of special note, as it aims at a complete solution of the complex problem of a perfect spirit-meter, which object is not attained, however, without a sacrifice of simplicity. It was set apart for actual test at a distillery.

The meter of Mr. N. B. Clark (Exhibit S) is designed to measure in a single vessel an amount of spirit equivalent to a given volume at a standard temperature, and by its weight to indicate at the same time the proportion of proof-spirits contained. The variations in quantity due to temperature are compensated by means of a metallic thermometer regulating the position of a counterpoise and by a peculiar form given to the top of the vessel. The weight of the contents of the vessel at each filling raises a fixed weight attached to the other arm of a bent lever to a position of equipoise, and in doing so draws back a light pallet or arm, by means of a suitably shaped guiding frame, to such a position that, in being pushed forward by the ascent of the vessel after emptying, it moves a registering wheel through an arc corresponding to the percentage of proof.

This meter, like Mr. Hutchinson's, aims at a complete solution of the problem, and shows much originality of conception. There are, however, serious objections to its mechanical design, calculated to impair its accuracy and durability. It was set apart for trial, although not claiming to be a properly constructed machine, but rather a working model.

Mr. R. L. Howell submitted a design for a meter (Exhibit D) which would measure the volume in a receiver and register the proof-gallons by means of a large hydrometer, both volume and proof being accurately compensated for temperature. The registrations in this apparatus are not to be effected by the liquid itself, which generally involves some sacrifice of accuracy, but by means of electro-magnets brought into action by certain circuits being closed when the spirit had risen to a definite height in the receivers. This method might afford great precision of measure when in perfect working order, but the commission have thought it inadvisable to recommend the employment of the extraneous agency of electricity, and have therefore laid this plan aside.

Mr. Howell also submitted a plan for checking the reports of inspectors by photographing the indications of the meters, which was deemed impracticable in general application.

Mr. C. Moegling presented a description and drawing of a meter for measuring volume and registering proof (Exhibit H), which was deemed too crude in its mechanical devices to merit further consideration.

Division (d)—Meters which register weight and proof.

The meter of L. Brauer & Co. (Exhibit V) registers the weight of the spirits by means of what they call a *rotary endless scale*, which is a kind of overshot wheel turned by the weight of the spirits, the motion being regulated by a counterbalance of fluid contained within the wheel, which is raised to a certain height by a series of interior paddles, and also by means of sand contained in closed cylinders arranged about the axle of the wheel. Since for each turn of the wheel very nearly the same

t of resistance has to be overcome in the interior chambers, whether it move
or rapidly, it follows that every turn of the wheel will be produced by the
'eight in the outside buckets. This is, of course, subject to some variation
ıe varying impact of the liquor, as the condensation takes place more or less
'; the fall of the liquor is, however, broken to some extent in a receiving
:r above the wheel. The wheel is so adjusted as to indicate ten pounds on the
ır each revolution.
proof registry is effected by means of a hydrometric balance, carrying on a
l arm a properly shaped scale, the position of which determines the descent,
revolution of the wheel, of a pointer or finger, with which the counters are
ted by ratchet-work. In the present machine the proof-register adds up all
grees of strength above 80 per cent. of proof-spirits, and by dividing the
y the number of revolutions the average proof above 80 per cent. is obtained.
drometer-well is supplied at the bottom by a small pipe, and delivers at the
overflowing, so as to be always full to a certain height. This arrangement
› essential defects: First, the supply to the hydrometer-well is nearly uniform,
he quantity running through the meter in the same time may vary very much;
he registrations of the hydrometer will not correspond properly to the varying
h of the spirits; and secondly, the same error is occasioned in a still greater
by the fact that the heavier spirit will displace the lighter much more readily
ıe former will displace the latter.
compensation for temperature is sought to be effected by making a counter-
› the hydrometer in the form of a bulb or plunger of equal bulk, and immersing
a liquid of equal expansibility with the average spirits; the vessel containing
g constantly surrounded by the liquor flowing from the still and imparting to
ıame temperature.
machine was set apart for trial at a distillery.
J. P. Tice also presented a meter designed to weigh the quantity of spirits and to
r the proportion of alcohol contained in the same, compensated for temperature
ing to the varying strength. A full description, contained in his letters-patent
611, and the actual parts of a machine, but not mounted for work, were sub-
. This meter was designed to meet the requirements for a perfectly accurate
y of the equivalent of proof-spirits discharged; but on account of its necessary
ıxity, it would not, in the opinion of the inventor, prove to be as enduring in
ned use as his simpler machine, and he did not therefore submit it for trial.
R. Creuzbaur submitted description and drawings (Exhibit N), and subse-
y, but too late for trial, a model of a meter, giving the weight by means of
g cans emptying by valves, and the proof by means of a hydrometer compen-
or temperature, and marking the strength on a roll of paper by means of a
The mechanical details of this machine did not commend themselves to the
ssion.

Division (e)—Meters which register the volume and weight.

L. W. Young's meter (Exhibit R) consists of a measuring apparatus for volume,
ed in his letters-patent No. 68,025, and of a weighing apparatus, of which a
ıg model was submitted. The former, operating by means of floats and valves,
ot favorably thought of by the commission. The latter was admitted to an
ative test. It consists of two buckets placed at opposite ends of the diameter
heel, one of which, filling, trips a counterbalanced escapement when a certain
; has been reached, and as it moves forward to be emptied the supply-pipe is
until the other bucket has come round. It is very similar in action to the
ng apparatus of Cox & Murphy, and, like the latter, is inferior in mechanical
to other weighing cans brought before the commission. There are proper
provided for closing the supply-pipe when an attempt is made to flood the
either by too copious a stream, or by stopping the outlet. No attempt is made
ect for temperature or to obtain a record of the same.
rs. Horton & Milligan's spirit-meter (Exhibit I) aims to measure the volume
ıns of a cylinder and piston, and to weigh in a small weighing-can a definite
n of the whole volume delivered to the weighing apparatus at every alternate
of the piston. The weighing can tilts and empties when a definite weight of
has accumulated in it, and is brought back to its former position by the next
of the piston, that portion of the last measured quantity which was not re-
to make up the weight being meantime retained in an intermediate delivery
A compensation for temperature is sought to be effected by means of the dis-
ıent of mercury in thermometric tubes, attached to bulbs, placed within the
ng-can. This machine was set apart for trial at a distillery.
meter submitted by Mr. J. P. Tice, belonging to this division, is one of those
actured by him under contract with the Treasury Department. The measuring
ıear the top of the meter and receives the spirit from the condenser through an
rovided with a conical stop-valve, *operated by a float* which checks the inflow

when the supply is greater than the meter can well dispose of, as may sometim happen even when the capacity of the meter far exceeds the ordinary run of the stil The measuring can delivers its contents into a basin, from which they flow into t weighing can below through an aperture provided with a peculiar ring-formed val or hood, which is shut down just before the full weight has been reached in t weighing can, and permits the final completion of the weight to be made by a sm and regular stream, however great the supply.

The weighing is done by a pair of V-shaped cans, which are alternately filled a emptied, one to the right, the other to the left. They are pivoted at one end o balance-beam and counterbalanced at the other in such a way that the beam beg to move when a certain weight, somewhat less than the required weight, is contain in the can. By this partial movement the check-valve before mentioned is shut dow the stream made small and uniform, and an additional counterpoise is taken This makes up the weight at which the can is required to descend a little further, as to escape from a detent against which it has hitherto rested, and by revolvi about its pivots to empty and bring the other can into position for receiving the flo In emptying, each can revolves through a right angle and, during this moti altogether after the operation of weighing has been completed, it works a set counters, the unit of which in this instrument represents ten pounds.

The measuring cans are constructed on the same plan as the weighing cans, have a partition near the top with a narrow inlet at the upper end. The can d not descend, and, escaping from the stop, empty itself until the liquid, whether wa or spirit, stands above the partition, when that which is below is emptied out throu an opening at the side, while the surplus above is received into a cap and retai until the other can tilts, when it flows back and forms part of the next measu The quantity of this surplus does not, therefore, in the least affect the measures; merely serves as a means to produce the movement of depression, which allows emptying of the can. Each measuring can empties one gallon in the meter un consideration, the size of which is designated as No. 3. It can readily work at rate of ten gallons per minute. The dimensions of the safe in which it is contai are 26 × 31 inches on the base, and 36 inches in height. The smallest size, or No. measures one quart and weighs two pounds; No. 2 measures two quarts and wei five pounds; and No. 4, destined for the largest class of distilleries, measures th gallons and weighs thirty pounds at each movement of the cans.

We have here the means of registering with considerable accuracy the weight the spirit, and also the volume at the time of its discharge; but as that varies so what with the temperature, a compensation for the effect of heat is requisite for p fect accuracy, or else a record of the temperature, in order that a due allowance m be made. Mr. Tice has presented to the commission three different devices desig to effect this: one by emptying with each measuring can an additional small quant of spirit, equivalent to the required correction, duly proportioned to the temperat and strength of the spirit; another taking an account, by means of thermomet register, of the volume to be subtracted from the showing of the counters, averag upon the expansibility of spirit of mean strength; and the third by adding a sm weight, variable with the temperature, to that of the weighing cans, so as to ma tain the correct ratio between the weight and volume, from which the proof inferred. In the latter form of compensation we should obtain the true proof, the volume would remain uncorrected. These devices are complex in proportion the completeness with which they attempt to attain the required ends, the la having the least, the first the greatest, number of parts. Mr. Tice himself does advocate the employment of either corrector, but, in order to preserve the utm simplicity in his machine, prefers that an allowance for the varying effect of tem ature, according to the seasons, be made by regulation of the department.

The meter is provided with a valve which closes up the outlet permanently, w the liquid rises to a certain height in the bottom-pan. This can only take p when the outlet is closed, while the still is running, and the attachment is desi to prevent the flooding of the meter with fraudulent intent. The same valve serves to close up the meter when an attempt is made to falsify its indications b ting it out of level. In this case a falling weight will cause the valve to be cl

The meter is encased in a cast-iron safe, coated with a black varnish, insolu spirits. It is securely fastened together with interior bolts and flanges, and the fastening is secured with a government lock.

A similar safe, enameled with porcelain, was also submitted by Mr. Tice, as af ing much greater security against drilling into the safe, since the enamel cann successfully repaired so as to cover up the hole, and detection would be certa the most casual inspection.

In reference to this whole division of measuring and weighing meters, it shou observed that in deriving the proof from a comparison of the weight with the st the separate measures, the result is slightly in error, from the fact that there *shrinkage,* or contraction of volume, when spirits of different strengths are mixed.

easily shown, however, that in the ordinary run of a still the error from this ill never reach one per cent., which is always necessarily against the distiller, n due allowance is made by the method of deriving the value of the indica- r the *rate* of the meter, from its actual performance when attached.

SAFES.

cluding the description of the spirit-meters presented to the commission, the of a *safe* for the same claims attention. Whatever meter be used, it must be l in a safe which is so far proof against tampering that any attempt to break will leave marks of violence readily recognized. The enameled surface of the sented by Mr. Tice appears to meet this demand in an effective way. It is of portance to determine how the last fastening should be secured, since, if it be whether with or without a key, or one that cannot be picked, it offers an only to the extent of the cost of a duplicate. The commission are of opinion plate which is last put on should be caught and held by interior spring- , so as to require to be broken in order to open the meter again; the manufact- ing required to guarantee the working of the meter for a certain time. It have the words "United States Internal Revenue," and a number, cast on it, nameled could not be readily imitated, as there are but few establishments uch work can be done, and those of such a character as not to be likely to at fraud. There is always a sure mode of ascertaining whether the meter is order, by simply comparing its indications with the actual quantity and h of liquor discharged from it during one or more charges from the still. This uld be made whenever a distillery is inspected, with a view of ascertaining r any changes have been made in the apparatus, and the distiller can at all sk for it when he thinks that the meter is overcharging him.

is connection the commission will mention two locks that have been submitted . One, by Mr. S. Bickerstaff, is a *combination lock* with four disks, presenting y chances against discovering any one combination that it may be deemed ticable to pick it. This is intended for general use. The other, by Mr. A. W. , designed to be used for securing the meter-safe, has no key, and is to be when the safe requires to be opened. The commission can give no estimate value of these locks compared with other devices of the same class, as none resented for competition.

OTHER DEVICES AND SAFEGUARDS.

ddition to meters proper, the following devices for receivers were submitted s in securing the assessment of the tax:

M. R. Wise, in connection with a plan for a high-wines distillery, describes he terms a meter, which is simply a receiver provided with metallic casing and shed with an outer pipe of glass connecting with the receiver and with a con- d hydrometer, permitting inspection of the proof as well as indicating quantity he height of the fluid.

r. J. J. Kish submitted a model of a receiver having an outer glass tube with a , which, by means of a cord and counterpoise, records on a register the height to ch the spirit has risen in the tank or receiver.

Ir. William M. Blume offered a model of a receiver having attached, at different rations, glass cups to be filled successively, thus preserving a record which would be destroyed by drawing off the contents of the receiver.

n the opinion of the commission, none of these devices for preventing fraud possess fficient merit to warrant their recommendation for adoption.

Mr. A. H. Emery submitted a plan for the collection of the tax and a description of meter in connection with the same (Exhibit P). He assumes the product of the ll to be run into sealed receivers, as at present required by law, and provides for automatic registration of the quantity and a reservation of samples, when the quor is drawn off into barrels and branded, as a check upon the inspector's return. he commission deem Mr. Emery's elaboration of administrative details for collecting e tax worthy of consideration by those charged with that branch of the subject. heir own inquiries being confined to the best mode of *assessing* the tax, they have not t it their province to express opinions upon some propositions incidentally brought efore them relating to the subject of identifying tax-paid whiskey in its passage rough the channels of trade; but they consider it of great importance to hinder the le of illicit spirits by checks of this nature. Among these is the plan of Mr. George t. George (Exhibit J), which contemplates the obligatory use of branded barrel heads a certain description, to be issued by the government; and the revenue coupon ok (Exhibit T), submitted by Mr. J. J. Kish, which is to serve to keep track of ch barrel of whisky in all its transitions from the distiller to the consumer. Both ese plans appear to the commission *to be deserving of careful* consideration.

Meters for measuring simply the quantity of liquid were brought forward Robjohn and by James Cochrane, but as they professed to fulfil only a small the requirements of a spirit-meter, they were not further considered.

Some novel forms of hydrometers were also brought to the notice of the comm but their limited time did not permit them to consider matters of such mere de

Among the additional safeguards submitted to the commission for their cor tion was a *detector*, invented by Pickett and Scott, to prevent the removal of th from the worm-tank without the knowledge of an official. After examina this instrument, the commission arrived at the conclusion that it would undul fere with the free operations of the distiller, as in many distilleries the wate worm-tub is required to be drawn off as a supply for other purposes, and th not in itself a sufficient protection.

HIGH AND LOW WINE DISTILLERIES.

The fact that in most American distilleries only a portion of the liquor cor in the worm is of merchantable strength, and that the larger portion of the l of each charge is returned to the *doubler* for redistillation, renders necessary plication in the system of measuring the taxable spirits which is avoided in of those stills that furnish only *high-wines* or spirits above proof. In such a ratus, generally known as the *German still*, a great portion of the aqueous is condensed in a series of coolers between the doubler and worm-tank, ar back into the doubler, while the spirits condensed in the worm average fron to forty per cent. over proof. It is obvious that for such a high-wine still a meter at the tail of the worm is all that is required to measure the product of tl In the common still, however, where the same spirit passes repeatedly thro condenser, it is necessary to make a discrimination between that portion whic livered in a merchantable condition and that which is returned to the distill paratus. To this end means must be provided by which the distiller, without access to the spirits or being able to interfere with the operation of the meter, all times observe the strength of the spirits as they run from the condenser enabled to change the flow from the receiver for high-wines to one for low-win under these circumstances, the latter were run into a sealed tank from whi can only be removed by being pumped into the doubler, is would appear suffi register the high-wines only. But since it would be necessary to guard th pump, and all connecting pipes so as effectually to prevent the abstraction of on their way back to the doubler, it appears advisable, for greater security, to n the value of low-wines also as they run from the worm, and let that stand as a against the distiller, to which a similar measure of what is returned to the will constitute a set-off. There would thus be required, in addition to a mete outlet of the condenser, which should register separately the high and low another meter at the doubler for the spirits sent back for distillation. The mediate receiver for low-wines should be of small capacity, only sufficient to h product of one charge. This is the system proposed by Mr. Tice, which also en the necessary safeguards for preventing the abstraction of the spirits from the d These cannot, perhaps, be made absolutely secure, but they will greatly incre probability of detecting fraudulent practices, the possible gain by which is too to induce men to take the risk.

If nothing but high-wines were delivered at the outlet of the condenser, tl culty of assessing the whole tax due upon the product of the still would be gre duced. The spirit is in the form of vapor from the time it leaves the still un densed in the worm or other apparatus for the purpose, and cannot be abs without the use of means which would render detection almost certain. If the spirits registered upon the meter were returned for redistillation, no oppo to abstract either the high or the low wines, and account for them as returne doubler, would exist. The commission are, therefore, strongly in favor of so s legislation on this subject as to induce distillers to make the requisite changes i apparatus to produce that result. It can readily be done at small cost—le haps than that of the additional meters and safeguards necessary in the oth tem—by introducing in an ordinary American still, between the doubler and tank, an additional cooler or condenser, in which the ascending vapor of wate is mixed with that of spirit is, in great part, condensed, and drips back i doubler, or into a reservoir, from which it can afterwards be let into the d while the more volatile vapor of alcohol is only condensed in the worm an down to the meter.

Of this description is the "low wine attachment," submitted by Mr. E. S. l inson, (Exhibit Q), which the commission recommend as an efficient and inex mode of changing the ordinary distillery into one making only high wines.

They do not wish to be understood, however, that they advise making the *this particular device* obligatory by law, since it is doubtless possible to att

same end in other modes. But since it is clearly practicable to make the desired change, they do recommend *that the tax be assessed upon all the spirits that come from the condenser, whether high or low wines, on the basis of the proof spirits contained therein, without making any allowance for low wines turned back for redistillation.*

In this connection it is proper to mention a form of distillery submitted by Mr. Henry H. Kirk (Exhibit B), designed for producing at one operation a finished whiskey of good quality, by means of what is called a treble still, the low wines being continually thrown back, and the product purified by means of charcoal. While the commission believe that the product of such a still may be superior in quality to that produced by the ordinary method of distillation, they do not consider that it offers sufficient protection against fraud to entitle it on that ground to be recommended for general adoption.

The papers referred to as exhibits in the foregoing descriptions are herewith transmitted for file in the Treasury Department, excepting those which are letters patent, of which copies are on file in the United States Patent Office.

GENERAL ACCOUNT OF TESTS OF SPIRIT METERS AT THE POTOMAC DISTILLERY.

Several of the meters presented to the commission were working models, though their capacity differed materially, some being sufficiently large to admit of their being used upon a distillery capable of manufacturing a considerable quantity of spirit per day, while others could only dispose of liquids poured gently and slowly through them. The object of the tests instituted was to determine the working of the larger machines, when subjected to the conditions of actual practice, during such periods of time as were at the disposal of the commission, and to judge what the operation of the others would be if constructed upon a sufficiently large scale to take and dispose of the run of the distillery.

With the foregoing objects in view, those meters which were claimed by their representatives to be of sufficient capacity to dispose of the run of the distillery were connected directly with the tail of the worm, where the experiments were conducted. Those which were of smaller capacity were placed upon suitable supports, and the liquid poured through them as rapidly as they could be made to receive it.

Manner of conducting the tests.

All the meters were subjected to such tests as could be applied calculated to show their *defects*. Such as measured and weighed the liquid, and recorded accordingly, were supposed to have their weak point in the power of the distiller to so vary the temperature of the liquid as to vitiate the result—the volume being considerably changed by the changes of temperature, while the weight remains the same. They were, therefore, required to measure liquid the temperature of which was varied as much as possible under the circumstances. Those which weigh and record the proof of the liquid passing through them were supposed to be liable to being tampered with through the medium of their hydrometric arrangement; therefore the spirits passed through them were varied in strength as much as possible.

The same principles were applied in all cases where practicable; and, when the length of time the meters were under test is taken into consideration, these tests were deemed very severe.

The *order of procedure* was as follows, viz:

The tail of the worm was prolonged to a convenient room, where, by their representatives, the meters were adjusted for trial, either to this prolongation of the tail of the worm, or to some other arrangement, depending upon the capacity of the meter. The product of four charges of the still was then passed through each meter; its mechanical working, its record, &c., being noted. The product of each charge was weighed upon a Fairbanks's platform-scale, standing close by the meter, the temperature and proof of the spirit being at the same time observed, and was afterwards accurately measured.

TESTS OF PARTICULAR METERS.

1.—*Tice's meter, represented by J. P. Tice.*

Tice's meter, of the size known as No. 3, was first in adjustment ready for trial, and was, therefore, the first tested. It is a machine intended to measure and weigh the liquid passing through it. It was attached, in the test, to the prolongation of the

tail of the worm, and received the entire run of the still. The product of five charges was passed through it, with the following result, viz:

Charges.	Volume in gallons.		Weight in pounds.	
	By meter.	By measure.	By meter.	By scales.
First	18	17	60	127.5
Second	23	22⅛	170	171
Third	30	29⅛	220	220.5
Fourth	29	28⅛	210	209.5
Fifth	26	25⅛	190	190
Total	126	123⅛	850	918.5

During the registration of the first charge it was discovered that the apparatus for recording the weight was out of order, and therefore the result of the weight of that charge, being known to be vitiated, was rejected. During the running of the second charge, the record of the weight was obtained by counting the tippings of the weighing can, this being the element which would have been recorded if the recording apparatus had been in order and working. A small bolt having been found displaced, the registering apparatus was adjusted so that it would count, and during the third, fourth, and fifth charges, worked satisfactorily. During the trial of this meter the supply of water was shut off from the worm-tank, so that the temperature of the spirit was increased from 50° to 75°, which was as high as it could be raised, and afterwards reduced by again letting the water into the worm-tank, the object being to test the machine as severely as possible. After rejecting the result of the first charge, the record stands as follows, viz:

Change.	Volume in gallons.		Weight in pounds.	
	By meter.	By measure.	By meter.	By scales.
Second	23	22.5	170	171
Third	30	29.5	220	220.5
Fourth	29	28.6	210	209.5
Fifth	26	25.6	190	190
Total	108	106.2	790	791

The meter weighed ½ per cent. low, and measured 1¾ per cent. high.

This machine was subjected to a further test on a subsequent day, just at the close of the experiments, when the product of eight charges was passed through it, with the following result, viz:

Change.	Volume in gallons.		Weight in pounds.	
	By meter.	By measure.	By meter.	By scales.
First	32	29.9	230	228
Second	46	44.3	340	340
Third	26	25	190	192.5
Fourth	33	32.3	250	245.5
Fifth	23	22.4	170	168
Sixth	47	45.5	340	337
Seventh	30	29.6	220	222
Eighth	40	40.8	300	304.5
Total	277	269.8	2,040	2,037.5

The meter weighed ½ per cent. high, and measured 2½ per cent. high.

In this last trial the several charges cannot be compared one with another, because the cans were not emptied until the end of the last charge.

Taking the average of the two days' trials as the rate of this meter, the *weight* gistration was, on the first day, ⅛ of one per cent. too small; on the second day, ⅛ r cent. too large. The *measure* was on the first day ⅜ per cent. too small; on the cond day ⅜ per cent. too large.

This meter performed its mechanical functions perfectly well, and it weighed with eat precision. It measured with only a moderate degree of accuracy. However, e kind of measuring-can used in this machine is capable, if properly adjusted, of ving a much better result; a fact which may be easily demonstrated.

2.—*The Austrian meter, represented by M. Fleishman.*

The representative of this meter claimed that it had sufficient capacity to receive d record the run of the still, he having seen it pass into the Tice meter. The same neral arrangements were made as in the preceding case. The meter belongs to that ss which records the volume, and takes a sample of the liquid passing through em. It was important, therefore, in this trial, to ascertain whether it was possible vitiate the reserved sample, to which end the distiller was directed to alternately scharge into the meter only high wines, and then both high and low wines. The pacity of the meter proved entirely too small for the still. It was at once flooded, d no doubt a considerable quantity of spirit overflowed into the sample receiver. fter the first charge, the spirit was slowly and gently poured into the meter with a ip. The indications of the register are in a unit expressed in some unknown Aus ian measure. The record of the four charges, and the ratio of the units of the me r, and the actual volume, are as follows, viz:

Charge.	Indications of meter.	Volume by measure.	Weight in pounds.	Ratio per cent.
		Gallons.		
First	41	16 2	122. 5	39. 5
Second	53	22. 1	165. 5	41. 7
Third	44	18. 5	141. 0	42. 0
Fourth	64	26. 6	201. 5	41. 0
Total	202	83. 4	630. 5	41. 2

Showing that the measurement of the volume was quite uniform.

The average proof of the charges was	131	per cent.
The proof of the sample taken	124	"
Error	7	"

The quantity of the sample was about four ounces.

3.—*Brauer meter, represented by the inventor.*

This meter is intended to record the weight and also the strength of the spirits passing through it, provided they be not more than 20° below proof. The meter being of ample capacity, it was attached to the prolongation of the tail of the worm, and received all the spirits that were discharged at this outlet. It was supposed that the indications of the proof register were more likely than any other part of the instrument to be affected, either by accident or by design, during the operations of distillation. Consequently the strength of the liquid passing through it was varied as much as possible within the limits to which the meter was adjusted. The following table shows the result of the first trial, with four charges of the still, viz:

Charge.	Weight in pounds.		Proof.	
	By meter.	By scale.	By meter.	By hydrometer.
First	154	149	105. 4	125. 6
Second	208	203. 5	108	120
Third	225	222	102	115. 9
Fourth	106	104	84	118. 7
Total	693	678. 5		

During the time the first charge was passing through the meter, the inventor claimed that the proof-registration apparatus was out of adjustment. In the interval, before the second charge commenced running, he readjusted it, but it failed to work to his satisfaction, and he again adjusted it in the interval between the second and third charges.

The result of this trial not being satisfactory to the representative of the meter, another series of four charges was passed through it, with the following result, viz:

Charge.	Weight in pounds.		Proof.	
	By meter.	By scale.	By meter.	By hydrometer.
First	182	175	127	130.6
Second	238	232.5	130	128
Third	125.5	123	117.5	126.2
Fourth	123.75	123	126.2	125.9
Total	669.25	653.5		

After the third charge was passed through the meter, the drippings were all collected and included in the weight by scale, and the proof and temperature observed, the object being to repass this liquid after mixing it, so that the proof and temperature should be uniform. The record of the fourth charge, since it is the identical spirit of the third charge, should be the same as that of the latter. The weights given by the scale in the two cases are the same, while the observed proof differs three-tenths one per cent. By the meter, the weights differ 1¼ pound, while the proofs $8\frac{7}{10}$ per cent. The record of the fourth charge agrees very nearly with the weight and proof, as observed by scale and hydrometer, both before and after this particular trial, from which it is inferred that the indications of the meter are more nearly correct when the strength of the spirit is uniform, or nearly so.

4.—*Hutchinson's meter, represented by the inventor.*

This meter is intended to make within itself all the necessary corrections for varying temperature and strength of spirits, and the register to show the quantity reduced to gallons at proof. It was not of sufficient capacity to dispose of the run of the still, and was therefore tested by slowly passing through it four charges after they had passed through the Braner meter, and had been weighed on the scales and measured in the usual manner. The following table embodies the result of the trial, viz:

Charge.	Proof gallons by weight, measure, and hydrometer.	Proof gallons by the meter.	Difference per cent.
First	24.07	20	—20
Second	31.70	29	— 9
Third	34.57	29.5	—15
Fourth	16.06	16.25	+ 1
Total	106.40	94.75	— 1

The indications of the register were neither accurate nor uniform.

5.—*Pickett and Scott meter, presented by Pickett and Scott.*

It is intended that this meter shall, by means of a four-way cock, operated by hand, and connected with a registering apparatus, record the volume of the spirit passed through it, and reserve a definite sample of the same.

The meter tested was of large size, and its representatives thought it was amply so to dispose of the run of the still. It was therefore connected with the tail of the worm so as to receive the entire discharge. The result was the flooding of the meter, *owing, perhaps,* to the insufficient capacity of the four-way cock.

Another attempt was made, using a new charge, but with the same result. The mechanism of the meter is extremely simple, and there can be no doubt but it is capable of doing the mere work of measuring the volume, and taking a sample of the spirit passing through it.

6.—Clark meter, presented by the inventor.

This instrument has a single can for both weighing and measuring the spirit. The can is designed to tilt and empty whenever it shall have received an amount of spirit equivalent to a given volume at any standard temperature. In the model presented and tested by the commission the can was designed to tilt and empty whenever it had received a quantity of spirit which at 40° Fahrenheit would be precisely one quart. The weight of each canful was reduced and recorded automatically at its equivalent in proof spirit.

The meter was tested by passing spirit slowly and gently into it through an elastic tube connecting the machine with a barrel of spirit at a slightly greater elevation. The inventor stated that there was such an error in the adjustment of the register as to vitiate its record. Therefore the commission was able to judge only of the ability of the instrument to perform its mechanical functions, without reference to their accuracy.

7.—Allen's meter, presented by the inventor.

This meter belongs to that class which weighs and takes a sample of the spirit passing through it. It was represented by a small model altogether incapable of dissing of the run of the still. The spirit was passed into it by slowly and gently uring from a cup. The following table gives the results of the experiments:

t gallon poured through instrument indicated	47	units of weight.	
l.....do.....do	46	"	"
l.....do.....do	46.5	"	"
h.....do.....do	46.5	"	"
Mean	46.5	"	"

From this it will be seen that the model on a small scale weighed accurately, and was observed that the samples were taken in the manner claimed by the inventor.

8.—Young's meter, presented by the inventor.

In fact, this consists of two meters, one of which is designed to measure and the ther to weigh the spirit passing through them. Only a small and imperfect model of the weighing meter was before the commission for trial.

During the test 4.23 gallons of spirit was passed into the meter in the manner already indicated for the Clark meter. The register recorded 31.5 pounds as the weight of the spirit, while it actually weighed on the scale 32 pounds. The model was too small and too imperfect in its mechanical construction to afford the commission the means of judging correctly concerning its working in actual practice.

9.—Horton & Milligan's meter, presented by Horton & Milligan.

This belongs to the class of measuring and weighing meters. A more particular description of it will be found elsewhere in this report. The representatives of the meter claimed that it had ample capacity to take and dispose of the run of the still, and it was therefore attached to the tail of the worm in the manner already described for meters of the largest size under trial. Attempts were made to pass the product of four several charges through is, with the following result, viz:

Charge.	Volume in gallons.		Weight in pounds.	
	By meter.	By measure.	By meter.	By scale.
irst	20	20	None.	156.5
econd	29	28.3	2	217.5
hird	9 } 27	25.8	3	198.5
ourth	18 }			
Total	76	74.1	.....	572.5

During the first charge the weighing apparatus entirely failed to perform its duty. The meter itself failed to pass the run of the still, in consequence of which the spirit was backed up to the still, and by means of the low wines pipe a large portion of it was returned for redistillation. The representatives of the meter opened air-holes in both ends of the cylinder, but this proved insufficient to influence the working of the meter, even under a head of five feet. The meter was operated principally by hand. The foregoing remarks apply equally well to the result of the second and third and fourth charges. The third and fourth charges were not weighed separately, but together, it being evident that no inter-comparison of the record of the several charges could be made. Altogether, the meter failed during the trial to perform its functions from some cause unknown to the commission.

10.—Cox & Murphy's meter, presented by S. B. Scott.

This meter is designed to weigh and take two samples of all liquids passing through it. The machine offered for trial was of sufficient size for the still, but it had been injured in transportation to such an extent that no result of any value was obtained during the time it was under test.

11.—Horton & Milligan's beer meter, presented by Horton & Milligan.

This comprised only the measuring arrangement of the Horton & Milligan spirit meter, and of course designed to record volume only. It was interposed between the beer pump and the charge of the still. The indications of this instrument were reasonably uniform, and, after adjustment, it is believed accurate. In regard to accuracy, however, it should be stated that there were no means of testing it satisfactorily. It was evident, from inspection of the charger, that the different charges were of nearly equal volume; and, as the indications of the meter were nearly uniform, it is concluded they were correct. It should be remarked, however, that all the beer that passed through this meter was of nearly the consistency of water, and that it does not necessarily follow that a denser or thicker beer would pass the instrument equally well, or that its volume would be registered with equal accuracy. Further tests are absolutely necessary to justify an opinion in regard to the efficiency of this meter under all the conditions of actual practice. The indications of the meter for the different charges were as follows, viz:

FIRST DAY.

Charge.	Register of meter—gallons.
1st	528
2d	512
3d	536
4th	552
5th	584
6th	592
7th	584
8th	648
Total	4,536

On the 1st charge, after pumping 11 minutes, air-holes were drilled in the meter. Temperature, 60°; saccharometer, 2½°.

The 3d charge commenced on a new mash of beer, as stated by the distiller. Temperature, 66°; saccharometer, 1½°.

SECOND DAY.

Charge.	Register of meter—gallons.
1st	608
2d	400
3d	400
4th	400
5th	416
6th	400
7th	400
8th	424
9th	400
10th	392
Total	4,240

After the first charge, the inventor of the meter affixed to it an air-escape pipe for the purpose, as he said, of getting rid of the air carried up by the action of the beer pump, which interfered with the action of his meter.

The "charger" was filled to the same height at the second charge that it was at others. The quantity shown by the meter was, however, some two hundred gallons less.

THIRD DAY.

Charge.	Register of meter—gallons.
1st	416
2d	384
3d, 4th, 5th	1,264
6th	408
7th	416
8th	416
9th	432
10th	472
11th	488
12th	456
13th	440
14th	376

DIFFERENT MODES OF ASSESSING THE TAX ON SPIRITS.

Four different modes have been proposed to be adopted, either separately or in combination, for assessing the tax on the production of distilleries:

1. On the *capacity* of the distillery.
2. By measuring the *beer* or fermented mash introduced into the still.
3. By *spirit meters*, measuring the product of the still.
4. By requiring the product of the still to be run into *closed receivers*, and having it measured by an inspector of revenue.

We shall consider these different methods in sequence.

1. *Capacity tax.*—The impracticability of obtaining the revenue due from distilled spirits, by means of a tax levied upon the capacity of distilleries, has been so well and so fully set forth by the Commissioner of Internal Revenue, in his report for 1867, that it would be useless to say more on the points there adduced. There is one aspect, however, which deserves to be more fully illustrated.

Assume that the administrative difficulties of rating each distillery could be overcome, and that the requisite experiments had been made to determine an absolutely best system of conducting the process of fermentation and distillation. Suppose it had been found that the fermenting capacity of an establishment afforded the best measure of productiveness, and that, in order to obtain the greatest amount of alcohol, we must allow, for one bushel of grain, six cubic feet of fermenting space, and seventy-two hours for the fermenting process; these numbers being sufficiently near the truth for the purpose of our illustration: it is apparent that, in assessing the capacity of a distillery, the government must allow the conditions which will produce the greatest yield, and we assume that to be sixteen quarts of proof spirits per bushel, under the above conditions.

Let us now consider a distillery capable of mashing one hundred bushels of grain per day, with fermenting capacity for three days or seventy-two hours. This assumes a daily product of four hundred gallons of proof spirits, and the tax assessed at $800; cost of production, say $140 ($100 for grain and $40 for the process).

If the distiller now, instead of fermenting seventy-two hours, uses only forty-eight, his tax is not increased, he will use one hundred and fifty bushels of grain per day, gets only twelve quarts of proof spirits from each bushel; but that gives him four hundred and fifty gallons, with a cost of production of $200. The fifty gallons which pay no tax give him an advantage of $100, with an increased cost of production of $60, being $40 clear profit. It is in this way that the high tax would lead to a great waste of material and consequent loss to the nation, besides inciting fraud on the revenue.

In the above example a very large loss is admitted to arise from hastening the fermentation, but it is extremely probable that fourteen quarts, instead of twelve quarts, as assumed, could be produced in forty-eight hours' fermentation, in which case there would be an additional profit of $150 per day.

The result may be differently stated, thus: The cost per gallon, including tax, when the legitimate process is followed, giving maximum yield, is assumed at $2.35. If the time of fermentation is reduced one-third, and we get only three-fourths' yield, or twelve quarts, the cost is $2.22. If, under the same conditions, we get seven-eighths' yield, or fourteen quarts to one bushel of grain, the cost is $1.90.

The different rates of tax the corresponding values would be thus:
For a tax of—

	$1 per gallon.	50c. per gallon.
Cost of one gallon, legitimate process	$1 35	.85
Fermenting two-thirds time, obtaining 12 quarts	1 33	.80
Fermenting two-thirds time, obtaining 14 quarts	1 14	.76

We see that even with a tax of one dollar a wasteful process would still afford a good margin of profit, but when the tax is reduced to fifty cents not much is to be gained in that way. In the latter case, however, the difficulties pointed out in the Commissioner's reports would not be materially lessened, and the system of assessing the tax upon the capacity of each distillery would still be found impracticable. For the foregoing and other reasons it is the opinion of the commission that to make capacity alone the basis of assessment of the tax is not sufficient to guard against fraud.

2. *Measurement of beer.*—This method of estimating the product of a distillery presupposes, *first*, that it must be impracticable to introduce beer into the still in any other way than through the beer meter; *second*, that the beer meter shall correctly measure the quantity of fermented mash introduced into the still; *third*, that the beer shall be of the density or containing the quantity of spirits assumed in fixing the rate.

The first condition will occasion some difficulty on account of the indispensable collapsion valves—outlet for the residue and connection with the doubler. Assuming, however, these points of attack to be guarded, it will be easy to measure the quantity of beer.

The third condition, however, presents to us the same difficulty as that above set forth in regard to a capacity tax, and, like that, owing its force to the high rate of tax imposed.

Experimental data are wanting for determining the degree of dilution or the proportion of water and grain which will produce the maximum yield of spirit; nor has it accurately been ascertained what diminution of yield will be experienced by a departure from the best proportion. If we consider the common practice to indicate something near the best proportion, we find that to be not far different from forty-five gallons of water to a bushel of grain, and since that will yield two gallons of alcohol, we see that the usual strength of the beer is about four per cent. A solution of four per cent. is so weak that the mixture would appear to admit of considerable variation without materially affecting the results. In other words, it appears altogether probable that six per cent. of alcohol can be produced as profitably, or very nearly so, as four per cent., *i. e.*, that thirty gallons of water can be made to contain nearly the same quantity of spirit as that for which forty-five gallons is allowed, that giving the maximum yield.

It is unnecessary to repeat, in detail, the computations already made with reference to the capacity tax to show how such frauds would operate. The cases are parallel. Experiment may possibly show that the dilution required for a profitable yield is much more circumscribed than above assumed; but it appears, nevertheless, certain that it must greatly vary, according as more or less active ferment is employed, or the process conducted at a higher or lower temperature.

We are informed that in certain distilleries in New York, by means of recent German improvements, the time required for fermentation is reduced to thirty-six hours without any loss in the production of spirit. It is a safe inference that if the interest of the distiller could be served by it, the quantity of water used might also be materially reduced.

From all considerations adduced, we are led to the conclusion *that unless the entire process of producing spirits from grain be regulated and prescribed by law, and such law be enforced, the measurement of beer alone cannot be relied upon for the assessment of the tax on distilled spirits.*

The next mode proposed for the assessment of the tax is by a spirit meter attached to the outlet of the condenser. Admitting that a meter can be constructed that will give a correct registration of all the spirits, and that it can be efficiently protected against fraudulent interference, it will still be necessary to provide a safeguard against the abstraction of the spirits before they reach the meter. The commission have therefore concluded that a meter attached to the outlet of the condenser does not in itself furnish a sufficient safeguard to insure the assessment of the tax upon the product of the distillery. And further, in view of past experience in the attempts to assess and collect tax on spirits under the present laws and regulations the commission concludes that the running of the product of the still into close receiving tanks, presumed to be accessible only to the officers of the government, the tax to be there assessed upon what is measured by them, does not in itself furnish sufficient safeguard.

Having concluded that no single device is sufficient to insure the assessment of the tax upon the product of the distillery, it remains to be indicated what system o

combination of modes will, in the opinion of the commission, probably result most favorably to the government.

If it be assumed that every distiller can make, from each bushel of grain or gallon of beer distilled, a definite quantity of proof-spirits, and this quantity be fixed at such a rate that the distiller will be certain to make a small quantity more, and the tax be assessed upon the fixed rate per gallon of beer that actually passes into the still, then the tax secured, though not all that the government is entitled to, will yet be a large proportion of it. Therefore the use of a beer meter is recommended as a part of the system; and if used, its indications will serve as a basis upon which to assess probably two-thirds of the tax before the spirits have passed into a merchantable form; and the margin of profit to be derived by the abstraction of the spirits on their way to the outlet of the condenser will be so much reduced as to remove in a great degree the temptation to commit the kind of fraud indicated. But it is necessary to ascertain the quantity of proof-spirit produced in excess of that assumed, with a view to the assessment of the tax upon this excess. To this end, the commission recommend the use of a spirit meter at the outlet of the condenser.

The above system seems to be all that is requisite. Still, in order to fix a responsibility upon the distiller, it is proposed, as a further check, to use his sworn declaration concerning the operations of his distillery, which, being made without any knowledge of the indications of the beer and spirit meters, the registers of which are concealed from him, should be compared with the latter, and the tax should finally be assessed upon the highest of the three records.

SAFEGUARDS ON DISTILLING APPARATUS.

1. The still must be protected against the introduction of beer otherwise than through the beer meter. To this end the manheads should be secured by government locks, to be taken off only in the presence of an officer; and the introduction of beer through the vacuum valves should be made impracticable by some proper device.

2. The still, doublers, and condensers should be so placed as to admit of the free inspection of all their parts and connections. They should be at least eighteen inches from any wall or other vessel.

3. The doubler should be supported at a suitable height from any floor by frame-work with glass blocks interposed, so that tapping it from the bottom could be easily detected. All pipes leading to and from the doubler should be in full view, and all cocks in the same should be secured by government locks. All openings into the doubler should be protected as mentioned for the still.

4. When a low-wine condenser is used, the same provisions should apply to it as to a doubler.

5. The worm-tub should also be placed not less than eighteen inches from any wall or ceiling; it should be supported by frame-work with interposed glass blocks, with a free space underneath of sufficient height to admit of easy inspection of the bottom, in order that every part of it may be easily seen and examined. The water should be drawn off at irregular intervals by a government officer, and the interior part carefully examined to see that the worm has not been tapped.

GENERAL CONCLUSIONS.

I. That no single apparatus or contrivance for protecting distillation against fraud is sufficient, although by the use of a meter and other appliances frauds may be rendered more difficult and their detection more certain.

II. That a meter fulfilling the following conditions is necessary at the end of the worm or condenser, viz:

1. That of giving the data for determining the amount of proof spirits which has passed through it.

2. Of not being affected by the ordinary operations or accidental derangements of the still.

3. Of not having its correct working readily interfered with without leaving such evidence of tampering as will insure detection.

III. That the following safeguards are requisite to prevent or detect the abstraction of the spirits before they reach the meter:

1. That the still, doubler, and condensing vessels be so isolated that no liquid can be abstracted from them by concealed tubes or other means.

2. That before a distillery is allowed to go into operation, a detailed description, with measurements and drawings of the several parts of the apparatus, shall be required, and that afterwards inspections shall be made at irregular intervals by different persons.

IV. That a measurement of the beer is desirable as one of the checks against fraud,

and that it is practicable to effect this measurement in the passage of the beer from the fermenting tub to the still by automatical means, without interfering with the necessary operations of the distiller.

V. That it is necessary to place the beer meter as close to the still as possible, and to provide against the introduction of beer into the still by other channels than through the meter.

VI. That the records of the meters should be accessible or visible only to government officers.

VII. That in assessing the tax three charges should be made against the distiller, viz:

One from the indications of the beer meter; another from the records of the spirit meter; and a third from the sworn declaration of the distiller; and that the highest of these form the basis of the assessment.

VIII. That no spirits should be permitted to leave a distillery without inspection and brand by a government officer, who shall report an accurate account of the same.

IX. That the tax be assessed upon all spirits, whether high or low, coming from the still.

X. That if the proposition to assess the tax upon all the spirits coming from the still does not meet the approval of Congress, then the following alternative will be necessary, viz:

In distilleries which produce only high wines the use of but one meter in addition to the beer meter is requisite; but in distilleries which produce both high and low wines, two meters at least, in addition to the beer meter, are necessary.

No. 1 to be placed at the outlet of the condenser, arranged to receive, pass, and register the high and low wines on separate registers.

No. 2 at and in the closest possible connection with the doubler, which shall register the low wines returned for redistillation, the record of this to serve as an offset to the register of the low wines given in meter No. 1.

DECISIONS AS TO METERS.

1. That the time available for actual tests of spirit meters by the commission was not more than sufficient to illustrate the mechanical workings of the several machines, and entirely insufficient to test their ability to preserve efficiency under the varying conditions of actual practice.

2. That none of the meters which have been offered fulfill all the conditions deemed necessary for a perfect meter, particularly in regard to the quantity of proof spirits dependent upon temperature.

3. That in all the machines presented to the commission in which an automatic correction for temperature is attempted, a complication and delicacy of parts are exhibited which render it highly probable that a derangement of them would soon occur.

4. That it is admissible in a meter so adjusted as to give correct indications at a standard temperature of say 60°, to dispense with an automatic correction due to variations of temperature.

5. That the meters of the weighing and sampling class have the merit of simplicity and correctness in theory, but that none of those submitted to the commission offered sufficient safeguard to be recommended for adoption.

6. That although the machines of the measuring and sampling class also exhibit much ingenuity, no one of those submitted was sufficiently perfect to allow of its being recommended for adoption, although it is possible that the meters of this class may be improved.

7. That the meters which are intended to measure the quantity and register the proof of the spirits, although exhibiting great fertility of invention, failed on account of the complication and delicacy of their parts to perform their desired operations, and cannot, therefore, be recommended for adoption.

8. That the machines intended to weigh and register proof not only failed to give a satisfactory result on trial, but appear also to be especially liable to falsification, and therefore cannot be recommended for adoption.

9. That the machines, with one exception, of the weighing and measuring class failed on trial to perform satisfactorily the required operations.

10. That although the indications of the Horton beer meter were reasonably uniform, yet, in view of the fact that only one meter of this class was submitted, and the short time allowed for its trial under varying conditions, the commission cannot recommend it for adoption without further experiment, and it is suggested that the production of a satisfactory beer meter be thrown open to the competition of inventors, and that none be adopted until after a full and satisfactory trial.

11. That the commission, from the results of the whole investigation, have come to

the conclusion that the Tice meter more nearly fulfills the requirements of such an instrument than any other submitted to their examination, and deem it safe to recommend that the government proceed with its use, but that provision be also made for allowing distillers to use any other meter approved by the Treasury Department which shall produce equally accurate results under the varying conditions of actual practice.

12. That to carry out this provision the commission recommend that the Secretary of the Treasury be authorized to institute tests from time to time of spirit meters whenever the public interests, in his opinion, will be thereby subserved.

It is important to state that all the foregoing conclusions and decisions were arrived at after full deliberation, and, with the exception of a difference as to the importance of the beer meter, were unanimously adopted as the independent judgment of each member of the commission.

Respectfully submitted.

JOSEPH HENRY.
J. E. HILGARD.
O. M. POE.
WILLIAM GURLEY.
JOHN WHITE.
D. M. GREENE.
D. L. BARTLETT.

Hon. HUGH MCCULLOCH,
Secretary of the Treasury.

July 20, 1868, Congress passed an act authorizing the Commissioner of Internal Revenue to adopt and prescribe for use a meter, &c., for the purpose of ascertaining the amount of spirits in the United States subject to tax, and that distillers should furnish and attach the same at their own expense. (See act of July 28, 1868, sections 2 and 3.)

SEC. 2. *And be it further enacted,* That proof spirits shall be held and taken to be that alcoholic liquor which contains one-half its volume of alcohol of a specific gravity of seven thousand nine hundred and thirty-nine ten thousandths (.7939) at sixty degrees Fahrenheit; and the Commissioner of Internal Revenue, for the prevention and detection of frauds by distillers of spirits, is hereby authorized to adopt and prescribe for use such hydrometers, saccharometers, weighing and gauging instruments, * or other means for ascertaining the quantity, gravity, and producing capacity of any mash, wort, or beer used or to be used in the production of distilled spirits, and the strength and quantity of spirits subject to tax, as he may deem necessary; and he may prescribe rules and regulations to secure a uniform and correct system of inspection, weighing, marking, and gauging of spirits. And in all sales of spirits hereafter made, a gallon shall be taken to be a gallon of proof spirit, according to the foregoing standard set forth and declared for the inspection and gauging of spirits throughout the United States. The tax on brandy made from grapes shall be the same and no higher than that upon other distilled spirits; and the Commissioner of Internal Revenue is hereby authorized, with the approval of the Secretary of the Treasury, to exempt distillers of brandy from apples, peaches, or grapes exclusively, from such other of the provisions of this act relating to the manufacture of spirits as in his judgment may seem expedient.

SEC. 3. *And be it further enacted, That the Commissioner of Internal Revenue is hereby authorized to order and require such changes of or additions to distilling apparatus, connecting pipes, pumps, or cisterns, or any machinery connected with or used in or on the distillery premises, or may require to be put on any of the stills, tubs, cisterns, pipes, or other vessels, such fastenings, locks, or seals as he may deem necessary.*

After the conclusion of these experiments and the several reports of the commission, and by virtue of the act of July 20, 1868, and on September 16, 1868, Commissioner Rollins gave notice of the adoption of the Tice meter, and prescribing regulations, &c., for their manufacture and use thereof, also fixing price, &c. (See letter to Tice, September 16, 1868, from the Commissioner of Internal Revenue, E. A. Rollins, second contract.)

Also printed Circular No. 69, of date September 16, 1868.

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE,
Washington, September 16, 1868.

SIR: Having decided to adopt and prescribe the meter invented by you for use in distilleries, you are hereby directed to proceed with their construction, provided you are willing to do so upon the following conditions:

First. Samples of the meters A and B and of the single and double counter meter will be kept, and such set of mefers will be tested and compared with the sample by an officer detailed for that purpose before being removed from the factory, and again after being finally attached to the distillery, and if any meter, upon being so attached, shall prove to be defective in any respect, the defective part shall be replaced or a new meter furnished without additional expense to the distiller.

Second. Public notice will be immediately given of the adoption of the meter, and distillers will be required to procure and attach them to their distilleries as fast as they can be delivered and attached until all are supplied.

Third. The one hundred and seventeen (117) meters now finished will be immediately made ready for delivery, and the thirty-six (36) now in process of manufacture will be completed as soon as possible. The manufacture of others, to the number of five hundred (500) in all, is to be proceeded with as rapidly as possible, and thereafter not more than twenty sets are to be in process of construction at one time, unless a greater number is directed by the Commissioner of Internal Revenue.

Fourth. The Commissioner reserves to himself, or his successor in office, the right at any time to adopt any improvement of the meter or system, or to revoke the order adopting the meter, and to direct, on the part of the government, a discontinuance of its manufacture.

Fifth. You are to furnish the meters in good order and condition, ready for transportation, at the prices fixed by the committee, which are as follows:

Sample meter A	$200
Sample meter B	$250
Meter No. 1:	
Single counter	$450
Double counter	$500
Meter No. 2:	
Single counter	$600
Double counter	$650
Meter No. 3:	
Single counter	$800
Double counter	$850
Meter No. 4:	
Single counter	$1,000
Double counter	$1,050

The cost of transportation and expense of attaching the same to be paid by the distiller.

Sixth. The attachment of the meters is to be made under your direction, and also under the supervision of the officer to be detailed under the regulations; and after the final attachment and closing of the meter, the working of the overflow valve is to be tested by flooding the meter.

Seventh. You are to report to this office at the end of each week the number of meters that have been delivered, and to whom the same were shipped, and the number on hand ready for delivery.

Very respectfully,

E. A. ROLLINS,
Commissioner.

ISAAC P. TICE, Esq.,
New York, N. Y.

[Circular No. 69.]

Notice of adoption of meter and regulations for supplying distilleries with the same, and securing their proper attachment.

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE,
Washington, September 16, 1868.

Notice is hereby given that the Commissioner of Internal Revenue has adopted and prescribed for use in distilleries the spirit-meter invented by Mr. Isaac P. Tice, of New York, being the same that was adopted and prescribed by the Secretary of the Treasury on the 19th of April, 1867, under section 15 of the act of March 2, 1867, and subsequently recommended for use by the commission under the joint resolution of *Congress* approved February 3, 1868. Section 3 of the act of July 20, 1868, provides

that whenever the Commissioner of Internal Revenue shall adopt and prescribe for use any meter, every owner, agent, or superintendent of a distillery must furnish and attach, at his own expense, such meter for use at his distillery, and furnish all pipes, materials, labor, and facilities necessary to complete such attachment, in accordance with the regulations of the Commissioner of Internal Revenue, who is also authorized to order and require such changes of or additions to the distillery apparatus, connecting pipes, pumps, or cisterns, or any machinery connected with, or used in or on, the distillery premises, and prescribe such fastenings, locks, and seals as he may deem necessary. The system which has been adopted involves the use of two meters, the first with double counters at the end of the worm, through which the entire product of the still will pass, the quantity of high wines being indicated upon one set of registers and the quantity of low wines upon another. The second meter will be placed upon the doubler in such position as to register the quantity of low wines carried back to the doubler for redistillation. If the still is provided with such attachments that no low wines are discharged, and the distiller is prepared to report as taxable the entire product of the still, the second meter will not be required.

These meters are constructed of six different sizes, the prices and capacities being as follows:

Sample meter A	$200
Sample meter B	250
Meter No. 1, single counter	450
Meter No. 1, double counter	500
Capacity, one and a half gallons per minute.	
Meter No. 2, single counter	600
Meter No. 2, double counter	650
Capacity, three gallons per minute.	
Meter No. 3, single counter	800
Meter No. 3, double counter	850
Capacity, six gallons per minute.	
Meter No. 4, single counter	1,000
Meter No. 4, double counter	1,050
Capacity, eighteen gallons per minute.	

The small meters A and B are intended more especially for application to small copper stills, and the capacity above given must be understood to be the maximum capacity per minute of each of the meters.

The meter adopted being the invention of Mr. Tice, and secured to him by letters-patent, can only be made by him or under his license, and in order to guard against an unreasonable price being demanded of those who are bound by law to purchase it, the prices of the several sizes, under an arrangement made between Mr. Tice and the government, have been determined by a committee consisting of William T. Duvall, of Georgetown, D. C., William P. Trowbridge, of New York, and S. J. Knowles, of Massachusetts, all practical and skillful machinists, two of whom were designated by the government and one by Mr. Tice, and the sums hereinbefore named are the prices agreed upon by them for the meters, delivered at the place of manufacture, as stated in the report of the committee.

Mr. Tice reports that he has now on hand, finished and ready for delivery, one hundred and seventeen meters, with thirty-six others in an advanced state, which will soon be ready for delivery, and has no doubt that he will be able to deliver meters as fast as they may be ordered, and as fast as distillers shall become authorized to run under the law.

Under the provisions of section 3, distillers are required to procure and attach such meters, and in making their applications therefor they must state the capacity of the still in cubic feet, and its utmost producing capacity per minute; that is, the greatest possible quantity of spirits that will pass from the worm in that time. The producing capacity here referred to must not be continued to high wines merely, but must show the entire quantity of spirits, whether high or low wines, which can or or will pass from the worm in the time specified. The attention of distillers is specially called to this point, as the discharge from the worm is not uniform, and if the meter is not of sufficient capacity to measure and pass the largest quantity which the worm will discharge, it will be flooded, and its operation thereby stopped until the meter is opened and the valve again placed in working order.

The application must also show the cubic contents of the doubler, the outside diameter of the worm at its lower extremity, the height and diameter of the tank in which it is placed, and the material of which the still, doubler, and tank are constructed. The diameter of the main pipe leading from the still to the doubler, as well as of the charging and discharging and blow-off pipes, including the pipe used for discharging the doubler, must also be given. There is also required a description of the foundations upon which the still, doubler, and condenser are respectively supported. If the still is provided with collapse-valves, *their number and diameter* must also be stated.

This application will be made on Form 7, as heretofore prescribed, which will be furnished by the collectors of the several districts. At the time of making the application, the applicant will furnish to the collector of his district a certificate of deposit in a United States depository for the amount of the price of the meter or meters, payable to the order of Mr. Tice, and the collector will certify upon such application that he has received such certificate, and forward the application to this office for transmission to Mr. Tice. And the applicant should also state the means of access to the distillery, whether by railroad, steamboat, or canal, and with what points the distillery is connected by either of these modes of communication. If there is any person carrying on the trade of coppersmith in the immediate vicinity, the collector will state the fact, and if not, he will state the distance to the nearest point at which the services of such artisan can be procured. Upon the delivery of the meter to the distiller, the collector will at once transmit the certificate of deposit to Mr. Tice, at his address, 314 Third avenue, New York City.

Meters will be attached under the joint supervision of the manufacturer or his agent, and of an assistant assessor, who will be specially detailed for that purpose by the assessor of the district, who will report the name of such assistant to this office.

The expenses of transportation and attachment of the meters, and of any changes required to be made in the distillery, are to be paid by the distiller.

So long as meters are ready for delivery, distillers must procure and attach them. Should any distiller refuse to procure and attach them, it will be the duty of the collector to close the distillery, and forthwith institute the proper proceedings for its condemnation and the enforcement of the penalties provided by law.

Immediately upon the receipt of these instructions, collectors will report to this office the number and location of all the distilleries in operation in their respective districts, with the names of the owners thereof, and thereafter, when any distiller shall commence business, the fact will be immediately reported to this office.

Distillers of apples, peaches, and grapes exclusively will not be required to furnish and attach meters to their distilleries.

E. A. ROLLINS, *Commissioner.*

Under this authority and contract the company again resumed work, and proceeded to supply meters in exact conformity with said regulations.

In January, 1869, special instructions were issued by the Commissioner of Internal Revenue to the collectors in the different districts to take the certificates of deposit in their own name, &c. (See copy letter of January 8, 1869, from the Commissioner to the collector of the first Pennsylvania district.)

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, January 8, 1869.

SIR: You will forward no certificates of deposit in payment for meters delivered until the meters are attached to the distilleries, and in future you will take the certificate of deposit in your own name, changing those which have already been taken if you can do so. Please report, in detail, amount of certificates already sent.

Very respectfully,

E. A. ROLLINS,
Commissioner.

TO COLLECTORS.

The effect of this, it seems, was to make the collectors the agents of the government in withholding, as they afterward did, the moneys deposited with them for meters from the Tice Manufacturing Company.

February 5, 1869, Special No. 65, Treasury Department, directs, among other things, the collectors, and forward to Mr. Tice the deposits made before January 8, 1869.

[Special No. 65.]

Concerning applications for meters.

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, February 5, 1869.

The attention of collectors of internal revenue, and of distillers, is called to the provisions of the law and the regulations in relation to the procurement and attachment of meters.

Examination in many cases has shown that the meters applied for by distillers are

o small in capacity for the distillery. In Circular No. 69, distillers, in making their pplication, are directed to state the utmost possible producing capacity of the still r minute, "that is, the greatest possible quantity of spirits that will pass from the orm in that time. The attention of distillers is especially called to this point as the ischarge from the worm is not uniform, and if the meter is not of sufficient capacity measure and pass the largest quantity which the worm will discharge, it will be ooded, and its operation thereby stopped until the meter is opened, and the valve gain placed in working order."

It is well known that, in steam distilleries especially, stoppages frequently occur r a short time when the accumulated force of the steam drives over the alcoholic apor, which is rapidly condensed and discharged from the worm with great force, in me cases accompanied by mash; and the question for the distiller to determine nder this regulation is, what is the greatest quantity which will be discharged from e worm under such circumstances? If the meter is not sufficient to pass the pro- uct of the worm under any and all circumstances it will be flooded, the discharge alve closed, and its operations stopped, the spirit filling the meter and flowing back ito the worm. The effect will of course be the same as if the distiller should effect- ally close the outlet of the worm while the still is in operation.

If the distiller applies for a meter of too small capacity its attachment will be at- ended with the result above stated, unless prevented by shutting off the steam in me. The cost of the delay and other expenses attending such an accident may be uch more than the difference in the cost of the meters, aside from the fact that the istiller in such case would be compelled to procure a larger meter to prevent a re- urrence of such accidents.

By the third paragraph of Circular No. 69, distillers are required to procure and at- ach two meters in all cases, except where the still is provided with such attachments hat no low wines are discharged, and the distiller is prepared to report as taxable the ntire product of his still. In most of the applications but one meter is called for, al- hough there is in the distillery a separation of low and high wines. If the two me- ers are attached, the distiller will be charged with the amount shown by the meter ttached to the worm, deducting therefrom the amount of low wines shown by the ther meter to have been returned to the doubler.

Distillers should be at once required to revise their applications for meters, and here the meters are too small, or only one is applied for when two are required, the pplications should be at once corrected. If not so done, it will be understood that he distillers propose to stand upon their applications as made, and that they will take the entire responsibility as to the meters ordered by them being of sufficient ca- pacity; and, where only one meter is applied for, that they assent to being taxed for the low as well as the high wines. All revenue officers will govern themselves accordingly. The manufacturer of the meters will be instructed to forward the me- ters of the sizes applied for, and to attach the same; and if any trouble arises on this account, the distiller, having been furnished with the precise size he asked for, will have no reason to complain of any one but himself.

A daily report must be made by the storekeeper in charge of each distillery to the assessor of the district, setting forth the indications shown by the meter at the hour of twelve meridian. And each assistant assessor who has a distillery in his division will examine each meter whenever he visits the distillery, and report to his assessor the indications of the meter as above directed. And assessors, in making their monthly computation on form 89, will use the information thus given in determining the required production. Where but one meter is attached, they will charge the dis- tiller with the full product of the worm, making no deduction for low wines returned to the still or doubler.

In distilleries where the product of the first distillation is singlings only, no meter will be required for the singling still; but each doubling still will require one or two meters, depending upon the fact whether there is a separation of the low wines.

It must be understood, however, that there must be close connection between the singling and doubling stills in all cases, so that no access can be had by the distiller to the low wines at any point during their passage from the singling to the doubling still.

Collectors will furnish distillers promptly with a copy of these instructions, and if no corrections of the applications are made, will at once notify this office.

Where distillers continue to run, after the issue of these instructions, without mak- ing prompt application for a meter, the names of such distillers will be at once re- ported to this office.

Where meters had been delivered prior to the receipt of the instructions of January 8, collectors will promptly forward to Mr. Tice the certificates of deposits therefor, and measures will be taken to have them attached.

Where collectors deposit their collections in a depositary bank, the meter deposits

will be made in such bank; but where they are required to deposit collections with an assistant treasurer or designated depository the meter deposits will be made in some responsible bank.

E. A. ROLLINS,
Commissioner.

Again, by letter of October 6, 1869, to I. P. Tice, the Commissioner (Delano) says: "The disposition of the certificates should be kept within the control of this office. (See letter October 6, 1869:)

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, Oct. 6th, 1869.

SIR: Please find enclosed copy of a circular sent to collectors, in relation to the deposits for the Tice meter.

I am of the opinion that this course will give much greater satisfaction to persons requiring meters, while, at the same time, the disposition of the certificates is kept within the control of this office.

The very many complaints made against the mode heretofore existing rendered some such action necessary.

Very respectfully,

C. DELANO,
Commissioner.

I. P. TICE, Esqr., *N. Y. City.*

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, October 8, 1869.

SIR: You are informed that so much of series 4, No. 5, relating to Tice meters, dated March 30, 1869, as directs that "upon the receipt of the bill of lading, the collector will at once transmit the certificate of deposit to Mr. Tice at his residence, No. 314 3d avenue, New York City," is rescinded, and you are instructed in future to only deliver such certificates of deposit to Mr. Tice when so instructed by this office.

On the attachment of any meter or meters in your district, you will report the fact of such attachment to this office, giving the name of the distiller and the number of distillery, and stating whether such meter is in working order. If the meter has not been adjusted, you will forward report of its adjustment when that occurs.

Very respectfully,

C. DELANO
Commissioner.

In October, 1869, the attachment of meters was suspended temporarily by order of the Commissioner by telegram to Tice of October 23, 1869.

June 8, 1870, the Commissioner revoked the order of September 6, 1868, for the manufacture and attachment of meters. (See letter of June 8, 1870:)

TREASURY DEPARTMENT,
OFFICE INTERNAL REVENUE,
Washington, June 8th, 1870.

SIR: The letter of the Commissioner of Internal Revenue addressed to Collectors of Internal Revenue, dated October 8, 1869, relating to certificates of deposit for Tice meters, has been and is revoked, and the instructions and regulations in force prior to that letter, relating to the ordering and shipment of and payment for the meters invented by you and prescribed for use in distilleries, remain in force only in respect to meters heretofore delivered, and also those you may now have on hand, or in process of construction, not exceeding twenty sets.

Any regulations heretofore prescribed addressed to you by or from this office directing or authorizing you to construct or proceed with the construction of or to furnish meters, and especially those of September 16th, 1868, are revoked, except as aforesaid.

New rules, regulations, and orders have been prescribed, a copy of which is herewith inclosed, it being distinctly understood that neither the Government of the United States, nor any department or officer thereof, is or will be responsible for or on account of any spirit meters, or the attachment or adjustment thereof.

Very respectfully,

C. DELANO,
Commissioner.

ISAAC P. TICE, ESQ.,
314 Third Avenue, New York City.

No meters had, in fact, been manufactured after May, 1870, and on June 8, 1870, the company had on hand 14½ sets of meters. which were worth at the rates prescribed by the committee, about $25,000.

On June 8, 1871, the use of the meters was entirely abolished, and all contracts annulled. (See Circular No. 96, Treasury Department, June 8, 1871:)

[Circular No. 96.]

Discontinuing the use of the Tice spirit meter.

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, June 8, 1871.

Under authority conferred by sections 2 and 3 of the act of July 20, 1868, the Commissioner of Internal Revenue, in Circular No. 69, dated September 16, 1868, and, again, in Regulations "Series 5, No. 5," dated June 7, 1870, adopted and prescribed for use in distilleries spirit meters invented by Mr. Isaac P. Tice, the same having been adopted and prescribed by the Hon. Secretary of the Treasury on the 19th day of April, 1867, and subsequently recommended for use by the commission appointed under the joint resolution of Congress approved February 3, 1868.

It having been ascertained by experience that these meters, as a class, do not fully answer the purpose for which they were intended, their use is hereby discontinued, and all existing orders prescribing the same are hereby revoked. All meters attached to distilleries may be detached.

The meters being the property of distillers, they will be permitted to dispose of them as they may desire.

A. PLEASONTON,
Commissioner.

Affidavit of Henry L. Vilas.

STATE OF NEW YORK,
City and County of New York:

Henry L. Vilas, being duly sworn, says:

I am the receiver of the insolvent corporation known as the Tice Manufacturing Company, and was appointed such receiver by order of the supreme court of the State of New York on March —, 1879.

Immediately after my appointment and the filing of the bonds by me, as required by law, I proceeded to take into my possession the property of the company, such as I was able to find, consisting only of some books of account, minute books, ledger, stock ledger, and certificate and transfer books.

None of the papers, contracts, and vouchers of said company were delivered to me, and I was informed the same, or a large portion thereof, were in the possession of the law firm of Benedict, Taft, and Benedict, who had been counsel for said company, and who claimed an attorney's lien thereon for several thousand dollars for professional services, payment of which was claimed as a condition of their surrender to me. From the books coming into my possession, I was unable to determine the nature of the assets or claims of said corporation, but was informed that the only assets were claims of various kinds against the Government of the United States. I had no means in my possession as receiver wherewith to pay the lien aforesaid upon the papers, &c., of said company, and for two years or more I was unable to obtain any definite information as to the validity and value of said alleged claims, though I made constant effort so to do, and the directors of said company were, as I am informed, all insolvent and bankrupt.

Within the past eight months information as to the nature, &c., of said claims has come to my knowledge, and I have been enabled to effect a satisfactory arrangement with said attorneys, whereby they have delivered into my custody all papers, &c., in their possession, and from a careful inspection and examination of which I am convinced, and am advised by counsel, that there do exist just and valid and equitable claims of said company against the Government of the United States to the amount of many thousand dollars, growing out of the contracts made between said government and the late Isaac P. Tice for the manufacture and furnishing of spirit meters. That since I have obtained possession of said papers, contracts, &c., I have made all diligent efforts to prepare and present said claims for allowance and payment on behalf of the creditors and stockholders of said company, as the equitable successors in interest to said contracts of Isaac P. Tice, deceased.

HENRY L. VILAS.

Subscribed and sworn to before me this 1st day of March, 1882.

[SEAL.]

SAM'L B. BENN,
Notary Public, N. Y. Co.

Affidavit of Enos N. Taft.

STATE OF NEW YORK,
City and County of New York, ss:

Enos N. Taft, being duly sworn, says:

I am an attorney and counsellor-at-law, and a member of the law firm of Benedict, Taft & Benedict, of No. 64 Wall st., New York. I became a member of the firm of Benedict, Taft & Benedict May 1st, 1872.

In the early part of 1870 I was employed by the Tice Manufacturing Company, a corporation organized under the laws of the State of New York, to endeavor to secure from the Government of the United States a fulfillment of its obligations and engagements with Isaac P. Tice touching the manufacture of spirit meters and furnishing the same for use in distilleries for the detection and prevention of frauds upon the government, of which said meters the said Tice was the inventor, but whose rights and interests in the premises had been transferred to the said company, and in which he was a large stockholder, and for which he acted as agent, though, I believe, generally in his own name, the dealings with the government having been begun in his name before the company was formed. I continued to act in the matter and to endeavor to obtain such redress as the case seemed to admit of from the Internal Revenue Department and the Treasury Department for several years, and as I remember substantially down to the time of the failure of the company and the death of said Tice, although I had pretty much exhausted my efforts in that direction some time previous, and only awaited the decision of the 4th Comptroller of the Treasury Department on the claim for meters left on hand when their use was discontinued, and the payment for which had, after careful argument and consideration, been recommended by the Commissioner of Internal Revenue.

On this claim I was heard twice and at length by said Comptroller, and submitted an elaborate brief, and was entirely confident that it was a claim that ought to have been allowed and paid. But it was not, although it was held for a very long time under advisement, and I cannot doubt that the justice and equity of the claim must have been forcibly felt by the Comptroller, but the methods which the government had adopted in the business, and the conflicting action which occurred under the importunity of the distillers and those upon whom they exerted a political influence, made the question one, perhaps, of some embarrassment to an officer whose duty was carefully to guard the Treasury against the payment of any but clearly legal claims. Still, I think the claim was, in fact, one that was strictly legal, and that the failure to allow it was a great hardship upon the company. But there were other losses and hardships to which the company were put of a most serious character.

The policy of the government was to make the distillers pay for the meters, and to that end it had a committee fix the price of the different sizes, and then it required the distillers to make application through the collector of the district for the proper meter, and deposit with the collector certificates of deposit for the price, which were to be forwarded to Mr. Tice at New York on the receipt of the bill of lading by the collector.

There was no other demand for the meters than that so created by the government, and it could continue no longer than the government required. Consequently all investment in the business of manufacturing these meters rested entirely upon the wants of the government and confidence in its being prompt to meet all just reliance placed upon the inducements and undertakings held out by it.

Now, first, after the government had determined to avail itself of the meters and arranged to have them supplied by Mr. Tice, who was acting for the company, and had led to special and expensive preparation and large investment, and the initiation of the business with all its appliances and necessary help, a sudden interruption was made by a joint resolution of Congress requiring a further competition and test of meters, which, of course, occupied a considerable period of time, and was a great damage to the company; and the hardship of this is the more apparent from the fact that the result proved favorable to Tice's meter against all competition.

Then the business was again proceeded with, but other interruptions followed from the very natural opposition of distillers, who complained loudly at being compelled to pay for that which they did not want, and which had no value to them except as it was required by the government.

And the result was that there was much unsteadiness on the part of the Commissioner of Internal Revenue, who was constantly plied by those who feared the influence of distillers politically, so that he would now stop and now again go ahead. At one time he took it upon him to suspend all further transmission to Mr. Tice of certificates of deposit for meters that had been shipped until further orders from him or to that effect; then, after much loss and damage had been thus inflicted, he recalled this injunction. But his action encouraged the distillers, and they got out injunctions against the collectors in suits scattered far and wide.

Early after the arrangement first made with Mr. Tice, such a suit had been brought

and injunction obtained; but then the government took hold of the suit, the district attorney appeared for the defence, and the distillers were defeated. Now the Attorney-General refused to direct the district attorneys to appear for the collectors, and Tice was left to get on as best he could under circumstances the most adverse, the collectors themselves being apparently relieved from all pressure and all interest on the part of the government in the question of Mr. Tice being paid for his meters. Thus what Mr. Tice was led to believe the government would be able to do and would do, to wit, secure to Mr. Tice the payment by distillers for the meters, was not only not done but was treated with an indifference that was most injurious. I say the government; I mean, of course, the Commissioner of Internal Revenue especially, of whom it is just to say that he found the business and the peculiar relation of the government to it had been so shaped by legislation and his rules and agreements as to make him feel it necessary to leave Mr. Tice to get what he could by his unaided efforts and pocket his loss for the rest.

The damages thus suffered by the company were urgently pressed by me upon the attention of the Commissioner from time to time in connection with the claim for meters left on hand; and at one time I did consider the matter of attempting a suit in the Court of Claims, but the claim which the company has equitably seems to depend in part at least upon some action by Congress; and, moreover, the company having been ruined financially and Tice having died, my efforts in the matter came rather necessarily to a close, and in fact I never received any direction to bring any suit in view of all the circumstances of the case, nor to apply to Congress for relief.

It certainly has been a very hard case to those who sought to provide by great skill and heavy outlay what the government desired, and most disheartening the result of all efforts made to obtain the remuneration promised, and the loss and damage most serious, and such, it seems to me, that Congress is justly called upon to look into the matter and make some suitable provision in a case of exceptional character, in that all that was done by Tice and the company in the premises was done for the exclusive benefit of the government, whose attempt to make the distillers pay for it was looked upon by them as unjust, and resulted in actual failure to do so to a very large extent.

E. N. TAFT.

Sworn to before me this 2d day of March, 1882.

SAM. H. VALENTINE,
Notary Public, N. Y. Co.

[SEAL.]

Affidavit of Erastus F. Mead.

STATE OF NEW YORK,
City and County of New York, ss:

Erastus F. Mead, being duly sworn, says:

I was president of the Tice Manufacturing Company from its organization until its sequestration, by order of the supreme court of the State of New York, as an insolvent corporation.

Said corporation was organized for the purpose of manufacturing spirit meters, under patents for the same granted to Isaac P. Tice, now deceased, and to supply the same for the use of the Government of the United States, to enable the revenue officers to collect the revenue tax upon spirits, &c., from distillers, &c. Said Isaac P. Tice assigned all his patents aforesaid, and his contracts or agreements with the Treasury Department of the United States Government for the furnishing of such meters, to said company at the time of its organization, and all meters manufactured under said agreements and contracts were in fact manufactured and furnished by said Tice Manufacturing Company.

Said company manufactured No. 1 meters for the government after the month of May, 1870, and had on hand and in store on the 8th day of June, 1870, fourteen and one-half sets of meters which were never delivered to distillers. The same fourteen and one-half sets of meters were also on hand and in the possession of said company on the 8th day of June, 1871, and are the identical meters for which compensation has been claimed and is now claimed by the said company, or its representative, against the Government of the United States, under the contracts of said government with Isaac P. Tice, aforesaid. Said meters were sold at sheriff's sale on execution against said company for about the sum of $100, after notice to the government, as old iron, and worthless for all other purposes than the measuring of spirits. Said sale was had during the summer of 1874.

That Isaac P. Tice aforesaid died at N. Y. City on or about the 9th day of November, 1875.

That said Tice Manufacturing Company made diligent efforts, after the revoking of the contracts aforesaid, to collect from the Government of the United States its claim for said meters, through Enos N. Taft, *esq., its counsel*, who prosecuted said claim

for many months, until his health failed. That owing to the illness of its said counsel, which lasted for over two years, said company was hindered in the prosecution of its said claim, and upon the recovery of his health by said Enos N. Taft, said company and its directors and officers had all become insolvent, and said corporation had been sequestered, and a receiver thereof appointed as aforesaid.

That, as deponent is informed, during the illness of the counsel for said company an attempt was made on behalf of the administrators of the estate of said Isaac P. Tice, deceased, to collect the claim for said meters in the Court of Claims of the United States, and that, upon appeal from the judgment of said Court of Claims, the Supreme Court of the United States affirmed the validity of said claim, provided the proofs had been adduced that said meters had been on hand and in the possession of said company, or of said Tice, on June 8, 1870, but that said administrators had failed to produce such proofs.

That said claim, so prosecuted by the administrators of said Tice, was not so prosecuted with the advice or consent of deponent, or of any officer, or of the board of directors of said Tice Manufacturing Company, nor has this deponent or said company ever recognized the right of said administrators to prosecute or collect said claim, but that the same is exclusively the property of said corporation for the benefit of its creditors and stockholders.

I have no interest individually in the prosecution of said claim.

E. F. MEAD.

Subscribed and sworn to before me this 6th day of March, 1882.

Notary Public, Westchester Co.

Cert. filed in N. Y. Co.

Affidavit of Francis W. Clark.

STATE OF NEW YORK,
City and County of New York, ss:

Francis W. Clark, being duly sworn, says: I reside at New York City, N. Y., and am engaged in business at No. 77 Warren street, New York City. During the years 1867, 1868, 1869, 1870, and 1871, and 1872, I was principal book keeper in the employ of the Tice Manufacturing Company, which was a corporation organized for the purpose of manufacturing and supplying spirit meters to distillers, under the contracts of Isaac P. Tice with the Government of the United States of April 17, 1867, and September, 1868.

I was familiar with the business done by said company and know from personal examination and inspection at the time that said company had on hand and undelivered at its factory in New York City, on the 8th day of June, 1870, fourteen and one-half sets of spirit meters. That said meters were never afterward delivered to distillers or sold by said company, and were in its possession also on June 8, 1871. That to my own knowledge said company manufactured no spirit meters for the government after May, 1870, and that the identical fourteen and one-half sets of meters, so on hand, and in possession June 8, 1870, are the same meters for which compensation was subsequently and (as I am informed) is now demanded of the Government of the United States, pursuant to its contract with Isaac P. Tice, aforesaid.

I further say that I have no personal interest in such claim against the United States.

F. W. CLARK.

Subscribed and sworn to before me this 6th day of March, 1882.

[SEAL.] JOS. HUSSON,
Notary Public, Westchester Co.

Cert. filed in N. Y. Co.

On the 8th June, 1870, at the time the order came to cease manufacturing, there was due for meters already supplied, and for which the distillers had paid the collectors of Internal Revenue a large amount of money, which was withheld by the collectors under various pretexts, and never paid to Mr. Tice or to the company, to wit, about $180,000. (See Schedule and statements :)

For meters on hand June 7, 1880	$25,000
For money collected by or deposited by collectors of internal revenue for meters ordered by distillers	180,000
For expenses incurred in making tests of meters for the United States, at Georgetown, D. C	5,000
For damages for delays and suspension, by order of the United States	25,000
For the skill, time, and labor expended in perfecting the Tice meters, for the benefit of the United States	
For interest on the foregoing amounts from the date, when due, to the date of payment	

Respectfully submitted.

THE TICE MANUFACTURING COMPANY,
By J. H. SYPHER,
Attorney.

47TH CONGRESS, 2d Session. } HOUSE OF REPRESENTATIVES. { MIS. DOC. No. 10.

VIRGINIA MILITARY DISTRICT IN OHIO.

PAPERS DESIGNED TO ILLUSTRATE THE NECESSITY FOR THE PASSAGE OF BILL H. R. 7015.

[To accompany bill H. R. 7015.]

DECEMBER 16, 1882.—Referred to the Committee on the Judiciary and ordered to be printed.

Mr. Robinson, of Ohio, introduced a bill (H. R. 7015) supplementary to "An act in relation to land patents in the Virginia military district of Ohio," approved August 7, 1882; which was read a first and second time, referred to the Committee on the Judiciary, and ordered to be printed.

The bill is as follows:

[Forty-seventh Congress, second session.]

H. R. 7015.

IN THE HOUSE OF REPRESENTATIVES, DECEMBER 11, 1882.

Read twice, referred to the Committee on the Judiciary, and ordered to be printed.

Mr. JAMES S. ROBINSON introduced the following bill:

A BILL supplementary to an act entitled "An act in relation to land patents in the Virginia military district of Ohio," approved August seventh, eighteen hundred and eighty-two.

Whereas an act entitled "An act to cede to the State of Ohio the unsold lands in the Virginia military district in said State," approved February eighteenth, eighteen hundred and seventy-one (Statutes at Large, volume sixteen, page four hundred and sixteen), ceded "the lands remaining unsurveyed and unsold" in said district, but did not include any lands previously entered; and

Whereas under said grant it was claimed, contrary to the provisions of said act, that if said survey contained more land than called for in the land warrants under which they were respectively made, the excess passed to the State of Ohio, and such claim, if sustained contrary to prior decisions of the courts of the State, would have taken from bona fide purchasers and occupants, long in possession, under titles which they believed valid, their lands; and

Whereas Congress by an act approved May twenty-seventh, eighteen hundred and eighty (Statutes at Large, volume twenty-one, pages one hundred and forty-two and one hundred and forty-three), "to construe and define" said act, declared valid all legal surveys returned with the proper land warrants to the General Land Office "on or before March third, eighteen hundred and fifty-seven, on entries made on or before January first, eighteen hundred and fifty-two, in pursuance of the act approved March third, eighteen hundred and fifty-five (Statutes at Large, volume ten, page seven hundred and one), prescribing said period of March third, eighteen hundred and fifty-seven, on such entries for such return, and for the procuring of patents, whether the amount of land included in any survey conformed to that called for in the warrant or not; and

Whereas an act entitled "An act *in relation to land* patents in the Virginia mili-

tary district of Ohio," approved August seventh, eighteen hundred and eighty-two (Statutes at Large, volume twenty-two, page three hundred and forty-eight), declared "that any person in actual open possession of any tract of land in the Virginia military district of the State of Ohio, under claim and color of title made in good faith based upon or deducible from entry of any tract of land within said district founded upon military warrant upon Continental establishment, and a record of which entry was duly made in the office of the principal surveyor of the Virginia military district, either before or since its removal to Chillicothe, Ohio, prior to January first eighteen hundred and fifty-two, such possession having continued for twenty years last past, under a claim of title on the part of said party either as entryman, or of his or her grantors, or of parties by or under whom such party claims, by purchase or inheritance, and they by title based upon or deducible from such entry by tax sale or otherwise, shall be deemed and held to be the legal owner of such land so included in said entry, to the extent and according to the purport of said entry or of his or her paper titles based thereon or deducible therefrom;" and

Whereas there are many persons in possession of other lands in said district, either entered or entered and surveyed, but which have never been patented, and in many cases in which said lands have reverted to the United States because the surveys and warrants were not returned to the General Land Office for patents prior to March third, eighteen hundred and fifty-seven, and in many cases said persons in possession of lands purchased them in good faith by contracts with persons claiming to be owners of the surveys or entries, but never received any deed of conveyance, and in other cases such deeds were lost or records destroyed, so that no title can be traced to an entry or survey: Therefore,

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That any person who has been, or may be, in the actual open possession of any tract of land in the Virginia military district of the State of Ohio, under claim and color of title made in good faith, which land has been entered or surveyed, and a record of which entry or survey was duly made in the office of the principal surveyor of the Virginia military district, either before or since its removal to Chillicothe, Ohio, such possession having continued for twenty years, under a claim of title on the part of said party either as entryman, or of his or her grantors, or of parties by or under whom such party claims by purchase or inheritance, by tax sale, or otherwise, shall be deemed and held to be the legal owner of such land so included in said entry or survey to the extent, and according to the purport of said entry, or of his or her paper titles; and patents may be issued as evidence of title, to persons entitled thereto under this act, or the act to which it is supplementary. And the Commissioner of the General Land Office is authorized to make all necessary surveys at the expense of the parties in interest, and ascertain the boundaries of lands to be patented under such regulations as he may prescribe.

Much information on the subject of the bill (H. R. 7015) above referred to will be found in the Miscellaneous Document entitled as follows: "House Mis. Doc. No. 42, Forty-seventh Congress, first session."

The judicial decisions, and other papers following, are designed to supplement the document above referred to in illustration of the necessity for passing the bill to which reference is made above.

JUDICIAL DECISIONS, ETC.

LAND WARRANT SURVEY—LANDS OF VIRGINIA MILITARY DISTRICT.

Supreme Court of Ohio, January Term, 1882.

JOHN A. COAN *vs.* WILLIAN J. FLAGG.

1. A survey, embracing sixteen hundred and eighty-two acres, on an entry of lands in the Virginia military district made on a warrant for five hundred acres, is, by reason of such excess, fraudulent as against the Government of the United States, and vests in the owner of the warrant no estate or interest in the land, which the Government of the United States, on principles of equity, is bound to protect by issuing a patent for the whole or any part of the survey.
2. Whether the act of Congress of February 18, 1871, granting to the State of Ohio lands in Virginia military district "remaining unsurveyed," passed title to lands covered by a previous survey voidable on account of excess in the quantity of land embraced, *quære?* But if it did not, the title to such land sold by the Ohio Agricultural and Mechanical College, grantee of the State of Ohio, to a purchaser for a valuable consideration, was ratified and confirmed to such purchaser by the fourth section of the act of May 27, 1880.

MAY 30, 1882.

Error to the district court of Scioto County.

The original action was brought by defendant in error against plaintiff in error to quiet his title to certain real estate within the Virginia military district, and known as survey 15882, containing 1,682 acres, and also known as lot No. 99, in the allotment of lands granted by the United States to the State of Ohio, by act of Congress passed April 18, 1871, and afterwards by the State of Ohio to the Ohio Agricultural and Mechanical College.

The plaintiff, Flagg, in his petition, claimed to be the owner of the legal title to, and to be in possession of, the whole of said tract.

The defendant, Coan, by his answer, disclaimed title or possession to that part of survey 15882 which is south of a line drawn from the northwest corner of survey 14304 to the easterly corner of survey 15771, and denying the plaintiff's title and possession to that portion of survey 15882 north of the line described, asserts title and possession in himself. The original suit was commenced in the court of common pleas of Scioto County, on the 19th of October, 1875. From the decree of the common pleas an appeal was taken to the district court, wherein a final decree was rendered in favor of the plaintiff, Flagg, at the December term, 1877. On a motion for a new trial by defendant, Coan, being overruled, a bill of exceptions, containing all the testimony, was made part of the record.

N. W. Evans, Duncan Livingstone, and James M. Dawson, for plaintiff in error.

STATEMENT OF FACTS.

This action involves the title and right of possession to the northern portion of survey 15,882, in the Virginia military district of Ohio, lying

north of the Ohio River, between the Scioto and Little Miami Rivers, and bounded on the north by a line drawn from the source of the Scioto River to the source of the Little Miami River, known as Ludlow's Line. The land in controversy is situate in Nile Township, Scioto County, Ohio. Aside from the question of title, and in case the finding of the court should be in favor of the plaintiff in error, there is a question as to the southeastern boundary, as claimed by the plaintiff in error.

A short review of the history of the general title to these lands may enable the court better to understand the questions in controversy.

SKETCH OF VIRGINIA MILITARY TITLES.

The lands in the Virginia military district of Ohio were granted by King James I, of Great Britain, to the colony of Virginia on the 23d of May, 1609, in the second charter granted to that colony by said monarch. This founded the only claim of the State of Virginia to these lands, and which has been recognized and admitted by the Congress of the United States.

An act of the legislature of Virginia of October, 1779, 10 vol. Henning's Statutes of Virginia, page 160, provides for bounties in lands to the officers and soldiers of Virginia in the Revolutionary War, both on Continental and State establishment, and prescribes the quantity each should receive, according to rank. Prior to the passage of this act, Virginia had promised land bounties to her soldiers on both State and Continental establishment, but the quantity was not definitely fixed till the passage of the act last referred to. This act does not prescribe from what particular lands the bounties shall be granted. According to its terms a subaltern officer of Virginia, in the Revolutionary War, under one of whom plaintiff in error claims, was entitled to 2,000 acres of land military bounty.

An act of Virginia in May, 1779, 10 vol. Henning's Statutes, p. 51, prescribed the manner in which officers and soldiers of Virginia, who served either upon State or Continental establishment, should procure their land warrants. The *modus operandi* may be briefly described as follows: In case of a commissioned officer (the case in point), he procured a certificate from his commanding officer that he had served the time prescribed by law, three years, stating his regiment and particular service. Armed with this certificate, the party applied to any court of record in Virginia, and by his own affidavit or otherwise satisfied the court of the truth of said certificate. Thereupon the clerk of the court applied to made a note of the proof on the original certificate and also in his order-book, and annually sent a list of such certificates approved to the office of the register of lands of the State.

With the endorsed certificate, the officer entitled to the bounty applied to the register of the land office of Virginia, who issued him a warrant, under his hand and seal of office, specifying the quantity of land and the rights upon which it was due, authorizing any surveyor qualified by law to lay off and survey the same, and requiring him to make a record thereof.

There was also a provision in the same act by virtue of which a party holding original warrants could lay them in one or more surveys, and where the survey or surveys were insufficient to fill the quantity named in the warrant, the party was authorized to exchange the original warrant or warrants for others calling for the quantity of land not already entered and divided into quantities, in separate warrants, to suit the

party holding the originals. In this way the name exchange warrant originated, and the one in question is an exchange warrant.

The same act also provided that all persons, including foreigners, should have the right to transfer warrants or certificates of survey of lands.

This statute provides also in regard to surplus in surveys, to the effects that no outside party should be permitted to claim the surplus except during the lifetime of the patentee or grantee, and not then in case any sale or conveyance of the land had been made from the patentee or original grantee. The party seeking to enter or take up the surplus must give one year's notice to the party in possession, who had that year to perfect his title to the surplus by covering it with a proper survey, on the same or another warrant, and in case the patentee could not defeat the claim for surplus by a resurvey or otherwise, he, and none other, could assign it in the tract held by him where he saw fit. The act also provided that a surplus of five per cent. should not be regarded.

An act of Virginia of October, 1783, 11 vol. Henning's Statutes, p. 353, prescribes the manner in which the warrants issued by virtue of the other acts referred to should be located, which is substantially the practice and manner used after the cession of these lands to the United States, and need not, at this point, be further referred to.

On the 1st of March, 1784 (1st vol. U. S. Laws, 472), Virginia ceded all lands owned or claimed by it northwest of the Ohio River to the United States. The cession was absolute, except as to so much of said lands as lay between the Little Miami and Scioto Rivers, which was reserved for bounties to Virginia troops upon Continental establishment, and as to these lands, since known as the Virginia Military District, the United States simply took the title in trust for the satisfaction of the bounties of the officers and soldiers of Virginia upon Continental establishment, whose bounties had not previously been satisfied by lands upon the Green and Cumberland Rivers.

To show how Congress regarded this trust, we quote from the ordinance of 1785 for ascertaining the mode of disposing of lands in the territory northwest of the Ohio River:

> Saving and reserving always to all officers and solders entitled to lands on the northwest side of the Ohio, and to all persons claiming under them, all rights to which they are so entitled, under the deed of cession executed by the delegates for the State of Virginia on the 1st day of March, 1784, and the act of Congress accepting the same; and to the end that the said rights may be fully and effectually secured, according to the true intent and meaning of the said deed of cession and act aforesaid, be it ordained, that no part of the land included between the rivers called Little Miami and Scioto, on the northwest side of the river Ohio, be sold, or in any manner alienated, until there shall first have been laid off and appropriated for the said officers and soldiers and persons claiming under them, the lands they are entitled to, agreeably to the said deed of cession and act of Congress accepting the same.—[Laws United States, volume 1. pages 563-69.

The mode of acquiring title to lands in the Virginia Military District, after the cession thereof to the United States Government, should be noticed.

The Virginia warrant holder would take his warrant to the office of the surveyor of the district and there make an entry of the lands he desired to take up with his warrant, not being already entered or surveyed, in the book of entry of the surveyor. Thereupon with this entry he would have a survey of the entered lands made by a deputy surveyor of the district, and returned to the office of the surveyor. Thereupon the surveyor would forward the survey to the General Land Office in Washington, upon which patent would issue to the owner of the survey making application therefor.

STATEMENT OF THE PLEADINGS.

The action began in the common pleas court of Scioto County, Ohio, was by William J. Flagg, plaintiff, *vs.* John A. Coan, defendant, a bill to quiet the alleged title and possession of defendant in error to survey 15,882, Virginia Military District, against the plaintiff in error. The suit was brought October 19, 1875. Defendant in error claimed the legal title to and that he was in possession of survey 15,882. He alleged that plaintiff in error had lately set up a claim to the northern portion of the survey, and was threatening to commit waste and trespass thereon, and praying that he be forever enjoined from asserting any claim to the premises. The plaintiff in error answered, setting up six defenses.

First, he disclaimed any title to that portion of survey 15,882 south of the black line running from the most westerly corner of survey 14,304 to the northeastern corner of survey 15,771. (See plat inserted in the printed record between pages 66 and 67.) He alleged that he was the owner of that portion of survey 15,882 north of the line described, and denied the title, ownership, and possession of defendant in error therein.

The second defense was adverse possession by plaintiff in error and those under whom he claimed, for more than twenty-one years, prior to the commencement of the suit.

The third defense, and most important of all, was the equitable title in plaintiff in error under and by virtue of a warrant, entry, and survey of the land claimed under the laws regulating the acquirement of titles in the Virginia Military District prior to 1871. He alleged that the warrant, entry, and survey were legal and valid, and had appropriated the land; that he was the owner of the entry and survey at the commencement of the suit, was entitled to a patent, and had applied for the same.

The fourth defense was that the only title of the defendant in error was a pretended deed from the Ohio Agricultural and Mechanical College, to him made, under the supposed authority of the act of the legislature of Ohio of April 3, 1873, accepting the cession of unsurveyed and unsold lands in the Virginia Military District of Ohio, and granting the same lands to the Ohio Agricultural and Mechanical College, and that at the time Congress passed said act of February 18, 1871, this particular land had been appropriated by a previous legal and valid entry and survey (being the same mentioned in the third defense), and that therefore defendant in error took no title by said deed.

The fifth defense was that defendant in error had procured his college deed by fraudulent and corrupt acts and practices upon the agents of the college, and that for these means the deed was void. The allegations of this defense furnish interesting reading matter, but need not be further quoted here.

The sixth defense was to the effect that the college, prior to making the deed to the defendant in error, had failed to comply with the act of April 3, 1873, requiring this land to be divided into lots of 500 acres each, to have plats and surveys thereof made and recorded in the office of the auditor of state, and to have the land appraised prior to sale and that for the want of these prerequisites the deed was void.

The plaintiff in error prayed the court to adjudge his title by entry and survey valid, and that defendant in error be perpetually enjoined from disturbing his possession. He also alleged that the pretended deed of the defendant in error from the Ohio Agricultural and Mechanical College was a cloud upon his title, and asked that the court should declare

the same invalid and void as against the premises claimed by plantiff in error.

The defendant in error replied to the second, third, and fourth, and demurred to the fifth and sixth defenses.

His reply to the second defense denied the twenty-one years' adverse possession, and said that even if such were the case he denied that plaintiff in error could acquire any title thereby, because, as he said, that until February 18, 1871, the title to said premises was, and continued to be, in the Government of the United State s.

His reply to the third defense was to the effect that the entry and survey of the Gordons and Heaton were invalid, and had been so declared by the Commissioner of the General Land Office, on account of defects in the assignment of the warrant and surplus in the quantity of land included in the survey.

His reply to the fourth defense was to the effect that his college deed was good and valid, or that plaintiff in error's alleged entry and survey had never appropriated the lands.

STATEMENT OF THE TITLE OF JOHN A. COAN.

The facts connected with the title of plaintiff in error are as follows

1st. A Virginia Military warrant exchange, No. 494, for five hundred acres, issued to Joseph, Sarah Ann, and Margaret B. Gordon, children and heirs of Francis Gordon, a child and heir-at-law of John Gordon, the only heir of Thomas Gordon, a lieutenant of cavalry for three years in the Continental Line, Virginia Military Establishment, dated 16th June, 1840, found on page 50 of the Record.

2d. An entry upon this warrant of 500 acres of land, dated December 18, 1849, No. 15,882, and being part of the same land in controversy, page 51, Record.

3d. A survey, No. 15,882, following said entry including the land in controversy, dated April 10, 1851, made by D. F. Heaton, a deputy surveyor, and recorded December 23, 1851.

4th. An assignment by Sarah Ann Dawson *ne* Gordon, and one of the owners of the warrant, George H. Dawson, her husband, of one-fourth interest in the warrant to David F. Heaton, dated April 18, 1849.

5th. A like assignment by Joseph F. Gordon, Margaret R. Francis *ne* Gordon, and Henry P. Francis, her husband, of one-fourth interest in the warrant to David F. Heaton, dated 16th May, 1849. Record, pp. 55 and 56.

6th. An assignment by Margaret R. Francis and husband of their entire interest in the warrant, being one-third, dated January 14, 1858, to David F. Heaton.

7th. An assignment by Joseph F. Gordon to David F. Heaton of his entire interest in the warrant 494 and survey 15,882, being one-third, dated January 14, 1858.

8th. The evidence of Leonidas C. Heaton, executor of David F. Heaton and his son, to the effect that he had seen an assignment from George H. Dawson and Sarah Ann Dawson, his wife, one of the Gordon heirs named in the warrant, of their entire interest in the warrant to David F. Heaton, his father, in the latter's papers, but that the same had been lost and could not be found.

9th. The record of the will of David F. Heaton probated in Scioto County, Ohio, November 11, 1871. This will authorizes the executor, Leonidas C. Heaton, to sell and convey the real estate of which he died seized, and of which *survey 15,882 was part.*

10. A deed in fee-simple from Leonidas C. Heaton, executor of David F. Heaton, for the north part of survey 15,882 was made to David M. Elliott, being the same premises claimed by plaintiff in error. Deed dated March 13, 1874, and recorded September 13, 1874.

11th. A deed from David M. Elliott to John A. Coan, plaintiff in error, conveying the same premises herein by him claimed. Executed September 15, 1874, and recorded November 10, 1875.

STATEMENT OF THE TITLE OF WILLIAM J. FLAGG.

The evidence of the title of the defendant in error to the land in controversy was in substance as follows:

1st. A deed from the trustees of the Ohio Agricultural and Mechanical College to William J. Flagg, dated June 10, 1875, and recorded July 22, 1875.

Plaintiff in error objected to the introduction of this deed in evidence as incompetent, without previous proof that the grantor in the deed had, before the execution of the same, complied with the requirements of the legislature of Ohio, in an act passed April 3, 1873, accepting the cession of Virginia military lands from the United States, but his objection was promptly overruled, as were all others made by him, and the deed was admitted in evidence.

To further support his title the defendant in error, Flagg, introduced evidence of the title to that part of survey 15,882 south of the line marked on the plat between pages 66 and 67 of the Record, as Coan's line, and which had no connection with the land in controversy except so far as it reflected on the question of the correctness of the boundary line in dispute.

To this evidence plaintiff in error objected as incompetent, but his objection was overruled and the evidence admitted. The evidence in question was—

2. A title bond from David F. Heaton to John A. Coan for 100 acres of land in this survey 15882, but south of both the red and black lines in controversy across the survey. This title bond was dated February 1, 1854. Record, p. 26.

3d. On the same day John A. Coan sold and assigned one-half interest in this title bond to Joseph M. Smith.

4th. On May 10, 1854, Joseph M. Smith assigned his interest in this title bond to William J. Flagg, and

5th. On the same date John A. Coan assigned his interest in this title bond to William J. Flagg.

6th. On August 2, 1854, William J. Flagg assigned this title bond to Nicholas Longworth. Assignments endorsed on the bond.

7th. Then defendant in error introduced a deed for the southern half of this survey 15882, not in controversy in this action, from David F. Heaton and wife to Nicholas Longworth, dated January 18, 1858. Plaintiff in error objected to the introduction of this deed as incompetent, but his objection was overruled and the deed admitted.

8th. Defendant in error then offered in evidence item 12 of the will of Nicholas Longworth, deceased, with item 2 of the first codicil thereto probated in Hamilton County, Ohio, February 17, 1863. The substance of this evidence was as to the will that the south half of survey 15882 covered in said deed from David F. Heaton to Nicholas Longworth was devised to Joseph Longworth and Larz Anderson, in trust for his daughter, Eliza J. Flagg, wife of defendant in error, William J. Flagg, *and by* the codicil this land went to Eliza J. Flagg absolutely during

her life, with power in her to dispose of the same by last will and testament.

The foregoing embraced all the evidence offered by defendant in error directly in support of his title.

DANIEL M'CARTY'S DEPOSITION.

After plaintiff in error had completed the evidence of his title, defendant in error undertook to impeach the same by the deposition of Daniel McCarty, a clerk in the General Land Office in Washington, D. C., together with Exhibits A, B, C, D, E, F, and G thereto.

The substance of the deposition and exhibits were as follows:

Witness had had charge of Division H, relating to the Virginia Military District, since 1857. He said that all the *decisions* of the Commissioner of the General Land Office were contained in letters written by him to parties interested. He, McCarty, wrote the letters. Exhibit "A" was a letter from Willis Drummond, Commissioner, to James M. Trimble, of Hillsborough, O., dated December 23, 1872, acknowledging receipt of a caveat against the issue of a patent on survey 15882 on account of a surplus of 1,282 acres, and notifying him that patent would not issue till the excess was explained, or otherwise patent would not issue for over 400 acres.

Exhibit B was a letter dated June 18, 1873, from W. W. Curtis, Acting Commissioner of the General Land Office, to L. C. Heaton, notifying him that on April 26, 1852, his testator had filed in the office for patent survey 15882, on Virginia Military warrant 494. That the application had been suspended for discrepancies in the manner of the warrantees and assignees, want of proof of marriage, &c., also that James M. Trimble, of Hillsboro', Ohio, agent of the Ohio Agricultural and Mechanical College, had filed a caveat against the issuing of a patent on the ground of surplus, and had filed a sworn survey of the land made by Thomas Keyes, a civil surveyor, showing 1,682 acres in the survey, or a surplus of 1,282 acres; also notifying Heaton that the validity of the survey would not be recognized under the circumstances, and that unless he denied the facts patent would be refused.

Exhibit C was a letter dated July 11, 1873, from Willis Drummond, Commissioner, to L. C. Heaton, notifying him that ninety days would be allowed him to substantiate his claims to survey 15882.

Exhibit D was a letter dated October 10, 1873, to L. C. Heaton, from Willis Drummond, Commissioner, to the effect that his application for patent for survey, 15882 was rejected.

Exhibit E was a letter dated October 29, 1873, from Willis Drummond, Commissioner, to L. C. Heaton, notifying him that the department would take no further action in regard to survey 15882.

Exhibit F was a copy of the resurvey of Thomas Keyes.

Exhibit G was a letter from Willis Drummond, Commissioner of the General Land Office, to David F. Heaton, dated October 26, 1871, recognizing the validity of survey 15882, and urging him to complete the evidence so that patent could issue.

In addition to the foregoing there was attached to the deposition of McCarty, as an exhibit and marked Exhibit G in the record, but wrongly so, a letter from S. S. Burdett, Commissioner of the General Land Office, to William J. Flagg, dated October 2, 1875, in which he recognizes the validity of the survey 15882 for 500 acres.

These exhibits were attached at the instance of Flagg, with the exception of the two last, which *were attached at* the instance of Coan.

The plaintiff objected to the introduction of this deposition and the exhibits thereto as incompetent, but his exception was overruled and the evidence admitted.

The vital question of the whole case is,

IS THE ENTRY AND SURVEY MADE IN THE NAME OF THE HEIRS OF THOMAS GORDON VALID?

If this question be determined by this court affirmatively, then the judgment of the district court must be reversed, for it decided the entry and survey wholly invalid.

After Congress had accepted the cession of these lands from Virginia, it passed various resolutions and acts concerning the same. The act of August 10, 1790, 2 vol. U. S. Laws, p. 179, provided for locations, entries, surveys, and patents on these lands.

The act of March 23, 1804, 3 U. S. Laws, p. 592, required locations to be completed within three years, and parties to return their surveys within five years.

Another act was passed March 2, 1807, 4 U. S. Laws, page 92. This extended the time for making locations to three years from March 23, 1807, and five years to return surveys.

In this act, on account of great litigation which had arisen between conflicting entries and surveys, what has since been known as the proviso of 1807 was incorporated.

This proviso reads as follows:

Provided, That no locations as aforesaid, within the above mentioned tract, shall, after the passing of this act, be made on tracts of land for which patents had previously been issued, or which had previously been surveyed, and any patent which may, nevertheless, be obtained for land located contrary to the provisions of this section shall be considered as null and void.

The time for making locations and returning surveys has been extended by Congress from time to time, as follows:

March 16, 1810, 5 and 7 years, 4 U. S. Laws, p. 281.
November 3, 1814, 3 and 5 years, 4 U. S. Laws, p. 714.
February 22, 1815, 2 years, 4 U. S. Laws, p. 805.
April 11, 1818, 3 years, 1 sess. 15 Cong., p. 37.
February 9, 1821, 2 years, 2 sess. 16 Cong., p. 10.
March 1, 1823, 2 and 4 years, 2 sess. 17 Cong., p. 73.
May 20, 1826, 3 and 5 years, vol. 1 G. S., 189.
April 23, 1830, 2 years, vol. 4 G. S., 396.
March 31 1832, 7 years, vol. 4 G. S., 500.
July 7, 1838, 2 years, vol. 5 G. S., 262.
August 19, 1841, 3 years, vol 5 G. S., 449.
July 29, 1846, 2 years, vol. 9 G. S., p. 41.
July 5, 1848, 2 years, vol. 9 G. S., 245.
February 20, 1850, 2 years, vol. 9 G. S., 421.
May 27, 1880, 3 years, 2 sess. 46 Cong., p. 143.

Each of these statutes, except the last, which is only one of construction, substantially re-enacted the proviso of 1807 before referred to.

The legality of the warrant is not questioned, nor that of the entry. That the survey was made within the time prescribed by Congress and properly returned is not questioned. That the survey was made by a deputy surveyor, and in due form and manner, is not questioned. That a computation of the calls of the survey, as recorded, will not show a surplus of over five per cent., is also proven by the evidence of John B. *Gregory (see page 67* of the Record), at the close of his examination in *chief.*

In fact, the only objection to the validity of the survey is an account the alleged surplus therein. The Commissioner of the General nd Office, the common pleas and district courts of Scioto County, decided this survey invalid and void on account of the surplus, in e of the laws of Virginia and of Congress, and the decisions of the ghest courts of Virginia, Kentucky, and Ohio, and the Supreme urt of the United States. The act of Virginia of May, 1779, 10 vol. nning's Statutes, p. 51, and before referred to on pages 2, 3, and 4 of is brief, provides that surplus should vitiate no grant or location, d provides how the surplus might be ascertained and disposed of, ving the owner of the survey the right to perfect his title thereto. his law of Virginia is a rule of property affecting this land as fully in ce to-day as any statute of the State or of the United States affect- g the same. When the United States took title to these lands from irginia on March 1, 1784, it was only the naked legal title in trust r the officers and soldiers of Virginia upon Continental establishment. ie right of these Virginia soldiers to have their bounties satisfied out these lands could not be defeated by any clerk sitting in an office in ashington and writing letters in the name of the Commissioner of the eneral Land Office.

But Virginia alone has not legislated on this question of surplus. Congress has also legislated on the question of surplus, a fact which was verlooked by the Commissioner of the General Land Office and the ourts below. In the act of May 20, 1826, 4 vol. U. S. Laws, p. 189, ection 2 reads as follows:

> That no patent shall be issued, by virtue of the preceding sections, for a greater quantity of land than the rank or term of service of the officer or soldier to whom, or to whose heirs or assigns, such warrant has been granted, would have entitled him to under the aforesaid laws of Virginia; and whenever it appears to the Secretary of War that the survey made by virtue of any of the aforesaid warrants is for a greater quantity of land than the soldier is entitled to for his services, the Secretary of War shall certify on each survey the amount of such surplus quantity, and the officer or soldier, his heirs or assigns, shall have leave to withdraw his survey from the office of the Secretary of War and resurvey his location, excluding such surplus quantity, in one body, from any part of his resurvey, and a patent shall issue upon such resurvey, as in other cases.

These sections clearly establish that the validity of a survey is not the affected on account of surplusage, and only give the Commissioner of General Land Office the right to refuse to issue a patent until a resurvey, including only the correct quantity authorized by the warrant, is made.

Under the proviso of 1807, a survey once made, no matter how informal, appropriated the land located and withdrew it from subsequent location.

So far as the defendant in error, Flagg, is concerned, since the cession of February 18, 1871, he cannot be regarded in any better light than a subsequent locator. We refer the court to the following cases in which the proviso of 1807 has been construed:

McArthur's heirs *vs.* Dunn's heirs, 7 Howard, 262.
Jackson *vs.* Clark & Ellison, 1 Peters, 628.
Galloway *vs.* Finley, 12 Peters, 264.
Parker *vs.* Wallace, 3 Ohio, 490.
Stubblefield *vs.* Baggs, 2 Ohio State, 217.
Thomas *vs.* White, 2 Ohio State, 540.
Price *vs.* Johnston, 1 O. S., 394. In this case, in quoting Justice McLean's opinion in Lindsay *vs.* Miller, 6 Peters, 666, there is an error in the printer on page 394, which makes Justice McLean say the contrary to what he *actually decided. The quotation* reads in Price *vs.* Johnston

"There can be no doubt that Congress did [not] intend to protect surveys which had been irregularly made, &c." The word *not*, in brackets, is not in Justice McLean's opinion.

McArthur's heirs *vs.* Gallaher, 8 O., 515.

Now as to the decisions of the Commissioner of the General Land Office, by which Flagg seeks to destroy the title of Coan.

The Commissioner, in his report for the year 1876, on pages 56, 57, and 58, speaking of unpatented lands in the Virginia Military District, of surplus therein, and of the claims of the Ohio Agricultural and Mechanical College thereto, says:

VIRGINIA MILITARY DISTRICT, OHIO.

This district, lying between the Little Miami and Scioto Rivers, northwest of the river Ohio, and estimated to contain some four million acres, was reserved by Virginia from the cession of 1783–'84 to the United States of what is known as the Northwestern Territory, for the purpose of satisfying the warrants issued or to be issued to the officers and soldiers of the Continental Line of said State, for services rendered during the war of the Revolution.

Three patents for 259¾ acres of land in said district have been issued, and the number of claims therefor is 61, calling for 13,441¾ acres, all which have been and continue suspended on account either of caveats filed against the satisfaction thereof, defects in the chain of title or heirship, or for the reason that the surveys contain a large excess of land over and above the quantity called for by the warrants in virtue of which the same purport to have been made.

On the 18th of February, 1871, Congress, by an act entitled "An act to cede to the State of Ohio the unsold lands in the Virginia Military District in said State," made provision that the lands remaining unsurveyed and unsold in said district be, and they are declared by said act to be thereby, ceded to the State of Ohio, upon certain specified conditions. These lands were soon thereafter ceded to the Ohio Agricultural and Mechanical College by act of the legislature of said State, official evidence of which is on file in this office.

It is estimated from such data as are attainable that between twenty thousand and thirty thousand acres of land in said district, apportioned among several hundred surveys, are still outstanding and unsatisfied, never having been returned to this office to be carried into patent; and efforts are now being made by parties acting as attorneys for claimants to have the same filed and patented.

The college above named contends that these unpatented surveys for the most part call for a large excess in the area of land actually included therein beyond the amount specified in the warrants upon which the same were made, and have produced satisfactory evidence in several cases showing by resurveys made upon the ground by competent civil engineers, and verified by their respective oaths, that such excess of land often amounts to from 50 to 500 per cent. over and above the area called for by the warrants in virtue of which such surveys purport to have been made.

It is further insisted by said college that all surveys should have been legally made, that is, for the precise amount called for by the warrants applied thereto; that by law no patent can be legally issued, where the fact is known, for any greater amount of land than is set forth in the warrant, and that therefore all such excess is really "unsurveyed" land, and, as such, the property of the college within the true intent and meaning of the said cession by Congress to the State of Ohio and that of the said State to the said institution, as above mentioned.

On the other hand it is claimed by the owners of such surveys that the act of issuing patents thereon is purely a ministerial duty; that the Commissioner of the Land Office must act from the face of the papers presented, and can exercise no judgment upon the subject, except as regards matters of form, and that patents are justly due for the lands called for by the surveys to the persons apparently entitled thereto.

The questions involved arose while Hon. Willis Drummond was Commissioner, who, upon full and careful examination of the subject-matter, decided that, while in the issue of the patents in question this office merely acted ministerially, and upon the face of the papers pronounced, and had no power or authority to determine the question of title to any excess of land in the said survey, yet it was the manifest duty thereof, upon general principles of right and justice, to withhold the issue of patents until the matters in controversy were settled either by a legislative interpretation of the said cession of 1871, or by proper and competent judicial decision. He accordingly declined to issue patents in the cases of surveys involving any considerable excess, first giving the parties in interest full opportunity to be heard before the office.

nd after such declension was made, the usual sixty days in which to take an appeal o the department. No appeal was ever made.

My immediate predecessor, Hon. S. S. Burdett, concurred in these views, and I see no good or sufficient reasons to change the actions had in the matter.

If it shall be decided in either of the methods above indicated that the excess in any unpatented survey is legally the property of the said college, I would then recommend, in all cases where the fact of such excess is established to the satisfaction of this office, that authority be given by law to the surveyor of the said military district to make, at the expense of the parties in interest, a resurvey of the lands claimed, excluding the excess in one body from any such part of the original survey as may be denied by the present proprietors thereof; and that a patent shall issue upon such resurvey as in other cases. This will leave the residue of said lands as the property of the institution in question.

If, however, it is determined that the surveys made are to be held as legal and valid so far as the locators thereof are concerned, and that the cession of 1871 had no reference to lands which were included in any survey, and that the patents must follow the same so far as the description of land is concerned, then the difficulty in the case will be removed, and all other requirements being satisfactorily answered, said surveys can be duly carried into patent.

It is proper to add in this connection that the surveyor of said district had by law no power or authority to make any surveys therein after March 3, 1857.

I am duly advised that the colle e in question designs to make resurveys of all the unpatented lands embraced in outstanding surveys, and expects to complete and file the evidence thereof by the 1st of January next.

This will serve to show that the Commissioner regarded himself only as a ministerial officer, and not a judicial one. That he is to be considered only a ministerial officer and without any judicial functions, has been repeatedly decided by the courts.

How Congress regards these entries and surveys may be seen by the ct of May 27, 1880.

As to the construction of the grant of February 18, 1871, by Congress o the State of Ohio, that remains for the courts; and the court of common pleas and district court of Scioto County, instead of depending on he *ex parte* statements contained in the letters of the Commissioner of he General Land Office, and deciding the case on the authority of these tatements alone, as they did, ought to have decided it on the merits of he entry and survey and the evidence of the ownership thereof. Had hese courts sought to have determined the validity of the entry and urvey on their own merits, instead of on the declarations of the Commissioner of the General Land Office, they could have found mines of udicial learning to have guided them to a correct decision. Had they ollowed the grand beacons of judicial authority scattered all along the ourse of years from 1807 down to the present time, instead of the farthing rush light of Daniel McCarty, we would have had no cause of complaint in this court to-day.

Having referred to the act of February 18, 1871. ceding these lands to the State of Ohio, it should be quoted at this point:

THE ACT OF FEBRUARY 18, 1871.

AN ACT to cede to the State of Ohio the unsold lands in the Virginia military district.

Be it enacted by the Senate and House of Representatives of the United States in Congress assembled, That the lands remaining unsurveyed and unsold in the Virginia military district, in the State of Ohio, be, and the same are hereby, ceded to the State of Ohio, upon the conditions following, to wit: Any person who, at the time of the passage of this act, is a *bona fide* settler on any portion of said land, may hold not exceeding one hundred and sixty acres so by him occupied, by his pre-empting the same in such manner as the legislature of the State of Ohio may direct.

Approved February 18, 1871.

The word "unsold," as used in this act, was utterly inappropriate. Not a foot of ground in this district was ever sold in the first instance, ut it was all given away in *military bounties*. Had the term "unap-

propriated" been used it would have been strictly correct. Doubtless the framer of the bill had in his mind other land districts in which Congress sold its lands. We think the court in passing upon this statute must necessarily construe the word "unsold" as though it read "unappropriated." Let it be given such construction, and under the construction given by the courts to the proviso of the act of March 2, 1807, all surveyed land, regardless as to the validity of the entry or survey, has been withdrawn from subsequent location, and as to all after claimants becomes the same as surveyed and sold land, and is not within the terms of the act of cession of February 18, 1871.

In construing the words "unsurveyed" and "unsold," the court will take into consideration the intention of Congress, the effect the act will have upon titles, and the object of the grant. Did it intend to convey to the State the surplus included in unpatented surveys, as well as the unsurveyed and unsold lands?"

The reasons stated for the passage of the act, as shown by the remarks made in the House and Senate upon the presentation of the bill, gathered from the Congressional Globe, were that the warrants for services in the Virginia Line upon Continental establishment had all been located and satisfied; that the tracts remaining unappropriated were composed of wild and barren hill lands, unfit for cultivation, and valuable only for the timber remaining thereon, and which was being rapidly destroyed by trespassers. The United States was unwilling to undertake to protect the value yet remaining in the unappropriated lands, and in order that they might be valuable to some one they were given to the State. The bill was presented in the House by the Hon. John T. Wilson, of the eleventh district, and its passage advocated by him and the Hon. Philadelph Van Trump, of the twelfth district. In the Senate the bill was presented and advocated by the Hon. Allen G. Thurman.

Can it be supposed that in the passage of the act Congress intended that the State, or its assigns, should have the right to file caveats against patents for all unpatented surveys containing surplus; that the Commissioner of the General Land Office, an appendage to the office of the Secretary of the Interior, should have the right and authority to decide all such surveys invalid, and by his own ministerial act change the title of this land to the college, subject only to the rights of squatters to pre-empt 160 acres? This is what the common pleas and district court of Scioto County decided.

There is a maxim that "the law favors quiet and repose;" but the two lower courts evidently overlooked it in rendering their decision, and considered that the title to every unpatented survey containing surplus should be held at the will of the Agricultural College and the Commissioner of the General Land Office.

There are over 270 unpatented surveys in the Virginia military district, nearly all of which contain surplus, and the greater part of which contain valuable farms. To say that Congress intended that the college should have the power to take up all the surplus in these surveys, seems absurd. It would have the effect to unsettle titles which have never been questioned in any court.

Consider the fact that by the passage of this act, Congress only intended to get rid of lands not required for the purposes of the trust for which it held them; to place them where they might become productive and tax-paying; that neither the State of Ohio or its college ever paid any consideration for the lands and had no equitable rights whatever in them; that the owners of these surveys had paid valuable considerations therefor either in services, blood, or money; and can it then

said Congress intended to give the State, or its assignee, a right ich the United States never claimed, and which it expressly pro- ted in the acts of 1826 and 1838, and which would, if carried to its gitimate result, unsettle many titles?

It was claimed in the court below that the survey was void because perated as a fraud upon the United States. In the court of common as plaintiff in error alleged in his answer that defendant in error, in curing the title from the college, had practiced stupendous frauds on the latter, and was ready with evidence and anxious to substanti- it; but the court said to him, it is none of your concern as to a fraud acticed by Flagg upon the college; you are not the party to complain; d sustained a demurrer to the fifth answer.

But here no fraud was practiced on the United States. It was ad- sed of the surplus, and the Commissioner of Patents refused a patent til the matter of the surplus was disposed of. Had the Commis- ner disposed of this surplus under the acts of May 20, 1836, July 7, 38, or the Virginia act of May, 1779, sect. 4, there would have been difficulty.

The surplus is not a fraud upon the college, for Congress reserved the rveyed and sold lands, and he has paid no consideration for the grant, aluable or otherwise, while the owner of this survey has.

The theory of the defendant in error was that the Commissioner of the eneral Land Office having refused to issue a patent, that was tanta- ount to a decision that the survey was fraudulent, and therefore the sur- ey being invalid the land passed to the college. The district court dopted this theory and decided the case upon it. In so doing it tterly ignored the uniform decisions of the courts of the highest esort in Virginia, Kentucky, and Ohio, and the Supreme Court f the United States, construing the proviso of 1807. It overlooked he fact that the Commissioner of the General Land Office is a mere inisterial officer and clothed with no judicial functions. It further verlooked the fact that he stated in his letters that the survey was per- ectly good for the number of acres named in the warrant, and it was nly on account of the surplus that patent was refused. It further verlooked the fact that instead of following the *dicta* of the Commis- sioner as a guide, it ought to have decided the question for itself, inde- pendent of his action. Ever since the settlement of this country and the establishment of courts, it has been considered their function to de- termine between different entries and surveys, and the Commissioner of the General Land Office has been guided by these decisions uniformly. If the owner of an unpatented survey could get the smallest 6 by 8 court in the United States to decide in his favor against a conflicting survey, all he had to do was to send an exemplified copy of the decree to the Commissioner of the General Land Office and the Commissioner would issue a patent in accordance with the decree. In this case the Com- missioner refused patent, leaving it to the parties to have their claims determined by the proper court, of Scioto County. That court, instead of determining the question by the flood of judicial light it might have had, simply followed the action of the Commissioner of the General Land Office, supposing it to be conclusive.

Another matter that may be looked at in the construction of the act of February 18, 1871, is this: is it to be presumed that Congress intended to place the owners of unpatented surveys having surplus at the mercy of the Land Office Commissioner, prompted by the greedy agents of the college, when that body undertook to protect the illegal interests of squatters and trespassers who had no shadow of title or equities in the

premises, no claim upon the government, and who were violating the laws? Yet as against the State of Ohio and its grantee, the college, is reserved the right of a *bona fide* settler at the passage of the act to pre-empt 160 acres in such manner as the State might prescribe. Does it not seem reasonable that if Congress were so tender of the *rights* (?) of squatters, who had no claim on it, that it intended to give the Commissioner of the General Land Office and the college, power to wrest from the owners of unpatented surveys containing a surplus, the lands for which they held equitable titles, for which they and their grantors had paid a valuable consideration, and place them in a worse condition than the squatters who had no rights, and still were allowed to pre-empt 160 acres?

A SURPLUS DOES NOT VITIATE A SURVEY.

The Supreme Court of the United States thoroughly considered and directly passed on the question in the case of Taylor *vs.* Brown, 5 Cranch, 249, 250, 251, and 253, and there following the doctrine and rules in Beckley *vs.* Bryan and Ransdale, Sneed's Kentucky Cases, 197, and Johnson *vs.* Buffington, 2 Washington, 116, held that surplusage did not vitiate or render a survey invalid. This case was decided at the February term, 1809. It is valuable as showing that at that time the old Virginia law of May, 1779, heretofore cited, respecting surplus, was held to be in force, and that its provisions governed cases of this character. This question arose before the court at a time when the attention of the public had been fully directed to this question of surplus, and the court says:

> No case exists, so far as the court is informed, in which, on a *caveat*, the quantity of land in the survey of the plaintiff or defendant has been considered as affecting the title, upon the single principle of surplus. Yet the fact must have often occurred.

The court goes on to show that these were the decisions of the courts of Kentucky and of Virginia both subsequent and prior to the Revolution, and cites precedents and cases. Those precedents have since been repeatedly followed by the same court, those of Kentucky and this State.

In Holmes *vs.* Trout, 7 Peters, page 208, a case going from Kentucky, the court says:

> It has long been a settled principle in Kentucky, that surplus land in a survey does not vitiate it; and such a survey was held to be made conformable to entry.

Laum *vs.* Latham, Wright's Reply, 309, decides that surplus in a survey is not subject to appropriation by a subsequent locator.

Gill *vs.* Towler, 3 Ohio, 209, was decided in 1827. There the court says:

> The error of a surveyor in placing his corners at a greater distance from each other than he intended, or in placing them somewhat out of the course he is calling for, so as to make an entry, by a survey of the ground, include too much land, has never been considered as affecting the location; if it did, by far the largest number of entries in the district would be void.
>
> * * * * * * *
>
> The defendant does not pretend that those surveys are injured by their surplus. But why not? It is because it appears of record that the owners preferred to take the quantity they were respectively entitled to, and no more; and because we are bound to attribute the variance, or excess, to the ordinary inaccuracy of measuring through a forest.

In this connection we desire to call the attention of the court to the fact that there was no authority of law for the resurvey of Thomas Keyes

ascertaining surplus; that it was made without any notice to the owners of the survey at the time made.

Moreover, in Gill *vs.* Towler (2 O., 210), the court says that—

> The legality of the entry must be determined by the courses and distances as found on record, and not by the remeasurement of the ground.
>
> * * * * * * *
>
> We do not distinguish between a call for course and distance, ascertained by the locator who makes the call, and a call for the recorded course and distance of an existing survey as ascertained by a former locator. In either case, the validity of the location, as far as quantity affects it, must be ascertained by the calls, and not by remeasurement.

The obvious justice of this rule will be apparent in this case, for the reason that the lines and corners of this survey 15,882 were, except upon the north, lines and corners of older surveys. (See testimony of Captain Barton, p. 42 of Record.)

The plaintiff in error objected to the testimony of Joseph M. Smith, surveyor, in testifying that he made a remeasurement of the survey and found a surplus of 1,302 acres (Record, page 38), but the district court, disregarding the authority of Gill *vs.* Towler, 2 O., 210, before cited, overruled the objection and admitted the evidence.

In making this survey the deputy surveyor of the United States for the district was governed by the corners, courses, and distances of surrounding surveys. If these were erroneous, is our survey for that reason invalid? If so, then this question might be investigated from one adjoining survey to another, until the surplus of every survey in the district, patented or otherwise, should be ascertained.

The most that the authorities representing the college have ever claimed is that under the cession of February 18, 1871, it is entitled to the surplus in existing unpatented surveys; but in this case the district court, utterly disregarding the rights of the owner of the survey, has given the whole of it to the college's grantee on account of surplus. On the contrary, the Commissioner of the General Land Office, in his alleged *decisions*, has uniformly recognized the validity of the survey to the extent of the 500 acres covered by the warrant. See his statement in Exhibit A to Daniel McCarty's deposition, Record, p. 83. See also his letter of date October 2, 1875, to William J. Flagg, on page 93 of the record, in which he states that the survey was irregular only beyond 500 acres, the amount called for in the warrant, thus clearly admitting its regularity for 500 acres, the number called for in the location.

In the same letter he promises to notify Flagg of further application for patent, evidently considering that the owner of the survey had a right to apply for patent for the number of acres he could properly locate.

We claim that under the construction given by the courts to the proviso of 1807 all lands in the district covered by irregular and defective surveys were as much withdrawn from subsequent location as if covered by regular and valid surveys duly carried into patent. That the term "unsurveyed and unsold lands," as used in the act of February 18, 1871, in view of the construction given by the courts to the proviso of 1807, must exclude any and all surveys and appropriations under Virginia military warrants, and that to give the State of Ohio or its assigns any right or title in the irregular surveys would require a subsequent act of Congress expressly conveying title to this class of surveys, or to the surplus therein, and there being no such subsequent grant, defendant in error has not, never had, and cannot have any title to the lands conveyed by this survey. If this position is correct, there is an end of the case, and the judgment of *the district court* must be reversed.

But for the sake of the argument, let us for a moment admit that the act of February 18, 1871, must be construed so as to give the surplus in unpatented surveys to the college, what, then, should the district court have done? It should either have permitted the owner of the survey to have resurveyed his location under the old statute of Virginia of May, 1779, prior to the cession to the United States, and gotten his quantity, excluding the surplus. Or it should have held his location valid for the number of acres in his warrant, and allowed him time to have made a resurvey, gotten his exact quantity, and excluded the surplus under the acts of May 20, 1826, vol. 4 U. S. Laws, p. 188, or under the act of July 7, 1838, vol. 5, 9 U. S., page 262.

It failed to do this, and for this reason, if none other, the judgment of the district court should be reversed.

ASSIGNMENTS OF THE WARRANT AND SURVEY.

It may, however, be argued against the plaintiff in error that though his survey was valid as to the 400 acres, yet he did not fully substantiate his title to it in that he did not fully indemnify Margaret B. Francis and Sarah Ann Dawson, as Margaret B. and Sarah Ann Gordon, original warrantees, and that the assignments by the warrantees are informal, and no assignment of the one-third interest of Sarah Ann Dawson to David Heaton appear.

No particular form of assignment is necessary. No written assignment is required. Lapse of time, coupled with payment and possession, is sufficient. After lapse of time and long possession an assignment will be presumed. (McArthur's heirs *vs.* Gallaher, 8 O., 512; Bouldin and wife *vs.* Massie heirs, 7 Wheaton, 122; Lewis *vs.* Baird, 111 McLean, 56; Duke *vs.* Thompson, 16 O., 34.)

But in this case the Commissioner did not refuse the patent on account of any irregularities or defects in the assignments of the warrant, but only on account of surplus in the survey.

THE DECISION OF THE COMMISSIONER OF THE GENERAL LAND OFFICE FURTHER CONSIDERED.

If the theory of the defendant in error be correct that this land passed to the State of Ohio by the cession of February 18, 1871, then the decision of the Commissioner of the General Land Office was void, as the United States had no interest in the land to be the subject-matter of a decision by the Commissioner.

The only remaining proposition to which the defendant in error is driven is that the title to the land was in the United States at the time of the decision of the Commissioner, and that by his decision he changed the title from the United States to the State of Ohio. This proposition is absurd upon its face, as the Commissioner possessed no power or functions which, by his own act, would enable him to transfer title. Either the title passed under the cession of February 18, 1871, or it is still in the United States, in trust for the owner of the survey.

In view of the Virginia act of May, 1779, the proviso of 1807 and the decisions of the courts thereunder, forming rules of property and muniments of title, the acts of May 20, 1826, and of July 7, 1838, we think this cannot successfully be maintained.

If, for the sake of the argument, it be admitted that the cession of February, 1871, conveyed this land to the State of Ohio, and with the decision of the Commissioner was equivalent to a patent, which we think

the court cannot find in any event, yet the equities of the owner of the survey can be asserted and protected.

Marquez *vs.* Frisbie, 11 Otto, 473.
Johnson *vs.* Tousley, 13 Wallace, 73.
Bird *vs.* Ward, 1 Missouri, 398.
Shepley *vs.* Cowan, 91 U. S., 330.
Danforth *vs.* Monical, 84 Ill., 456.

These cases are to the effect that notwithstanding the proper officers of the United States have acted, and patents to lands have issued, yet the equity of any third party may be protected and the holder of the land title by patent may be decreed to hold in trust for one having equities prior to the issuing of the patent. While we do not think there is any call for the administration of this principle in this case, yet out of extreme caution we have referred to the doctrine. The case last above referred to goes to the extent that the decisions of the register and receiver of the United States Land Office are not conclusive on the rights of individuals.

Upon this subject we also refer to the statutes of the United States, sections 2,447 to 2,455, Revised Statutes. Section 2,450 provides in what manner the Commissioner of the General Land Office shall decide upon unpatented entries and adjudge in what cases he shall issue patents. Section 2,451 provides that every such adjudication shall be approved by the Secretary of the Interior and Attorney General, acting as a board, and shall operate only to divest the United States of the title of the lands embraced thereby, without prejudice to the rights of conflicting claimants.

The latter clause was inserted in the statutes to conform to the decisions of the Supreme Court and courts of the last resort in the several States, of the tenor before referred to. (Brush *vs.* Ware, 15 Peters, 107.)

So in case the defendant in error relies upon the decision of the Commissioner as equivalent to a grant by the United States to him, in what better condition is he against the prior equity of the owner of the survey than he was before?

It may be claimed that the owner of the survey is not prejudiced by the action of the Commissioner and the lower courts; that he could surrender his entry, procure land scrip of the United States and locate land elsewhere. (Act of 31st of August, 1852, 10 Statutes, p. 143.)

This statute does not apply, for the reason that at the passage of that act the warrant in this case was not an "unsatisfied outstanding warrant," for which relief was provided in the statute, but had been satisfied by being located.

Should the owner of the survey undertake to procure the scrip referred to in this act he would be met by this objection by the Commissioner of the General Land Office. This act has a proviso to the effect that it should be taken as a full and final adjustment of all bounty land claims to the officers and soldiers, seamen and marines, of the State of Virginia, for services in the war of the Revolution, on condition that the State of Virginia should, by proper act of the legislature thereof, relinquish all claims to the lands in the Virginia Military Land District of the State of Ohio. This clearly shows that Congress, at that time, still recognized the trust in favor of the Virginia officers and soldiers.

There is another answer to this question still more forcible.

Section 3 of the act of May 20, 1836 (4 Statutes U. S., p. 189), provides "that no holder of any warrant which has been or may be located, shall be permitted to withdraw *or remove the same* and locate it in any

other land, except in cases of eviction, in consequence of a legal judgment first obtained, from the whole or part of the located land, or unless it be found to interfere with a location or survey."

Hence the locator is bound to hold to his location.

A sufficient answer to this objection, however, is that the locator is not bound to give up his location, and his assignee does not desire to do so.

THE SUSTAINING OF THE DEMURRER TO THE SIXTH DEFENSE.

Being in possession and claiming title to the land, it seems to us that Coan should have been permitted to show that Flagg's college deed was void, in order to remove a cloud from his, Coan's, title. Or even if the college had title, under the sixth defense Coan should have been permitted to show that for want of compliance with the act of the legislature of Ohio of April 3, 1873, respecting sales of college lands, the deed was void and conveyed no title.

Without the legal title Flagg could not have maintained a bill of peace, and his action must have failed whether he lacked that title on account of the college never having had any under the act of February 18, 1871, or having the title, failed to convey the same by want of compliance with the sections 4 and 5 of the act of April 3, 1873. (Thomas *vs.* White, 2 O. S., 540.)

THE DISPUTED SOUTHERN BOUNDARY.

A reference to the plat bound in with the record between pages 66 and 67 will show the difference between the parties as to boundary. The black line running from the three black oaks, northwest corner of survey 14,304, to the hickory and hornbeam, northeast corner of survey 15,771, is the one claimed by Coan. The red line running directly west from the three black oaks to the west side of the survey is the one claimed by Flagg. The call for this line in the deed of David F. Heaton and wife to Nicholas Longworth is "from the northwesterly corner of McCall's survey 14,304, west 330 poles to a hickory and hornbeam on side of a hill, most easterly corner to William McCall's survey 15,771." (Record, page 27.)

The call in the deed of Leonidas C. Heaton to David M. Elliott for this line is "from three black oaks on top of ridge northwest corner to survey 14,304, south 73 degrees 25 minutes west 316 poles, crossing several branches and ridges to a stone on the west bank of ravine, 10 poles north of a branch of Dog Hollow, in place of hickory and hornbeam east corner of survey 15,771."

The evidence shows that the true course of the line is as given in Leonidas C. Heaton's deed to David M. Elliott. The point of the controversy is that valuable stone quarries lie between the disputed lines. The Coan line, from the three black oaks to the hickory and hornbeam, is from monument to monument; that from the three black oaks 330 poles west is according to course alone, and finds no monument at its western limit.

The law in case of a conflict of this character is too plain to admit of an argument. Course and distance must yield to natural and artificial monuments.

Hence, if the court find the title of the northern portion of the survey to be in Coan, it must find the southern line as claimed by him. (*Nash vs. Atherton*, 10 Ohio, 167; Calhoun *vs.* Price, 17 Ohio State, 100.)

April 6, 1881.

MOORE & NEWMAN and W. A. HUTCHINS for defendant in error:

The objection to the relief sought by the defendant in error, relied upon mainly, if not entirely, is, that he did not have the legal title to the land in controversy. As the case was finally submitted, the entire scope of this objection was the alleged want of title in the Ohio Agricultural and Mechanical College, by which the lands were conveyed to Flagg, and upon which he mainly relied as the source of his title. Coming directly to the point, the contention of the plaintiff in error was that the premises in controversy are not embraced in the act of cession by Congress to the State of Ohio.

We do not understand that any question is made, or can be, as to the right of the United States to grant to the State of Ohio any of the lands in the Virginia military district remaining undisposed of, or not appropriated before that time in the manner provided by law.

From 1784, when the cession was made by Virginia to the United States, of the lands (among others) situated in what has since been known as the Virginia military district, the time was extended by acts of Congress from time to time until August 31st, 1852, within which the Virginia troops, upon continental establishment, could obtain warrants for their bounties and satisfy the same by the location and appropriation of lands in the district referred to. Under these provisions most of the persons entitled to bounties obtained their warrants and had the same satisfied out of the lands so set apart; and in 1855, by act of Congress, the holders of entries made before January 1st, 1852, were allowed until March 3d, 1857, to make and return their surveys and warrants. (See U. S. Statutes at Large, vol. 10, p. 701.)

August 31st, 1852, Congress provided, by act, that warrants issued or allowed before March 1st, 1852, were allowed to be surrendered for land scrip, *and the act was required to be taken as a full and final adjustment of all bounty land claims on the Virginia military district.* (See U. S. Statutes at Large, vol. 10, p. 143.)

In Jackson *vs.* Clark (1 Peters, 628), the U. S. Supreme Court recognized the validity of the limitation acts referred to.

And in Taylor's Lessee *vs.* Myers (7 Wheaton, 23), the court held that an individual could *abandon* his survey by not returning it to the land office within the time specified by law, &c.

There being, however, no claim that after giving to the persons entitled to bounties a reasonable time, as was done, within which to obtain their warrants and have them satisfied with lands, and after providing also for the satisfaction by land scrip of the warrants not already satisfied, it was not within the power of Congress to cede to Ohio the residue of the lands; and this having been done, the real question is, are the premises in controversy embraced in the terms of the act of cession?

I.

We agree with counsel for the plaintiff in error, that the language used in the act may not be very well chosen, or appropriate, to designate clearly the lands ceded to the State. Both of the terms used as descriptive, in view of the true situation of the lands, is, to say the least, somewhat indefinite. The term "unsold lands" would seem to imply that some had been sold, and yet, strictly speaking, none of the lands embraced in the Virginia military district, up to that time, had been "sold." The term was used, we suppose, to exclude from the grant all of the lands the legal *title to which, under the* provisions of the law, had

passed out of the government, and had become vested in another, as by patent issued. The courts had held that while provision was made for the appropriation of the lands by entry, survey and patent, and that this was the usual way for disposing of lands, still, if there had been no entry or survey, or if the entry and survey, or either of them, were defective, or were void, but the government had issued its patent granting the land, the title would pass, and the land could be treated in the broad sense as "sold" land. (Hoofnagle *vs.* Anderson, 7 Wheaton, 27; Stubblefield *vs.* Boggs, 2 O. St., 206. Thomas *vs.* White et al., 2 O St., 540.)

The term "sold," as contra-distinguished from "unsold lands," covered by the cession to the State, we submit, had reference to and embraced the lands for which the government had issued its patent, and thereby parted entirely with its title.

In 1871, when the act of cession was passed, most of the lands in the military district, at least the valuable portion of the same, had been fully appropriated to satisfy the warrants allowed for bounties, and patents had been issued by the government therefor; so that nothing remained in it in respect thereto that could be the subject of grant. And of course that class of lands would necessarily be excluded by the terms of the cession.

At the same time there was another class of lands in the district, the legal title to which still remained in the government; but with a view to their application to the satisfaction of warrants granted for bounties, everything had been done that would entitle the holders of the warrants to their patents, and nothing was left but to issue the same therefor; still, even in the broad sense, they could not be treated as "sold lands." And while this class ought not to have been the subject of cession to the State, strictly, they were neither sold or unsold lands, and, therefore, their exemption in the act of cession under the description of "unsold lands," was indefinite, and might lead to confusion. Hence, we suppose, the other term in the act, "unsurveyed lands," was used so as to embrace, in connection with the class first named, "unsold lands," all of the lands in the district intended to be ceded to the State.

The law authorizing the holders of warrants to locate the same ceased to operate January 1st, 1852, and since that time there has been no law which would authorize an "entry," and the most that could be done, if an entry had been made prior thereto, was to make and return their surveys. And on March 3d, 1857, even this right was terminated.

Prior to January, 1852, the district was open to locations and entries to satisfy military warrants, and by acts of Congress well-known rules were prescribed to regulate the conduct of the holders of warrants in making their entries and surveys, so as to avoid conflict or interference in respect thereto. The most notable of these was the *proviso* attached to the act of Congress passed March 2d, 1807, and continued in force as long as there was any law authorizing entries to be made. The proviso itself was suggested, doubtless, by the constant conflict that was occurring between the holders of warrants in locating the same, and in making their entries and surveys. It was to operate upon them, and was to obviate, so far as possible, the conflict so constantly occurring in respect to the entries and surveys then being made.

In the language of Chief Justice Marshall, in Jackson *vs.* Clark *et al.* (1 Peters, 638), "it was most truly an enactment of repose." It was intended as a prohibition upon subsequent locators from any interference, *or even inquiry in* respect to lands already entered and surveyed. As *to the subsequent* locator, the land was withheld from location. In

regulating the satisfaction of warrants by the appropriation of lands set apart for that purpose, Congress had power "to withhold from location any portion of the military land;" and having by the proviso referred to withheld from location all lands previously *patented* or *surveyed*, it would follow, necessarily, than any attempt to enter lands so expressly withheld from location would be null and void.

It is enough to know that such subsequent locations by the holders of warrants were a nullity, because Congress had so declared, and it had the power so to declare. (Stubblefield *vs.* Boggs, 2 O. St., 219; Jackson *vs.* Clark *et al.*, 1 Peters, 638–9.)

It is apparent, therefore, that the proviso of 1807 was intended as a rule for the control of the holders of warrants in locating and appropriating lands in the Military District in satisfaction of the same, and nothing else. It is a part and parcel of the law authorizing such locations, and prescribing how and when it may be done. And its only purpose was to withdraw certain lands from location, and prohibit the holder of a warrant from subsequently entering or surveying the same. Its entire scope was to operate upon and restrain the parties holding warrants in locating the same. It in no way, by its terms, affects the title of the government to the land, or its right to dispose of it, as it may see proper, or the right of any one acquired under the government to the land in any other way than by an entry and survey in satisfaction of a military warrant.

The conclusion, therefore, is irresistible that when, as in 1852, the right to enter and appropriate lands to satisfy military warrants ceased, or, at all events, in March, 1857, when the right to make and return surveys of lands previously entered terminated, the proviso of March, 1807, so far as it could operate upon subsequent transactions, was at an end. It had served its purpose, and had become *functus officio*. In 1852 Congress provided for the satisfaction of all the military warrants not already satisfied by the appropriation of lands, with land script, and thereby withdrew the military lands from appropriation for that purpose, and assumed control of it for some other purpose. And in so doing, all the rules prescribed for its appropriation, while subject to entry, survey and patent, to satisfy military warrants, ceased to operate, and it was for Congress to prescribe the mode by which the remaining lands could be appropriated. Whatever conflict there was, or could be among those who had attempted to locate and appropriate the lands to satisfy military warrants, while there was a law authorizing it, would have to be controlled by the acts of Congress in existence when such attempt was made, including, we may concede, the proviso of March, 1807; but as to the government, or those claiming under it by virtue of some appropriation, other than by entry and survey to satisfy a military warrant, such acts of Congress would in no way control.

II.

We do not understand that it is claimed in behalf of the plaintiff in error that the *proviso* of March, 1807, is to be applied in a controversy between the government and the owner of the warrant who has made an entry and survey at a time when he was authorized by law to do so, as it has been, or should be, between two conflicting entries made by the holders of warrants at different periods. Should it be, however, it is only necessary to examine the cases in which the very stringent rulings have been made by the *courts, so much* relied upon by counsel for

Coan, to satisfy any one that both upon principle and authority the rule can have no such application.

The proviso itself, it must be remembered, is merely a rule prescribed to regulate and control *the holders of warrants in entering and appropriating lands to satisfy the same.* Its chief, if not only purpose, was repose and the prevention of conflicting claims, so likely to occur in the attempts of parties to appropriate the same piece of land. Its manifest effect was, and so intended to be, to withdraw from subsequent entry and survey, land previously surveyed and patented, and almost in every respect to prevent inquiry on the part of the subsequent locater as to the validity of the previous survey or patent. The subsequent entry and survey is declared null and void, because Congress saw proper, having the power to do so, to so declare; *second*, because land already surveyed and patented is no longer land *subject* to entry and survey, and *third*, because the subsequent entry and survey of land already surveyed or patented is expressly prohibited. (Jackson *vs.* Clark *et al.*, 1 Peters, 638; Price *vs.* Johnson, 1 O. St., 394; Stubblefield *vs.* Boggs *et al.*, 2 O. St., 218.)

Based upon the reasons of the rule given, the courts, in controversies between the parties claiming under surveys and patents covering the same land, but made at different periods, have gone to great extremes in sustaining the previous survey, and in holding the subsequent survey or patent null and void. The cases already referred to, the more recent case in Ohio of Saunders *et al. vs.* Niswanger *et al.* (11 O. St., 302), and the various cases referred to by the court in delivering the opinions in the cases mentioned, will illustrate how far the courts have gone to sustain the prior and exclude the subsequent survey.

But it will be seen that all through the series of decisions referred to the ruling is limited to the rights of the owners of the conflicting surveys, and the effect of the proviso of 1807 upon them; and great care is observed to maintain the distinction that there is in a controversy between such parties, and one between the government and an individual who asserts title under or against it. There may be a good reason for not permitting a party who has a conflicting claim to property to interpose as an objection some defect of title, or fraud, as between his adversary and the government under which he claims, while as between the government and the latter no such reason would exist. But whether there is a reason for it or not under the proviso of 1807, as interpreted by the courts, the holder of the subsequent entry and survey is hardly permitted to raise any objection to the validity of the prior survey. And when the reason given, to wit, that the land, *as to him*, when his survey is made is not subject to entry, and he is expressly prohibited from making it, is considered, it is clear that, by implication at least, the right is reserved to the government to make the objection referred to, if any such exists.

In Jackson *vs.* Clark *et al.* (1 Peters, 638), Chief Justice Marshall, referring to the distinction mentioned, says:

> It may be that the defendants (the owners of the senior survey) may never be able to perfect their title. The land may be yet subject to the disposition of Congress. It is enough for the present case to say, that as we understand the act of Congress, it was not liable to location when the plaintiff's entry was made.

The same doctrine is held in Price *vs.* Johnston (1 O. St., 394), and the language of C. J. Marshall is quoted and approved. (See also Stubblefield *et al. vs.* Boggs *et al.*, 2 O. St., 218; Thomas *vs.* White *et al.*, 2 O. St., 540.)

III.

It is apparent that in 1871, when the act of cession to the State of Ohio as passed, the purpose of the United States was, by that act, to dispose f and transfer to the State all of the lands in the district not before hat time actually appropriated, as provided by law, to satisfy military warrants.

As long ago as 1852 the authority for entering these lands ceased to operate, and after 1857 there was no law by which entries made prior to 1852 could be surveyed and patented. In 1852 provision was made for satisfying with land scrip the unsatisfied warrants, and in 1857 the land office was closed. From that time until 1871 there was no provision of law by which a single acre of these lands could be obtained from the government. They had been withdrawn from location to satisfy military bounties, and there was no law authorizing their sale. They were wholly useless to the United States, and there was every reason why some definite disposition should be made of them, so that the government should be relieved of all burden in respect to every parcel in the district remaining under its control. And this, we submit, is just what was done by the act of cession. There was no reason why any portion of the land which really remained under the control, or was undisposed of by the government, should be excepted from the grant. And none was excepted. The grant is sweeping in its terms, and embraced every acre not already appropriated as against the government under the provisions of the law authorizing such appropriation. Whatever title or estate remained in the United States was granted to the State. The only limitation therefore there is upon the title so acquired by the State is the limitation that was upon the title of the United States at the time of the act of cession.

IV.

As against the government, was the land in controversy *appropriated* by the survey made in the name of the Gordon heirs?

We have seen that the proviso of 1807 was simply a rule to regulate the conduct of the holders of warrants in making their entries and surveys under the same, and had no application to the government in determining its rights in respect to the land sought to be appropriated; that its effect was merely to *withdraw* from subsequent entry and survey by the holder of a warrant lands already surveyed or patented, and to *prohibit* such holder from making a subsequent entry and survey thereon. But as to the government, the question remained open as to whether or not the *previous* survey appropriated the land. We have seen, also, that the manifest purpose of the act of cession was to transfer to the State of Ohio all the land remaining in the district not already appropriated, either by patent granted, or by a survey, *valid and legal*, not only as to subsequent locators under military warrants, but as to the government itself. And the important inquiry in the case is, was the land in question *appropriated* by a survey subsisting at the time of the act of cession *valid and legal as against the government?*

There is no controversy in this case between conflicting surveys based upon military warrants, and therefore nothing to be affected by the proviso of 1807.

It is a question simple and pure between the United States and the holders of the survey under whom defendant below claims. If it was a legal, valid, subsisting survey, such as would appropriate the land as against the government at *the time the act of* cession was passed, no

title would pass to the State, and none would pass o the college, or from it to plaintiff below. On the contrary, if the survey was not at that time a legal, valid, subsisting one, such as would *against the government* appropriate the land, whatever its effect would have been under the operation of the proviso of 1807 in a controversy between locator the land was subject to grant by the United States, and the title would pass under the act of cession.

It will be remembered that long prior to the act of cession, to wit, as early as March 3d, 1857, all laws providing for the completion and return of surveys in the district ceased to operate, and there was no provision of law in force that would authorize any act on the part of the owner of a survey, or any government official, in the way of correcting a survey, or in curing defects, or in relinquishing a portion of the land covered thereby, so as to render the same legal and valid to the extent of appropriating the land, when otherwise it would not be appropriated.

On pages 2, 3, and 4 of the brief of the plaintiff in error reference is made to certain acts of the Virginia legislature on the subject of the satisfaction of bounty warrants by the appropriation of certain lands set apart for that purpose, in which it is provided that no outside party should be permitted to claim any surplus contained in a survey, except during the lifetime of the patentee, or original grantee, &c.; and providing, also, that a surplus of five per cent. should not be regarded. Whatever effect the acts referred to had upon the lands entered under them, it is enough to know that they never had any effect upon the appropriation of lands in the Virginia military district to satisfy military warrants. Such appropriation was provided for and regulated exclusively by Congressional legislation. On page 17 of the same brief there is a reference also to an act of Congress passed May 20th, 1826, by which provision is made for the case in which a greater quantity of land than the rank or term of service of the officer or soldier to whom, &c., such warrant has been granted, would have entitled him to under the laws of Virginia; and it is argued that said act will control the government in respect to any surplus that there may be in the Gordon survey.

From a careful reading of this act, however, it will be perceived that the case provided for is the one in which, by a mistake, the warrant has been granted for more land than the rank or term of service of the officer or soldier entitled him to, and not the case of an attempted appropriation of a greater quantity of land than was called for by the warrant itself. And, besides, the clause referred to is, by its very terms, limited to patents issued by virtue of *section* 1 of the same act, and *that section* ceased to operate entirely June, 1829, so far as it authorized officers and soldiers to obtain warrants; and in June, 1832, for the completion of the location of the warrants; and in June, 1833, for the return of the surveys and warrants. (See vol. 4, U. S. Statutes at Large, p. 189.) And no subsequent act of Congress made the sections quoted by the plaintiff in error in his brief applicable to any other than patents issued by virtue of sec. 1 of the said act, approved May 20th, 1826.

And so also in regard to the act of Congress approved May 27th, 1880 (long since the determination of this action in the courts below). In none of its provisions does that act apply to the lands in controversy in this case. On the contrary, by the very terms of sec. 4, the tract in question is exempted from its provisions.

We repeat, therefore, that since 1857 there has been no provision of *law that could* in any way enable the Gordon heirs to perfect their survey, *cure any* defect or irregularity that existed in respect to it, or

any way so as to make it a valid, legal, subsisting survey
ıe *government*, such as would *appropriate* the whole, or any
he land covered by it, when it otherwise would not, nor
had that effect.
y must be adjudged as it stood after March 3d, 1857, when
he completion and return of surveys in the district expired
erms. If sufficient then, or on the 18th of February, 1871,
t of cession was approved, to *appropriate* the land in con-
to and against the United States, it never was or could be,
ult the title would pass by the grant to the State of Ohio.
"surveyed land," in the Virginia military district, may be
e had two significations depending upon the parties to be
"survey," as it was to be understood, by one who would
ue of a military warrant to enter and survey the land cov-
as "a *bona fide* attempt to locate lands under a warrant by
urvey." Because the "effect was to *withdraw* such lands
quent location upon another warrant, whether such entry
was valid or void." (Price *vs.* Johnston, 1 O. St., 397.)
the government, by the term "survey" was meant not sim-
de attempt to locate lands under a warrant by entry and
a *legal, valid survey*, such as would appropriate the land as
ıst the United States. If void, no title or interest, either
ıitable, would pass out of the government, but the whole
n in it, as it did before the attempt was made. "It has the
his only, to exclude every person except the legal holder of
from encroaching upon the land thus attempted to be ap-
oy subsequent locations." (See also Jackson *vs.* Clarke, 1
.)
terpart of the term "unsurveyed lands" used in the act of
wit, "surveyed lands," must be understood either in the
to it in respect to the holder of a warrant who would seek,
uent entry and survey, to appropriate the land covered by
ey, or in the sense that attaches to it where the rights of
ıent are to be affected by the act done.
ntion of the plaintiff in error is, that the term, as it is used
o the State, must be understood as contradistinguished from
art, "surveyed lands," as that term is understood in respect
s of a subsequent locator of a warrant upon the same land.
solutely essential to him that he should maintain such a
e can succeed in so doing, he may, or may not, obtain the
he judgment; but if he fail, he cannot possibly succeed in

nce by his counsel in his brief to the cases in which the
given to the term mentioned the signification claimed for it,
and while it may be difficult to harmonize them all, the rule
idered as well enough established, that the courts have gone
e verge of absurdity in applying the proviso of 1807 to sus-
ior survey. And while they have not done so in every case,
he reasons given by the courts, we need not care to complain
ings. (See Saunders *et al. vs.* Niswanger *et al.*, 11 O. St.,
e review of all the cases cited in the opinion of Justice

very one of the cases *referred to, in* which the meaning
the *plaintiff in error for the term* "surveyed lands," was
ntroversy was between conflicting entries and surveys, and
the respective locators of warrants were involved. In no

one case that we are aware of, certainly in no case cited by counsel fo Coan, or found by us, where the controversy has been between th holder of the survey and the government, or where the rights of th government in respect to the land were involved, or the question wa as to the appropriation of the land as against the government, has an court given to the term the signification which is claimed for it by th plaintiff in error. In no case has it ever been held that, by virtue o the proviso of 1807, the government is *prohibited* from interfering wit land sought to be appropriated by an entry and survey, or from enqui ing into the regularity, validity, or legality of the survey. And lea of all, is land covered by a survey without reference to its regularit its validity or legality, *withheld* from the control or subsequent appr priation by the government. On the contrary, such an enquiry, contro and right in behalf of the United States is fairly deducible from th decisions, and recognized by the courts in the very cases relied upon b the counsel for Coan.

The enquiry still remains, did the survey of the Gordon heirs appr priate the land in controversy as against the government, or so affec either the legal or equitable title to it, that it is no longer the subje of grant?

As to the government, the entry and survey are but the *preliminar* steps towards the appropriation of the land; but whether the proceed ings are to be consummated by which the appropriation is to becom complete, is certainly a matter beyond the mere entry and survey. Until the patent has issued, the land, to some extent at least, if no fully, is under the control of the government. Indeed, it has been sai that "if the patent has been issued irregularly, the government ma provide means for repealing it." (Miller *vs.* Kerr, 7 Wheat, 1; Thoma *vs.* White *et al.*, 2 O. St., 549.)

And if, therefore, until the patent has issued, the land is still unde the control of the government, there must abide in it the power to exam ine into the regularity and validity of the preliminary steps, and espe cially in respect to the entry and survey. The right to examine an inquire must imply the right to determine, and to accept or reject th entry and survey as valid and regular or otherwise. And upon the re sult will depend the issuing of, or refulal to issues the patent. This right to accept or reject as regular and valid, the entry and survey, may not be an unlimited one, or a right to be exercised arbitrarily. And while as against the government the courts may be powerless to compe the issuing of a patent, we may concede that cases may arise in which the determination of the government may be the subject of review by the courts. It is not necessary, certainly, in this case, that we should claim that the courts possess no such power.

We may grant, for the sake of the argument, that to constitute in its broadest sense an appropriation of the land in question, so as to leave nothing in the government to pass by the act of cession to the State, it was not necessary that the patent should have issued; but, certainly, it was necessary that the entry and survey should have been a valid, legal, subsisting one, as to and against the government itself, and so complete as to create in favor of the Gordon heirs a perfect, equitable title, one upon which, if it were not for the want of power in respect to the party to be affected, the courts would have predicated a decree for the legal title. But we may say, that in so liberal concession, we do not admit that the proviso of 1807 is to figure in the slightest. On the contrary, the rights of the parties are to be determined precisely as if *there had never* been any such proviso.

Was there then a valid, legal, subsisting entry and survey as to and inst the government, the effect of which was to give to the Gordon rs a perfect, equitable title to the land embraced in their survey?

First. The government itself has answered this in the negative. It s the right of the government to examine into the matter and deter- ne whether or not the entry and survey were made in accordance with : law; and it has done so, and we have the result in the record which as kept.

It is true that various objections are made by the counsel for Coan this action of the government. (1.) It is objected that the mode of of as to the determination of the government is incompetent. The position of Daniel McCarty, who had been a clerk in the General nd Office since 1852, and, ever since 1857, has had exclusive charge der the various Commissioners of all matters pertaining to the Vir- ia military district of Ohio, was taken, and he testifies that the only ord kept of the action of the General Land Office touching the tters involved is the correspondence between the clerk having charge the business, approved by the signature of the Commissioner, and orded in full on the letter-books of the office, and the parties to be ected by the action. These letters, so recorded and preserved, con- n the evidence of the action taken and the determination arrived at; d copies of the same, taken from the record and sworn to by the clerk, the evidence objected to. We submit that it is in every respect com- tent in that way to establish the action of the proper department of e government on the subject. (2.) Objection is made also as to the ne when the action of the government took place. The matter con- dered was something that had occurred prior to 1857. And the in- iry was not as to matters transpiring after the act of cession, but ng prior thereto; and the effect was simply to ascertain the status of e claimants in respect to the land in question at and prior to 1871. If eir entry and survey had been adjudged valid and legal, so as to give em a complete, equitable title, the patent would have issued, and the tle would then have related back to the time of the return of the sur- y; and in that event, there was nothing in the government, except e naked legal title, that could have passed to the State of Ohio.

The objection is based upon the idea that the determination of the ommissioner of the General Land Office had something to do with e *creation* of the title; but nothing of the kind is claimed as the result that action. It neither weakened nor strengthened the title of the tate or college. Our claim is, that if by the entry and survey the land suit was *appropriated*, even by a complete, equitable title as against e government, when in 1871 the act of cession was approved, there as nothing, except the naked legal title in the government, and noth- g would pass by the grant. And all that was done by the Commis- oner was simply to pass upon and determine, when the application r a patent was made, whether or not the entry and survey created ch an equity as would entitle the holder to a patent for the land. nd this was what was done, and no more. No one has claimed that e decision of the Commissioner was equivalent to a patent to the State Ohio. Its title came by the act of cession, and the effect of the de- sion of the Commissioner was simply the rejection, as illegal and invalid, the survey of the Gordon heirs.

(3.) It is objected also that the Commissioner of the General Land ffice *alone* could not decide upon the legality of the entry and survey, nd that sections 2447, 2455, 2450, and 2451, U. S. R. S., required that e should act in conjunction *with the Secretary of the* Interior and the

Attorney-General. We submit, that none of these sections sustain the objection made. They have reference to another class of cases, especially sections 2450 and 2451, which are the only ones that bear upon the subject.

The letters of the Commissioner will show that an appeal could have been taken to the Secretary of the Interior, and 60 days were given to Heaton within which to take his appeal; but none was taken. We maintain, therefore, that the usual and ordinary course was taken to obtain the determination of the government, acting through the proper department, in respect to the legality or validity of the survey, and that the decision was adverse.

Second. But even if the Commissioner had no power to act, or if his action was informal and irregular, or if it is true that his decision is not final, the same conclusion must be reached by any court having jurisdiction to determine the question. The legal title to the property involved remained in the government, and the most that can be claimed is, that it held it subject to the equities that existed in favor of the Gordon heirs. These were equities, if any existed, *against the government*, and in favor of the parties who were attempting by an entry and survey to appropriate a portion of the lands belonging to it.

The warrant under which it was sought to make the appropriation called for 500 acres of land, and no more. To that extent it was authority for the appropriation of the lands in the Virginia military district, and beyond that it conferred upon the holder no authority whatever. Without such a warrant no entry or survey could be made at all; and with such a warrent, the authority to make the entry and survey was limited to the number of acres called for by the warrant. An entry and survey of more land than was called for by the warrant was just as unauthorized as to the excess as an entry and survey without any warrant whatever. And this was the argument that was used in Clarke *vs.* Jackson *et al.* (1 Peters R., 635), the weight of which, as Chief Justice Marshall said in deciding the case, "the court felt," and had "bestowed upon it the most deliberate consideration." But the controversy in that case was between parties claiming under entries and surveys made at different periods upon the same land; and in view of the proviso of 1807, notwithstanding the senior survey was based upon a warrant *already satisfied*, the subsequent survey was held void; because, as was said, *as to him*, at the time he made his survey the land was *withheld* from entry, and he was *prohibited* from making his survey. While so holding, however, the court recognized the difference between that class of cases and those where the question was between the holder of a survey based upon a warrant already satisfied and the government. (See the language of the court, on pages 638–9.)

The government refused to carry the survey into grant, and to issue to the Gordon heirs a patent for the land covered by it, because, with a warrant calling for 500 acres, two entries and surveys were made, one for 400 acres, so called, covering the land in controversy, but embracing, in fact, as ascertained by actual survey, 1,682 acres of land; the other for 100 acres, so-called, but embracing, by actual survey, 517 46-100 acres. In the 400-acre survey, so-called, for the attempted appropriation of the 1,282 acres in excess of said 400 acres, there was no authority or warrant whatever. The owners of the warrant were in no way entitled to any part of said excess, and there was certainly no reason why the government should be deprived of it. As to the 1,282 acres, no equity existed or could exist in favor of the holders of the survey, and *none could grow* up against the government. Upon what, then, could

rdon's heirs predicate any claim to it? But the claim of Coan seems be that, inasmuch as the warrant was authority for appropriating 400 res covered by the survey, the surplus must go along with it; or, if at is not his claim, it is, that with an authority to appropriate 400 res of land, you may appropriate 1,682 acres, and still, even as to the vernment, that is to be immediately affected by it, the survey is in no ay vitiated. The mere statement of either proposition shows its ab- rdity. It must be borne in mind that the most that can be claimed , that there had been an *equitable* appropriation of the land in ques- on as to the government, and therefore, at the time of the grant to e State, the government had nothing except the naked legal title, at it could grant. An *equitable* appropriation must arise out of or be sed upon equitable principles; and what equity is there in compel- g the government to give up 1,682 acres to a party who has a claim on it for 400 acres? Or in awarding to a claimant 1,682 acres, because e has a warrant that entitles him to 400?

The brief for Coan contains a reference to quite a number of cases, in hich it is said a surplus in a survey does not vitiate it. And that ere can be no entry or survey of the surplus so as to deprive the older of the survey containing the surplus in it. We have no doubt that ecisions to that effect can be found. But as to whom does such doctrine pply? Not the government, certainly, that is to be affected by it, where patent has issued; but to third parties, who are mere volunteers in behalf f the government, or are seeking to interfere and appropriate land that ey are *prohibited* from interfering with, as they were by the proviso so ften referred to. But besides, the cases in which the doctrine has been cognized, are those in which but a small quantity of surplus land was mbraced, such as might naturally, by mistake or error in making the rvey, be included. But no case has been, or can be found, we appre- end, where the surplus is more than *three times* as much as the quan- ty authorized to be appropriated, and the rights of the government re directly involved, to sustain so startling a proposition.

But it is argued that the survey, if vitiated at all, is only vitiated to he extent of the surplus; 400 of the 1,682 acres covered by the survey, is claimed, is in equity appropriated to satisfy so much of the war- nt. But the trouble is, which 400 of 1,682 acres is so appropriated? ossibly, while there was a law in force which authorized entries and rveys to be made, and lands to be appropriated in that way, to tisfy military warrants, if the government had refused on account of he surplus to carry the survey into grant, the warrant might have been ithdrawn, and a survey, embracing the proper quantity, made. But here is no law in force, and has not been, at least so far as these lands re concerned, since 1857, to warrant any such action. And the result , that since the law ceased to operate, and expired by its own limita- on, the only relief that a party can have, if he has failed within the me limited to have his warrant satisfied by valid survey with the land the district, is to have it satisfied with land scrip. The provision re- rred to is ample and complete to cover any such case as the one in- olved. And if it were otherwise, the party who has embraced so much rplus land in his entry and survey as to justify the government in fusing to carry it into grant, is the one, if anybody, that should suffer.

But we plant the right of the government to reject the survey entirely on a much higher principle, and could go far to justify it even in a e where the government alone was not concerned, but where the hts of a subsequent locator were involved, although it is by no means quired that we should maintain the *latter branch* of the claim.

Judge Ranney, in delivering the opinion of the court in Price *vs.* Johnston, (1 O. St., 397), in referring to the conflicting decisions as to the import of the proviso of 1807, and in endeavoring to reconcile them, says it can be done by "holding that every *bona fide* attempt to locate lands under a warrant by entry and survey, has the effect to *withdraw* such lands from subsequent location upon another warrant, whether such entry and survey is valid or void." And the *bona fides* of the senior entry and survey should have much to do, certainly, in withholding the land from subsequent survey. But if, as between conflicting surveys, the *bona fides* of the entry and survey should be an important element, how much more should its effect be in a controversy between the locator and the government, in which it is sought, upon *equitable considerations*, to appropriate a portion of its lands?

It might be that the owner of a warrant, acting in entire *good faith*, could embrace a small quantity of surplus land in his survey, and no doubt it has been frequently done; but when a warrant callling for 500 acres is used as the foundation of two surveys—one for 400 acres and the other for 100—and by actual measurement the former is made to cover 1,682 and the latter 517 46-100 acres, the presumption of *good faith* or *innocent mistake* is overcome, and the very reverse must be the presumption. In fact, the attempted appropriation of the amount of land embraced in the two surveys, to satisfy a military warrant calling for five hundred acres, and no more, upon its very face is a most arrant fraud upon the government; a fraud so palpable and glaring that out of such a transaction, in the language of Judge Reed, "no equity can ever blossom."

The government having ignored the survey, and refused *absolutely* to carry it into grant, and there being no equity in the claim, and the survey itself being so strongly tainted with fraud, the conclusion is irresistible that at the time of the act of cession to Ohio the land in question was in no way appropriated, either legally or equitably, to satisfy the warrant of the Gordon heirs; and it was therefore the subject of grant by the government, and would pass by the cession to the State.

V.

The question raised by the ruling of the court upon the demurrers to the defenses of the plaintiff in error need not require much space for discussion. Coan in no way connected himself with the Ohio Agricultural and Mechanical College in respect to the land, or its title thereto, and yet in his *fifth* and *sixth* defenses he attacks the title of Flagg acquired from the college. In his fifth defense he alleges that the title from the college was acquired by *fraudulent and corrupt acts* practiced by Flagg, and in his sixth defense he alleges that there was a *fraudulent combination and conspiracy* between Flagg and the trustees of the college, by which the title was obtained. And suppose either or both of them were true, how did it affect Coan? At best, the matters stated could only be the cause for setting the deed aside at the instance of the proper parties; but the deed itself was not void. Coan had no right to raise any question in respect to the mode by which Flagg acquired his title from the college, and for that reason his defenses were not sufficient.

Several objections were made during the progress of the trial by Coan in respect to the introduction of evidence, and when the objections were overruled, *exceptions were noted*, as shown by the bill of exceptions, but no exception was, in fact, *taken* to such rulings in this bill of exceptions. *The only exceptions* saved by bill of exceptions was as to the ruling of

ɔurt in overruling the motion of a new trial. But if we were mis- in this, and the questions are before this court for review in ct to the rulings of the district court in the admission of evidence ted to, it is sufficient for our purpose to say that all of the evi- introduced upon the trial is embraced in the bill of exceptions, f any evidence was introduced that was not strictly competent, a r that we do not at all concede, the evidence so admitted was un- tant, and could in no way have contributed to bring about the . It was as to collateral and immaterial matters, and in no way ient to the material questions involved. The evidence objected to as well have been omitted, and the finding would have been the ; and this is apparent from all the evidence introduced. Should erefore, even be found that some of the evidence objected to and ted ought to have been excluded, the plaintiff in error has not prejudiced by such admissions.

ILVAINE, J.:

ch party traces his title to the cession of territory northwest of the River by the State of Virginia to the United States, in 1784 (1 J. S. Laws, 472), whereby lands situate in this State, between the o and Little Miami Rivers, were devoted to the satisfaction of war- , as bounties, issued by the State of Virginia to troops for services e Revolutionary War, on the continental establishment.

gg, plaintiff below, claims title under the act of Congress of April 71 (16 vol. of Statutes at Large, 416), which reads as follows:

enacted by the Senate and House of Representatives of the United States in Congress led, That the lands remaining unsurveyed and unsold in the Virginia Military t in the State of Ohio be, and the same are, ceded to the State of Ohio upon nditions following, to wit: Any person who at the time of the passage of this a bona-fide settler on any portion of said lands may hold not exceeding one ed and sixty acres so by him occupied, by his pre-empting the same, in such r as the legislature of the State of Ohio may direct.

complete his chain of title, the plaintiff below claims further un- grant from the State of Ohio to the Ohio Agricultural and Me- ical College, and from the college to himself.

an, the defendant below, claims title under an exchange military ant No. 494, issued by the State of Virginia on the 16th day of , 1840, to the children and heirs of Francis Gordon, a child and of John Gordon, the only heir of Thomas Gordon, who was a lieu- nt of cavalry in the continental line of Virginia troops in the Revo- uary War, for five hundred acres of land, to be laid off in one or surveys.

entry, No. 15882, purporting to cover five hundred acres of land r the foregoing warrant, No. 494, made on the 18th of December. by the said heirs of Francis Gordon and one David F. Heaton, an nee of part of said warrant.

survey under said entry, No. 15882, purporting to contain four lred acres—375 acres for the heirs of Francis Gordon and 25 acres aid Heaton—made by said D. F. Heaton, a deputy surveyor of the ict, on the 10th day of April, 1851, giving the metes and bounds e lands surveyed, which was duly recorded on the 23d of Decem- 1851, and mesne conveyances from the heirs of said Francis Gor- and said Heaton to himself. It appears, however, that this survey, 15882, embraces, in fact, one thousand six hundred and eighty-two s.

patent has ever been issued on *this entry* and survey, for the

reason, among others, that the quantity of land embraced is grossly in excess of the quantity named in the warrant No. 494.

Upon these facts the main questions in the case arise:

1st. Did the entry and survey invest the owners of the warrant or their assignee with an equitable interest in the lands conveyed? If, as against the United States, an equitable estate had passed to the defendant below, it may be admitted that the subsequent grant by the United States to the State of Ohio did not divest such estate. Upon general principles, it cannot be doubted that a fraud so palpable as is shown to have been attempted against the laws of the United States by this entry and survey would have avoided the survey entirely. The excess is so great that no reasonable supposition can arise that it occurred through an honest mistake. True, the United States, against whom it was intended, might waive the fraud and relieve the party from its consequences, in whole or in part; and it is claimed that such was the effect of the act of Congress of July 7, 1838 (vol. 5, Statutes at Large, 262), the second section of which provides "that no patent shall be issued, *by virtue of the preceding action*, for a greater quantity of land than the rank or term of service of the officer or soldier to whom, or to whose heirs or assigns, such warrant has been granted, would have entitled him to under the laws of Virginia and of the United States regulating the issuing of such warrants; and whenever it appears to the Secretary of War that the survey made by any of the aforesaid warrants is for a greater quantity of land than the officer or soldier is entitled to for his services, the Secretary of War shall certify on each survey the amount of such surplus quantity, and the officer or soldier, his heirs or assigns, shall have leave to withdraw his survey from the office of the Secretary of War and resurvey his location, excluding such surplus quantity, in one body, from any part of his resurvey, and a patent shall issue upon such resurvey as in other cases," &c. Clearly this section forbids the issuing of a patent for a greater quantity of land than the officer or soldier was entitled to under the laws regulating the subject; and by fair construction it would seem that the relief provided was only in cases where the quantity named in the warranty was in excess of the quantity to which the warrantee was entitled, and not to cases where the survey was in excess of the warrant. But however that may be, the operation of the section is expressly limited to cases arising under the preceding section of the act, and the operation of that section expired by its own limitation on the 10th of August, 1840. If it be claimed that the operation of section two of this act was extended by reason of the extension and revival of the first section by the act of August 19, 1841 (vol. 5, U. S. L., 449), it is, at most, sufficient for this case to say, *that the "preceding section" thus revived and continued in force for a limited time, contained the sole authority for making and returning entries and surveys under these Virginia warrants, and since March 3rd, 1857, there has been no authority for making or returning surveys under any circumstances whatsoever.* So that, at all events, the right to relief against excessive surveys granted by the 2d section of the act of 1838, whatever it may have been, has not existed since 1857, even if it be conceded that it was continued at all after 1840. See Statute Mar. 3, 1855 (10 vol. Stat. at Large, 701). Again, it is claimed that Congress has recognized the validity of surveys within the district, notwithstanding the quantity embraced in the survey was excessive, by the *proviso* in the act of March 23, 1807 (4 U. S. L., 92), which reads as follows: "Provided, that no locations as aforesaid, within the above-mentioned *tract, shall,* after the passage of this act, be made on tracts of land for

atents had previously issued, or which had been previously
.; and any patent which may, nevertheless, be obtained for
ated contrary to the provisions of this section, shall be con-
as null and void."

undoubtedly been settled by repeated decisions that under this
hat excess in the quantity of land embraced in a survey does
te the survey so as to authorize a subsequent location or entry
other warrant. But it has not been settled, nor was it the in-
of Congress, by this proviso, to require a patent to be issued on
sive survey.

ween locators, lands actually surveyed, whether the survey was
nt or not, were withdrawn from subsequent entry and survey
previous survey should be withdrawn or set aside. This legis-
as in the interest of peace, as between locators of warrants, and
se provision. But to hold that Congress intended, as against
ernment of the United States, to declare that excessive surveys,
by mistake or design, should be binding, so as to establish an
e estate in the holder of the warrant and entitle him to a patent
hole or any part of the survey, would do violence to the lan-
the *proviso*, and would show a disregard for the faithful exe-
the trust imposed by the cession of these lands by Virginia to the
States, amounting to wickedness.

as we are advised, we know of no rule or practice, based either
ngressional enactment or principles of justice, by which the
States Government could be justified in recognizing in the de-
below an equitable estate in the whole or any part of the lands
e, arising upon an entry and survey so palpably fraudulent as
on which he relies, and, therefore, it was within the power of
s, on the 18th of April, 1871, to grant to the State of Ohio the
dispute, free from any claim of right or interest therein of the
nt below.

aimed, however, that these lands were not conveyed, or intend-
conveyed, by the act of April 18, 1871. The following is the
on of the lands intended to be conveyed by that act, to wit:
nds remaining unsurveyed and unsold in the Virginia military
n the State of Ohio."

e part of the plaintiff in error, it is contended that the word
eyed" is used in this statute as the counterpart of the word
ed," as used in the proviso in the act of 1807, which has been
d to mean "surveyed in fact," whether the survey was valid
ble in point of law. On the other side it is contended that the
of Congress was to grant to the State all the lands remaining
strict of which the United States had the power of disposition,
he word "unsurveyed" included land covered by an invalid or
vey. *This construction is supported strongly by the facts that sub-
o the year* 1852 *no entries under warrants for military services in
were authorized, and subsequent to* 1857 *the right to make surveys
nt of such warrants ceased*—provision having been made by
s for the satisfaction of outstanding warrants by other means—
; prior to the act of 1871, Congress had provided no other means
lispositions of lands remaining subject to its power of disposi-

asmuch as Congress, by the act of May 27, 1880 (2nd session 46th
s, Statutes, page 142), has declared the true intent and meaning
ct of 1871, to be, that the word "unsurveyed" excluded lands
ld been included "in *any survey*," *whether* valid or invalid; and

as we do not deem it necessary to the decision of this case to declare the effect of the act of 1871, we leave it undecided. The decision of this question becomes unnecessary, from the fact that Congress, in the 4th section of the act of 1880, provides, "This act shall not in any way affect or interfere with the title to any lands sold for a valuable consideration by the Ohio Agricultural and Mechanical College granted under the act of February 18th, 1871." This section we construe to be a ratification on the part of Congress of the title of Flagg, plaintiff below, who was a purchaser from the college for a valuable consideration. True, the language of the section was not happily selected to express such ratification, but we think such was the intention of the section. Construed literally, the section can have no effect whatever. Of course, the declaratory act of 1880, could not "affect or interfere" with any right acquired under the act of 1871. Congress knew that the Ohio Agricultural and Mechanical College had assumed to convey title to portions of these lands for a valuable consideration under the belief and claim that it had a right to do so under the act of 1871. The title which the act was not to "affect or interfere with" was not one which in the view of Congress was valid and indefeasible, but one which, under the construction placed upon the act of 1871, by the act of 1880, the college had no power to convey for want of title in itself. A title which the college intended to sell for a valuable consideration, but by reason of the construction claimed for the act of 1871, it could not convey, was the subject of this section, and the purpose undoubtedly was to confirm the sale so made and give it effect according to the intention of the parties.

The title of Flagg thus ratified took effect as of the date of the conveyance, no other rights having intervened.

Several other questions have been raised and considered, which need not be reported.

Judgment affirmed.

[This case will appear in 38 O. S.]

The following is the argument submitted to the Secretary of the Interior on an appeal taken to him from the decision, dated May 9, 1882, of the Commissioner of the General Land Office, denying a patent on a survey of land in the Virginia military district of Ohio, which decision will be found in House Miscellaneous Document No. 42, first session Forty-seventh Congress, June 23, 1882:

Argument of Jeremiah Hall for the appellants.

CIRCLEVILLE, OHIO, *June* 12, 1882.

Hon. N. C. MCFARLAND, Esq.,
Commissioner of the General Land Office, Washington, D. C.:

DEAR SIR: You will take notice that we appeal to the honorable the Secretary of the Interior from your decision on our application for the issue of a patent on survey No. 12096 for 150 acres of land in the Virginia military district of Ohio, founded on part of military warrant No. 584, for 200 acres issued in the name of Aquilla Norvill Sergeant, in the Virginia line on continental establishments, holding that there is no authority of law under which a patent can issue in this case.

Very respectfully, yours, &c.,

JEREMIAH HALL,
Attorney for Samuel H. Ruggles and others.

ɔecification of errors filed with the foregoing appeal, as follows, to

The Commissioner erred in deciding that there was no authority
ıw under which a patent could issue in this case, when he should
ɔ held that the case was within the act of Congress of May 27, 1880
ited States Land Laws, local and temporary, vol. 1, page 95, No.
and the other acts of Congress to enable the officers and soldiers of
Virginia line on continental establishments to obtain titles to cer-
lands lying northwest of the river Ohio, between the Little Miami
Scioto, beginning with the act of August 10, 1790, page 1, No. 1 of
Land Laws, &c.).

. The Commissioner erred in construing the words "land office" in
ion 2 of said act of May 27, 1880, to mean the "General Land Office,"
n he should have held that Congress by said words intended the
l office of the Virginia military district of Ohio, otherwise designated
he office of the principal survey of said district.

I. The Commissioner erred in deciding that the survey in this case
not within the said act of May 27, 1880, in so far as it had not been
rned to the "General Land Office" on or before March 3, 1857,
n he should have held that it was within the act because it had
ı legally surveyed and returned to the land office previous to March
357, on an entry made previous to January 1, 1852, and was founded
ɔart of an unsatisfied Virginia military continental warrant, and
a complete location and appropriation of the land designated therein,
by the provisions of the second section of the act of March 1, 1823
1 Land Laws, page 63, No. 98), reserved from locations to be made
'eafter, and by the provisions of the first section of the act of July
838 (said Land Laws, page 80, No. 146), and the second section of
act of May 27, 1880, declared valid.

V. The Commissioner erred in holding the act of March 23, 1804,
ded to by him on page 3 of his said decision (said Land Laws, page
No. 35), and the provisions of the second and third sections thereof
ɔrce and operated a release of the lands designated in said survey
ı the satisfaction of said military bounty, so that they became and
e now a part of the public domain of the United States, discharged
ı the trust imposed by the deed of Virginia of March 1, 1784 (1st
Laws of the United States, page 472), ceding to the United States
territory, or that tract of country within the limits of her charter,
ate, lying, and being to the northwest of the river Ohio, to and for
uses and purposes, and on the conditions of the act recited therein,
ng which is the reservation of the land designated in said survey in
sfaction of the said military warrant, when he should have held the
risions of said act of 1804 not in force, or if ever in force to release
lands designated in said survey from the satisfaction of said military
rant, then that Congress by her act of February 18, 1871 (said Land
rs, page 94, No. 187), and her said act of May 27, 1880, had waived
t release and recognized the said survey as a valid and complete ap-
priation of the lands designated in said survey and entitled to be
ried into patent.

JEREMIAH HALL,
Attorney for Samuel H. Ruggles and others.

Argument filed on the foregoing appeal and specification of errors,

. There is but one principal question in this case, and that is whether

or not the law authorizes a patent to issue on said survey No. 12096 all other questions involved in the case are merely incidental to this.

II. At the time the location was completed in this case by the record of the survey in the office of the principal surveyor of said district on the 27th day of January, 1823, the time limited by the act of February 9, 1821 (said Land Laws, page 61, No. 93), under which the location and survey had been made had expired; but however that may have been, the survey was returned to said office and recorded, and by the act of March 1, 1823, reserved from location, and by said act of July 7, 1838, declared valid.

III. Counsel concede that the act of 1804 was suspended by the act of March 2 1807 (said Land Laws, page 39, No. 45), and subsequent acts, and all locations previously surveyed reserved from location, and we do not disagree as to what would have been the effect of the act of 1804, if Congress had the constitutional authority to pass it, had it not been suspended; but I may say the act of 1804 was not discovered until 1881, and then it was found by a blind man, and Justice Matthews, of the Supreme Court of the United States, not remembering, perhaps, the parable, "Can the blind lead the blind? Shall they not both fall into the ditch?" and never having heard of the act before, and believing it to be in force, adopted it from the brief of the blind man into his decisions of the cases of Fussell *vs.* Hughes *et al.*, and same *vs.* Gregg *et al.*, decided by him at the June term of the circuit court of the United States for the northern district of Ohio, and published in the Federal Reporter, vol. 8 No. 6, pages 384–387, inclusive, September 20, 1881, in which decision the justice held that all the lands in the Virginia military district of Ohio, standing on entry and survey merely, forfeited to and had become a part of the public lands of the United States, and at its disposal at pleasure, and with this decision he held in the case of Chamberlain *vs.* Marshall, decided at the same term of court and published at the same time, pages 398–410, inclusive, fell all titles of those lands resting on sales for taxes, executors and administrators, guardians, &c., whensoever made, thus discrediting the titles to a great district of very important lands; but I forbear to pursue the discussion of the act of 1804 any further at present.

IV. But whether the act of 1804 ever at any time went into effect, we insist it was competent for Congress to suspend it or waive its effect to release the land designated in said survey from the claim for military lands, and that they did so by their act of February 18, 1871, to cede to the State of Ohio the unsold and unsurveyed land in the Virginia Military District in said State. Under this act the "Ohio Agricultural and Mechanical College, the grantee of the State, claimed the lands standing upon entry and survey in said district, thereupon Congress not having intended to cede to the State of Ohio any of the lands in said district standing upon such entries and surveys and which she intended by her said act to reserve to the said officers and soldiers, their heirs or assigns for whom they had been originally reserved by Virginia, passed her act of May 27, 1880, construing and defining her said act of 1871, by which she very clearly stated that she did not intend to cede to the State of Ohio any land in said district appropriated by entry or survey upon military warrants on continental establishments.

V. She then declared in the second section of her last named act, that all legal surveys returned to the "land office" on or before March 3 1857, on entries made on or before January 1, 1852, and founded on unsatisfied Virginia military continental warrants valid, as she had before *by her said act of July 7*, 1838, declared the survey in this case valid.

VI. She then by the third section of her said act of 1880 extended to d officers and soldiers, their heirs or assigns, entitled to bounty lands ich had been entered on or before January 1, 1852, within the tract served by Virginia, between the Little Miami and Scioto Rivers, for isfying the legal bounties to her officers and soldiers upon continental ablishments, three years to make and return their surveys for record the office of the principal surveyor of said district, and provided by last clause of this section that "and may file their plats and certifi-e, warrants or certified copies of warrants at the General Land Office d receive patents for the same."

VII. Now we insist this last act is so plain that no right-minded, in-ligent man can fail to understand it.

VIII. Congress thus, by the first section of her act of 1880, clearly ognized the estate of the officers and soldiers, their heirs or assigns, the lands designated in said entries and surveys. She calls them ap-priations of the lands.

IX. By the second section they describe a legal survey returned to "land office" on or before March 3, 1857, on an entry made on before January 1, 1852, founded on an unsatisfied Virginia military ntinental warrant, valid, or a complete location. This is what Con-ess had in their minds. They had no allusion to a return of a plat cer-cate, warrant, or certified copy of a warrant to the "General Land fice" for patent. They meant what they said, "a legal survey re-rned to the "land office," the local office of the Virginia Military Dis-ct of Ohio, otherwise designated as office of the principal surveyor of id district; the office where the military warrants were legally kept; which the record of the entries of lands were made and recorded in a rticular book, called the "Book of Entries" and to which office the rveys were returned and in which they were recorded in the record surveys and from which the plats, certificates and other papers in the ation were delivered to the locator, to be filed by him in the "Gen-l Land Office" for patent.

X. The office of the principal surveyor in the military district of Ohio defined a land office by Webster's Unabridged Dictionary.

XI. The author defines the term "land office" "An office in which sales of new lands are registered and warrants issued for the lo-tion of lands and other business respecting the public lands is trans-ted."

XII. As in this case in a district of country reserved specially for the tisfaction of a particular class of military land warrant, in which an ice is established and an officer appointed to take charge of the mili-y warrants, to keep the records of locations, make and record the tries and surveys of lands, etc.

XIII. Congress did not then by the words "land office" as used in id second section of said act of 1880, intend the "General Land Office." no act of theirs did they ever speak of the "General Land Office" as "land office" merely. The General Land Office is always designated Congress by the name given it by the act creating it. Congress al-ys speaks of this office by the designation of "General Land Office," e office of all and every class of public lands, and to construe the rds "land office" to mean "General Land Office" would be illogical making the minor proposition include the major; or it would be acting the farce in the fable of the frog blowing herself up to the size the ox.

XIV. Nor is any allusion had in this second sections to a return of e survey or plat, certificate *or warrant to the "land-office"* for patent.

That is left to the last clause of the third section of the act, in which Congress says, "said officers and soldiers, their heirs and assigns," may file their plats, certificates, warrants, or certified copies of warrants at the General Land Office and receive patents for the same.

XV. But I understand counsel will insist that this last clause does not apply to a legal survey declared valid by the second section of the act, or that it does not apply to a legal survey made and returned to the land office on or before March 3, 1857.

XVI. It is conceded that the act of 1804 was suspended by the act of March 2, 1807, and the other acts for the extension of the time to make and complete locations, &c., and reserving from location tracts previously surveyed, all of which are in *pari materia* and must be construed together and in the same uniform way, each and every new act extending the time reserved, the surveys previously made from location and in no other way referred to them. Yet not one of them when returned to the Secretary of War or the General Land Office was ever denied a patent on the ground that the new act did not apply to a survey previously made. The language in such acts of extension was to obtain warrants and complete their locations, and return their surveys, warrants, &c. (Sedgwick on the rules which govern the interpretation of Statutes, &c., page 247, &c.)

XVII. Sometimes one period was limited for obtaining warrants and completing surveys, and another and different period was limited for returning plats, &c. And so it was under the act of March 3, 1855, to extend the time for surveying entries made before January 1, 1852. No survey previously made was denied a return and patent under the act of 1855, and it must not be done under this act of 1880. A survey previously made stands upon the same equity, the same law, the same right in every respect as a survey of an entry, to be made under this act, and such has been the previous construction and practice under it, and Congress so intended. (See engrossment and passage of the bill in this act in the Senate, the discussion and the letter of J. A. Williamson, then Commissioner of the General Land Office, vol. 10, part 4, Congressional Record, pages 3453–3454, inclusive, May 18, 1880.)

XVIII. That my position in this case may be defined, and what I claim to be the questions discussed, and how I understand them may be manifest, I will recapitulate.

1st. I concede then that the act of March 23, 1804 (waiving the right of Congress to pass it), discharged the unappropriated lands in the said district from the claim for bounty land, on the expiration of each and every period limited for making locations, &c., and that if a location was made between acts, such location was void, unless validated by some such provision as that of the first section of the act of July 7, 1838, or that of the second section of the act of May 27, 1880. These acts are in *pari materia* and must be construed in the same way.

2d. But that the provisions of each of those acts, beginning with the act of March 2, 1807, reserving from location tracts of land which had been previously surveyed, withdrew from forfeiture under the third section of said act of 1804, the tracts surveyed forever as perfectly as if they had been patented.

3d. Each and every act then to extend the time to make locations, etc., was a new grant at the pleasure of Congress to locate lands which had not been previously surveyed under the former act, but there were no forfeitures of the tracts previously surveyed nor was there any extension to locate them *de novo*, but they were reserved from location *and* never denied a patent under the new act, nor was an entry denied

a survey under the new act. These acts to extend the time to locate, survey, and return the surveys for patent to the General Land Office are also in *pari materia*. No location surveyed previous to the act of March 3, 1855, was ever denied a return to the General Land Office for patent under that act, and it is certainly the narrowest act of any of the acts of extension in respect to tracts previously surveyed, while the act of 1880 is as favorable, admitting the return for patents of tracts previously surveyed, as any former act since the extension of time to locate these lands.

4th. The language and purpose of these several acts are plain, unambiguous, and nothing is left for construction or interpretation. (Sedgwick, page 231.)

In conclusion, unless your honor has been convinced that the principles of logic have been changed, and that the minor proposition now contains the major, and that the frog is "biger" than the ox, and that Congress when they said "land office" meant "General Land Office," and did not know the difference between the offices, or if they did, we must presume they made a mistake, or if you please, it was a typographical error, then you will sustain our application for the issue of the patent in this case.

Respectfully submitted,

JEREMIAH HALL,
Attorney for Samuel H. Ruggles and others.

Legal proposition supposed to be involved in the foregoing application for patent, and the decision of the Commissioner and appeal from the same to the honorable the Secretary of the Interior, and which propositions it is desired his honor the Secretary would submit to the honorable the Attorney-General of the United States for his opinion thereon, viz:

I. Did the act of Congress of March 23, 1804, referred to in said decision, page 3 (United States Land Laws, Local and Temporary, vol. i, 1880, page 32, No. 35), take effect the 1st day of January 1852 (or at any other time), to release those tracts of land within the tract reserved by Virginia, the surveys whereof had not been returned to the "General Land Office," from the satisfaction of the military warrants upon which the locations had been legally founded?

II. Did the act of Congress of February 18, 1871 (said Land Laws, vol. i, page 94, No. 187), as construed and defined by the 1st section of the act of Congress of May 27, 1880 (said Land Laws, vol. i, page 95, No. 190), recognize the surveys described in the first proposition as subsisting appropriations of said tracts of land?

III. Did Congress by the words "land office" in the 2d section of the last-named act describe the local "land office" of the Virginia Military District of Ohio, otherwise designated as the office of the principal surveyor of said military district?

IV. May legal surveys, such as those described in the said second section of said last-named act be carried into patent under the last clause of section three of said act of 1880, on plat certificate, warrant, or certified copy of warrant in such locations being filed in the "General Land Office"?

Respectfully submitted.

JEREMIAH HALL,
Attorney for Samuel H. Ruggles and others.

A sufficient argument in answer to the foregoing is found in the House Mis. Doc. No. 42, first session Forty-seventh Congress, and in the following case, which shows also the necessity for legislation on the subject:

Court of Common Pleas of Hardin County, Ohio, October term, 1882.

SUSAN RHODES AND OTHERS *vs.* JOHN R. GUNN.

Civil action in the nature of ejectment, to recover Virginia Military survey No. 12097. Before Hon. John A. Price, judge.

1. It is well settled that a patent issued without authority of law is void.

2. The act of Congress of March 23, 1804, provides that officers and soldiers in the Virginia military line on continental establishment shall have three years to complete locations of Virginia military bounty land warrants and five years to make returns of surveys to the Secretary of the Department of War, and that lands not thus subjected to a right of locators to procure patents should be released from any claim for bounty lands. By subsequent legislation the return was to be made to the General Land Office. Various acts of Congress were from time to time passed extending the time for making entries and surveys, or for making return of warrants and surveys, and procuring patents down to the act of March 3, 1855, which gave two years to make and return surveys on entries made prior to January 1, 1852.

Virginia military warrant No. 4641, issued to Cornelius Beazley, September 1, 1794, was entered by him December 24, 1822, and survey made thereon December 28, 1822, recorded in the office of the principal surveyor of the Virginia Military District in Ohio, January 28, 1823; the warrant and survey were filed in the General Land Office in January, 1859, and patent issued thereon October 29, 1861.

Held:

(1.) The patent issued without authority of law, and is void, because the warrant and survey were not returned to the General Land Office within the time required and limited by law.

(2.) It was competent for Congress to make such limitation.

(3.) The third section of the act of May 27, 1880, extends the time two years for making and returning surveys and for receiving patents for lands entered on or before January 1, 1852, but does not declare valid returns that were made during the interim from March 3, 1857, to May 27, 1880, and they therefore remain void, and all patents issued thereon are void.

4. The fact that Congress, by the act of May 27, 1880, gave authority to do certain acts does not give validity to similar acts previously done without authority. This construction is rendered all the more certain by reference to the act of 1838, in which Congress made express provision for the validation of acts previously done without authority.

5. The act of May 27, 1880, does not, in terms, or by any reasonable implication or construction, give validity to returns of warrants and surveys made to the General Land Office after the time fixed by law had expired for making such returns, nor does it render valid the void patent issued on such returns.

6. The act of May 27, 1880, does not authorize any new entry to be made.

7. It does not authorize a new patent to be issued on any land previously entered and surveyed by authority of law.

8. The expression "the land office," mentioned in section 2 of the act of May 27, 1880, means the General Land Office at Washington City.

9. But if this expression means the office of the principal surveyor of the Virginia military district in Ohio, it cannot aid a patent previously issued in violation of law on a warrant and survey returned to the General Land Office after the time limited by statute. This section does not validate such patents, nor authorize any new patent to issue. Its purpose was to protect occupants under surveys containing land in excess of the amount specified in the respective bounty-land warrants under which said surveys were made, and it applies to such surveys returned to the General Land Office within the time prescribed by previous statutes.

The material facts are as follows:

1. *September* 1, 1794, Virginia military bounty-land warrant 4641, for 100 acres, was issued at the proper office in Richmond, Va., to Cornelius Beazley, a soldier for three years to the United States in the Virginia line on Continental establishment.

2. *July* 4, 1819, on this warrant an entry was made of 100 acres in Hardin County, Ohio, in the name of Beazley.

3. *December* 28, 1822, Virginia military survey No. 12097, for and in the name of Cornelius Beazley, was made of that date on said 100 acres of land, which survey was recorded at Chillicothe, in the office of the principal surveyor of the Virginia military district in Ohio January 28, 1823.

4. *January*, 1859, the survey and land warrant were filed in the General Land Office in Washington City, and application made for the issue of a patent to the heirs of said Beazley, he being dead.

5. *October* 29, 1861, the patent issued to Cornelius Beazley on this application for said land.

6. *March* 14, 1854, the court of common pleas in Hardin County by partition decree on service by publication against Beazley's heirs set off to Gunn, as assignee of Wallace, one-third of said survey by metes and bounds for services in locating the survey.

7. The defendant has been in adverse possession, claiming the whole survey, since February 10, 1851, under a tax sale made to him in January, 1851, on which the auditor's deed of conveyance was made to him December 15, 1853.

8. *December* 12, 1831, the land was sold at forfeited tax sale to Ralph E. Runkle for taxes of 1823 to 1831, inclusive, with possession in him under it for several years, but no tax-sale deed made.

9. *August*, 1872, Susan Rhodes and others claiming to be heirs of Beazley commenced a suit in the court of common pleas of Hardin County, Ohio, to recover the land from John R. Gunn, defendant, in possession.

10. *October* 24, 1882, the case was tried to the court, Hon. JOHN A. PRICE, *Judge*, a jury being waived.

William Lawrence, for defendent.

The patent is void, because the statute did not authorize it to issue on a warrant and survey returned to the General Land Office after January 1, 1852. This is the limit fixed by the act of Congress of February 20, 1850 (9 Stat., 420). The act of *March 3, 1855* (10 Stat., 701), ex-

tended the time for two years for making surveys on previous entries and for patents in such cases, but did not extend the time for return to the General Land Office of surveys previously made. The failure to return the warrant and survey within the limited time renders the patent void.

I. This has been decided:

1. By the Commissioner of the General Land Office.

(1) Kendrick's Case, April 3, 1880, Copp's Land Owner, August, 1880, House Mis. Doc. No. 42, 1st session 47th Congress, June 23, 1882.

(2) Norvill case, May 9, 1882, [Congress] House Mis. Doc. No. 42. aforesaid, 30, 34.

2. By the circuit court of the United States for the northern district of Ohio, August, 1881, held by Matthews, justice, Supreme Court United States, and Welker, district judge.

(1) In Marshall *vs.* Chamberlain, 8 Saint Paul, Minn., Federal Reporter, 398, Sept., 1881; 8 Copp's Land Owner, 145, No. 9, Dec., 1881: House Mis. Doc. No. 42, above mentioned, p. 3.

(2) In Fussell *vs.* Hughes, same Reporter, 384, 398; also in same Congressional Doc., p. 15.

3. It is expressly made so by the act of August 10, 1840, 5 Stats., 262.

4. The same decision in effect by the supreme court of Ohio, May 30, 1882, in Coan *vs.* Flagg (38 Ohio St. R.), 2 Ohio Law Journal [Columbus], No. 44, p. 555, June 15, 1882. In this case the acts of Congress relating to the Virginia military district in Ohio came under review, and the court, referring to the act of July 7, 1838 (5 Stat., 262), said:

> The second section * * * provides that no patent shall be issued by virtue of the preceding section for a greater quantity of land than the rank or term of service of the officer or soldier * * * entitled him to. * * * If it be claimed that the operation of section 2 of this act was extended by reason of the extension and revival of the first section, by the act of August 19, 1841 (5 Stats., 449), it is at most sufficient for this case to say that the "preceding section" thus revived and continued in force for a limited time contained the sole authority for making and returning entries and surveys under these Virginia warrants, and since March 3, 1857, there has been no authority for making or returning surveys under any circumstances whatever * * * Subsequent to the year 1852 no entries under warrants for military services in Virginia were authorized, and subsequent to 1857 the right to make surveys on account of such warrants ceased—provision having been made by Congress for the satisfaction of outstanding warrants by other means.

The act of August 31, 1852 (10 Stats., 143), made them convertible into land scrip.

It is unnecessary to repeat the reasoning of these cases; they are unanswerable.

II. State courts will, generally, follow the rulings of the courts of the United States, on acts of Congress especially, when, as in this case, the executive and judicial officers of the national government have ruled in the same way. (Wells' Res Adjudicata, § 630; Roser Inter-State Law, 36, 85.)

III. The act of Congress of May 27, 1880 (21 Stats., 142; House Mis. Doc. No. 42, p. 46), does not aid the plaintiffs.

1. This was considered and determined in all of the decisions above referred to since that of April 3, 1880; and,

2. If the act authorized a patent, as it does not in such case as this, the plaintiffs have none under it. The only provision authorizing a patent is section 3, which gives three years "to make and return surveys * * * and receive patents for the same" as to lands only "which *have on or* before January 1, 1852, been entered;" it does not apply to

lands which had been previously surveyed. Congress did not intend to permit patents to issue in cases where lands had been previously entered and surveyed, because, as shown by Justice Matthews, in cases referred to, the lands covered by surveys not returned to the General Land Office prior to 1857 had reverted to the United States; they were generally held by owners with an occupancy of from twenty to eighty years, or more, under deeds of conveyance, or contracts of purchase, sometimes lost or imperfect, from the parties in whose names the surveys had been made, and in many cases under tax sales, guardians' sales, executors' and administrators' sales, from fifty to eighty years old; the occupants were entitled to be protected, having purchased in good faith, without looking to see if patents had issued or if all was regular. If patents were issued in such cases they would be to the heirs of the parties in whose names the surveys were made, and speculators in old stale claims would buy them up, bring suits against the occupants who would not be protected by the statute of limitations, since the supreme court of Ohio has decided that the statute does not run until the patent issues, and thus a great wrong would be done. Congress intended to protect these occupants, and hence, in the act of February 18, 1871 (16 Stats., 416), ceding "the unsold" lands in the Virginia Military District, ceded only "the lands remaining unsurveyed and unsold." The word unsold must be construed as having some purpose other than unsurveyed, and it means unentered.* This purpose is shown by the history of the legislation on the subject. Congress has shown a purpose to fix an end to the time of making surveys. It is shown by the fact that from March 3, 1855, to May 27, 1880, Congress refused to authorize new surveys. Repeated efforts to secure extensions failed. [Congress] House Mis. Doc. No. 42, 1 sess., 47th Cong., 28; Globe, vol. 69, p. 349, January 22, 1866; Globe, vol. 72, p. 3511, June 30, 1866.

3. The second section of the act of May 27, 1880, does not aid the plaintiff.

(1) It does not authorize the issue of a patent, and the plaintiffs have none.

(2) It does not validate entries and surveys unless returned to the Land Office at Washington "on or before March 3, 1857," and the plaintiff's survey was returned after that date.

(3) The Land Office mentioned in the act of 1880 is the General Land Office, at Washington, for several reasons:

a. This subject was considered and decided by Justice Matthews in Fus-

*In [Congress] House Mis. Doc. No. 42, 1 sess., 47th Cong., June 23, 1882, page 28, in a letter from William Lawrence to the Commissioner of the General Land Office, it was intended to be said "it was not the purpose of Congress to include any land which had been surveyed or entered." By a typographical error the words "or entered" were dropped out. The act of Congress of August 7, 1882 (22 Stats., 348), evidently was based on the views presented above, and was designed to protect occupants in the condition above described. By it Congress gave to occupants land which, as Justice Matthews declared in Fussell *vs.* Hughes, had lapsed "into the general body of the public lands to be disposed of according to the laws." In Coan *vs.* Flagg (38 Ohio St.: s. c. 2 [Columbus] Ohio Law Journal, No. 44, June 15, 1882, p. 559) it is apparent the court regarded the act of February 18, 1871, as only granting the unentered lands. The able briefs filed in that case show this conclusively. In that case a majority of the court gave a construction to the fourth section of the act of May 27, 1880, which seems to be unsupported by its language or purpose, and which, if sustained, will be ruinous in its operation. (See letter of Samuel Kendrick to William Lawrence, March 11, 1879. House Mis. Doc. No. 42, p. 58.) It is understood the case will be taken to the Supreme Court of the United States. For reference to many of the acts relating to these lands, see 1 Stats., 182, note; vol. 2, p. 274, and Synoptical Index to Laws U. S., 1852.

sell *vs.* Hughes (House Mis. Doc. 42, p. 22), and by the Commissioner of the General Land Office in his decision of May 9, 1882 (House Mis. Doc. No. 42, p. 34). The reasoning of these cases is conclusive.

b. This is clear by reference to the statutes on the subject. The act of March 3, 1855 (10 Stats., 701), was the last of the original series extending time to make entries and surveys. It fixed the limit of two years—to March 3, 1857—"to make and return surveys * * * to the General Land Office" only on entries made "prior to January 1, 1852." The act of May 27, 1880, is a *counterpart* of the act of 1855, deals with the same subject (surveys and returns), takes the *same dates*, of March 3, 1857, for surveys, and January 1, 1852, for entries, as found in the act of 1855, and validates all surveys of this character returned to the General Land Office on the date previously fixed by the act of 1855. The coincidence in language between the two acts shows that both referred to returns to the same General Land Office. So far it only gave validity to what had been authorized by act of March 3, 1855.

So on entries made "prior to January 1, 1852."

There may have been surveys made under the act of December 19, 1854 (10 Stats., 598), and prior acts, not returned to the General Land Office within the two years limited by each, but still returned prior to March 3, 1857, but which, having been returned after the limited time, were not validated by the act of March 3, 1855 (10 Stats., 701). The second section of the act of May 27, 1880, merely validates them. Its whole purpose is to refer to entries prior to 1852, surveys and returns to the General Land Office prior to March 3, 1857, and to validate those.

It is unreasonable and absurd to suppose it referred to any other land office than that mentioned in prior acts, especially when its dates are taken from prior acts, relates to them, and has no words to indicate a purpose to refer to any other office. This construction is required by well-settled rules. Lord Mansfield said:

> All acts which relate to the same subject, notwithstanding some of them may be expired, or are not referred to, must be taken to be one system and construed consistently. (Rex *vs.* Loxdale, 1 Burroughs, 447; Sedgwick Stats., 212; State of Indiana *vs.* Springfield Township, 6 Indiana, 83.)

The adoption of a statute, as that of 1881, carries with it the construction placed upon prior statutes on the same subject. This rule is carried so far that "the adoption of a statute originally passed in another State carries with it the construction which obtained in the original jurisdiction at the time of such adoption." (Sedgwick Stats. (2d ed.), 367, citing Tyler *vs.* Tyler, 19 Ill., 151; Drennan *vs.* People, 10 Mich., 169; Scruggs *vs.* Blair, 44 Miss., 406; Galbraith *vs.* Galbraith, 5 Kans., 402.) Hence the "land office" mentioned in the act of 1881 is the same office mentioned in the act of 1855, and prior acts; even a change of phraseology will not change the result. (Burwell *vs.* Tullis, 12 Minn., 572; Sedgwick Stats. (2d ed.), 229, 365.)

c. The land office is an expression which in legal and popular usage refers to the General Land Office at Washington.

d. The office at Chillicothe cannot be intended as the office mentioned in the act of 1880. This act has its own definition of terms or names. Section 3 requires owners of entries made prior to 1852 "to make and return their surveys for record to the *office* of the *principal surveyor of said Virginia military district.*" This is the *name* given by *this act* to the Chillicothe office. When it is thus *named in this act*, it cannot be held that the words "land office" in the same act mean the office of the "principal surveyor of the Virginia military district." The statute distinguishes between the "land office" and "the office of the principa

surveyor." The distinction must be presumed to have had a purpose—to refer to different offices. The use of the expressions interchangeably is to assign two meanings to each.

Lieber, in his Legal and Political Hermaneutics, 86–88, says: "To have two meanings in view is equivalent to having no meaning, and amounts to absurdity."

Bishop reaffirms this in his work on Written Laws, sections 94, 95, and says that generally—

> If a particular word occurs repeatedly in a statute, or in different statutes on the same subject, the meaning may, *prima facie*, be deemed identical in all the places. This doctrine is occasionally expressed in even stronger terms.

The Chief Justice of the King's Bench has said:

> We disclaim altogether the assumption of any right to assign different meanings to the same words in an act of Parliament, on the ground of a supposed general intention in the act. We are not to assume the unwarrantable liberty of varying the construction. (Reg. *vs.* Commr's Poor, 6 Ad. & El., 68; Sedgwick Stats., 222.)

e. The legal and popular name of the office at Chillicothe is that of the *principal surveyor of the Virginia military district.* The act of Congress of February 24, 1829 (4 Stats., 335) requires the appointment of "a surveyor for the Virginia military district," and he is authorized to appoint *deputies.* Prior to this, surveyors were appointed in Virginia, under the act of May, 1799 (10 Henning Va. Stats., 53), one called a "*principal surveyor*" and others *deputies.* The land warrants issued at Richmond since the establishment of the office are addressed "to the principal surveyor," &c. His certificates to copies of entries and surveys are always dated at the "office of the principal surveyor of the district," and they are signed officially by the surveyor as such officer. The act of August 7, 1882 (22 Stats., 348), recognizes this as the name of the office, as all prior legislation had done.

f. It is not competent to show by parol evidence the purpose of any interested person who wrote the bill, or of particular members of Congress in obtaining its passage. (United States *vs.* Union Pacific R. R. Co., 91 U. S., 72; Aldridge *vs.* Williams, 3 How., 9.)

IV. But if the expression "land office" in the act of May 27, 1880, applies to the office of the principal surveyor of the Virginia military district, it does not aid the plaintiffs. It does not authorize any patent to issue. The reasons which led Congress to refuse repeatedly to authorize patents in such cases have been stated. It does not validate any patent. It is shown, and will be more fully shown, that the act was intended to protect occupants of lands, whether on valid or invalid surveys, whether subsisting, or lapsed by failure to make the proper return to the General Land Office. This purpose is to be kept in view. No construction which will permit occupants to be disturbed is to be tolerated.

V. The real purpose of the second section of the act of May 27, 1880, was to validate surveys returned to the General Land Office prior to March 3, 1857, made on entries prior to January 1, 1852. These surveys generally included more land than the warrant called for. The Commissioner of the General Land Office refused to issue patents in such cases on surveys made and returned in due time. The act of February 18, 1871 (16 Stats., 416), ceded the "unsurveyed and unsold [unentered] lands" to the State of Ohio. The State granted its rights to the Ohio Agricultural and Mechanical College. The college claimed that the act of 1871 ceded lands both entered and surveyed, so far as there was any excess above the number of acres in any survey called for by the warrant. (Coan *vs.* Flagg, 38 Ohio St.) Congress intended to validate all

these surveys to defeat the claim made by the college. Congress intended to protect the occupants of the lands—not to validate patents illegally issued—not to authorize patents to lay a foundation to harass occupants with litigation. All this is fully shown in [Congress] House Mis. Doc. No. 42, first session forty-seventh Congress, June 23, 1882. pp. 10, 21, 22, 25–30, 31–34, 36, 37, 47–52. The history of the reasons which led to the act are there given. This is clear from the language of the act. Section 1 is declaratory of the meaning of the ceding act of February 18, 1871, and says it "had no reference to lands which were included in any survey or entry."

This settled two points:

(1) If lands previously entered and surveyed had reverted to the United States by a failure to return the warrant and survey to the General Land Office within the time limited by law, they did not pass to the State. Congress did not intend that occupants should be disturbed in their possession. In cases of failure to make such returns the lands reverted. (Jackson *vs.* Clark, 1 Peters, 628; Fussell *vs.* Hughes, above cited.)

(2) If entries and surveys included more land than authorized by land warrant, the excess did not pass to the State. Congress intended to protect occupants.

Then the second section carrying out this policy validated entries and surveys "returned to the land office on or before March 3, 1857." This was the last date fixed by the act of 1855 for such return. Congress intended to protect occupants on these surveys, even though (1) they had reverted to the United States, or (2) if not reverted, yet contained an excess of lands; the occupants having bought in good faith with no knowledge of the excess, were to be protected. Patents were not authorized, because they could only issue to the persons in whose names the surveys were made, or their heirs. (1) As to lands reverted by failure to return the warrant and survey prior to March 3, 1857, they were not entitled to patents. (2) As to lands included in surveys properly returned to the General Land Office with warrant, no new statute was necessary to issue patents. The prior acts authorized their issue.

There is great justice in protecting the occupants even of surveys containing an excess of land over the amount authorized by warrant. The surveys were made by officers of the United States. Those who purchased and occupied were not lawyers; they had no means of testing their accuracy, and might well assume them to be correct. Nearly all the surveys contained excess land. (House Mis. Doc. No. 42, 1st session Forty-seventh Congress, p. 58.) There are now 270 unpatented surveys in the district mostly with excess land generally covered with valuable farms. Hence the courts have held excess surveys valid. (Taylor *vs.* Brown, 5 Cranch, 249, 253; Holmes *vs.* Trout, 7 Peters, 208; Gill *vs.* Fowler, 3 Ohio, 209.) These recognize the Virginia act of May, 1779 (10 Henning's Statutes, 51), as in force, which protects the occupants of excess surveys.

VI. The partition proceeding does not estop the defendant from denying the validity of the patent. The claim of estoppel is an afterthought, utterly without any show of support.

1. This question was decided in principle in Chamberlin *vs.* Marshall and Fussell *vs.* Hughes (House Mis. Doc. No. 42, pp. 9–23.)

2. This is the result of legal principles.

Neither the petition nor decree in partition declared that the plaintiffs had any title. They only asserted that Wallace was entitled to a locator's *share of the land* which he sold to Gunn, and which was accordingly set off

o him by metes and bounds. This was the only question which passed n *rem judicatam*. The decree did not attempt to make a title to the and even in Gunn, except as against defendants therein, much less to hese same persons now plaintiffs in this action. They could not make a title in these plaintiffs when they lost any claim to the land or to a patent by the failure to return the survey to the General Land Office within the time required by law. The title was in the United States at the time of the decree, and a State court could not divest it. The United States could not be made a party to the proceeding, and is not bound by it. The decree could not give a title to the plaintiffs *which the law denied to them*. It could not deny the defendant's right to assert what the law says—that the patent is void. A partition decree cannot repeal a statute. A test of this would arise if the plaintiffs sought to recover on the *decree alone*. Clearly they could not, because the decree *gives them no title*. The defendant may now deny the plaintiff's title because that never passed *in rem judicatam*. Thus, it is said in Broom's Legal Maxims, p. 340:

The rule against reagitating matter adjudicated is subject generally to this restriction, that however essential the establishment of particular facts may be to the soundness of a judicial decision, however it may proceed on them as established, and however binding and conclusive the decision may, as *to its immediate and direct object*, be, those facts are not all necessarily established conclusively between the parties, and that either may again litigate them for any other purpose as to which they may come in question, provided the *immediate subject* of the decision be not attempted to be withdrawn from its operation, so as to defeat its direct object. (From Herman's Law of Estoppel, p. 64.)

But where since the judgment new rights and titles have accrued, it is no bar to another action. (*Id.*, p. 71.)

In order that a judgment in another action between the same parties shall constitute an estoppel, it should appear that the identical questions involved in the issue tried were passed upon by the court or jury at the former trial. It must, therefore, be clearly evident that a former judgment cannot operate as an estoppel to another action, unless the subsequent suit is not only founded upon the same contract of transaction as that litigated in the first, but that the subsequent action is brought for the wrong or redress which the party sought in the first action. So a judgment for a defendant in action brought to recover damages for an alleged deception in inducing the plaintiff to enter into a contract can be no defense to an action on the contract, or on a bond given for the fulfillment of the contract, because a judgment that a contract was not procured or void for fraud can be no reason why it should not be enforced. (*Id.*, 546.)

If, however, it be doubtful whether the second action is brought *pro eadem causa*, it is a proper test to consider whether the same evidence would sustain both actions, and what was the particular point or matter determined in the former action, for a judgment in each species of action is final only for its own purpose and object, and *quoad* the subject-matter adjudicated upon, and no further; for instance, a judgment for the plaintiff in trespass affirms a right of possession to be, as between the plaintiff and defendant, in the plaintiff at the time of the trespass committed, but, in a subsequent ejectment between the same parties, would not be conclusive with respect to the general right of property in the *locus in quo*. Where, in an action for the stipulated price for a specific chattel, the defendant pleaded payment into court of a sum, which the plaintiffs took out in satisfaction of the cause of action, it was held that the defendant in that action was not thereby estopped from suing the plaintiffs for negligence in the construction of the chattel.

When the whole title is swept away, there can be no estoppel, and no recovery. In Chamberlain *vs.* Marshall a party in possession for over thirty years under a tax sale conveyance made of a survey unpatented at the time of the tax sale sought to quiet his title against those claiming under a patent void because issued on a survey returned too late, but the court said:

The claims of the complainant, under his tax deed, and based on the presumption of a grant from the defendant of his equitable interest under the entry and survey, of course cannot survive the extinguishment of the defendant's interest, both in equity

and law. These claims of the complainant are derived from and through the previous title of the defendant, and being dependent upon it must fall with it. The proposition, therefore, which sweeps away all title from the defendant, precisely as if none ever existed, as this proposition which avoids the patent does, necessarily leaves nothing in the complainant but a naked possession, which, however good it may be as a defense against any stranger without title, does not confer even the color of right as against the true owner.

It is true that the bill claims that an equitable title vested in Robert Marshall by virtue of the entry and survey, that that equitable estate passed to and vested in the complainant by virtue of the tax deed, and the presumed grant thereof, and that only the patent is void. But a statement of the grounds on which it is claimed, and on which alone it can be claimed, that the patent is void, will show the impossibility of maintaining the existence of any such equitable estate, to vest in the complainant.

VII. The plaintiff can only recover on evidence of a legal title shown by a valid patent. This has been decided in Fussell *vs.* Hughes. (House Mis. Doc. No. 42, p. 23.) In that case the plaintiffs sought to recover land on an equitable title, and the court said:

The complainant claims only an equitable estate, and yet prays for the recovery of possession of the lands against defendants in possession, as to whom she alleges they have no title either at law or in equity. She does not admit that the patents under which they claim have vested them with the legal title, but under such circumstances as to entitle her in equity to call for a conveyance and release. If she did, it would be an ordinary case for the exercise of jurisdiction by a court of chancery. But she asserts no equity against the defendants in possession except that they are in possession, without title, of land which in equity belongs to her, the legal title to which is in the United States. Under such circumstances her only remedy is, if she is entitled to do so, to clothe her equity with the legal title by an application under the law to the public officers of the United States charged with the duty of issuing patents to those entitled, and then proceed at law to recover possession. But she does not expect or ask for a decree of this court clothing her with the legal title, nor pray for a conveyance from the defendants of what they claim to have.

The plaintiffs have no legal title, because the patent is void. If they could claim (1) the estoppel they assert, or (2) that the act of 1881 validated their survey, these only operated on the equitable title created by the entry and survey, but by no means create or vest in the plaintiffs the legal title which is in the United States, and must so remain until a valid patent issues. (Simmons *vs.* Wagner, 101 U. S., 260; Polk's Lessee *vs.* Wendell, 9 Cranch, 99; s. c. 5 Wheaton, 303; Lindegray *vs.* Roland, 2 How., 590; United States *vs.* Stone, 2 Wall., 535.)

VIII. The patent is void because issued to a dead man.

The patent having been issued in the name of a dead man, without authority of law, and in violation of law, is void. (Lessee of Wallace *vs.* Sanderson, 7 Ohio, Part 1, p. 322; Price *vs.* Johnson, 1 Ohio St. R., 397; Wood *vs.* Ferguson, 7 Ohio St. R., 288; 4 Peters, 345; McDonald *vs.* Smalley, 6 *Id.*, 261.) The case of Hoffnagle *vs.* Anderson (7 Wheat, 212) is not in conflict with the cases cited, because in that case it was held that the patent was not void for want of power to issue it, but voidable only for irregularities in the exercise of the power. The act of May 2, 1836 (5 Stats.), to give effect to patents in the name of deceased persons, only reaches patents issued "in pursuance of any law," and this patent was not so issued.

IX. The defendant's tax title conveyance will, after the lapse of twenty-one years, in this case be deemed regular, especially as the records on which it issued were long since destroyed by accidental fire. The authorities which prove this are cited in Fitzpatrick's Heirs *vs.* Forsythe (7 American [Cincinnati] Law Record, 411, January, 1879) [and follows this case in this document]; 1 Greenleaf, Evidence, 21; Stockbridge *vs.* West Stockbridge (14 Mass., 257); Trustees Ep. Church *vs.* Trustees Newbern Academy (2 Hawks, 233).

X. The law will, after twenty-one years' adverse possession by the

defendant, presume a grant to him from the holders of the entry and survey under which the plaintiffs claim. This subject is fully discussed in Fitzpatrick's Heirs *vs.* Forsythe, above cited, and in [Congress] House Mis. Doc. No. 42, first session Forty-seventh Congress, June 23, 1882. It is shown in 1 Greenleaf's Evidence, 21; Stockbridge *vs.* West Stockbridge (14 Mass., 257); Trustees Ep. Church *vs.* Trustees of Newbern Academy (2 Hawks, 233). It is recognized by Justice Matthews in the extract above quoted from his opinion in Chamberlain *vs.* Marshall.

Whenever the statute of limitations does not protect a possession at its inception, the doctrine of *presumed grant* applies. This is not by *analogy* to the statute, and hence there is no exception for disabilities.

It may be supposed that Stark *vs.* Smith (5 Ohio, 456), and Smith *vs.* Stark (7 Ohio, 551, Part 2, p. 201), militate against the doctrine of presumption in this case. It holds that long enjoyment "*alone*" of an *easement* "*peremptorily*" raises a presumption of a grant *because* the statute of limitations did not then apply to easements.

It does say that "in respect to corporal rights this rule of presumption has not [at that date] been applied," and, as the case says, *because* "they are within the purview of the act of limitations." It does not say that it would not in a proper case be applied, and it has been since applied.

1. This case is an authority for saying, then, that when lands are occupied (as in this case) *before the patent emanates* so that *the statute of limitations does not protect the occupancy*, the doctrine of presumption *will* apply. It says "in all *cases in which the statute operates* the only bar arising from length of possession is that prescribed by its provisions." The *inference* is—and the *reason* of the rule is—that when the *statute* does not apply, the presumption will.

2. *Every* REASON *exists for applying the presumption to possession upon an equitable title to land as to easements.*

Equitable titles are sold by decree, and in probate court proceedings. Can the original owner whose equitable title is thus sold get in the legal title fifty years after and say he is neither barred by *presumption* nor by the *statute of limitation?* If the Ohio civil code applies its limitation to *equitable* titles, as it clearly does, still there are thousands of acres where equitable titles were sold prior to the code, and yet dependent on the law in force prior to it.

3. The question is *settled in Ohio* that a grant will be presumed from the holder of an *outstanding equitable title* (like that of the plaintiff in this case) to the occupant (as in this case).

Lessee of Blake *vs.* Davis (20 Ohio, 242) affirming the principle that "there is *no difference* in the doctrine [of presuming a grant] whether the grant relate to *corporeal* or *incorporeal* hereditaments," and on page 243 that in even less than twenty years deeds may be presumed "to clothe the *equitable rights* with perfect legal protection," and on page 241 the doctrine is approved that such "presumptions do not always proceed on a belief that the thing [grant] presumed has actually taken place * * but merely from a *principle of quieting the possession.*"

This doctrine is founded on the highest principles of morality. The Rev. Joseph Cook says the *right of property* "includes also the provision that a title, after a certain period, should be given by prescription.

"What if Selkirk here on his island had no right to a foothold when he first landed? He passes years in solitude, and makes the garden resemble Eden, and it is finally ascertained that the island belonged to some barbaric chief. Selkirk took possession without purchase; but the chief, after ascertaining what Selkirk had done, leaves him in pos-

session, and Selkirk goes on improving the island. Many years pass, and he obtains at last what our laws call a prescriptive right to the soil. *He has mingled so much of his labor with it that more injustice would be done in turning him out than in allowing him to stay.* Although defending several extreme views on this right of property, John Stuart Mill himself undertakes to maintain that the right of property includes the right of possession by prescription. Far away is the cool, clear Mill from the wildness of Herbert Spencer, who claims that a clean cut, universal principle must be run through all these cases of prescription, and the right to private property denied even when it has not been disturbed for centuries." (See Mill, Principles of Political Economy, vol. i, book ii, chap. 11, § 2. See also Roscher, Political Economy, vol. i, chap. v.)

XI. It is fully settled that a defendant in possession with an equitable title can defeat a party claiming under a patent. (Ohio Civil Code, section 93, 559; Bliss's Code Pleading, 349, 351; Pomeroy, Legal Remedies, 87; Burnley *vs.* Stevenson, 24 Ohio St., 479; Matthews *vs.* Rector, 24 Ohio St., 445; Crary *vs.* Goodman, 12 New York, 65; Simon *vs.* Schurck, 29 New York, 598; Wintermute *vs.* Montgomery, 11 Ohio St., 442; Jones *vs.* Devore, 8 Ohio St., 431; Niswanger *vs.* Gwynne, 20 Ohio, 556; Newman *vs.* Cincinnati, 18 Ohio, 326.)

XII. The act of August 7, 1882 (22 Stats., 348), quiets the title of the defendant in possession. This is the effect of its language. It is competent for Congress to give a new defense or remedy. This power, says Cooley, "must reside in every State to enable it to secure its citizens from *unjust* and *harassing litigation*, and to *protect them in those pursuits which are necessary to the existence and well-being of every community.*" (Cooley, Const. Lim. (4th ed.), 352 [288]; Bronson *vs.* Kinzie, 1 How., 311.)

"Congress has sole power to declare the dignity and effect of titles emanating from the United States." (Bagnell *vs.* Broderick, 13 Pet., 436; Swayzie *vs.* Burke, 12 Pet., 11; Gilmer *vs.* Poindexter, 10 How., 257; Fenn *vs.* Holme, 21 How., 481; Hooper *vs.* Schermer, 23 How., 235.)

XIII. *The plaintiffs are barred by the Statute of Limitations of March* 22, 1849. (2 Curwen, 1494.)

They had the right of action in *equity* to recover the land in February, 1851, and the right *at law* when the patent issued, October 29, 1861.

The act of 1849 recognizes the right *at law and in equity* by saying that after a prescribed time "NO action of *ejectment* or *other action for the recovery* of lands or tenements shall be brought." There was then no action at law but ejectment.

The civil code follows it by *barring* both *legal* and equitable causes of action. And it is settled that when the statute begins to run it does not stop. (State Md. *vs.* Shipley, 7 Ohio, Pt. 1, p. 246; Granger *vs.* Granger, 6 Ohio, 35.)

But if the right of action did not accrue to the plaintiffs until the patent issued October 29, 1861, they were not then under disability, and their action is barred by either five or seven years' possession thereafter *if the statute of* 1849 *applies to this case.*

It does so apply. The civil code, section 6, continues in force the statute of 1849, as to all "cases where the right of action [at law or in *equity*] has already accrued, [when the code took effect, July 1, 1853,] but the statute now in force [the statute of 1849] shall be applicable to *such cases* [cases in the plural] according to the subject of the action, and *without regard to the form*," [at law or in equity.]

In Scott *vs.* Hickox, 7 Ohio St., 91–93, the statute of 1849 was held bar a right asserted in *equity.*
The Limitation Act of 1831, (3 Chase, 1778,) by (1) its *title* and (2) all *provisions*, applied only to *law* actions.
The act of 1849 by (1) its *title* "to give *additional* security to land les," [at law and in equity,] and (2) by all its *provisions* covers both *al* and *equitable* titles. It is, besides, to be liberally construed to ect its object. Angel Limitations, 24, 7 Ohio St., 94.
In every view the plaintiff must fail.

JEREMIAH HALL for the plaintiffs:
I. The patent is valid. Every extension of the period to locate land the several acts of Congress down to the act of March 3, 1855, and return surveys, revive the whole of section 2 of the act of March 23, 04, and postpones the release of said act for the same period.
The acts of March 3, 1855, and of May 27, 1880, subtract from the cond section of the act of March 23, 1804, the right to make new cations and revive every other provision of said section, and post- ne the release of said surveys from the several periods prescribed said last-named act. This is the effect of what Senator McDonald id at the time a bill on the subject passed Congress. (See Congres- nal Record, vol. 10, part 4, p. 3453, May 18, 1880.) The acts of 1855 d 1880 apply to surveys made prior to January 1, 1852. The con- ruction of all the acts as one continuous act to obtain patents applies the acts of 1855 and 1880. The patent in this case is valid from its te. (Thomas *vs.* White, 2 Ohio St., 540; Stubblefield *vs.* Boggs, 2 hio St., 216.)
II. One tenant in common cannot assail the common title. (Free- an on Co-tenancy, secs. 152, 158, 552, 530, 531, 553.)
III. The act of 1880 is a new grant founded on the original valid uity conveyed by the entry and survey, and relates back to the issu- g of the patent, October 29, 1861.
IV. The act of May 20, 1836, declares patents valid when issued in e names of deceased persons. (Wood *vs.* Ferguson, 7 Ohio St., R.)

WILLIAM LAWRENCE for defendant in reply:
I. The act of 1880 does not aid the plaintiffs.
1. This has already been shown.
2. This was shown, also, by Justice Matthews in Fussall *vs.* Hughes. n that case the court considered the effect of the act of 1880, and, after eciding that a patent could not lawfully issue on surveys returned ter the time prescribed in prior acts, said:

This conclusion is strengthened by the language used in the act of July, 1838, con- ming entries and surveys made in the interim between June 1, 1832, and the pas- ge of that act, during which, as has been shown, the limitation which barred them d become complete. That language is that such entries and surveys "shall be ld good and valid, any omission heretofore to extend the time for the making of ch entries and surveys to the contrary notwithstanding." Such language would t have been thought necessary, except upon the theory that, without it, all such tries and surveys would have been void. So, too, it is manifest by the act of March 1855, and of May 27, 1880, which extends the time for making and returning sur- ys until March 3, 1857, but on entries only that had been made prior to January 1, 2, that since the last-mentioned date all entries and surveys made prior thereto vacated, annulled, and made void, so that they cannot lawfully serve as the basis patents; the land covered by them lapsing into the general body of public lands the United States, to be disposed of according to the laws in force in respect ereto, and no longer constituting any portion of the Virginia military reservation bounty lands.
That conclusion, adopted *and applied to the present* case, is fatal to the complain- t's claim.

II. The defendant is not affected by any rule as to one co-tenan assailing the common title.

1. Neither the defendant, nor Wallace, whose claim was assigned t him, was ever a co-tenant with plaintiffs. The defendant, certainly, i not now. If a co-tenancy ever could have been said to exist, it has lon since been severed.

2. If the defendant had been a co-tenant he is not precluded fro showing the invalidity of plaintiffs' title. This has been shown fro the extract above quoted from the opinion in Chamberlain *vs.* Marshal which, in effect, authorizes the defendant to deny the plaintiff's clai of title, since the evidence "sweeps away all title" and "avoids th patent." A tenant in common who is in possession may show that co-tenant claiming to oust him never had title. (2 Greenleaf's Ev dence, 305, 307.)

III. The act of 1880 makes no grant. It passes no legal title. I purposely omits to provide for the issue of any patent except in th class of cases mentioned in section three. *Expressio unius exclusio a terius.* The fact that provision is made for the issue of patents in se tion three shows that no other patents were to be issued. No languag is employed to validate patents previously issued. Such validation b implication is not to be favored, and especially as Congress expressl provided for patents in one class of cases. It is not to be presumed tha Congress intended by relation to validate void patents, and thus cut o the rights of occupants, or subject them to vexatious litigation.

JAMES KERNAN and JOHN STILLINGS also for defendant.

October 25, 1882, Hon. JOHN A. PRICE, judge, delivered an opinio as follows:

This is an action to recover 100 acres of land situate in Hardin Count in military survey No. 12097, founded on military warrant No. 4641, fo 100 acres of land issued to Cornelius Beazley for his services as a soldie of the United States in the Virginia line on continental establishment

For the purpose of having determined a legal question arising in th case, the parties agree on the facts already stated.

The defendant insists:

I. That the patent under which the plaintiffs claim was issued with out authority of law, and, hence, is void, for the reason that the warran and survey were not returned to the General Land Office at Washing ton prior to March 3, 1857.

(*a*) If the claim of the defense be true, that the patent relied upon b plaintiffs was issued without authority of law, it follows, of course, tha the patent is void, and the plaintiffs take nothing under it. That a paten issued without authority of law is void, is a mere truism that I do no understand is disputed in this case, or, in fact, by any one.

(*b*) The pertinent and vital question in this case is: Was the paten under which plaintiffs claim issued without authority of law? This i the question we will now briefly consider.

II. The determination of this question depends upon a constructio of the act of Congress of March 23, 1804 (United States Land Law of 1881, pp. 32 and 33), limiting the period for locating Virginia mili tary lands, &c., and the various other acts of Congress, from time t time, extending time for making locations, and making and returnin surveys, down to and including the act of May 27, 1880. (Land Laws *p. 95.)*

he act of 1804 (Land Laws, pp. 32, 33), section 2, provides:

* That officers and soldiers shall have three years to complete locations, and rs to make return of surveys to the Secretary of the Department of War.

ion 3 provides, in substance, that lands not located within three from that time and surveys returned to the Secretary of War i five years from that time should be released from any claim for y lands, &c. By subsequent legislation the return was to be made General Land Office.

Supreme Court of the United States has decided that it was com- for Congress to limit the time when the lands to be appropri- by the claimants should be separated from the general mass of blic lands. (Jackson *vs.* Clark *et al.*, 1 Peters, 628.)

ious acts of Congress were passed extending the time for making ns, and for making and returning surveys, or doing some of those , down to the act of March 3, 1855. (Land Laws, p. 92.)

his act of March 3, 1855, gives two years' further time to make turn surveys to the General Land Office on entries that had been prior to January 1, 1852. That was the last act of Congress rela- the matter prior to the act of May 27, 1880. (Land Laws, p. 95.)

On the 3d of March, 1857, according to the limitation in the act of 3, 1855, the time expired within which a person might return a to the General Land Office, and procure a patent thereon.

survey in this case was returned to the General Land Office in ry, 1859, nearly two years after the last limitation had expired; g out of view the act of May 27, 1880. The patent issued in 1861 warrant and survey that had been returned when there was no ity of law for making such return. There was an interim from 3, 1857, to May 27, 1880, during which there was no law author- return of the survey. The return of the survey in this case to neral Land Office and the issuing of the patent were both during nterim.

When the patent issued it was without authority of law, because ed upon a return not authorized by law to be made. It was com- for Congress to make the limitation. The limitation ran through various acts, including the act of March 3, 1855, and from and March 3, 1857, the land was not subject to appropriation by patent imants of bounty lands. If the legislation had ceased with the March 3, 1855, with its limitation of two years, I think there could ly be a doubt that the patent relied upon is void, as having issued it authority of law. It is claimed, however, that it is in some way by the act of May 27, 1880, that said act gives validity to returns veys that were invalid and unauthorized when made, and to the s issued upon a survey so returned.

re was an interim once before, from 1833 to 1838, and in the act 8 Congress deemed it necessary to give validity to entries and s made during the interim. The act of July 7, 1838 (Land Laws, declares:

* And all entries and surveys, &c., * * * shall be held to be good and ny omission heretofore to extend the time for the making of such entries and to the contrary notwithstanding. * * *

act of May 27, 1880, third section (Land Laws, p. 95), extends ne two years *for making and returning surveys*, but does not de- alid returns that were made during the interim from 1857 to 1880, there was no authority for such return. Because Congress gives n time within *which to do certain acts*, it does not follow that it

thereby gives validity to similar acts previously done without authority. In the act of 1838 Congress deemed it necessary to make valid by legislation the acts done in the interim. In the act of 1880 it did not do so. In my judgment, the return of the survey being unauthorized in 1859, it is not cured by anything in the act of 1880, for that act does not purport to make any such return valid. In other words, the act of 1880 is not curative, only in so far as it purports to be. It does not purport to legalize a return of a survey made in 1859, nor to authorize or give validity to a patent issued upon a survey so returned.

The act of May 27, 1880, does not aid the plaintiff.

Section one is declaratory of the meaning of the act of February 18, 1871, ceding the "unsurveyed and unsold" lands to the State of Ohio. It declares that the act of 1871 did not cede any lands "which were included in any survey or entry." This excluded from the grant all lands covered by any entry or survey, whether (1) they included more land than authorized by land warrant or not, and (2) even if they had reverted to the United States by a failure to make return to the General Land Office prior to March 3, 1857, &c. Section 2 only gives validity to what had already been authorized by the act of March 3, 1855. Section 3 only authorizes parties having entries to "make and return their surveys" and receive patents in such cases. It does not authorize a new entry.

The act of 1880 does not, either in terms, or by construction, give validity to a patent issued on a survey returned in 1859. It follows, according to my construction of the law, that the patent under which plaintiffs' claim was issued without authority of law, and is therefore void.

The partition decree does not operate to estop the defendant from denying the validity of the patent. State courts are not necessarily bound to follow the decisions of the courts of the United States, but, as a general rule, they do so on questions relating to the construction of the acts of Congress.

Judgment for defendant.

District court of Logan County, Ohio.

FITZPATRICK'S HEIRS *vs.* JAMES FORSYTHE.

Civil action to recover land.

SYLLABUS.

1. On the trial of a civil action to recover real estate the jury may, in favor of a party defendant, who has had a possession adverse *in law* and *in fact* for twenty-one years, *presume a grant* from the plaintiffs whose title has been such that the statute of limitations does not run against it.
2. Where a party occupies adversely, for the period prescribed in the statute of limitations, an entry of land in the Virginia military district of Ohio, not patented at the inception of the adverse possession, the jury may, on trial of an action to recover such land brought by those claiming title under the patent, against the party in possession, presume a grant from the original holder of the entry to such party in possession, and thus defeat such action.
3. In favor of a party in adverse possession of real estate for a long period, but less than twenty years, under a delinquent tax sale, it may be presumed, when the records are destroyed, that all the proceedings have been regular to authorize a sale and to make a valid conveyance.
4. If the tax records are destroyed in such case, and secondary evidence of their contents cannot be produced, it will be presumed that all official acts have been rightfully performed, and a tax deed regular on its face will be *prima facie* evidence of valid title.
5. *Semble.*—That in such case, to support the deed, it is not necessary to resort to, or *prove the loss of,* secondary evidence.

COLE, MCKENZIE, AND PHELPS, JJ.

The material facts are these:

April 5, 1872, the plaintiffs brought a civil action in the court of common pleas of Logan County, to recover military survey 9953.

On the trial, April term, 1874, the plaintiffs gave in evidence, Virginia military entry 9953, date July 19, 1819, in name of James Fitzpatrick; a survey of same entry, January 14, recorded March 28, 1821, in surveyor's office, Chillicothe, patent date February 20, 1872, and to the plaintiffs described as heirs of James Fitzpatrick, and depositions proving heirship of plaintiffs.

WM. LAWRENCE, for defendant, moved to rule out the patent.

I. It is void, because issued after the time had expired within which patents could be lawfully issued in the Virginia military district of Ohio. (2 U. S. Stat. at Large, 274, sec. 2, p. 425; 3 Stat., 10 Stat., 143, 598–701; 1 Stat. 394, and other acts on the subject; 2 Greenl. Ev., sec. 541.)

II. The patent is not indorsed by the Secretary of War, as required, showing the land warrant unsatisfied. (1 Stat., 394; 10 Stat., 143.)

JEREMIAH HALL, for plaintiff.

By COURT. Motion overruled.

The defendant then offered in evidence: Entry 13314, in name of Duncan McArthur, date June 30, 1832, survey thereof October 15, 1832; patent to him July 1, 1837, proof that the surveys 9953 and 13314 covered the *same land;* record of delinquent tax sale of survey 9953 to Duncan McArthur December 12 1831, (on which no deed was ever made); McArthur's deed of conveyance, July 4, 1837, to Irwin, with warranty for survey 13314 and other conveyances to defendant; that Irwin and defendant had continued in adverse possession since July, 1837; about 35 years before suit was brought; that McArthur died 1838, that no claim was made by plaintiffs until after 1872; that the taxes had been regularly paid by McArthur, Irwin, and defendant, all of whom had made large and valuable improvements.

The court was asked to charge the jury on the law before the argument to the jury and on the law questions.

JEREMIAH HALL, for plaintiff, argued:

1. The patent to McArthur is void. (Act of Congress of March 2, 1807, *proviso*, 2 Stat., 425; McArthur's Heirs Lessee *vs.* Gallagher, 8 Ohio, 512; Galt *vs.* Galloway, 4 Pet., 331.)

2. There is no presumption of any grant in favor of defendant. (Hart's Heirs *vs.* Young, 3 and 4, JJ. Marsh, 408; Stark *vs.* Smith, 5 Ohio, 455; S. C., 7 Ohio Rep.; Wallace *vs.* Minor, 7 Ohio, 249.)

He cited on various questions, page Va. Mil. Titles, 126–131, 2 Ohio R., 415; Kerr *vs.* Watt, (6 Wheat., 550); Miller *vs.* Lee (6 and 7 B. Monroe, 91); Galt *vs.* Galloway (9 Curtis, 331); Taylor *vs.* Fletcher (7 B. Monroe, 82–90); 8 Ohio, 412.

WM. LAWRENCE, for defendant:

I. McArthur's patent is valid. The act of March 2, 1807, was changed by act December 19, 1854 (10 Stat., 598), and act March 3, 1855 (10 Stat., 701). The possession under it is a bar to the plaintiff's action) Miller *vs.* McIntyre, 6 Peters, 61). It is operative for all purposes of the statute of limitations. This is especially so in Ohio. The civil code protects even equitable titles.

II. But if McArthur's patent is void, then the defendant has a title independently of it, which is a *defense.*

Some preliminary considerations are necessary.

1. An *equitable* title in defendant is a defense. (24 Ohio Stat., 444–5–479; Civil Code, sec. 93; Wallace *vs.* Seymour, 7 Ohio, Pt. 1, p. 156; Duke *vs.* Thompson, 16 Ohio, 48; Holt *vs.* Hemphill, 3 Ohio, 236; Blake *vs.* Davis, 16 Ohio, 48; Ricard *vs.* Williams, 7 Wheat., 244; *Idem*, 109.)

2. The *land warrant* on which the entry of Fitzpatrick was made may be *verbally* sold so as to convey an equity. (Duke *vs.* Thompson, 16 Ohio, 41; Lessee of McArthur *vs.* Gallagher, 8 Ohio, 518–519.) The assignment may be presumed. (4 Wheat., 343; 7 B. Monroe, 279; 20 Ohio, 231; 7 Wheaton, 243.)

3. Possession long continued is evidence tending to prove a *purchase* by the defendant of the outstanding equity of plaintiffs before patent issue. (Bierce *vs.* Pierce, 15 Ohio, 529–540; Duke *vs.* Thompson, 16 Ohio, 41, 48, 54; McArthur *vs.* Gallagher, 8 Ohio, 518–519; Ward *vs.* McIntosh, 12 Ohio Stat., 238; Ludlow *vs.* Barr, 3 Ohio, 407; Ricard *vs.* Williams, 7 Wheat., 59 [237] Broom., Legal Max., 428; 3 Stark Ev., Part IV, 1203–1221; Courcier & Graham, 1 Ohio, 330; Arnold *vs.* Flattery, 5 Ohio, 272; 15 Ohio R., 548; 1 McLean, 93; 6 Cl. & Fin., 657; 2 W. Bl., 1228; Best on Presumptions, 87; 1 Greenl. Ev., § 21; 14 Mass., 145; *Id.*, 177; 10 Mass., 105; 2 Rob. La., 374; 1 N. H. R., 310.) The evidence is competent, and from which the jury may infer, *as a fact*, a conveyance. They are the judges of the *fact*, and by the rules of evidence, if the facts make it *probable* that there was a sale in some form, this is all that is required. In Angell on Limitations, sec. 3–4, it is said: "*Long* possession in the eye of the law is *an assurance of title*, because it is in *itself evidence of title, priora praesumuntur a posterioribus* * * * And in order to render the title of the possessor complete they [the courts] *will presume* * * * *execution* of deeds, &c., agreeable to the maxim, *ex diuturniate temporis omnia praesumuntur solemniter esse acta.*"

III. On the facts in evidence the jury as a question of *law must* presume a grant from Fitzpatrick to McArthur or his grantees, or as a question of *fact may* presume it.

I concede that to raise this presumption there must be a possession—adverse *in law* as well as *in fact*. There are cases where a possession adverse *in fact* is not so in law. I will mention three classes.

(1.) The possession of a lessee after the expiration of his lease is not *in law* adverse to the lessor, and cannot be until possession is surrendered to him.

(2.) The possession of a party under contract of purchase is *in law* not adverse to the vendor.

(3.) So the possession of a trustee is not in law adverse to the *cestui que trust;* but subject to these and similar exceptions the doctrine of presumed grant applies.

Subject to these exceptions and others similar in principle a grant will be presumed to a party long in possession from all adverse claimants.

1. *This is the doctrine of the elementary books.* (American Law Register, Feb., 1874, p. 69, old series, vol. 22, N. S. 13; Angell on Limitations, sec. 38–3–4–9–10; Starkie Ev., Part 4, p. 1222; 2 Greenl. Ev., sec. 539–541 n; 1 Greenl. Ev., 20–45 n; 2 Washburn Real Prop., 293 A [39]; 3 *Idem*, 51 [448]; Washburn on Easements and Servitudes, 2d Ed. [72], 109 [68] 103, &c.; Best on Presumptions of Law and Fact, 87; Wood Civil Law, 123; Phillip's Jurisprudence, sec. 147; Maine Anc. L., 284; Tudor Leading Cases, 114; Perry on Trusts, sec. 866; 2 Greenl.; Cruse Dig., Book 3, p. 423 n; Matthew's Presumptive Evidence, 1, 7, 271–277; 3 Dane's Abridgment, 55; Hoffman's Eccl. Law, 123, 126; Broom, Legal *Max., 800–852; 3* Cruse Digest, 467; 1 Greenleaf Evidence, sec. 21 n.)

he books enumerate many reasons in support of the doctrine.
.) *Public interests* require an end of litigation; *interest reipublicæ*, is the maxim which Angell declares (sec. 9) antedates the Christian is venerable for its age as it is hallowed in its purposes of peace.
.) *Public interests* require that titles be settled so as to promote im-rements and agriculture. (Angell, sec. 9.)
.) *Truth* requires courts to presume as probable that parties who ; delay to make claims have abandoned or transferred them. (9 nions Attorneys-General, 204.)
.) *Justice* requires that parties in possession (who *cannot* preserve lences of title, often in imperfect writings or by parol) shall not er by loss of evidence.
.) *Honesty* requires that *fraudulent claims* shall find no favor when evidence to defeat them is lost.
hese and other reasons are supported by authorities and legal max-hereafter cited.
ngell says:

> ie doctrine of prescription is founded on *public policy*. The spirit of the maxim, *est reipublicæ ut sit finis litium*, may be traced to a more remote period than the stian era. * * * With respect to land, there is one other *public con-ation* in support of the doctrine of prescription * * * that during the ation it must become waste and unproductive from want of improvement. * * * e of time is a dereliction of all ground of objection—a protection against * * * ns the *injustice of which* (from lapse of time) it is extremely difficult to detect and se. * * * *Vigilantibus non dormientibus inservit lex.* * * *

nd see the authorities cited above from Angell.

Stockbridge *vs.* West Stockbridge, 14 Mass., 257.

Chamberlain *vs.* Marshall and others, [Saint Paul] Federal Reporter, September 20, 1881; S. C., House Mis. Doc. No. 42, first session Forty-seventh Congress, 9; Fussell *vs.* Hughes, same Federal Reporter, 1; S. C., same Mis. Doc., 19.

Process presumed. (Morgan *vs.* Burnet, 18 Ohio, 535; Curtis *vs.* Keesler, 14 Barb., 511; Tracy *vs.* Atherton, 36 Vermont, 503; Ricard *vs.* Williams, 7 Wheat., 244; Wendell *vs.* Jackson, 8 Wend., 183; People *vs.* Dennison, 17 Wend., 312; People *vs.* Trinity Church, N. Y. court of appeals, September, 1860; 3 P. F. Smith, 84; 1 Rawle, Penrose & Watts, Pa., 78; 4 W. & S., 336; Mather *vs.* Trinity Church, 3 S. & R., 509; Bedle *vs.* Beard, 12 Co., 5; Croker *vs.* Pendleton, 10 Shepley, 339; Jackson *vs.* McCall, 10 Johns, 377; Vandyck *vs.* Van Buren, 1 Caines, 84; Burges *vs.* Bennett, 1 Caines, C., 1; Grote *vs.* Grote, 10 Johns, 492; Jackson *vs.* Schoonmaker, 7 Johns, 12; Mather *vs.* Trinity Church, 3 S. & R., 509; Powell *vs.* Millbank, 12 G., 3 B. R.; 1 T. R., 339; Williams *vs.* Presby. Soct., 1 Ohio St., 492.)

The rule is so strong, that in case of a possession adverse in law and in fact the presumption of a grant *cannot be repelled by evidence.* It is conclusive. (Strickler *vs.* Todd, 10 Serg. & R., 63–69; Rust *vs.* Lowe, 6 Mass., 90; Mayor *vs.* Horner, Cowp., 102; 2 Greenl. Ev., sec. 539; Wilson *vs.* Wilson, 4 Dev., 154; Ingraham *vs.* Hough, 1 Jones, N. C., 39, and cases collected; 22 [Philadelphia] American Register, 73.)

The doctrine was applied by courts of law to *easements*, because the statute of limitations did not apply to them. For the same reason courts must apply it in cases of lands to which the statute does not apply. The *reason* of the law is the life of the law.

3. *Courts of equity apply the doctrine.* (Ridley *vs.* Hettman, 10 Ohio, 524, commented on; 22 American Law Register, 69 [N. S., vol. 13]; Larrow *vs.* Beam, 10 Ohio, 502; Burnley *vs.* Stevenson, 24 Ohio St., 479; Matthews *vs.* Rector, 24 Ohio St., 444–5; Wallace *vs.* Fletcher, 10 Foster, 446; Miller *vs.* McIntyre, 6 Peters, 61–65; Rhodes *vs.* Symmes, 1 Ohio, 281. Fussell *vs.* Hughes alone cited per Matthews, Justice.) The doctrine originated with courts of equity in 1707, and was adopted by courts of law in 1761. (Wallace *vs.* Fletcher, 10 Foster, 446.)

4. *In tax sales* the courts *presume* the proceedings regular after a long possession, even less than twenty years. (Bierce *vs.* Pierce, 15 Ohio, 547–533–543; Wallace *vs.* Seymour, 7 Ohio, Pt. 1, p. 156; Matthews *vs.* Rector, 24 Ohio St., 445; Burnly *vs.* Stevenson, 24 Ohio St., 474; Ward *vs.* Barrows, 2 Ohio St., 241; Coombs *vs.* Lane, 4 Ohio St., 112; Ridley *vs.* Hettman, 10 Ohio, 524; Read *vs.* Goodyear, 17 S. & R., 350; Freeman *vs.* Thayer, 33 Maine, 76; Farrar *vs.* Eastman, 5 Greenl. Me., 345; Brown *vs.* Connelly, 5 Blackf'd, 391; Keane *vs.* Cannovan, 21 Cal., 300; Coleman *vs.* Anderson, 10 Mass., 105; Gray *vs.* Gardner, 3 Mass., 399;

S. *vs.* Dandridge, 12 Wheat., 70; 2 Ohio St., 241–246; 4 Ohio 148.)

vell, in his valuable work on tax titles, reviews the authorities, (4 Ed., 533), "that a long possession under a tax deed *short of l fixed by the statute of limitation*, is a sufficient basis for a *pre- of regularity*," and he says this doctrine "is in unison with the ıed principles of law as applied in analogous cases." It is not essary to *prove* the loss of records; it will be conclusively pre- It is not necessary to look for secondary evidence; at best it is, e, imperfect. The law supplies its *existence* as well as its *de-* ›resumption.

octrine is especially important, since the *principle* affects all *ales* under which it estimated lands equal to the entire area of transferred once in every generation of thirty years. It will sales by corporations, the authority of whose officers cannot d after a few years, &c. There is no one principle of law of reaching consequences and so important in giving repose to ːs as this. By force of these authorities it must be held that ale of December, 1831, was regular; that the officers did their d this on grounds of public policy, even if the fact were not so. also be presumed that the tax deed was made and thus a per- passed to McArthur.

re is nothing in the objection that the statute of limitations run against the government, nor until a patent issues—*nullum ːcurit regi*, as decided in Wallace *vs.* Minor (6 Ohio, 366, S. C.; Part 1, p. 249); Duke *vs.* Thompson (16 Ohio, 34); Clark *vs.* l (16 Ohio St., 408); Wood *vs.* Ferguson (7 Ohio St., 288).

so for several reasons, to be considered separately.

cases show that the doctrine of the *presumption of a grant* ex- pendently of the statute of limitations. The statute of limita- ıde no *new principle*, it was only declaratory of the common ngell on Limitations, *passim.*)

axim, *nullum tempus*, &c., was designed to protect the *rights of nment*, not private individuals who sleep on *their* rights. It is ant perversion of the maxim to make it give protection to pri- zens, and hence has been held not to apply in cases affecting ›ersons. (Beadle *vs.* Beard, 12 Co., 5; Jarbo *vs.* McAtee, 7 B. 279; Starkie on Evidence, Part 4, p. 1222; 22 American Law , 69.)

ax title operates upon an *entry* before patent, and carries to the ːr a title which will defeat the subsequent patent. (Jones *vs.* 8 Ohio St., 431; Holt *vs.* Hemphill, 3 Ohio, 232; Wallace *vs.* ; 7 Ohio, Pt. 1, p. 156; Douglas *vs.* Dangerfield, 14 Ohio, 522; *vs.* Niswanger, 20 Ohio, 556; Lessee of McMillin *vs.* Robbins, 2.)

title is an *original title.*

rant has been presumed even against the government on grounds ː policy, and contrary to the known fact. (22 American Law , February, 1874, pp. 70–71, note 84, and authorities there cited; *s.* Beard, 12 Co., 5; Jarbo *vs.* McAtee, 7 B. Monroe, 229; Good- Baldwin, 11 East., 488; Roe *vs.* Ireland, 11 East., 280; Read *vs.* ın, 3 Term R., 159; Rex *vs.* Carpenter, 2 Show., 48; Biddulph r, 2 Wils., 23; Bullard *vs.* Barksdale, 11 Ired., 461.)

› courts have sustained the title of parties in possession upon nd that an adverse claimant, by long neglect, had *abandoned* ı—equivalent to the *equitable doctrine of stale equity.* (Strauch

vs. Shoemaker, 1 Watts and S. Pa., 173; Chambers *vs.* Mifflin, 1 Pa. (Raule, Penrose and Watts), 79; Read *vs.* Goodyear, 17 Serg. and Rawle, 350.)

This doctrine, in its *reason*, its *policy*, and its *purpose*, applies as well where an original claimant *has paid* for his land as in cases where he has not. A party who *abandons* a claim thereby consents that others may acquire rights, after which the original claimant is, on every principle of law, morals, and justice, *estopped* from asserting a title.

IV. *a.* The doctrine of presumed grant should be sustained on grounds of *public* policy. This is especially so in a new country like Ohio, where early records were sometimes not carefully made—where many have been lost.

b. There are now in the Virginia military district 130,000 acres of land covered by entries, never patented, held by occupants more than twenty-one years, who are liable to be harassed by unscrupulous parties, who hunt up fictitious heirs, get patents in their names, and bring suits. (See speech of Hon. H. L. Dickey, House of Representatives, June 8, 1878, Congressional Record, vol. 7, part 5, page 4342.)

c. Parties who persistently refuse to pay taxes and wait to speculate on the advance in value of lands produced by the labor of others, do not present a favorable claim for judicial aid. (Carlisle *vs.* Longworth, 5 Ohio, 371, and cases cited *ante* as to presumptions on tax sales; Read *vs.* Goodyear, 17 Serg. and Rawle, 350.)

d. History has shown that uncertainty of titles is the greatest impediment to the improvement of lands. This has been seen in the Virginia military district. Waddy Thompson has described it in his "Recollections of Mexico." Men flee from a region of doubtful titles as from pestilence. (Angell on Limitations, sec. 9; Hovenden *vs.* Lord Ausley, 2 Schf. and Lefr., R., 629; Lewis *vs.* Marshall, 5 Peters, 470; Hawkins *vs.* Barnett, 5 Peters, 547.)

e. I may illustrate the necessity for the doctrine of presumed grant by a case.

On the 24th of July, 1832—more than forty years ago—a paper was executed as follows:

> Received, July 12, 1832, of Henry H. McPherson, three hundred dollars, in full payment of the south half of the southeast quarter of section numbered seven, and township numbered two, and range fifteen, known as the place Michael Kearns now lives on.
>
> Witness my hand and seal.
>
> JAMES McPHERSON.

Nearly thirteen years passed by when James McPherson, having died, Henry H. McPherson, on May 2, 1845, filed a bill in chancery against the widow and heirs of James McPherson to obtain decree for title.

He soon after had his bill dismissed without prejudice, because he found himself involved with surety debts, which would have taken the land.

Henry H. McPherson paid the taxes from 1832 to 1872, forty years; but the land being wood land, he had no actual *pedis possessis* which would protect him under the statute of limitations. In 1872 he agreed in writing to convey the land to J. McPherson, and in a few weeks thereafter died, the only title of record being in the original James McPherson, the patentee.

In 1875 the last purchaser, J. McPherson, found himself in litigation as to this land, and liable to be ousted by action by the heirs of James McPherson.

There was but *one living man* who knew of the existence of the *receipt*

of July 12, 1832—the attorney who filed the bill of May 2, 1845—who, for a wonder, after thirty years, remembered and produced it, and thus saved the title of the last purchaser. But for this fact his title must have been lost, unless it could have been saved by the doctrine of *presumed grant*, and that, too, merely on proof of (1) payment of taxes, and (2) the absence of claim by the heirs of James McPherson.

There is a *necessity* for the doctrine, especially in cases like this, where *a party in possession*—as the Supreme Court of Ohio possibly may be supposed to have held—*cannot avail himself of the benefit of the statute of limitations under a void patent, and against the prima facie valid patent of plaintiffs.*

If the court will not require or permit the presumption, what follows? Then, if the holder of an entry and survey delays procuring his patent for forty years, and can still maintain an action to recover land under it, he may do so for sixty years, or a hundred, and if this be so, then an adverse possession will be of no avail for

> Ten thousand years bright shining as the sun,
> With no less days to sing Hall's praise than when we first begun.

In Whitney *vs.* Webb (10 Ohio, 522), the court say that the doctrine of "*cumulative disabilities*" would let a claim run to infinity, which "is a consequence *too monstrous* and absurd to be admitted."

Adverse possession must raise the presumption of a grant, or "*monstrous consequences*" will result. The evidence of titles is liable to perish. Fire, flood, accident, negligence, all contribute to destroy the evidences of title.

The evidence perishes even of the original adoption of our constitutions and of the enactment of laws.

Change is written on everything. All earthly things decay. God only is unchangeable.

The statute of limitations is founded on a policy *approved in morals* and entitled to *favorable* consideration by the courts, and so is the doctrine of presumed grant. (Angell on Limitations, sec. 65, ed. of 1854; also secs. 3, 4, 9, and 10.) I refer also to page 17, Minority Views to House Rep., 784, first session Forty-third Congress, and the opinion of Attorney-General Black on a post-office claim as to loss of evidence and statute of limitations (9 Opinions Attorney-General, 204; Co. Litt., 6, American Law Register, February, 1874, p. 71.)

V. If necessary, I would insist that a possession under the MacArthur patent is protected by the statute of limitations. For the *purpose of the statute of limitations*, the McArthur patent passed the *legal title.* The act of 1807 only *protects the prior title* as between conflicting claimants, if asserted in due time. (Holt *vs.* Hemphill, 3 Ohio, 233–237; Niswanger *vs.* Wallace, 16 Ohio, 558–561; Wallace *vs.* Minor, 6 Ohio, 366; 7 Ohio, 249; 22 Amerigan Law Register, 71; Ridley *vs.* Hettman, 10 Ohio, 524; Miller *vs.* McIntyre, 6 Peters, 61; Fussell *vs.* Hughes [St. Paul], Federal Reporter. September 20, 1881: House Mis. Doc. No. 42, first session Forty-seventh Congress, 24.)

P. B. COLE, judge, charged the jury, in substance, that the McArthur patent is void; that it cannot be presumed that Fitzpatrick made an assignment or grant to McArthur, or those claiming under him, because he did not *claim* under Fitzpatrick, but under an adverse entry, survey, and patent; that the plaintiffs did not lose their right by *abandonment;* that in the Pennsylvania cases cited the locator *had not paid* for the

land, but Fitzpatrick's warrant was payment. He ruled out the McArthur entry, survey, patent, and tax sale.

LAWRENCE, for defendant. I ask the court to charge the jury that the Fitzpatrick warrant might have been assigned by delivery without writing; that if the jury find as a *fact* that it was assigned to McArthur, or that Fitzpatrick sold the entry or survey to McArthur, or made him any written conveyance of the land, the plaintiffs cannot recover.

COLE, J. This is so; but there is no evidence of such written conveyance.

LAWRENCE, for defendant. I ask the court to charge the jury that they are the exclusive judges of all disputed facts.

COLE, J. This is the law.

LAWRENCE then argued to the jury:

There was a sale by Fitzpatrick to McArthur or his grantee of the warrant on which entry 9,953 was made, or a written assignment, in some form, of the entry, survey, or land. I cannot produce the writing; but I ask you to believe it *once existed.* It is *probable* it did, and this is all the law requires. (1 Stark. Ev., 451.)

This probability is shown:

1. By the long neglect of plaintiffs to make claim. (Angell on Limitations, sec. 10.)

2. By the fact that Fitzpatrick himself made no claim; *he* knew he had no right to do so.

3. The *possession* of defendant, without other evidence, makes it *probable* that he had purchased in the adverse claim. (12 Ohio Stats. Rep., 238; 3 Ohio, 407; 7 Wheat., 59 [237]; Mathews on Presumptive Ev., 2–8–260; Best on Presumptions, 87; Angell on Limitations, sec. 3–4–9.)

This is supported by four maxims quoted by Angell: (1) "*Interest Republicæ ut sit finis litium;*" (2) "*Priora præsumuntur a posterioribus;*" (3) "*Ex diuturnitate temporis omnia præsumuntur solemniter esse acta;*" (4) "*Vigilantibus non dormientibus inservit lex.*" Hence it is a rule in law and equity that "he who is silent when he *should* speak *shall* be silent when he *would* speak." These are illustrated in Broom's Legal Maxims.

4. The McPherson case cited, illustrates the probability of the existence of written sale.

5. The McArthur patent is evidence that the General Land Office was satisfied that Fitzpatrick had no claim.

6. The tax sale shows that Fitzpatrick had no claim.

JEREMIAH HALL, for plaintiffs, argued the case, cited 14 Ohio, 509, and other cases.

COLE, judge, charged the jury again, when the jury retired, and, after deliberation, returned a verdict for defendant.

The plaintiffs then took a second trial, then permitted, as of right, by the statute.

The case was again tried to a jury, April 5, 1875, on the same evidence, the defendant being permitted to offer to the jury, subject to the instructions of the court, all the evidence he previously offered.

On this trial the defendant had also some evidence, tending to prove that the plaintiffs were not the true heirs of James Fitzpatrick, the original owner of entry 9,953.

LAWRENCE, for defendant, insisted that the plaintiffs must prove the heirship. (Adams on Ejectment [282]; 2 Greenl. Ev., sec. 309; 1 Greenl. *Evidence, sec. 104;* Niswanger *vs.* Wallace, 16 Ohio, 561.)

he same questions were made and argued as on the former trial, and same charge, in substance, given to the jury, who rendered a verdict lefendant.

he court overruled a motion for a new trial, and rendered judgment lefendant.

he whole case was put into a bill of exceptions by plaintiffs, who l a petition in error in the district court of Logan County, which was d at March term, 1876.

he court affirmed the judgment of the common pleas, and held that er the circumstances disclosed in the bill of exceptions the jury might erly have presumed a grant from James Fitzpatrick, or his heirs, to Arthur, or those claiming under him, and that upon the disputed s the jury had not erred.

he plaintiffs subsequently applied to the supreme court of Ohio for e to file a petition in error therein to reverse the action of the dis- t court.

he following is the argument submitted to the Supreme Court in foregoing case:

LLIAM LAWRENCE, JOSEPH H. LAWRENCE, J. B. MCLAUGHLIN, DUNCAN DOW, AND J. D. MCLAUGHLIN for Forsythe:

Plaintiffs in error were plaintiffs in common pleas, seeking to recover acres of land, called survey No. 9953.

ubstantially two defenses were pleaded: First the general issue; l next an equitable defense, to wit: that in 1819, James Fitzpatrick, ler whom plaintiffs' claim acquired an equitable title to the land ich was assigned to Duncan McArthur, defendants' grantor.

The case was tried before court and a jury, at April term, 1874, and dict for defendants, and allowance of second trial entered and per- ted. At the April term, 1875, second trial resulted in verdict and gment for defendants.

District court, upon petition in error, at March term, 1876, affirmed judgment of the common pleas. Leave is now sought to file a peti- n in error to the district court, alleging such affirmance to be error.

On the second trial two patents were in evidence, each confessedly ering the tract of land in suit: The first made in 1837, on entry of 2, and on survey No. 13314, of A. D. 1833, to Duncan McArthur, fendant's grantor. The second made in 1872, on entry of 1819, and rvey No. 9953, of A. D. 1821, to the heirs of James Fitzpatrick, who de the first entry and survey.

The auditor's record book of forfeited land sales was also in evidence, owing a sale of the land to Duncan McArthur, on 12th Dec., 1831, for 9.50.

The adverse possession of defendants since 1837 was admitted.

The assignments of error may be condensed into three:

I. Permitting in evidence patent to McArthur, his conveyance to de- ndants, then occupancy of the land, &c.

II. Permitting in evidence, record of tax sale to McArthur (1831).

III. Overruling plaintiff's motion for new trial.

Now consider these assignments of error *seriatim:*

I. Did the court below err in admitting McArthur's patent, with the ecedent entry and survey, and the grants and acts thereunder, to go the jury?

Defendants alleged that James Fitzpatrick assigned his equitable terest in the land to McArthur before McArthur made his entry and rvey.

And if so, McArthur's patent, not being in controvention of the "proviso of 1807," would be valid: and defendants entitled to the use of it, before the jury, and entitled to a verdict.

Again: under the general issue the heirship of plaintiffs is denied. The burden of proof on them.

Defendants insist that plaintiffs signally failed to establish their identity as heirs of James Fitzpatrick.

Now, if the jury should have found this issue in favor of the defendants, this again would sustain the validity of McArthurs's patent, for a stranger cannot be permitted to set up the *proviso* of 1807. (18 Ohio, 44; 7 Ohio, 160.)

Besides, plaintiffs could not have suffered by such evidence, for the entry of James Fitzpatrick was proven by certified copy; and court charged the jury that "the entry is proved by a certified copy thereof; and if any subsequent entry be made it is void; and survey, patent deeds, possession, &c., founded thereon, also void."

That McArthur made entry, survey, procured patent, conveyed to defendants; that they *occupied* and *improved* forty years without *notice* of adverse claim, and paid all *taxes;* and that he died thirty-three years ago, are all and each legitimate evidence, tending to prove an assignment of Fitzpatrick's equitable interest in the land to McArthur and his grantees.

We respectfully insist: the court was wrong in charging—as the record shows it did—"that no presumption of such assignment of such equitable title can be inferred from length of time the defendant's have been in adverse possession."

But such charge being actually given, no injury could have resulted to plaintiffs from the admission of evidence of the fact.

II. Defendants insist that the court did not err in admiting the *old record*—forty-four years old—showing that McArthur had purchased the land—survey No. 9953, of 300 acres, on December 12, 1831, for $79.50.

It will not be denied that this record tends to prove that the land had been sold to McArthur by the auditor, according to law; and if so, the equitable title passed away from Fitzpatrick and vested in McArthur; and if so, his patent is not void.

True the statute substantially says that a tax deed shall be *prima facie* evidence of the ownership of the purchaser. (S. & C., 1472, sec. 104.)

This does not exclude the possibility of other proof of ownership.

The deed is not the ownership, but only evidence thereof.

The record shows the lapse of time—more than fifty years—abandonment by Fitzpatrick, and more than forty years since McArthur bought the land for $79.50 from the auditor.

The lapse of time might induce the jury to find as a matter of fact that all was lawfully done that should have been done in the premises, including deed. (10 Mass., 105.)

III. A verdict will not be set aside unless *palpably—manifestly* against the evidence. (6 Ohio, 74 and 456; 1 Ohio S., 54; 4 Ohio S., 566.)

The verdict sought to be set aside must have been the result of a finding; that plaintiffs had failed to prove their heirship; or that defendants had succeeded in proving their acquisition of Fitzpatrick's equitable title to the land, or both.

Either one, or both, would justify the verdict.

Can it be said that plaintiffs are *palpably* and *manifestly* proven to be *the heirs-at-law* of the person who made the entry, No. 9953?

1. His name was Fitzpatrick; the name of the father of the plaintiffs is Fitspatrick.

2. Fitzpatrick was poor; he must have sold his land warrant, received his own service, for he swears in his pension application, under date 1820, that he only owned $39.25 worth of property, and he enumerates the articles, whilst Fitzpatrick was in 1819, and after, the owner survey No. 9953. It was surveyed for him in 1820.

3. The father of the plaintiffs, Fitzpatrick, was himself a Revolutionary soldier, as shown by said application for pension. The ancestor of owner of No. 9953, Solomon Fitzpatrick, was in the war of Independence.

James Fitzpatrick, the son of Solomon, must have been too young to serve in the war of Independence, for his father was a soldier in that war.

4. James Fitzpatrick, as shown by his warrant, was of the State of Maryland, not of Bourbon County, Kentucky.

The jury are not *manifestly* and *palpably* wrong in finding a failure of proof of heirship.

The fact of assignment was presumptively found on slight grounds Duke *vs.* Thompson. (16 Ohio, 41.)

In that case, the assignment was presumed upon the ground of abandonment—thirty years lapse of time—and Basil Duke's letter suggesting that his nephew was willing to exchange the land for other lands.

In the case at bar we have 50 years abandonment; thirty-five years adverse possession by defendants, claiming title; McArthur's tax purchase; his entry and survey, and patent, and his death thirty-three years ago, involving the loss of his papers.

This makes as strong a case as Duke *vs.* Thompson, in which Judge Hitchcock asys:

> There is no sufficient apology for this delay. It can be accounted for upon no other presumption than the one assumed by the defendants, that the complainant had parted with his interest. (16 Ohio, 54.)

IV. And last, not least, defendants, as we insist, have a right, upon the acknowledged *abandonment* of the *land* for half a century by the original equitable owner, and the confessed adverse possession of defendants for a period of full nigh forty years, claiming title, to the *conclusive*, *legal* presumption that they are the assignees of such equitable title.

And if this proposition be tenable, it would be a vain and useless work to set aside this verdict and reverse this judgment, and require the inferior court conducting a future trial of the same case, to instruct a future jury to return the same verdict.

Indeed it has been well said, "When substantial justice has been done by a verdict, a court should not disturb it, although found upon slight evidence." (12 Ohio, 151.)

Upon principles of reason—and the law is said to be "the perfection of reason."

It is right to presume an assignment after fifty years abandonment by claimants, and forty years advance possession by occupants. If it be, as it is, right, to presume a grant on twenty-one years' adverse possession. The presumption is not against the government, for it had parted with the equitable title in 1819.

Since such presumption of grant is right, *a fortiori*, the presumption of assignment is right, for the former requires deed, written, signed,

sealed, attested, acknowledged, and recorded, whilst the latter needs only a memorandum in writing, signed by the assignor, or parol agreement with possession. (McArthur *vs.* Gallogher, 8 Ohio, 518; Bauldin *vs.* Massie's heirs, 7 Wheaton, 122.)

The evidence of the latter being least permanent, the presumption should the sooner accrue.

We think the right of the defendants in this case to such *conclusive, legal* presumption is fully vindicated by many high and pertinent authorities. (10 Johnston, 377; 7 B. Monroe, 279; 10 Mass., 105; 16 Ohio, 41; 8 Ohio, 518; Mathews on pros., 2 to 8; Starkes on Ev., p. 1, 1203, and 1221; 3 Ohio, 236; 7 Wheaton, 122.)

Leave to file petition in error herein should be refused.

Jeremiah Hall for plaintiffs cited Stark *vs.* Smith (5 Ohio, 455); 7 Ohio, 249.

The supreme court refused permission to file such petition, thereby, in effect, affirming the judgment of the district court.

Upon the whole, the decisions *necessarily* affirmed the first two points stated in the syllabus, and the remaining points result from the authorities cited.

The foregoing case involves principles of so much importance, affecting so many land titles, that it is deemed proper to notice and quote more fully some of the authorities which support them.

I.—As to tax sales.

It is a *general rule*, when not changed by statute, that a party claiming title under a tax sale must show affirmatively a substantial compliance with the law to authorize it. Those acts which are required by law to be of record must be proved by the record. A leading case on the subject is Williams *vs.* Peyton (4 Wheaton, 77), and numerous authorities are collected in 2 Cow. and Hill's Notes to Phillips on Evidence, p. 832 (note q), and Vol. I, p. 460; Carlise *vs.* Longworth (5 Ohio, 370).

But there are *three modes* by which this proof may be made:

1. By the proper records.
2. If lost by secondary evidence of their contents; and
3. After the lapse of twenty-one years or the period fixed by the statute of limitations:—

(1) The *law* will *presume* that officers have done their duty and a tax deed under which a right has been asserted in any form will be evidence of title; and

(2) In case of the loss of record evidence, even in a *less period*, upon slight proof it may be left to a jury to infer, as a fact, that the proceedings have been regular without supplying all by secondary evidence.

In the former case the *law* supplies the requisite evidence, dispenses with the primary evidence, and does not require secondary evidence. In the latter case the law permits such evidence as may be reasonably accessible, and when all this is produced it leaves the jury to determine the fact in view of all the circumstances.

These doctrines rest upon *maxims* and grounds of *public policy* and on *rules of evidence*. These furnish legal proof as much so as original record evidence. The statutes regulating tax sales do not generally prescribe rules of evidence or interfere with legal maxims resting on public policy.

The authority of Blackwell on tax titles has been cited in the fore-case, and need not be again quoted here.

of the authorities in support of the principles stated are given as follows:

COLEMAN *vs.* ANDERSON.

(10 Mass., 105. Decided 1813.)

o recover land in 1810. Defendant held under tax sale deed, February, 1780. Verdict for defendant who failed to prove regularity of sale.

J.:

le [of defendant] is * * * denominated a *collector's title*, as expressing a doubt and difficulty. And collector's title must continue dubious and diffi-he proof and evidence required to support them so long as they remain unas-; *any other limitation than that which applies in a writ of weight.* * * * deeds [tax sale] are to avail, if at all, upon the legal authorities of the con-who made the sale]; and it was thought at the trial incumbent upon the ten-*ove all the circumstances requisite in the due execution of those authorities;* and this standing the length of possession under these deeds, and the long acquiesence rties otherwise entitled to the premises thereby surveyed. * * * The court in the opinion * * * that the judge * * * was right in submitting dence as there was, *although incomplete;* and if the jury were satisfied that the ies in the evidence were not chargeable to the fault or negligence of the party, hing in the power of the party to produce was willfully withheld, the jury y properly instructed to *consider everything as proved* which might be rationally ly presumed from the facts and circumstances proved. In short, at the dis-time which had intervened between the constable's sales and the trial it was able to require evidence of the particulars which the tenant * * * was rove, especially evidence from documents not intrusted with the party or ed with his title. The case is within the principal of * * * Gray *vs.* (3 Mass., 309).

ict confirmed and judgment accordingly.

GRAY *vs.* GARDNER.

(3 Mass., 399. Decided 1807.)

Action to recover land.

syllabus is:

nty years' acquiesence by the heirs of an intestate in the possession of the real of their ancestor, holden under a sale by the administrator, *the court will pre-*hat the administrator took the oath and posted the notifications according to evious to the date; evidence being given of the license to sell and of the actual auction.

court say:

it is * * * considered that * * * the transaction took place more enty years since, and that the probate records are now *incomplete;* the court fied * * * that the jury made a fair and *legal presumption.* * * * *If ions under these circumstances are not to be allowed the title to many estates holden es by license will be shaken, if not defeated.* And these presumptions are not than the common cases in the English books of procuring a grant after ears' undisturbed possession. (See Bergen *vs.* Bennet, 1 Caine's Cases 1, 2, 18.)

irmation of judicial sales presumed: Moore *vs.* Greene, 19 How., 9. Grayson *vs.* Weddle, 63 Mo., 523. Henderson *vs.* Herrod, 23 134. Tiplon *vs.* Powell, 2 Coldw., 19. Watts *vs.* Scott, 3 Watts, owan *vs.* Jones, 10 S. & M., 164.

READ *vs.* GOODYEAR.

(17 Sergeant & Rawle, 350. Decided July 3, 1828.)

is case the plaintiff showed a paper title. The defendant gave e of a warrant to the sheriff, *date July 5*, 1803, to sell the land

for taxes; a sale by sheriff to Ross November 28, 1803; a deed by Ross to defendant, and proved his payment of taxes until suit brought.

Rogers, J., in deciding the case, says:

If the plaintiff can recover under such circumstances, it is obvious it would be a premium for non-payment of the county rates and levies. He would recover back his lands without having paid or offered to pay one cent of the county assessments, for the defendant will have sustained these burdens for his benefit. For thirty years he has abandoned all claim, and in all probability we should not have heard of this suit had it not been for the increased value arising from the settlement of the country. It should be an unbending principle of law which would sanction the recovery in favor of a person so negligent of his rights and the duty imposed upon him against the holder of the land who has regularly paid the burden assessed for public purposes. *If one, claiming by warrant and survey, omit to pay one part of his taxes for twenty-one years, and suffer one who has entered without title and settled on the land to pay the whole taxes during that whole period, the jury may presume he was ousted* and he will be bound by the act of limitations. (10 Serg. & Rawle, 306.) This, it is true, is not the point of the case, and, therefore, not cited as a binding authority; but it is referred to for the good sense in the dictum of the learned judge. * * *

Several bills of exception have been taken to detached parts of the evidence offered by the defendant and overruled on the ground that "*an exact and punctual adherence to the laws can alone divest the title of lands on a sale of non-payment of taxes.*" That a minute conformity to the laws in ordinary cases must be proved under the act of 1796 and 1804 is too well settled to be now shaken, but that the principle under the facts governs this case may well be doubted. It has not, so far as my researches have extended, yet had the benefit of a judicial decision, whether *lapse of time may* not *alter the rule* and throw the *onus* on the warrant holder. That there must be *some limit* when *courts of justice* should apply the maxim, *omnia præsumuntur rite acta*, will appear from the consideration that otherwise the longer the possession the weaker the title. *After the lapse of twenty-one years it is almost impossible to prove a literal compliance with the act*, and to exact a punctual adherence to the letter would be equivalent to saying that a sale for taxes should not be supported. It would only be necessary to lie by until the evidence of the regularity of the sale was lost, when a recovery would be the necessary consequence. Time would strengthen the title of the warrant holder in the same proportion that it weakened the title of the vendee of the land. * * *

The court then cite Toth., 54, S. C. Vern., 196; Pencose *vs.* Frelaurey (1 Vern., 196); S. C., 2 Ch. Cas., 150, and the court say:

The plaintiff sought to have a conveyance of his father's estate set aside, which was made twenty years since, when the father was eighty years old, and *non compos mentis;* the court declared that after twenty years and two purchases it was not proper for the court to examine a *non compos mentis*, and dismissed the bill.

1 Ch. Rep., 40; 1 Ch. R., 139, S. P., 2 Ch. R., 48, the court refused to reverse a decree sixteen years old. 2 Vern., 32. "For a number of similar instances in which equity regards length of time, I would refer to Francis' Maxims in Equity, Maxim 10, p. 38."

The court then cite in support of presumptions at law: Young *vs.* Collins (2 Browne, 98); Strickler *vs.* Todd (10 Serg. & R., 63); Miller *vs.* Beates (3 S. & R., 490); Kingston *vs.* Leslie (10 S. & R., 391); Lessee of Ewing *vs.* Barton (2 Yeates, 318).

The court conclude:

Here in consequence of lapse of time the evidence should have been received and the jury should have been left to presume an ouster, and whether under the circumstances there was not an abandonment of all right to the land by the warrant holder.

This case shows that it is by no means necessary to prove the loss of records in order to let in the presumption that all has been properly done.

FREEMAN *vs* THAYER.

(33 Maine, 76. Decided 1851.)

Trespass involving title of land.

In 1816 the land was sold for taxes, and defendant claimed under this. *The statute* requires that to support a tax sale the party shall "prove *that such collector* complied with the requisition of the law."

The defendant proved "that the assessment * * * was lost * * that some of the notifications required by law were duly posted * * but he failed to prove * * * that the other requisite notitions were given."

In the court below the tax sale was sustained.

HOWARD, J.:

The defendant assumed that the statute furnished a rule of evidence for him in prosecuting a recovery and sustaining the title derived from the sale for taxes. * * * "this question of title had arisen before the expiration of *twenty years* from its origin, evidence might, perhaps, have been introduced, which time and accident may have rendered inaccessible. Then the facts, unaided by presumptions of fact, might be constituted the evidence to sustain the title originating in the collector's sale. It has been determined that after the lapse of thirty years from a collector's sale of land for taxes it may be presumed, from facts and circumstances proved, that the tax was, valuation, warrants, notices, &c., were regular; that the assessors and collector were duly chosen at legal meetings; that the collector was sworn; that a valuation and copy of the assessments were returned by the assessors to the town clerk, and that everything which can be thus reasonably and fairly presumed may have the force and effect of proof. (Gray *vs.* Gardner, 3 Mass. 402; *Knox* vs. *Jenks*, 7 Mass., 492; Newman *vs.* Anderson, 10 Mass., 105; Pepipscot Proprietors *vs.* Ransom, 14 Mass., 147; Bissom vs. *Cannon*, 14 Mass., 178; Battles *vs.* Holly, 6 Greenl., 145; *Soc. for Propagating the Gospel* vs. *Young*, 2 N. H., 310; Bergen *vs.* Bennett, 1 Cain. Cas. Err., 18; Case of Corporations, 4 Coke, 78; Rex *vs.* Long Buckby, 7 East., 45; Read *vs.* Goodyer, 17 Serg. & Rawle, 350; 3 Sugden *vs.* & P. 16—43, 6th Amer. from 10th Lond. tion; Pittsfield *vs.* Burnstead, 40 N. H., 494.)

Judgment on the verdict.

FARRAR *vs.* EASTMAN.

(5 Greenl., Maine, 345. Decided 1828.)

Tresspass involving title to land.

Defendant set up title under tax sale, deed April 5, 1780. In the court below, the court rejected the tax deed.

PRESTON, J.:

It is an ancient transaction; and neither the note of the proprietary, nor the deed under it, are drawn with any attention to legal precision. It is well known that much of the business of these proprietors was loosely conducted; and after such a lapse of time, and for the purpose of upholding their proceedings and of titles derived from them after such long acquiesence, they are to be viewed with great indulgence. Whether in a recent case greater precision and a more clear and perfect deduction and pursuance of authority would not be required, it is not necessary now to decide. *It is not essential that all the facts necessary to sustain and justify the sale should be recited in the deed. They may be presumed* or proved aliunde. Such as do not appear in the records and among the papers of the propriety may, *and after such a length of time will be presumed.*

The opinion of the court is that *the deed* of John Knox, which was rejected at the trial, was by law admissible in evidence. The verdict is, therefore, set aside, and a new trial granted.

BROWN *vs.* CONNELLY,

(5 Blackford, 391. Decided 1840.)

BLACKFORD, J.:

The rule that secondary evidence shall not be admitted where primary evidence is obtainable, although a sound general rule, has been relaxed in some cases where general convenience has required the relaxation. The character of a public officer is one of those cases.

KEANE *vs.* CANNOVAN.

(21 California, 300. Decided 1833.)

There are many transactions of which it is impossible or extremely difficult, after the lapse of little time, to *produce the proper evidence*, and in favor of the regularity

of which presumptions are in consequence made by the law. (Bierce *vs.* Pierce, 15 Ohio, 533–543–547; Wallace *vs.* Seymour, 7 Ohio, part 1, p. 156; Ridley *vs.* Hetmar, 10 Ohio; Lessee of Winder *vs.* Starling, 7 Ohio, part 1, p. 190; Bank of U. S. *vs.* Dandridge, 12 Wheat., 70; 2 Ohio St., 241–246; 4 Ohio St., 112–148; Easton *vs.* Savery, recently decided in Iowa.)

In Calvert *vs.* Fitzgerald (Litt. Sel. Cas., 388–392) probate of a will was presumed on proof of sales by the executor, the records having been destroyed.

Many of the authorities hereafter cited are equally applicable under this head, and to them reference is made accordingly.

The statute of limitations, the presumption of regularity of official acts after twenty years, and the doctrine of a presumed grant hereafter noticed, all rest on the same maxims and principles of public policy, and as the statute is conclusive, so should the presumptions referred to be equally regarded as conclusive. Hence it is that the authorities noticed show that the legal presumptions in favor of the regularity of official proceedings is *per se* original evidence or the equivalent of original evidence after twenty years, and in such cases there is no necessity for a resort to secondary evidence or even to other original evidence.

And certainly when the primary evidence to support a tax sale or judicial sale is lost, the presumption in favor of regularity may well be made without reference to secondary evidence.

This must be so, because:

1. This is the logic and result of the authorities.

2. It must be so on *reason*. All secondary evidence is imperfect. If it be produced it will come with its imperfections, and thus a party may lose a title which the original evidence would have sustained. If the presumption be not made, lapse of time instead of being a muniment of title will impair titles, (1) by the loss of evidence and (2) by the facilities thereby afforded to advances, fictitious and fraudulent claims.

3. Any other doctrine practically defeats the whole purpose of the presumption and the maxims on which it rests. It is equivalent to saying that where the maxim ***omnia acte rite***, &c., is ***most needed***, it shall not apply. It is most needed to avoid (1) the uncertainties of secondary evidence, (2) the loss of original evidence by time, and (3) to defeat fraudulent claims.

4. It must be so on grounds of *public policy*.

The same rule which applies to tax sales is to apply to all judicial sales. Is a defect in or loss of judicial records never to be cured? If not, there is no safety in judicial sales. If the record of a judgment is burned, shall not a sheriff's deed of sale, especially if there be no adverse claim made for 20 years, be sufficient evidence of the existence and regularity of the official proceedings necessary to support it?

II.—Presumption of a Grant.

1. Where a party has been in adverse possession of lands, tenements, or hereditaments, during a period equal to the statute of limitations, the law in cases to which the statute does not apply presumes a grant to him from the original holder of an outstanding legal or equitable title. This doctrine was first adopted by the court of chancery in 1707, and it was adopted by the courts of law in 1761. (Wallace *vs.* Fletcher, 10 Foster, 446.)

This doctrine has been much discussed in the elementary books and adjudicated cases. Reference will be made to some of these.

THE ELEMENTARY AUTHORITIES.

For civil law see Sanders' Justinean, Lib. 2, Title 6.
The standard American work on the subject says:

Long possession in the eye of the law is an assurance of title, because it is in itself evidence of title. *Priora præsumuntur a posterioribus.* * * * And in order to render the title of the possessor complete, they (the courts) will presume * * * execution of deeds, &c., agreeable to the maxim, *exdiuturnitate temporis omnia præsumuntur solemniter esse acta.* (Angell on Limitations, sec. 3-4.)

Again Angell says:

The doctrine of prescription is founded on *public policy.* The spirit of the maxim *Interest Reipublicae ut sit finis litium* may be traced to a more remote period than the Christian Era. (Angell, Lim., sec. 9, *Vigilantibus non dormientibus inservit lex.*)

With respect to land * * * there is one other public consideration in support of the doctrine of prescription * * * that during the litigation it must become waste and unproductive from want of improvement. (Angell, Lim., sec. 9; Hovender *vs.* Ld. Aunsley, 2 S. Ch. J. & Lifr. R., 629; Lewis *vs.* Marshall, 5 Pet., 470; Hawkins *vs.* Barney, 5 Pet., 457.) Lapse of time is * * * a dereliction of all ground of objection—a protection against * * * claims, the injustice of which (from lapse of time) it is extremely difficult to detect and expose. (Angell, sec. 10.)

American Law Register, April, 1879, vol. 18, N. S. No. 4; 2 Washburn Real Property Book 2, p. [40] 293.
The most philosophical of all our books on evidence, says:

Although no one can prescribe against the Crown, the maxim being *nullum tempus occurrit regi*, yet after long-continued enjoyment a grant from the Crown may be presumed. After long-continued exercise of a right of advowson by the prior of Stonely, it was held that a grant was to be presumed. For that all should be presumed to have been solemnly done, which could make the ancient appropriation good, although the original grant could not be found. (Stark. Ev., Part iv, 1222; 1 Phillips, Ev., 442-455; Cow. & Hill, Notes, Part 1, page 486, note 298 to Phil. Ev.)

Another elementary writer of high authority says:

The fiction of presuming a grant from 20 years' possession or use was invented by the English courts in the eighteenth century to avoid the absurdities of their rule of legal memory, and was derived by analogy from the limitation prescribed by the statute, 21 Jac. 1, c. 21, for actions of ejectment, *not upon a belief that a grant in any particular case has been made, but on general presumptions.* (Washburn on Easements, 103 [62].

Again he says (p. 102 [66]):

Now an enjoyment of an easement for the term of twenty years raises a legal presumption that the right was originally acquired by the title. And this, *though the jury should not* find as a fact that any deed had ever been made. *And although the user never began, in fact, as an act of trespass.*

Washburn, referring, p. 108 [72], to Townsend *vs.* Downer (32 Vt., 183), and Tracy *vs.* Atherton (36 Vt., 503), and in considering "whether the presumption * * * is one of law or fact," says:

If it is to raise the presumption of a grant without regard to the fact whether such a grant was really made or not, it may with the strictest propriety be said that the law presumes a grant, and it would be the duty of the court to direct a verdict.

Tudor, in his Leading Cases, 114, says:

It became usual for the purpose of supporting a right which had been long enjoyed, * * * and upon enjoyment being proved for twenty years, the judges held, or rather directed, juries to believe that a presumption arose that there had been a grant made of the easement * * * which had been subsequently lost.

In the work on "The Law of Religious Societies" by Lawrence it has been discussed at some length. (22 American Law Register (O. S., Feb., 1874; Vol. 13, N. S.), 72.)

THE JUDICIAL AUTHORITIES.

COURCIER *vs.* GRAHAM.

(1 Ohio, 330.)

This was an action of covenant for breach of contract to convey land, and the question was as to the sufficiency of the title. The court say:

"The first position of the court [below] was, that no continuance of possession for any time less than where the statute of limitations would operate to bar a recovery in ejectment was sufficient to warrant the presumption of a deed. The authorities show that continuance of possession for a less period of time, accompanied by other circumstances, might be sufficient to warrant this presumption." In Baily *vs.* Shaw and others (6 East., 215), Lord Ellenborough says: "I take it, that twenty years' exclusive enjoyment of water, in any particular manner, affords a *conclusive* presumption of right in the party so enjoying it, derived from grant or act of Parliament. But less than twenty years' enjoyment may or may not afford such presumption, according as it is attended with circumstances to support or rebut the right."

From this I infer that *possession* alone would not be sufficient to warrant the presumption *unless continued for twenty years*, and, if so, the court were correct. The possession under Dayton had continued for more than twenty years, and this possession was accompanied by circumstances which would justify the jury in presuming, and they probably did presume, a title in that individual.

LESSEE OF BLAKE VS. DAVIS.

(20 Ohio, 214.)

In this case a question of title arose under an imperfect partition.

Ranney, J., said:

Possession was taken about nineteen years before the commencement of the suit, and has been continued * * * Presumptions do not always proceed on a belief that the thing presumed has actually taken place. "Grants are frequently presumed," as Lord Mansfield says, "merely for the purpose and from a principle of quieting the possession. There is much occasion for presuming conveyances of legal estate, as otherwise titles must forever remain imperfect, and in many respects unavailable, when, from length of time, it has become impossible to discover in whom the legal estate (if outstanding) is actually vested." On appeal to the Lord Chancellor (Erskine) the decree was affirmed. He says: "The presumption in courts of law from length of time stands upon a clear principle, built upon reason, the nature and character of men, and the result of human experience. It resolves itself into this, that a man will naturally enjoy what belongs to him. That is the whole principle." Mr. Justice Story, in delivering the opinion of the Supreme Court of the United States in the case of Prevost *vs.* Gratz (6 Wheat., 481,) says: "The doctrine in Hilary *vs.* Walker on this subject meets our entire approbation," and it is also approved by Chancellor Kent in Ham *vs.* Schuyler (4 J. C. R. 7,) Dutch Church *vs.* Mott (8 Paige, 81). Again in Ricard *vs.* Williams (7 Wheaton, 109;) Mr. Justice Story says: "There is no difference *in the doctrine whether the grant relates to corporeal or incorporeal hereditaments. A grant of land may as well be presumed as a grant of fishery or of a common or of a way.* Presumptions of this nature are adopted from the general infirmity of human nature, the difficulty of preserving muniments of title, and the public policy of supporting long and uninterrupted possessions;" "and where the other circumstances are cogent and full, there is no absolute bar against the presumption of a grant within a period short of the statute of limitations."

If further illustration from the books were needed upon this subject I know not where the general doctrine will be found more perspicuously stated than in Cowan & Hill's notes to Phil. Ev., vol. 2, page 368.

LESSEE OF M'ARTHUR VS. GALLAGHER.

(8 Ohio, 518.)

In this case the validity of a patent for land in the Virginia military

district was called in question because the land-warrant on which the entry was made had not been assigned to the locator. The court say:

It must be remembered that no particular mode of assigning military land-warrants was prescribed by law. It might be done by an indorsement upon the warrant itself, or on a separate paper. Nor was there *anything in the law requiring it to be done even in writing* That mode was adopted most convenient to the parties. (7 Wheat. R., 122.) Courts will, under circumstances sufficiently strong, *presume a grant or a deed*, and there is no impropriety in a proper case made in presuming the assignment, and such presumption was made in the case of Bouldin *vs.* Massie's Heirs (7 Wheat. R., 122), and in that case the subject is very fully and at large discussed.

Rex *vs.* Joliffe, 2 B. & C., 54, cited 1 Phil. Ev., 442, note, whe it is said "Lord Tenterden, C. J., speaks of modern uses as affording cogent evidence of prescription, and he observes that it is fit to recommend a jury to make the presumption. In that case the usage had existed only for twenty years." (Chambers *vs.* Mifflin, 1 Penn. R., 29; Rawle, Penrose & Watts.)

Although a warrant has been surveyed, yet, if not returned, the owner may change its lines, or change its place altogether, and lay it on any other vacant land anywhere near; until it is returned the State has no power to collect arrears of purchase money. *It never can be that a man can wait thirty or forty years, and all that time* be able to say, this is my land, if I please, and not mine unless I please. I will take this land and pay the State for it if the country improves and it rises in value, or if somebody will render it valuable by improvement, but I will not take it and pay the purchase money unless something occurs to render it more valuable.

Nor is it the law that a man can commence procuring a title from the State, and, from pure negligence, leave it in such situation for more than twenty years as that he is not bound to take it, and no one else can safely take it.

JARBOE VS. M'ATEE.

(7 B. Monroe, 279.)

Bill to rescind contract of sale because title defective, as no patent had issued to vendor or those under whom he claimed. The vendor * * * had been in possession fifty years.

The court say:

After long continued enjoyment a grant from the Crown may be presumed (3 Stark., 1221; 1 Greenl. Ev., 50). In regard to public grants, a longer continued peaceable enjoyment has generally been deemed necessary, in order to justify the presumption, than is deemed sufficient to authorize the like presumption in the case of a deed from private persons, 10 Johns., 377. It is the policy of the law, and necessary to the repose and security of society, that such a presumption should be indulged. * * * This presumption is peculiarly proper in this State, the history of its land titles showing that the lands were often covered by several conflicting grants. * * *

After the lapse of fifty years, which is the longest period allowed by our statutes for the institution of a suit for any description of real property, the presumption of a grant from the Commonwealth is authorized in favor of a possession * * * continued during the time.

See cases collected Cow. & Hill. Notes, Part 1, p. 485, Note 298 to Phil. Ev.

In Ricard *vs.* Williams, 7 Wheaton, 59, it is said:

Possession of land by a party claiming it as his own in fee is *prima facie* evidence of his ownership. * * *

Presumptions of a grant arising from the lapse of time are applied to corporeal as well as incorporeal hereditaments.

In general the presumptions of a grant are limited to periods analogous to those of the statute of limitations, in cases where the statute does not apply. * * *

But if the circumstances of the case are very cogent, and require it, a grant may be presumed within a period short of the statute, presumptions * * * are adopted from the general infirmity of human nature, the difficulty of preserving muniments of title, and the public policy of supporting long and uninterrupted possessions.

There is another feature of this doctrine of presuming a grant.

II. *Where the possession is adverse the presumption of a grant is one of law, not merely of fact, and the jury will be instructed to presume* it if not *rebutted. In some cases it is conclusive.*

The possession of a lessee is not in law adverse to his lessor; that of a vendee is not adverse to his vendor; that of a trustee generally not adverse to his *cestui que trust.* But a possession adverse in law and in fact is entitled to the benefit of a conclusive presumption of a grant to support it. (Cow. and Hill's Notes, Part I, p. 486; note 298 to Phil. Ev.)

This is so for several reasons.

1. *The authorities are so.* (Washburn on Easements, 105–70:)

It may, therefore, be stated as a general proposition of law that if there has been an uninterrupted user and enjoyment of an easement * * * for more than twenty-one or twenty, or such other period of years as answers to the local period of limitation, it affords conclusive presumption of right in the party who shall have enjoyed it.

He cites numerous authorities, and on page 109 [72] says: "This must now be considered as established law."

In Strickler *vs.* Todd (10 Serg. & R., 63–69), Duncan, J., said:

It is well settled that if there has been an uninterrupted exclusive enjoyment above twenty-one years (the Pa. Stat. Limitations) of water in any particular way, this affords a CONCLUSIVE prescription of right in the party so enjoying it, and that is equal to a right by prescription.

In Rust *vs.* Lou (6 Mass., 90), Parsons, J., says:

The country has been settled long enough to allow of the time necessary to prove a prescription.

In Mayor *vs.* Horner, Cowper, 102, it is said:

So in the case of prescription, if it be time out of mind, a jury is ***bound*** to conclude the right from that presumption if there could be a legal commencement of the right. (See Oswald *vs.* Leigh, 1 Term, R., 270.)

Parker *vs.* Foote, 19 Wend., 309:

Where there is no evidence to repeal the presumption arising from twenty year's uninterrupted adverse user of an incorporeal right, the judge may very properly instruct the jury that it is their duty to find in favor of the party who has had the enjoyment. (Coolidge *vs.* Leonard, 8 Peck, 504.)

Knight *vs.* Halsey (3 Bos. & P., 172–206; 3 Dane, Abr., 55), says of the doctrine that it is—

A novel invention of the judges for the furtherance of justice, and the sake of peace where there has been a long exercise of an adverse right.

Parker *vs.* Foote (19 Wend., 309):

The modern doctrine of presuming a right by grant * * * exerts a much wider influence in quieting possession than the old doctrine of title by prescription. (Curtis *vs.* Keesler, 14 Barb., 511.)

Tracy *vs.* Atherton, 36 Vermont, 503:

The presumption arising from such long-continued possession unrebutted is a presumption of law, and that it is *conclusive* evidence or sufficient evidence to warrant the Court in holding that it confers a right on the possessor.

Jackson *vs.* McCall (10 Johns., 377):

Where M. died in possession of land, and his son and heir at law succeeded to the possession, and continued in the undisturbed possession of it for above eighteen years, it was held that a purchase of the title by the ancestor might be presumed; and where there was an order of the council of the colony of *New York*, in 1764, for the survey of the lot, as allotted to J. P., and a survey thereof made, though no patent could be found on record, it was held that a patent to J. P. and a deed from him to the ancestor, might be presumed for the sake of quieting the possession.(a.)

In a foot note to the 3d edition of Johnson's Reports [Ed. 1839, p. 277] *numerous* authorities are collected. (Eldridge *vs.* Knott, Cowp.,

; Bealey *vs.* Shaw, 6 East, 208–219; Tyler *vs.* Wilkinson, 4 Mason, –402; Sherwood *vs.* Burr, 4 Day, 244.) And see: Lessee of Ludlow McBride, 3 Ohio, 254; Lessee of Armstrong *vs.* McCoy, 8 Ohio, 135; rke *vs.* Smith, 5 Ohio, 455; Smith *vs.* Stark, 7 Ohio, Part 2, p. 551; wn *vs.* Willer, 10 Ohio, 143; 4 Mason, 397; 10 Serg. & Rawle, 63; 4 , 244; 3 Greenl. R., 120; 2 Peck, 466; 4 Peck, 245.

11. *The presumption may be made of a grant from the holder of an* ITABLE TITLE, *as an entry and survey in the Virginia military dis- t in Ohio, even as against a subsequent patent.*

. The authorities so hold.

These have been stated.

n Ricard *vs.* Williams (7 Wheat., 59) it is said the presumption is per "in cases where the statute [of limitations] does not apply."

1 Phil. Ev. [7 Ed.] 161: Cowen & Hill's Notes, Part 1, p. 486; note 298: There is the greater necessity for it in such cases. They are within reason of the rule.

In Ridley *vs.* Hettman (10 Ohio, 524), a court of equity refused to de- e the legal title in favor of the prior entry where the junior entry rried into patent had been held for a period equal to the statute of itations, though the statute did not bind the chancery court. This s evidently on the doctrine of "stale equity," or it should be more perly on a *presumed grant* from the party holding the original entry. ice the case of Ridley *vs.* Hettman was decided, the act of Congress of arch 2, 1807, was passed, which declares void all patents issued on lands which there was a prior survey. The holder of a prior survey could, erefore, procure a patent and would no longer seek his remedy in uity, but would do so at law. But if he delayed to procure his pat- t until the period had run out for presuming a grant from him in favor the holder of a junior survey carried into patent with twenty-one ars' possession under it, he would be without remedy. His equity der his survey would pass by presumption to the occupant under e junior survey. (Duke *vs.* Thompson, 16 Ohio, 48; Blake *vs.* Davis, *id.*, 242; Ricard *vs.* Williams, 7 Wheat., 59.) This must be so, or a rge class of cases will be without remedy.

The only effect of the act of 1807 was to change the remedy from uity to ejectment at law. What was before illegal in equity became egal at law. Yet if equity would not, prior to the statute, aid a party ter twenty-one years to recover on his prior survey against an occu- nt under a junior survey, it must, since the statute enjoin an ejectment, rather defeat it by the presumed grant, or rights will be sacrificed to ere modes of redress. (Angell in Limitations, sec. 38; Johnson *vs.* win, 3 S. & R., 291; Thomas *vs.* Hatch, 3 Sumner, 170; 22 American aw Register, (O. S. Feb., 1874), 72.)

2. These authorities rest upon a public policy especially applicable to e Virginia military district.

(*a.*) These principles as applied to government grants are of the ut- ost importance, and are absolutely essential to the repose of society. he statute of limitations does not run against the government, nor in vor of the occupant of land, until the patent issues. (Roads *vs.* Symms, Ohio, 316; Duke *vs.* Thompson, 16 *id.*, 34.) A person who had com- lied with the pre-emption laws of Congress, and so entitled to a patent, ight neglect to procure its issue, his estate travel down through gen- rations, and when the evidence of his claim is lost a third person ight enter the land, procure patent, and oust him but for this salutary octrine. So a person might enter land, receive his certificate of entry,

and having paid in full, but neglected to procure patent, might need the same principle for his protection.

(*b.*) So in the Virginia military district in Ohio, in the Kentucky military district, and in others, entries on warrants never carried into patent might be lost without remedy but for this principle. Imperfect entries need the application of the rule. This should certainly be so where a party came into possession under "color of title," as in Bedle *vs.* Beard (12 Co., 5). In the Virginia military district the prior entry appropriates the land even as against a junior entry carried into patent.

(*c.*) In our judicial proceedings the cases are very numerous where lands are sold without any legal title of record in the party owning—in fact on the record a mere equity. Unless aided by the presumption of a grant a fatal blow is given to judicial sales.

(*d.*) Cumulative disabilities are not allowed even with the letter of the statute of limitations in their favor, because they would permit claims to travel down throughcenturies, "and be productive of incalculable mischief." (Ridley *vs.* Hettman, 10 Ohio, 526.)

The same evil will result if a grant may not be preserved in favor of a possession against the holder of an equitable title.

3. The maxim, *nullum tempus occurrit regi*, has no application to such a case.

(*a.*) The purpose of this maxim is *to protect the rights of the government*—not to enable private persons claiming under it to perpetuate a claim against other parties claiming from them. (Birch *vs.* Alexander, 1 Wash., R., 34; Cow. & Hill's Notes, part 1, p. 486, Note 298 to Phil. Ev., and Note 301, pl. 40, p. 539, where authorities are collected; 22 American Law Register (vol. 13, N. S.), 466; Gwynne *vs.* Niswanger, 20 Ohio, 556; McClain *vs.* Bovey, 34 Wisconsin.)

Additional authorities will be found cited in the preceding pages.

(*b.*) The cases, therefore, which hold that the statute of limitations does not run in favor of a party in possession before a patent has issued does not in the least affect the doctrine of the presumption of a grant. In those States, as in Ohio, where a party can at law defend his possession on proof of an equitable title with right of possession, this presumption is sufficient to defeat an action to recover possession supported by a patent issued even within twenty years before suit brought.

In view of the vast number of land titles affected by these principles, it is hoped this review may be found of some value to the profession, and of service to the cause of justice in protecting titles.

BELLEFONTAINE, OHIO, *January* 1, 1879.

WM. LAWRENCE.

47TH CONGRESS, 2d Session. } HOUSE OF REPRESENTATIVES. { MIS. DOC. No. 11.

REPORT OF EXPENDITURES BY THE CLERK OF THE HOUSE OF REPRESENTATIVES.

LETTER

FROM

THE CLERK OF THE HOUSE OF REPRESENTATIVES,

TRANSMITTING

Report of expenditures from December 5, 1881, to June 30, 1882.

DECEMBER 4, 1882.—Referred to the Committee on Accounts and ordered to be printed.

CLERK'S OFFICE,
HOUSE OF REPRESENTATIVES UNITED STATES,
Washington, D. C., December 4, 1882.

SIR: In obedience to the requirements of sections 60, 61, 62, 63, and 70, of the Revised Statutes of the United States, and in compliance with the terms of a resolution of the House of Representatives of July 24, 1868, I have the honor to submit the following report of clerks and other persons employed, and of payments and issues made in this office from the 5th day of December, 1881, to the 30th day of June, 1882, inclusive, which will be found classified in papers marked A, B, C, D, and E, and to state that the persons named as in the service of this office have been usefully employed.

Very respectfully,

EWD. McPHERSON,
Clerk of the House of Representatives.

Hon. J. WARREN KEIFER,
Speaker of the House of Representatives.

A.

COMPENSATION OF THE OFFICERS, CLERKS, MESSENGERS, AND OTHERS RE(AN ANNUAL SALARY, &c.

BLICATION AND DISTRIBUTION OF PUBLIC DOCUMENTS.

COMMUNICATION

FROM

. AMES, SUPERINTENDENT OF DOCUMENTS, DEPARTMENT OF THE INTERIOR, A. R. SPOFFORD, LIBRARIAN OF CONGRESS, AND SPENCER F. BAIRD, SECRETARY OF THE SMITHSONIAN INSTITUTION,

IN COMPLIANCE WITH

esolution of the House of Representatives relative to the publication and distribution of public documents.

EMBER 22, 1882.—Referred to the Committee on Printing and ordered to be printed.

WASHINGTON, D. C., *December* 22, 1882.

IR: The undersigned, in compliance with a resolution of the House Representatives adopted August 8, 1882, as follows:

esolved, That the Librarian of Congress, the Secretary of the Smithsonian Institu-, and the Superintendent of Documents, Department of the Interior, be, and they hereby, requested to compile the laws and regulations now in force governing the iting and distribution of public documents; to prepare a tabulated statement wing the number of documents printed by order of the Forty-sixth, and the first ion of the Forty-seventh Congress, and under general laws now in force, and the osition directed to be made of the same, and to report what reductions should be le in the number of such documents, and to present such other information at their mand relating to public documents as will tend to promote judicious legislation, submit the draft of a bill to provide for the printing and distribution of documts; and they shall report to the House at the beginning of the next session",

pectfully submit herewith—

First. A compilation of such laws as are permanent or continuous in ir operation governing the printing and distribution of public documents, with notes embodying information deemed of general interest value.

Secondly. A tabulated statement of the documents of the Forty-sixth ngress and of the first session of the Forty-seventh Congress, printed to be printed in compliance with the provisions of laws already in ce and of special acts or resolutions of Congress, showing the num-, distribution, and, so far as it has been found practicable to give it, cost of the same, together with the number to which each member

of Congress is entitled, and the surplus remaining after the distribution directed has been made.

The committee are very deeply impressed with the number of documents printed by authority of Congress, aggregating for the Forty-sixth Congress 2,324,254, and for the first session of the Forty-seventh Congress 1,354,947. This last number includes the entire edition of the Reports of the Census, estimated as containing sixteen volumes besides the Compendium. It does not, however, include the volumes of the Records of the Rebellion subsequent to the twelfth, of which it is estimated that there will be eighty-four, nor does either number include reports and other documents printed for the use of the several executive departments and offices of the government, the expense of which is paid from their annual appropriations for printing, nor the fifty copies of each document printed for international exchange.

They are no less deeply impressed with the lack of system and economy in the distribution of these documents. The one reform most essential to secure the object for which it is supposed public documents are issued is the decrease of the number of agencies by which they are distributed. Under the practice now prevailing, nearly all documents, whatever may be their cost and value, are distributed by from two to four agencies, each in ignorance of what the others are doing, so that it is impossible but that to no small extent documents are sent in duplicate and triplicate to the same parties.

In the judgment of the committee, no distribution of public documents entirely satisfactory will be accomplished until all excepting those required for official use are distributed by a single agency, which can and should be required to detect and prevent duplications, which should be held to a strict accountability for all documents intrusted to its care, and upon which all orders should be given by those entitled by law to direct their specific distribution.

It is not believed that any special inconvenience would attend such a system, or that the rights and privileges of any party would be infringed by its adoption. An approximation to this system was made at the last session of Congress in providing for the distribution of the whole edition of the Rebellion Record and of the reports of the Tenth Census by the departments from which they respectively emanate. The results of this departure from the methods hitherto in force will be of special interest in their bearing upon this question.

The establishment of a single agency for this work would very greatly subserve the public convenience, as it would soon come to be recognized as the source from which information in regard to any and all documents could be readily secured, and the party with whom most of the correspondence relating to the subject should be conducted.

Very serious inconvenience is now experienced by many, especially scientists and other students and librarians, in obtaining definite information as to particular documents desired, and often not until protracted correspondence has transpired, if at all, is such information gained.

PUBLIC LIBRARIES.

In the distribution of documents, the most prominent place should be given to public, university, and college libraries. All the large libraries of the country are permanent institutions, and in their possession documents are of manifold and continuous service, as they are there made accessible from year to year to the public.

In the judgment of the committee, no argument is needed in support

f the proposition that definite provision should be made for the regular ıpply of all the principal libraries of the land with all the publications f the government as they are issued from month to month.

No increase in the numbers printed need be made. It is only neces- ıry that of those ordered by Congress, a sufficient number shall, by ct of Congress, be set aside for this special purpose, to be forwarded pon their publication to such libraries as from their prominence seem ıtitled to receive them, thus putting them in possession of the same t the earliest practicable moment, rather than compelling them to ait, as is now too often the case, for months and even years after the ublication of documents before they receive them, if they do not alto- ether fail of this.

After repeated inquiry it has been found that of the principal libraries ' the country not more than one in eight is supplied by Congress with ocuments published for general distribution. This fact alone indicates ıe importance of some permanent provision of law in their behalf. Ex- ting laws allow of the designation of one institution as a depository ' public documents in each Congressional district, and of two at large ı each State, to which have been hitherto sent the Journals, Executive ıd Miscellaneous Documents, and Reports of Committees of the two ouses of Congress, and the Official Register of the United States.

By the extension of the law of the "usual number" to all reports and ocuments ordered by Congress, these depositories will hereafter receive ›pies of all such publications issued by authority of Congress.

No limitation is now imposed by which the designation of small and nimportant libraries can be prevented. It is thought by the commit- ıe that a minimum limit as to the size of a library entitled to such esignation should be fixed, so that hereafter only those that give as- ırance of permanence shall become depositories.

CONGRESSIONAL RECORD.

Of all the publications of the government the Congressional Record probably the one the possession of which would be most prized by braries, and to which most frequent reference would be made by the ublic. With the exception, however, of State and Territorial libraries, ıd of the libraries of Soldiers' Homes, no provision of law now exists ›r the assured supply of this valuable document to any single library.

Whether libraries receive it or not depends upon the action of mem- ers of Congress, by whom alone, except as above noted, this work is ratuitously distributed.

The number of libraries in regular receipt of this work is surpris- ıgly small. As a result of inquiries just made, it has been found, for xample, that of twenty-six State and Territorial libraries reporting, nly eight, and of three hundred and forty other libraries containing ach 5,000 volumes or more, only seventy-four, have received complete ets of the Record of the Forty-sixth Congress. Nothing could more onclusively show the importance of some action by Congress provid- ıg for the regular supply of this work, not only to State and Territo- al, but also to other libraries—at least to the depositories of public ocuments in the several States and Territories.

CONGRESSIONAL GLOBE.

In this connection the committee call the special attention of the louse to the odd volumes *of the Congressional* Globe purchased sev-

eral years since from Messrs. Rives, and now in the care of the Public Printer. These aggregate about 60,000 volumes. Of this collection the Public Printer, in his Annual Report for 1878, says, "only two complete sets of the Globe are on hand"; and, after stating the expense of reprinting a sufficient number of the missing volumes to make five hundred complete sets, he adds, "it will be perceived that, unless a reprint is had, the volumes on hand are almost valueless, except for waste paper." And in his report for 1880, again recurring to the subject, he remarks:

> It is respectfully submitted for the consideration of Congress, that should it be determined not to direct a sufficient number of volumes to be printed to make a specified number of sets, then to authorize the sale of the odd volumes, bound and unbound, at public auction to the highest bidder, as waste paper.

In the judgment of this committee, however, this will be a most unwise disposition to make of these volumes. They form a most valuable collection from which to supply deficiencies in the public libraries of the country, and if Congress does not deem it expedient to incur the large expense involved in reprinting the missing volumes, the odd volumes on hand should be used for this purpose. An opportunity is now afforded for adding to, if not completing, a large number of sets of the Globe in the large libraries of the land, which will probably never again occur, and the committee know of no disposition that can be made of these odd volumes more judicious, involving as it does comparatively little expense, and avoiding the multiplication of broken sets.

Replies to inquiries addressed to all the principal libraries of the country disclose the following facts: That of twenty-six State and Territorial libraries reporting, only four contain complete sets of the Globe; of three hundred and forty other libraries, containing each 5,000 volumes or more, only two possess complete sets. There are probably a few other complete sets in libraries from which no returns have been received.

Most of these libraries, however, contain partial sets, many with but few missing volumes, any addition to which will be highly prized.

To add to already existing collections for the purpose of making them more complete, rather than to increase the number of partial sets, is by far the wisest policy to pursue in the disposition of these documents.

With this end in view, the draft of a joint resolution is herewith submitted, providing for their distribution, and for the supply hereafter to State and Territorial libraries, and to depositories of public documents, of the Congressional Record, which is commended to the favorable consideration of Congress.

The section providing for the future supply of depositories with the Record involves the printing from stereotype plates of only 450 copies additional to those already provided for by law, while its adoption will relieve members of Congress of all care and responsibility as to these libraries, and save for other disposition, to such as are accustomed to supply them, their copies of the Record, which would otherwise be sent to these depositories.

REDUCTION OF NUMBER OF PUBLIC DOCUMENTS.

It is the opinion of the committee that the laws governing the printing and distribution of documents may be so modified as materially to diminish their number, without detriment to any public or even private interest. An examination of the laws and tables herewith submitted shows that the regular editions of the Congressional documents of the *Forty-sixth* Congress, comprising Journals, Executive and Miscella-

ieous Documents, Reports of Committees, and Abridgment of Messages ınd Documents, printed by authority of laws continuous in their operaion, amounted to 425,050 volumes; of these, the "usual number" ımounts to 222,300 volumes; the Abridgment to 70,000 volumes, while he remainder, 132,750 volumes, is made up of Annual Reports of the Executive Departments and offices of the government issued over and ıbove those included in the "usual number." It does not, however, inelude the 50 copies of each printed for international exchange, nor the editions of their own reports issued by the several executive departnents of the government, so that the number stated is much below the otal amount printed.

Of the "usual number," 1,900, nearly one-half are delivered in an unbound form. The unbound documents of the Forty-sixth Congress ımounted to 96,000 volumes, of nearly 1,000 pages each, most of which are doubtless ultimately sold as waste paper. Those of the first session of the Forty-seventh Congress will amount to not less than 80,000 volumes, if existing regulations continue in force.

The committee call special attention to this matter, as it seems to them this great waste should be, and in large measure can be, readily prevented. This becomes more important in view of the fact that by action of Congress at its last session the "usual number" of all documents ordered by Congress, whether by permanent law or special resolution, will hereafter be printed, so that, for example, such works as the memoirs and other special reports of the Geological Survey and Bureau of Ethnology, and all other valuable and costly publications of the government, will be issued in large numbers in unbound form, if no change is made in the law governing this matter.

The committee are aware that in regard to the Reports of the Committees of Congress, and to many Executive and Miscellaneous Documents, it is important that they shall be in the hands of members of Congress at the earliest practicable moment.

But in respect to the scientific publications of the government, and to such Annual Reports of the Executive Departments as form each a separate and entire volume, it is submitted that the brief delay essential to binding would not materially retard or prejudice legislation.

In compliance with instructions contained in the resolution of the House appointing this committee, the draft of a bill is herewith submitted, embodying their views as hereinbefore expressed regarding the printing and distribution of documents.

In this bill the committee have sought to combine and unify the various laws now in force providing for the regular editions of Congressional documents, and to make such reductions in the number of the same as seemed expedient.

By it all ambiguity in the law establishing depositories of public documents is removed.

Provision is made that at such depositories all important public documents shall be found, so that every citizen may be assured that at the depository in his district he may find, and be able to consult free of charge, any document in which he is interested.

Provision is furthermore made that public, college, and university libraries, not depositories of documents, containing over 5,000 volumes, shall be in like manner supplied with the Journals of Congress, the Annual Reports of the several Executive Departments and offices of the government, and with publications of a scientific character, printed by order of Congress. These documents are of special value to libraries, embracing as they *do, in the first place,* a succinct statement of the pro-

ceedings of Congress; secondly, a detailed history from year to year of the operations of all the departments of the government; and, thirdly, the results of those investigations in the several departments of science which have been conducted under the authority and at the expense of the government.

That these provisions may not increase the expense of printing to the government, the number of Journals, Annual Reports of Departments, and the Abridgment of Messages and documents, is reduced much below the number now published.

Had the provisions of this bill been applicable to the documents of the Forty-sixth Congress, the number of volumes of Executive documents and Abridgment would have been nearly 100,000 less than were printed, while of those delivered in unbound form, and in large measure wasted, there would have been bound, and so saved for permanent use, nearly 60,000 volumes. The number of volumes of the first session of the Forty-seventh Congress similarly saved would not be less than 50,000.

In regard to the supply of the executive departments of the government with sets of documents, it has seemed best to the committee to provide in the bill for a duplicate set for the general library of each department, leaving it to the several departments to order such additional sets as each should deem necessary for the use of its subordinate bureaus and offices, the expense of the same to be paid from its appropriation for printing, the only exceptions to this rule being the important libraries of the Patent Office and the Surgeon-General's Office.

PAMPHLET LAWS.

The committee think that a reduction can properly be made in the number of copies of pamphlet laws issued, and submit draft of a joint resolution embodying such reduction, and also modifying existing laws regulating their distribution and the distribution of Statutes at Large, the object being the prevention of duplication by charging a single office with the distribution of the entire edition ordered for this purpose.

This resolution reduces the number of pamphlet laws to be printed about 15,000 copies per session, 10,000 of which are those sent in bulk to the governors of the several States and Territories for their distribution, which supply it is deemed expedient to discontinue.

PUBLIC DOCUMENTS FOR SALE.

The existing provisions for the sale of documents are very unsatisfactory; so impracticable, indeed, that very few avail themselves of them. It is only by ordering in advance of publication, and paying the estimated cost, that public documents, with few exceptions, can now be purchased directly from the government. Occasionally a small edition of a document has been ordered by Congress for sale, either by the Public Printer, or by some office of the government, but as for the great mass of documents printed no opportunity is afforded for their purchase, while undoubtedly there are many citizens and institutions that would rather buy such documents as they desire than beg them from members of Congress or officers of the government.

The committee are convinced that some more practical method for supplying such parties with public documents should be adopted, and that opportunity should be afforded for the purchase of any publication *of the* government so long as the edition of the same printed remains *unexhausted*.

This can readily be accomplished by giving the officer in charge of general distribution of documents authority to make requisition on those offices of the government by which or for which documents printed for such as are not required for strictly official use. It will be necessary for an edition of any document to be ordered for sale, simply that some one officer of the government shall have authority sell any document printed, and, whenever he has an order for any ument, to make requisition for the same upon the office for which it printed, if it is not already in his charge. To the care of this same cer, in the judgment of the committee, should be committed all doc- nts which have been or may be ordered for sale, instead of, as now, ttering them through several departments and offices of the govern- nt.

In this matter, as in others, greater unity and system are much to be sired. This officer should be required to give bonds, and to make an mized report each year to Congress, the proceeds of all sales, of course, be paid into the Treasury.

The committee submit the draft of a joint resolution embodying their ws in the premises, the adoption of which, it is believed, will subserve blic convenience and interest, and afford all the opportunity for the rchase of public documents which any one can desire.

Should its provisions acquire the force of law, arrangements can very dily be made for informing the public, especially libraries, as to the aracter and cost of documents as they are issued from month to month, result of which would doubtless be an increasing demand for them purchase.

It is not thought worth while by the committee to discuss the ques- n of limiting the gratuitous distribution of documents and of substi- ing their sale in its place, as the sentiment of Congress seems entirely posed to so radical a change; but no serious objections to the pro- ions above suggested present themselves.

OFFICIAL DOCUMENTS OF THE BRITISH PARLIAMENT.

The following information regarding the papers and debates of the tish Parliament is submitted as being of interest in its bearing upon subject under consideration.

There is no systematic gratuitous distribution of official papers, such prevails here. It existed to some extent formerly, but has been much rowed of late with a view of cutting down the large expenditure for nting; and cases occur of government departments having to pur- se papers for their own use.

Some of the government departments, such as the Foreign Office and Board of Trade, send gratuitously certain documents to the foreign nisters in London, to the Chamber of Commerce, and to the most minent newspapers.

Members are now only entitled to one copy of each paper, &c., pre- nted to Parliament; some of these, however, are not distributed, but n be obtained on members applying for them. A notice of such unde- ered papers is given in the Daily Votes and Proceedings of the House. Only in respect to the *Bills that are in progress* can members obtain tra copies—these they can get from the vote office in the House.

The papers are ostensibly printed for the use of the House and public partments, extra copies being struck off for sale to the public. This gan in 1836.

There are four different *printers employed*: Hansard, for the Com-

mons' papers; Eyre & Spottiswoode, for the Lords' papers; Harrison, for the diplomatic papers emanating from the foreign office; and Nicholls for the "Daily Votes and Proceedings." There are likewise government printers at Edinburgh and Dublin for papers relating to those parts of the United Kingdom.

The order for printing rests with the Speaker, through the librarian, and the printing committee appointed by the House.

A complete set of Commons' papers can be subscribed for at the rate of £12 12*s.* per session, payable in advance. This for delivery in town; extra for the country and for abroad.

The Daily Votes and Proceedings cost £2 10*s.* per session.

The Journals, 10*s.* annually.

The Lords' papers cost, sessionally, £8 8*s.* for town delivery.

The Daily Minutes cost £2 10*s.* per session.

The Lords' Journals are not sold, but copies can be obtained through peers.

The scale price of papers on sale to the public is at the rate of 1*d.* per folio sheet; and when there are plans, at the rate of 3*d.*, 6*d.*, or 1*s.* each, extra.

The *Debates of Parliament* are published as a private venture by Mr. Hansard, the government recompensing him by taking a number of copies for official and departmental use, besides granting him an annual subsidy of, it is believed, £2,000. "*Hansard's Debates*" is the only complete form in which the discussions in Parliament appear, and the work is looked upon as official. The sketches are revised by the authors. The subscription is £5 5*s.* per session.

DELAY IN BINDING RESERVED COPIES.

It is very much to be regretted that the documents "reserved for binding," which embrace the copies sent to depositories of documents throughout the country, should be so long detained at the Government Printing Office.

A number of the documents of the Forty-sixth Congress are still unbound, while very few, if any, of those of the Forty-seventh Congress are ready for distribution, not even the Annual Reports of the Executive Departments of the government.

It is not surprising that libraries and other institutions, entitled under the law to receive them, become impatient of such delay, and are disposed to criticise the methods that obtain in public business.

Whether the cause of this delay is to be found in deficient appropriations or elsewhere, the committee are unable to determine. Congress can undoubtedly remedy the evil, and secure the prompt binding of documents after they are printed, instead of their being stored and retained in unbound form, for months, if not years, at the Printing Office.

SURPLUS DOCUMENTS.

The accompanying tables show that after the quota of the several documents to which each member of Congress is entitled has been assigned, there remains a large number of surplus copies, aggregating for the Forty-sixth Congress 27,814 volumes. Some of these documents are doubtless required for the use of the several offices of the two houses of Congress; but after all these requirements are satisfied, many documents are probably left for whose distribution no provision is made.

It is suggested that such surplus documents be transferred to the De-

irtment of the Interior for distribution to public libraries and other stitutions, instead of being allowed to accumulate in the folding-oms of the Capitol.

CONCLUSION.

In conclusion, the committee beg to say that they have not deemed it st to recommend any radical departure from the existing system of sposing of public documents. They have sought to harmonize and ify the laws relating to the subject, to reduce as far as seemed prac-cable the number of documents to be printed under provisions of law ntinuous in their operation, to present information which might pro-ote judicious legislation in the matter of special orders for printing cuments, to provide for the certain supply to the principal libraries the country of documents printed at public expense, and for their le in a manner convenient for the buyer, to centralize their distribu-on and sale, so far as this can be done, without seeming to infringe e privileges of members of Congress and others, and thus prevent aste of documents by duplication, and to secure more adequate reports Congress of the disposition made of public documents.

In recommending that this distribution, so far as any change in this rection is suggested, be made by the Department of the Interior, the mmittee have in view the fact that by act of Congress said depart-ent is already constituted the custodian and distributer of all docu-ents not specifically ordered for Congress or for any executive depart-ent of the government, and that rooms are provided for their recep-on, and that an office exists, and has long existed, properly equipped r the satisfactory prosecution of this work.

The utilization of this office will avoid the expense of creating a new gency, and will make available the valuable experience which has been quired by those now charged with its administration.

Very respectfully,

J. G. AMES,
Superintendent of Documents, Department of the Interior.
A. R. SPOFFORD,
Librarian of Congress.
SPENCER F. BAIRD,
Secretary of the Smithsonian Institution.

Hon. J. WARREN KEIFER,
Speaker of the House of Representatives.

The documents of the Forty-fifth Congress delivered in unbound form amounted to 79,000 volumes; those of the Forty-sixth Congress to 96,000 volumes, most of which were doubtless ultimately sold as waste paper. Those of the first session, Forty-seventh Congress, will amount to 80,000 volumes, if the same distribution is continued.

b The "usual number" was subsequently increased to 1,900.

c Only 1,670 copies of the Senate and 1,610 of the House Journal are reported by the Public Printer as printed under the provisions of this section and subsequent increase.

d The cost of binding the "reserved copies" is not included in this sum.

e As only the aggregate cost of documents of which only the "usual number" is printed is given in the Reports of the Public Printer, it is impossible to state the cost of this individual volume.

TABLE A.—*DOCUMENTS OF THE FORTY-SIXTH CONGRESS, &c.*—Continued.

Volume.	Title.	Total number ordered.	Usual number.	Ordered for the Senate.	To each Senator.	Surplus.	Ordered for the House.	To each Representative.	Surplus.	Department or office.	Number of copies.	By what authority printed.	Cost.

a The cost of the 50 additional copies printed for the Library of Congress is included in this amount. b Not yet published. c The cost of 1,900 additional copies the "usual number," is included in this amount. d The cost of 4,900 additional copies, the regular edition, is included in this amount. e It is estimated that this work will comprise ninty-six volumes. As, however, the law defining the number to be printed and directing the distribution thereof was materially modified by the Forty-seventh Congress, only the five volumes previously issued are here enumerated.

a By authority of a joint resolution approved July 7, 1882, the "usual number," 1,900, of each document named in this table ordered by Congress will be printed additional to those herein specified, excepting such as are included in the Executive or Miscellaneous documents of Congress, and those printed prior to the passage of said resolution.

b Not yet published.

c It is estimated that the Report of the Tenth Census will embrace from fifteen to twenty quarto volumes. On the supposition that it will contain sixteen volumes, the aggregate number in the entire series for which provision is made is 350,650 volumes. This includes the fifty copies of each volume that go to the Library of Congress, and also the "usual number" of each.

d It is estimated that this work will embrace eighty-four volumes additional to the twelve above enumerated. Should existing provisions govern the printing of the remaining volumes the aggregate number of volumes in the entire series will be 1,228,700. This number includes the fifty copies of each volume that go to the Library of Congress, and the "usual number" of each volume authorized by joint resolution of July 7, 1882.

ACTS AND RESOLUTIONS

OF

CONGRESS,

PERMANENT OR CONTINUOUS IN THEIR OPERATION,

GOVERNING THE

PRINTING AND DISTRIBUTION OF PUBLIC DOCUMENTS.

ACTS AND RESOLUTIONS OF CONGRESS.

CONGRESSIONAL DIRECTORY.

A Congressional Directory shall be compiled at each session of Congress, under the direction of the Joint Committee on Public Printing, and the first edition for each session shall be ready for distribution within one week after the commencement thereof.—Sec. 77, Revised Statutes.

The first edition of the Congressional Directory for each session shall be printed and ready for distribution within one week after the commencement thereof.—Sec. 3801, Revised Statutes.

NOTE.—There were printed of the Congressional Directory of the Forty-sixth Congress, 72,700 copies; of the Forty-seventh Congress, special and first sessions, 53,150 copies.

CONGRESSIONAL RECORD FOR CONGRESS.

Resolved by the House of Representatives (the Senate concurring), That the Congressional Printer be directed to furnish 3,100 copies for the use of the Senate, and 7,250 copies for the use of the House of Representatives, of the Congressional Record, or of any such other like official report of the debates in Congress as may be hereafter authorized by law, either daily as originally published, or in the revised form, without binding, or in bound volumes, or part in each form, as each Senator, Member, and Delegate receiving the same may elect.—Concurrent resolution of June 4, 1874.

CONGRESSIONAL RECORD FOR THE SUPREME COURT.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Public Printer be authorized to furnish the Chief Justice and each of the associate justices of the Supreme Court of the United States, and the clerk and marshal of the court, with a current copy of the daily Congressional Record, and at the end of each session a bound copy of the proceedings of Congress for such session. And the Public Printer shall also furnish to the official reporter of the Senate 5 bound copies of the Congressional Record for each session.—Joint resolution, January 27, 1881, vol. 21, Statutes at Large, p. 515.

SEMI-MONTHLY INDEX OF THE CONGRESSIONAL RECORD.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Joint Committee on Printing be, and they are hereby, authorized and directed to make the neces-

sary provisions and arrangements for hereafter issuing the index of the Congressional Record semi-monthly during the sessions of Congress, beginning with next ensuing session.

That the Public Printer be, and he is hereby, directed to print and distribute the same number of copies of said semi-monthly index as he prints and distributes of the daily issue of the Record, and to the same persons and in the same manner.

That the Public Printer shall employ such persons to prepare said index as shall be designated by the Joint Committee on Printing, who shall also fix and regulate the compensation to be paid by the Public Printer for the said work, and direct the form and manner of its publication: *Provided, however*, That the compensation allowed for preparing said semi-monthly index, including their compilation into a session index, shall not exceed the average total amount now allowed by the Joint Committee on Printing for compiling the session index.—Joint resolution, February 8, 1881, vol. 21, Statutes at Large, p. 516.

ADDITIONAL COPIES OF THE RECORD FOR THE SENATE.

Resolved by the Senate (the House of Representatives concurring), That the Public Printer be directed to furnish, commencing with the first session Forty-seventh Congress, 3,425 copies of the Congressional Record, for the use of the Senate, instead of 3,100 copies, as ordered by the concurrent resolution of June 4, 1874.—Concurrent resolution, June 24, 1882.

CONGRESSIONAL RECORD FOR STATE AND TERRITORIAL LIBRARIES.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Public Printer be, and he is hereby, authorized and directed to forward free of charge to the State and Territorial libraries of each State and Territory, having or that shall hereafter have and maintain, a State and Territorial library, one bound copy of the Congressional Record of each session of Congress or special session of the Senate, beginning with the Forty-seventh Congress. And the Public Printer is directed to print fifty additional copies of the same to meet the requirements of this joint resolution.—Joint resolution, August 2, 1882, Pamphlet Laws, 1st sess. 47th Cong., p. 390.

NOTE.—134,550 volumes of the Record of the Forty-sixth Congress, and 85,984 volumes of the Record of the first session of the Forty-seventh Congress, were printed in accordance with the above provisions.

PURCHASE OF CONGRESSIONAL GLOBE.

* * * That the sum of $100,000 is hereby appropriated to purchase of the present owners and proprietors, the following property, to wit: 25,000 bound volumes of the Congressional Globe, 40,000 unbound volumes of the Congressional Globe, 46,000 metal plates for printing the Congressional Globe, 24,000 composition plates for printing the Congressional Globe, the two story fire-proof brick building situate in the rear of the Globe building on Pennsylvania avenue, and the copyright for the complete work: *Provided*, That the Public Printer, the Secretary of the Senate, and the Clerk of the House of Representatives, shall examine the said property, and shall certify to the Secretary of the Treasury, that it is in good order and in accordance with the schedule

mitted, before any of said money shall be paid: *And provided fur-*, that said property, when purchased by the United States, shall be ced in the custody of the Public Printer, under the direction of the nt Committee on Public Printing; and that title to said property ll be approved by the Attorney-General.—Act of June 20, 1878, vol. Statutes at Large, p. 207.

NOTE.—Under this provision 26,638 bound and 36,408 unbound vol-es of the Congressional Globe were purchased, which are now in the e of the Public Printer, awaiting the order of Congress for their dis-ution. They furnish a very valuable collection from which to supply iciencies in State and other important libraries.

BILLS AND RESOLUTIONS.

There shall be printed 750 copies of every bill or joint resolution lered by either House of Congress, or required by any rule thereof be printed, unless a different number shall be specifically ordered.—c. 3791, Revised Statutes.

NOTE.—The number was subsequently increased to 925.

The bills and resolutions of the Forty-sixth Congress, authorized this section, if bound in volumes of 500 pages each, would form a rary of 70,398 volumes, costing $69,000. Those of the first session the Forty-seventh Congress would form a library of 61,446 volumes.

POSTAL CONVENTIONS.

The Congressional Printer, on receiving from the Postmaster-Gen-al a copy of any postal convention between the Postmaster-General the part of the United States and an equivalent officer of any foreign vernment, shall immediately cause an accurate printed copy thereof to executed and sent in duplicate to the Postmaster-General. On the re-rn of one of the revised duplicates, he shall at once have the marked rections made, and cause to be printed and sent to the Postmaster-neral, any number of copies which he may order, not exceeding 500, l to be printed separately, and sent to the two houses of Congress usual number.—Sec. 3806, Revised Statutes.

ACTS, JOINT RESOLUTIONS, AND TREATIES.

The Congressional Printer, on receiving from the Secretary of State opy of any act or joint resolution or treaty, shall immediately cause accurate printed copy thereof to be executed and sent in duplicate the Secretary of State for revision. On return of one of the revised plicates, he shall at once have the marked corrections made, and use to be printed and sent to the Secretary of State any number of pies which he may order, not exceeding 500, and to be printed separ-ely, and sent to the two houses of Congress the usual number.—Sec. 905, Revised Statutes.

NOTE.—The acts and resolutions of the Forty-sixth Congress, printed by authority of this section, if bound in volumes of 500 pages each, ould form a library of 6,250 volumes.

PAMPHLET LAWS.

At the close of each session of Congress there shall be printed and ound for the use of the Senate 3,000 and for the use of the House of

Representatives 10,000 copies of all acts and resolutions so furnished with a complete alphabetical index, prepared under the direction of the Joint Committee on Public Printing.—Sec. 3807, Revised Statutes.

That at the close of every session of Congress the Secretary of State shall cause to be distributed pamphlet copies of the acts and resolutions of Congress for that session, edited and printed in the manner aforesaid, as follows: to the President and Vice-President of the United States, 2 copies each; to each Senator, Representative, and Delegate in Congress, 1 copy; to the Librarian of the Senate, for the use of Senators, 126 copies; to the Librarian of the House 250 copies, for the use of the Representatives and Delegates; to the Library of Congress, 14 copies; to the Department of State, including those for the use of legations and consulates, 600 copies; to the Treasury Department, 200 copies; to the War Department, including those for the use of the officers of the Army, 200 copies; to the Navy Department, including those for the use of officers of the Navy, 100 copies; to the Department of the Interior, including those for the use of surveyors-general, and registers and receivers of public land offices, 250 copies; to the Post-Office Department, 50 copies; to the Department of Justice, including those for the use of the Chief and Associate Justices, the judges and the officers of the United States and Territorial courts, 425 copies; to the Department of Agriculture, 10 copies; to the Smithsonian Institution, 5 copies; to the Government Printing Office, 2 copies; to the governors and secretaries of Territories, 1 copy each; to be retained in the custody of the Secretary of State, 1,000 copies; and 10,000 copies shall be distributed to the States and Territories in proportion to the number of Senators, Representatives, and Delegates in Congress to which they are at the time entitled.—Sec. 6, act of June 20, 1874, vol 18, Statutes at Large, p. 113.

NOTE.—Total number of copies of Pamphlet Laws of the first, second and third sessions of the Forty-sixth Congress printed, 79,887.

STATUTES AT LARGE.

That after the close of each Congress the Secretary of State shall have edited, printed, and bound a sufficient number of the volumes containing the Statutes at Large enacted by that Congress to enable him to distribute copies, or as many thereof as may be needed, as follows:

To the President of the United States, 4 copies, one of which shall be for the library of the Executive Mansion, and one copy shall be for the use of the Commissioner of Public Buildings; to the Vice-President of the United States, 1 copy; to each Senator, Representative, and Delegate in Congress, 1 copy; to the Librarian of the Senate, for the use of the Senators, 114 copies; to the Librarian of the House, for the use of the Representatives and Delegates, 410 copies; to the Librarian of Congress, 14 copies, including 4 copies for the Law Library; to the Department of State, including those for the use of legations and consulates, 380 copies; to the Treasury Department, including those for the use of officers of customs, 260 copies; to the War Department, including a copy for the Military Academy at West Point, 50 copies; to the Navy Department, including a copy for the Library of the Naval Academy at Annapolis, a copy for the library of each navy-yard in the United States, a copy for the Library of the Brooklyn Naval Lyceum, and a copy for the Library of the Naval Institute at Charlestown, Mass., 65 copies; to the Department of the Interior, including those for the use of the sur-

veyors-general and registers and receivers of public land offices, 250 copies; to the Post-Office Department, 50 copies; to the Department of Justice, including those for the use of the Chief and Associate Justices, the judges and the officers of the United States and Territorial courts, 425 copies; to the Department of Agriculture, 5 copies; to the Smithsonian Institution, 2 copies; to the Government Printing Office, 1 copy; and the Secretary of State shall supply deficiencies and offices newly created.—Sec. 7, act of June 20, 1874, vol. 18, Statutes at Large, p. 114.

NOTE.—Total number of copies, 2,408.

SUPPLEMENT TO THE REVISED STATUTES.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Supplement to the Revised Statutes, embracing the statutes general and permanent in their nature, passed after the Revised Statutes, with references connecting provisions on the same subject, explanatory notes, citations of judicial decisions, and a general index, prepared by William A. Richardson, be stereotyped at the Government Printing Office; and the index and plates thereof, and all right and title therein and thereto, shall be in and fully belong to the government for its exclusive use and benefit.

That 6,357 copies be printed, bound, and distributed, as provided for the distribution of the Revised Statutes by the "joint resolution providing for the distribution and sale of the new edition of the Revised Statutes of the United States," passed May 22, 1878, and joint resolution passed December 21, 1878, and such additional copies, on the order of the Secretary of State, as may be necessary, from time to time, to be kept for sale in the same manner and on like terms as the Revised Statutes are required to be kept for sale, and to supply deficiencies and offices newly created; that for preparing and editing said Supplement, including indexing and all clerical work necessary to fully complete said work, including the legislation of the Forty-sixth Congress, there shall be paid to said editor the sum of $5,000; and each Senator and Member of the present Congress who would not receive copies under said joint resolution shall receive the same number of copies as other Senators or Members receive under the same.—Joint resolution, June 7, 1880, vol. 21, Statutes at Large, p. 308.

NOTE.—Under the provisions of this resolution 4,057 copies of the Supplement are printed for members of Congress, and 2,300 for officers of the government.

REVISION OF INDIAN TREATIES.

That the Secretary of State shall cause all the copies of the revision of Indian treaties made by Thomas J. Durant, now printed, to be bound, and the same shall be deposited with the Secretary of the Interior for the use of the departments and officers of the government.—Sec. 10, act of June 20, 1874, vol. 18, Statutes at Large, p. 114.

THE USUAL NUMBER OF DOCUMENTS.

One thousand five hundred and fifty copies of any document ordered by Congress shall be printed, and that number shall be known as the usual number; no greater number shall be printed unless ordered by either House or as hereafter provided.—Sec. 3792, Revised Statutes.

NOTE.—This number was subsequently increased to 1,900.

The documents of the Forty-sixth Congress, printed under the authority of this section, amounted to 222,300 volumes. Of this number 96,000 volumes were delivered in unbound form, most of which were doubtless ultimately sold as waste paper.

The aggregate of the "usual number" of documents hereafter to be printed will be largely increased by the provisions of the following joint resolution.

EXTENSION OF "USUAL NUMBER" TO ALL DOCUMENTS ORDERED BY CONGRESS.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That whenever any document or report shall be ordered printed by Congress there shall be printed, in addition to the number in each case stated, the "usual number" of copies for binding and distribution among those entitled to receive them; and this shall apply to all unexecuted orders now in the office of the Public Printer.—Joint resolution, July 7, 1882, Pamphlet Laws, first session Forty-seventh Congress, p. 387.

JOURNALS, EXECUTIVE DOCUMENTS, AND ABRIDGMENT.

Of the documents named in this section there shall be printed and bound, in addition to the usual number for Congress, the following copies, namely:

First. Of the documents accompanying the annual reports of the executive departments, 1,000 copies for the use of the members of the Senate and 2,000 copies for the use of the members of the House of Representatives.

Second. Of the President's Message, the annual reports of the executive departments, and the abridgment of accompanying documents, unless otherwise ordered by either House, 10,000 copies for the use of the members of the Senate and 25,000 copies for the use of the members of the House of Representatives.

Third. Of papers relating to foreign affairs, accompanying the annual message of the President, 2,000 copies for the use of the members of the Senate and 4,000 copies for the use of the members of the House of Representatives.

Fourth. Of the "Commercial Relations," annually prepared under the direction of the State Department, 2,000 copies for the use of the members of the Senate and 3,000 copies for the use of the members of the House of Representatives.

Fifth. Of the annual report on the Statistics of Commerce and Navigation, exports and imports, merchandise in transit, manufactures, and registered and enrolled vessels, prepared by the Special Commissioner of the Revenue, Chief of the Bureau of Statistics, 2,000 copies for the use of the members of the Senate and 6,150 copies for the use of the members of the House of Representatives.

Sixth. Of the Public Journals of the Senate and House of Representatives, 1,550 copies.—Sec. 3798, Revised Statutes.

NOTE.—The documents of the Forty-sixth Congress, printed under the authority of this section, amount to 202,750 volumes.

EXTRA COPIES OF DOCUMENTS.

All propositions in either House of Congress for printing extra copies of documents, the cost of which exceeds $500, shall be by concurrent resolution, which shall, upon its transmission from either House, be immediately referred to the Committee on Printing of the House to which it is sent.—Sec. 3795, Revised Statutes.

The Congressional Printer shall, when so directed by the Joint Committee of the Library, print, in addition to the usual number, either 50 or 100 copies, as he may be directed, of all documents printed by order of either House of Congress, or of any Department or Bureau of the Government.—Sec. 3796, Revised Statutes.

If any person desiring extra copies of any document printed at the Government Printing Office by authority of the law shall, previous to its being put to press, notify the Congressional Printer of the number of copies wanted, and shall pay to him in advance, the estimated cost thereof, and ten per centum thereon, the Congressional Printer may, under the direction of the Joint Committee on Public Printing, furnish the same.—Sec. 3809, Revised Statutes.

All motions to print extra copies of any bill, report, or other public document shall be referred to the Committee on Printing of the House in which such motion is made.—Sec. 3793, Revised Statutes.

PUBLIC DOCUMENTS FOR EXCHANGE.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That 50 copies of all documents hereafter printed by order of either House of Congress, and 50 copies additional of all documents printed in excess of the usual number, together with 50 copies of each publication issued by any department or bureau of the government, be placed at the disposal of the Joint Committee on the Library, who shall exchange the same through the agency of the Smithsonian Institution, for such works published in foreign countries, and especially by foreign governments, as may be deemed by said committee an equivalent; said works to be deposited in the Library of Congress.—Joint resolution, March 2, 1867, Statutes at Large, vol. 14, p. 573.

The Joint Committee upon the Library may from time to time appoint such agents as they deem requisite, to carry into effect the donation and exchange of documents and other publications placed at their disposal for the purpose.—Sec. 87, Revised Statutes.

Of the documents printed by order of either House there shall be printed and bound 50 additional copies for the purpose of exchange in foreign countries.—Sec. 3799, Revised Statutes.

DOCUMENTS FOR SOLDIERS' HOMES.

Be it enacted, &c., That section 4837 of the Revised Statutes of the United States be, and the same is hereby, repealed and re-enacted as follows:

"The Secretary of the Senate and the Clerk of the House of Representatives shall cause to be sent to the National Home for Disabled Volunteer Soldiers at Dayton, in Ohio, and to the branches at Augusta, in Maine; Milwaukee, in Wisconsin; Hampton, in Virginia; and the

Soldiers' Home at Knightstown Springs, near Knightstown, in Indiana, each, one copy of each of the following documents: The Journals of each House of Congress, at each and every session; all laws of Congress; the annual message of the President, with the accompanying documents; the daily Congressional Record; and all other documents or books which may be printed and bound by order of either House of Congress; and the Public Printer is hereby authorized and directed to furnish to the Secretary of the Senate and the Clerk of the House of Representatives the documents referred to in this section."—Act of February 8, 1881, Sup. Revised Statutes, vol. 1, p. 591.

BINDING FOR MEMBERS OF CONGRESS.

Be it enacted, &c., That the Public Printer be authorized to bind at the Government Printing Office any books, maps, charts, or documents published by authority of Congress, upon application of any member of the Senate or House of Representatives, upon payment of the actual cost of such binding.—Act of December 10, 1877, Sup. Revised Statutes, vol. 1, p. 303.

Resolved, That the Secretary of the Senate be, and he is hereby, authorized to cause to be bound, at the Government Printing Office, one copy of any public document desired by any Senator for his personal use.—Senate resolution, January 17, 1878.

* * * *Provided*, That no binding shall be done at the Government Printing Office for Senators, Representatives, or Delegates in Congress, except that there may be bound for each Senator, Representative, or Delegate, one copy of each book or document issued by order of Congress, but this provision shall not allow any binding as aforesaid to be done of books or documents issued by authority of and during any former Congress.—Act of August 7, 1882, Pamphlet Laws, first session Forty-seventh Congress, p. 334.

INDEX TO JOURNALS OF CONGRESS.

Be it resolved, That there shall be prepared, under the direction and supervision of the Committee on Rules, a general index of the Journals of Congress.

Resolved, That the Committee on Rules are authorized to select and employ a proper person to prepare such general index, at a compensation not to exceed $2,500 per annum, to be paid out of the contingent fund of the House for the ensuing fiscal year, and to be under the direction of the Committee on Rules as the prosecution of the work proceeds.—House resolution, June 18, 1878.

Resolved, That the Committee on Rules are hereby authorized to select and employ a proper person to assist in the preparation of a general index of the Journals of Congress, under the resolution of June 10, 1878, at a rate of compensation not to exceed $2,000 per annum, to be paid out of the contingent fund of the House until an appropriation shall be made.—House resolution, May 22, 1882.

* * * For the person preparing the general index to the Journals of Congress under resolution of June 18, 1878, $2,500; for the assistant to the person preparing the general index to the Journals of Congress, authorized under the resolution of May 22, 1882, $2,000.—Act of August 5, 1882, Pamphlet Laws, first session, Forty-seventh Congress, p. 221.

OFFICIAL REGISTER OF THE UNITED STATES.

Be it enacted by the Senate and House of Representatives of the United tates of America in Congress assembled, That in lieu of the number of ›pies of the Biennial Register now authorized by law to be printed, ıe Secretary of the Interior be, and he is hereby, directed to cause to e printed 2,500 copies of the said work, to be distributed as follows:

To the President of the United States, 4 copies, 1 copy of which hall be for the library of the Executive Mansion; to the Vice-Presi-ent of the United States, 2 copies; to each Senator, Representative, nd Delegate in Congress, 1 copy; to the Secretary of the Senate, 1 opy; to the Clerk of the House, 1 copy; to the Library of the Senate, 0 copies, of which 1 copy shall be supplied to each Standing Commit-ee of the Senate; to the Library of the House of Representatives, 75 ›pies, of which 1 copy shall be supplied to each Standing Committee ıf the House; to the Library of Congress, 25 copies; to the Depart-nent of State, 250 copies; to the Treasury Department, 150 copies; to he War Department, 50 copies; to the Navy Department, 20 copies; to he Department of Justice, 25 copies; to the Post-Office Department, 150 copies; to the Department of the Interior, 250 copies; to the De-›artment of Agriculture, 5 copies; to the Smithsonian Institution, 4 ›pies; to the State Library and State Historical Society of each State, nd to the Executive of each Territory, and to the designated deposi-›ry of public documents in each Congressional District in the United States, 1 copy each; and the remaining copies shall be kept by the Secretary of the Interior as a reserve, from which he may supply newly-reated offices, and Members of Congress, 1 additional copy each.—Act of December 15, 1877, Statutes at Large, vol. 20, p. 13.

SUPREME COURT REPORTS.

The reporter shall cause the decisions of the Supreme Court made luring his office to be printed and published within eight months after hey are made: and within the same time, shall deliver 300 copies of the volumes of said reports to the Secretary of the Interior. And he shall, n any year when he is so directed by the court, cause to be printed and published a second volume of said decisions, of which he shall deliver, n like manner and time, 300 copies.—Sec. 681, Revised Statutes.

The 300 copies of said reports delivered to the Secretary of the Interior shall be distributed as follows: To the President, the Justices of the Supreme Court, the Circuit Judge, the Judges of the District Courts, the Judges of the Court of Claims, the Judges of the Supreme Court of the District of Columbia, the Judges of the several Territorial Courts, the Secretary of State, the Secretary of War, the Secretary of the Treasury, the Secretary of the Navy, the Secretary of the Interior, the Postmaster-General, the Attorney-General, the Solicitor-General, the Secretary of the Senate for the use of the Senate, the Clerk of the House of Representatives for the use of the House of Representatives, the Gov-rnors of Territories, the Commissioner of Agriculture, the Commissioner of Internal Revenue, the Commissioner of Indian Affairs, the Commis-ioner of Pensions, the Commissioner of the General Land Office, the Com-nissioner of Patents, the Commissioner of Customs, the Commissioner of Education, the Paymaster-General, the First and Second Comptrollers f the Treasury, the First, Second, Third, Fourth, Fifth, and Sixth uditors of the Treasury, the Solicitor of the Treasury, the Register of ıe Treasury, the Treasurer of the United States, and the heads of such

other Executive offices, as may hereafter be provided by law of equal grade with any of the said offices, each one copy; to the Secretary of the Senate for the use of the Standing Committees of the Senate, 10 copies; and to the Clerk of the House of Representatives for the use of the Standing Committees of the House, 12 copies; and the residue of said copies shall be deposited in the Library of Congress, to become a part of said Library. The copies received by any officer under this section, shall, in case of his death, resignation, or dismissal from office, be delivered to his successor in office.—Sec. 683, Revised Statutes.

* * * The reporter of the decisions of the Supreme Court of the United States shall be entitled to receive from the Treasury an annual salary of $4,500 when his report of said decisions constitutes 1 volume, and an additional sum of $1,200 when, by direction of the court, he causes to be printed and published in any year a second volume, and said reporter shall be annually entitled to clerk hire in the sum of $1,200 and to office rent, stationery, and contingent expenses in the sum of $600; and an amount sufficient for the payment of said sums is hereby appropriated: *Provided*, That the above provision shall not apply to decisions of the court pronounced at the last term thereof, but that said decisions shall be printed and the volumes containing them delivered to the Secretary of the Interior as prescribed by existing laws; and an amount sufficient to pay the salary and compensation of the reporter in connection therewith is hereby appropriated: *And provided further*, That the volumes of the decisions which said court shall hereafter pronounce shall be furnished by the reporter to the public at a sum not exceeding $2 per volume, and the number of volumes now required to be delivered to the Secretary of the Interior shall be furnished by the reporter without any charge therefor.—Act of August 5, 1882, Pamphlet Laws, first session Forty-seventh Congress, p. 254.

REPORTS OF COURT OF CLAIMS.

On the first day of every December session of Congress the clerk of the Court of Claims shall transmit to Congress a full and complete statement of all the judgments rendered by the court during the previous year, stating the amounts thereof and the parties in whose favor they were rendered, together with a brief synopsis of the nature of the claims upon which they were rendered. And at the end of every term of the court he shall transmit a copy of its decisions to the heads of departments; to the Solicitor, the Comptrollers, and the Auditors of the Treasury; to the Commissioners of the General Land Office and Indian Affiars; to the chiefs of bureaus, and other officers charged with the adjustment of claims against the United States.—Sec. 1057, Revised Statutes.

NOTE.—Two hundred and fifty copies of Court of Claims reports are printed for official use.

OPINIONS OF THE ATTORNEY-GENERAL.

The Attorney-General shall, from time to time, cause to be edited and printed at the Government Printing Office an edition of 1,000 copies of such of the opinions of the law officers herein authorized to be given as he may deem valuable for preservation in volumes, which shall be as to size, quality of paper, printing, and binding, of uniform size and appearance, as nearly as practicable, with volume eight of such opin-

published by Robert Farnham, in the year 1868. Each volume contain proper head-notes, a complete and full index, and such notes as the Attorney-General shall approve. Such volumes shall istributed in such manner as the Attorney-General may from time me prescribe.—Sec. 383, Revised Statutes.

DECISIONS OF THE FIRST COMPTROLLER.

esolved by the Senate and House of Representatives of the United States merica in Congress assembled, That the Public Printer be, and is, ired to print not more than one volume each year of the decisions opinions of the First Comptroller of the Treasury Department, with explanatory matter as he may furnish, and to furnish for the use ach Senator, Representative, and Delegate in Congress, 10 copies eof; to the Comptroller, 2,000 copies; and for distribution in the ner provided in section 7 of the act of June 20, 1874, 18 Statutes at ge, page 113, providing for the publication of the statutes, one- the number therein mentioned.—Joint resolution, August 3, 1882, phlet Laws, 1st sess. 47th Cong., p. 391.

OTE.—Seven thousand two hundred and ninety-four copies will be ted under the provisions of this resolution.

PUBLICATIONS OF THE PATENT OFFICE.

he Commissioner of Patents is authorized to have printed, from time me, for gratuitous distribution, not to exceed 150 copies of the com- e specifications and drawings of each patent hereafter issued, ther with suitable indexes; one copy to be placed for free public in- tion in each capitol of every State and Territory; one for the like pose in the clerk's office of the district court of each judicial district he United States, except when such offices are located in State or itorial capitols; and one in the library of Congress; which copies l be certified under the hand of the Commissioner and seal of the nt Office, and shall not be taken from the depositories for any other pose than to be used as evidence.—Sec. 490, Revised Statutes.

he Commissioner of Patents is authorized to have printed such ad- nal numbers of copies of specifications and drawings, certified as ided in the preceding section, at a price not to exceed the contract e for such drawings, for sale, as may be warranted by the actual and for the same; and he is also authorized to furnish a complete f such specifications and drawings to any public library which will for binding the same into volumes to correspond with those in the nt Office, and for the transportation of the same, and which shall provide for proper custody for the same, with convenient access for public thereto, under such regulations as the Commissioner shall n reasonable.—Sec. 491, Revised Statutes.

he price to be paid for uncertified printed copies of specifications drawings of patents shall be determined by the Commissioner of nts, within the limits of ten cents as the minimum and fifty cents he maximum price.—Sec. 493, Revised Statutes.

e it further enacted, That the Commissioner may print, or cause to rinted, copies of the specifications of all letters patent and of the vings of the same, and copies of the claims of current issues, and es of such laws, decisions, rules, regulations, and circulars as may ecessary for the information of the public.—Sec. 20, act of July 8, , Statutes at *Large, vol. 16, p. 200.*

* * * For printing and binding the first and second volumes of Catalogue of the Library of the Surgeon-General's Office, $20,000; to be immediately available. * * * .—Act of March 3, 1879, vol. 20, Statutes at Large, p. 390.

* * * For printing and binding the third volume of the Catalogue of the Library of the Surgeon-General's Office, $10,000. * * * .—Act of March 3, 1881, vol. 21, Statutes at Large, p. 447.

NOTE.—One thousand five hundred copies of this work are printed for distribution by the Surgeon-General. Vols. 1, 2, and 3 have already been issued.

AMERICAN EPHEMERIS AND NAUTICAL ALMANAC.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That there shall be printed annually at the Government Printing Office 1,500 copies of the American Ephemeris and Nautical Almanac, and of the papers supplementary thereto, of which one hundred shall be for the use of the Senate, four hundred for the House of Representatives, and one thousand for the use of the public service, to be distributed by the Navy Department.

SEC. 2. That additional copies of the Ephemeris and of the Nautical Almanac extracted therefrom may be ordered by the Secretary of the Navy for sale: *Provided*, That all moneys received from such sale shall be deposited in the Treasury to the credit of the appropriation for public printing.—Joint Resolution, February 11, 1880, vol. 21, Statutes at Large, *p. 301.*

PORT OF DIRECTOR OF THE MINT ON THE STATISTICS OF THE AN-UAL PRODUCTION OF GOLD AND SILVER IN THE UNITED STATES.

Resolved by the Senate and House of Representatives of the United tes of America in Congress assembled, That 15,000 copies of the Report the Director of the Mint on the Annual Production of Gold and Silver the United States be printed; 8,000 for the use of the House of Rep-entatives, 3,000 for the use of the Senate, and 4,000 for the use of Treasury Department.—Joint Resolution, March 3, 1881, vol. 21, atutes at Large, p. 521.

CONSULAR AND COMMERCIAL REPORTS.

* * * For printing and distributing the publications, by the De-rtment of State, of the consular and other commercial reports, in-ding circular letters to chambers of commerce, $20,000.—Act of ly 1, 1882. Pamphlet Laws, first session Forty-seventh Congress, 135.

AGRICULTURAL STATISTICS.

* * * For collecting agricultural statistics, including statistics of production, home consumption, and exportation of oleomargarine, d butterine, and imitation butter, and compiling and writing matter monthly, annual, and special reports, $80,000, of which sum $10,000 ll be immediately available. Said reports shall give a full state-nt monthly, showing the freight charges for the chief agricultural ducts, upon the principal lines of railroads and river routes to the ncipal markets in the United States.—Act of May 19, 1882. Pam-let Laws, first session Forty-seventh Congress, p. 90.

RECORDS OF THE WAR OF THE REBELLION.

* * * To enable the Secretary of War to begin the publication of Official Records of the War of the Rebellion, both of the Union and the Confederate Armies, the sum of $15,000. And the Secretary of ar is hereby directed to have copied for the Public Printer all reports, ters, telegrams, and general orders not heretofore copied or printed, d properly arranged in chronological order.—Act of June 23, 1874, l. 18, Statutes at Large, p. 222.

* * * For continuing the preparation of the publication of the ficial Records of the War of the Rebellion, both of the Union and Con-lerate Armies, and for the printing and binding, under the direction the Secretary of War, of 10,000 copies of a compilation of the Official cords, Union and Confederate, of the War of the Rebellion, so far as e same may be ready for publication during the fiscal year, $40,000; d of said number 7,000 copies shall be for the use of the House of presentatives, 2,000 copies for the use of the Senate, and 1,000 copies r the use of the executive departments.—Act of June 16, 1880, vol. , Statutes at Large, p. 269.

* * * For continuing the publication of the Official Records, and inting and binding, under direction of the Secretary of War, of 11,000 pies of a compilation of the Official Records, Union and Confederate, the War of the Rebellion, so far as the same may be ready for pub-ation during the fiscal year, $36,300.

The volumes of the Official Records of the War of the Rebellion shall

be distributed as follows: 1,000 copies to the executive departments, as now provided by law; 1,000 copies for distribution by the Secretary of War among officers of the Army and contributors to the work: 8,300 copies shall be sent by the Secretary of War to such libraries, organizations, and individuals as may be designated by the Senators, Representatives, and Delegates of the Forty-seventh Congress.

Each Senator shall designate not exceeding twenty-six, and each Representative and Delegate not exceeding twenty-one, of such addresses, and the volumes shall be sent thereto from time to time as they are published, until the publication is completed.

Senators, Representatives, and Delegates shall inform the Secretary of War in each case how many volumes of those heretofore published they have forwarded to such addresses.

The remaining copies of the 11,000 to be published, and all sets that may not be ordered to be distributed as provided herein, shall be sold by the Secretary of War for cost of publication with 10 per cent. added thereto, and the proceeds of such sale shall be covered into the Treasury. If two or more sets of said volumes are ordered to the same address, the Secretary of War shall inform the Senators, Representatives, or Delegates who have designated the same, who thereupon may designate other libraries, organizations, or individuals. The Secretary of War shall report to the first session of the Forty-eighth Congress what volumes of the series heretofore published have not been furnished to such libraries, organizations, and individuals. He shall also inform distributees at whose instance the volumes are sent.—Act of August 7, 1882. Pamphlet Laws, first session Forty-seventh Congress, p. 320.

NOTE.—It is estimated that this work will embrace ninety-six volumes, of which six have already been issued. Of the first five volumes, 10,000 copies each were printed. The edition of the remaining volumes will comprise 11,000 copies. The aggregate number provided for in the above acts amounts to 1,051,000 volumes. If to this be added the 50 copies ordered for the Library of Congress and the "usual number" of each after volume 6, the total will amount to 1,228,700 volumes.

REPORTS OF THE TENTH CENSUS.

Be it enacted, &c., That the Reports of the Tenth Census of the United States be printed, and that 10,000 additional copies be printed, of which 3,000 shall be for the use of the Senate, 6,000 for the use of the House of Representatives, and 1,000 for the use of the Department of the Interior.

That, in addition to the above, 20,000 copies of the Report on Population be printed, of which 6,000 shall be for the use of the Senate, 12,000 for the use of the House of Representatives, and 2,000 for the use of the Department of the Interior.

That 20,000 additional copies of the Report on Agriculture be printed, of which 6,000 copies shall be for the use of the Senate, 12,000 copies for the use of the House, and 2,000 copies for the use of the Department of the Interior.

That 10,000 additional copies of the Report on Manufactures and Mechanics be printed, of which 3,000 copies shall be for the use of the Senate, 6,000 copies for the use of the House of Representatives, and 1,000 copies for the use of the Department of the Interior.

Also, that 6,000 additional copies of the Report on the History of the National Loan be printed for the use of the Treasury Department.

Also, that 1,500 additional copies of the Report on Fish and Fisheries e printed for the use of the Fish Commission.

And, also, that the Compendium of the Tenth Census be printed, and iat 100,000 additional copies be printed, of which 30,000 copies shall e for the use of the Senate, 60,000 copies for the use of the House, and 0,000 copies for the use of the Department of the Interior.

And in order to avoid duplication in the distribution of these documents, and to secure complete sets to libraries and other public institutions, the additional copies herein ordered, excepting those ordered for he Treasury Department and for the Fish Commission, be delivered to he document rooms of the Department of the Interior; and the Secretary of the Interior shall distribute those ordered for the use of Congress as follows: In sets to each of such fifteen libraries and other public institutions or individuals as shall be named to him for this purpose by each Senator, and to each of such ten libraries and other public institutions or individuals as shall be named to him for this purpose by each Representative and Delegate, and in volumes to Senators and Representatives, or such other parties as shall be designated by Senators, Representatives, and Delegates, until the quota of each shall be exhausted: *Provided*, That one copy of each volume shall, on its reception from the Public Printing Office, be transmitted to each Senator, Representative, and Delegate in Congress: *And provided further*, That duplicate copies shall not be sent to any library or individual on the request of any Senator or member of the House of Representatives until both Senator and member shall be notified that they have named the same library or ndividual: *And provided further*, That the party receiving the work pon the order of a member of Congress shall be informed by the Secretary of the Interior upon whose request it is supplied.

And the Secretary of the Interior shall report to Congress at its next ession the names and locations of the libraries and other public institutions designated to receive these reports under the provisions of this ill.

And the sum of $678,624.61, or so much thereof as may be necessary o defray the cost of the above-named printing and binding, be, and the ame is hereby, appropriated out of any moneys in the Treasury not otherwise appropriated.—Act of August 7, 1882, Pamphlet Laws, first ession Forty-seventh Congress, p. 344.

NOTE.—It is estimated that these Reports will comprise from fifteen o twenty quarto volumes, amounting in the aggregate, including the Compendium, to from 336,000 to 395,500 volumes.

REPORT OF PUBLIC LAND COMMISSION.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That 8,500 additional copies of the Codified Land Laws and History of the Public Domain of the United States, compiled and prepared by the Public Land Commission, embraced in House Executive Document No. 47, with all subsequent laws which may have been passed by Congress prior to the adjournment of the present session, be printed and bound, under the direction of the Secretary of the Interior; 2,000 copies for the use of the Senate, 5,000 for the use of the House of Representatives, and 1,500 for the use of the Secretary of he Interior: *Provided*, That the copies for the use of the Senate and he House of Representatives shall be distributed by the Secretary of he Interior in the manner provided for the distribution of the Reports

of the Tenth Census, and that all copies not ordered to be distributed within two years after the passage of this act shall be sold by the Secretary of the Interior at cost of publication, with ten per centum added thereto.—Joint Resolution, August 7, 1882, Pamphlet Laws, first session Forty-seventh Congress, p. 393.

ANALYTICAL CATALOGUE OF PUBLIC DOCUMENTS.

Be it enacted, &c., That there be prepared and published, under the direction of the Joint Committee on Printing, a classified, analytical, and descriptive catalogue of all publications made by the authority of the Government of the United States and the preceding government of the Colonies, and all departments, bureaus, and offices thereof, from July 4, 1776, to March 4, 1881; and upon the request of the said joint committee, the officers of the Senate and House of Representatives, and the heads of all the executive departments and of all the bureaus and offices thereof, shall furnish to said joint committee all such information and assistance in reference to said publications as will facilitate or assist in the completion of said work; and the sum of $10,000 is hereby appropriated for the purposes of this act, which sum may be expended as additional pay or compensation to any officer or employé of the United States.—Act of July 27, 1882, Pamphlet Laws, 1st sess. 47th Cong., p. 176.

CARE AND DISTRIBUTION OF PUBLIC DOCUMENTS.

The Secretary of the Interior is charged with receiving, arranging, and safe-keeping for distribution, and of distributing to the persons entitled by law to receive the same all printed journals of the two houses of Congress, and all other books and documents of every nature whatever, already or hereafter directed by law to be printed or purchased for the use of the government, except such as are directed to be printed or purchased for the particular use of Congress, or of either house thereof, or for the particular use of the Executive or of any of the departments, and any person whose duty it shall be by law to deliver any of the same shall deliver them at the rooms assigned by the Secretary of the Interior therefor.—Sec. 497, Revised Statutes.

Suitable rooms in the Department of the Interior shall be from time to time assigned by the Secretary for the journals, books, and documents.—Sec. 509, Revised Statutes.

The Congressional Printer shall deliver to the Secretary of the Interior, at the room in the Interior Department set apart for that purpose, all books and documents directed by law to be printed for the use of the government, except such as are directed to be printed for the particular use of Congress, or of either house thereof, or of the President, or of any of the departments.—Sec. 3813, Revised Statutes.

A register of all publications received at the Department of the Interior for safe-keeping and distribution shall be kept, under the direction of the Secretary, showing the quantity and kind at any time received by him; and he shall cause to be entered in such register, at the proper time, the time when, the place where, and the person to whom any of such publications have been distributed or delivered.—Sec. 499, Revised Statutes.

The publications received by the Secretary of the Interior for dis-

n shall be delivered out only on the written requisition of the
f departments, Secretary of the Senate, Clerk of the House of
ntatives, Librarian of Congress, and other officers and persons
by law authorized to receive the same, except where by law
etary of the Interior is required, without such requisition, to
e same to be sent and delivered; and in either of such cases it
the duty of the Secretary of the Interior to cause the same to
and delivered, the expenses thereof, except when otherwise
, to be charged to the contingent fund of the department.—Sec.
ised Statutes.

epartment of Justice shall be charged with the distribution to
ous judges and courts of the statutes, reports, and other judicial
nts provided by law.—Sec. 386, Revised Statutes.

ecretary of the Interior is required to furnish to the head of the
nent of Justice, from time to time, as they may be published, a
t number of the statutes of the United States and the reports
upreme Court of the United States, to be by him distributed to
cers of the courts of the United States as are now or may here-
by law entitled to receive them.—Sec. 498, Revised Statutes.

opies of journals, books, and public documents, which are or
authorized to be distributed to incorporated bodies, institutions,
ciations within the States and Territories, shall be distributed
bodies as shall be designated to the Secretary of the Interior by
the Senators from the several States respectively, and by the
ntative in Congress from each Congressional district, and by
gate from each Territory.
istribution shall be made in such manner that the quantity dis-
to each Congressional district and Territory shall be equal,
hat whenever the number of copies of any publication is insuffi-
supply therewith one institution, upon the designation of each
of the Senate and House of Representatives, the copies at the
of the Secretary may be distributed to such incorporated colleges,
ibraries, atheneums, literary and scientific institutions, boards
, or public associations as he may select.—Sec. 501, Revised
3.

election of an institution to receive the documents ordered to
shed or procured at the first session of any Congress shall con-
documents of the entire Congress, unless other designation be
fore any distribution has taken place under the selection first

e the same work is printed by order both of the Senate and
f Representatives, the duplicates may be sent to different insti-
if so desired, by the member whose right it is to direct the
tion; and the public documents to be distributed by the Secre-
the Interior shall be sent to the institutions already designated
e shall be satisfied that any such institution is no longer a suit-
ository of the same.
essional journals and public documents authorized to be dis-
to institutions on the designation of members of Congress
sent to such libraries and institutions only as shall signify a
ess to pay the cost of their transportation.—Sec. 502, Revised
3.

So many copies of the public journals of the Senate and of the House of Representatives shall be transmitted by the Secretary of the Interior to the executives of the several States and Territories as shall be sufficient to furnish one copy to each executive, one copy to each branch of every State and Territorial legislature, one copy to each university and college in each State, and one copy to the historical society incorporated or which shall be incorporated in each State.

Fifty copies of the documents ordered by Congress to be printed shall be used for the purpose of exchange in foreign countries; the residue of the copies shall be depoisted in the Library of the United States, subject to the future disposition by Congress.—Sec. 503, Revised Statutes.

Whenever there are in the custody of the Department of the Interior any sets of the documents of any session of Congress or other documents or odd volumes not necessary to supply deficiencies or losses that may happen in the Library of Congress, or in that of either of the executive departments, or in State or Territorial libraries, the Secretary of the Interior shall distribute the same as equally as practicable to the several Senators, Representatives, and Delegates in Congress, for distribution to public libraries and other literary institutions in their respective districts.—Sec. 505, Revised Statutes.

The Secretary of the Interior shall make annual reports to Congress as follows:

* * * A report showing the quantity and kind of the copies of public journals, books, and documents which have been received by him for distribution on behalf of the government, and showing also the time when, the place where, and the person to whom any of the same have been distributed and delivered during the preceding year.—Sec. 445, Revised Statutes.

SUPERINTENDENT OF PUBLIC DOCUMENTS.

There shall be in the Department of the Interior a superintendent of public documents, who shall be appointed by the Secretary, and shall be entitled to receive a salary of $2,500 a year.—Sec. 507, Revised Statutes.

* * * So much of section 507 of the Revised Statutes as provides for said salary is hereby repealed.—Act of June 19, 1878, vol. 20, Statutes at Large, p. 198.

The superintendent of public documents shall be charged, subject to the general direction of the Secretary of the Interior, with the duty of collecting, arranging, preserving, packing, and distributing the publications received at the Department of the Interior for distribution, and with the duty of compiling and supervising the Biennial Register.—Sec. 508, Revised Statutes.

POSTAL LAWS RELATING TO OFFICIAL MAIL MATTER.

That it shall be lawful to transmit through the mail, free of postage, any letters, packages, or other matters relating exclusively to the business of the Government of the United States: *Provided*, That every such letter or package, to entitle it to pass free, shall bear over the words "official business" an indorsement showing also the name of the *department*, and, if from a bureau or office, the names of the department

id bureau or office, as the case may be, whence transmitted. And if ıy person shall make use of any such official envelope to avoid the ıyment of postage on his private letter, package, or other matter in ıe mail, the person so offending shall be deemed guilty of a misde- ıeanor, and subject to a fine of $300, to be prosecuted in any court of ɔmpetent jurisdiction.

That for the purpose of carrying this act into effect, it shall be the uty of each of the executive departments of the United States to pro- ide for itself and its subordinate offices the necessary envelopes; and, n addition to the indorsement designating the department in which hey are to be used, the penalty for the unlawful use of these envelopes hall be stated thereon.

That Senators, Representatives, and Delegates in Congress, the Sec- etary of the Senate, and Clerk of the House of Representatives may ɛnd and receive through the mail all public documents printed by ɔder of Congress; and the name of each Senator, Representative, elegate, Secretary of the Senate, and Clerk of the House shall be ritten thereon, with the proper designation of the office he holds; and e provisions of this section shall apply to each of the persons named erein, until the first day of December following the expiration of their spective terms of office.—Secs. 5, 6, 7, Act of March 3, 1877, vol. 19, :atutes at Large, p. 335.

* * * *Provided further*, That from and after the passage of this ɛt Senators, Representatives, and Delegates in Congress, the Secretary ' the Senate, and Clerk of the House of Representaties may send and ɛceive through the mail free all public documents printed by order of ongress; and the name of each Senator, Representative, Delegate, ecretary of the Senate, and Clerk of the House shall be written thereon ith the proper designation of the office he holds; and the provisions ' this section shall apply to each of the persons named herein, until ıe first Monday of December following the expiration of their respect- 're terms of office. * * *.—Act of March 3, 1879, vol. 20, Statutes at arge, p. 356.

The provisions of the fifth and sixth sections of the act entitled "An ct establishing post-routes, and for other purposes," approved March , 1877, for the transmission of official mail matter, be, and they are ıereby, extended to all officers of the United States Government, and nade applicable to all official mail matter transmitted between any ɔf the officers of the United States, or between any such officer and ıither of the executive departments or officers of the government, the ɛnvelopes of such matter in all cases to bear appropriate indorsements ɔontaining the proper designation of the office from which the same is ıransmitted, with a statement of the penalty for their misuse. And the ɔrovisions of said fifth and sixth sections are hereby likewise extended ınd made applicable to all official mail matter sent from the Smithso- ıian Institution: *Provided*, That this act shall not extend or apply to ɔension agents or other officers who receive a fixed allowance as com- ɔensation for their services, including expenses for postage.—Sec. 29, Act of March 3, 1879, vol. 20, Statutes at Large, p. 362.

PROPOSED BILL AND RESOLUTIONS

PROVIDING FOR THE

PRINTING AND DISTRIBUTION OF PUBLIC DOCUMENTS.

59

BILL AND RESOLUTIONS.

to establish depositories and provide for the distribution of public documents.

enacted by the Senate and House of Representatives of the United of America in Congress assembled, That the depositories of public ents in the several States and Territories of the United States onsist of the State and Territorial libraries, the library of the y Academy at West Point, the library of the Naval Academy at olis, the libraries of the Soldiers' Homes at Dayton, Ohio, Au- Maine, Milwaukee, Wisconsin, Hampton, Virginia, and Knights- Springs, near Knightstown, Indiana, and other libraries in each equal in number to the number of Senators and Representatives ie same in the present Congress, and one additional library in each ry; and hereafter any increase in the number of Representatives ny State shall entitle such State to a corresponding increase in mber of such depositories.

.2. That institutions once designated as depositories of public docu- shall be entitled to receive such documents so long as in the judg- f the Secretary of the Interior they continue proper depositories of ne: *Provided*, That, excepting capital cities, only one depository e located in any town or city containing less than 100,000 inhabi- and that no institution shall be placed upon the list until it has given nce to the Secretary of the Interior that it will preserve the docu- as a permanent portion of its library, accessible, free of charge, to neral public, and that it will, during the month of January of each eport to the Secretary of the Interior the number of volumes in ary and the number of documents received under the provisions act still in its possession; and the requirements of this proviso reby made applicable to all institutions heretofore designated as tories of public documents: *Provided further*, That hereafter no tion shall be placed upon the list whose library does not exceed ousand volumes, unless a large district would be otherwise un- ed.

. 3. That the designation of depositories of public documents in veral States, Congressional districts, and Territories still entitled h depositories shall be made by Senators, Representatives, and ates of the same in the present Congress: *Provided*, That if not ade before the termination of the same the Secretary of the In- is hereby authorized to make the designation, and he is further- uthorized to designate such additional depositories as any State ereafter be entitled to in virtue of increased representation.

. 4. That the library of the Executive Mansion, the Library of ess. the library of the United States Senate, the library of the of Representatives, the library of each of the executive depart- , the library of the Supreme Court, the library of the Court of s. the library of the Patent Office, the library of the Surgeon-

General's Office, and the library of the Smithsonian Institution are hereby constituted depositories of public documents in the city of Washington.

SEC. 5. That the Public Printer shall deliver to the Secretary of the Interior such number of copies of each and every document printed at the Government Printing Office as will enable that officer to supply one copy to each depository of public documents; and it is hereby made the duty of the Secretary of the Interior to transmit said documents to their destination as soon as practicable after they are received.

SEC. 6. That of the Journals of Congress, the annual reports of the several executive departments and offices of the government, and of publications of a scientific character printed at the Government Printing Office, there shall be delivered by the Public Printer to the Department of the Interior one thousand copies each, from which number the Secretary of the Interior shall transmit one copy to each of such two university, college, or public libraries, not depositories of public documents, as may be named for this purpose by each Senator, Representative, and Delegate in Congress: *Provided*, That said libraries shall contain not less than five thousand volumes each, unless a large district would be otherwise unsupplied; and the Secretary of the Interior is hereby authorized to sell the remaining copies of said documents at cost.

SEC. 7. That of the Journals of Congress and the annual reports of the several executive departments and offices of the government there shall be printed, in addition to the usual number, two thousand copies, six hundred of which shall be for the use of the Senate, and one thousand four hundred for the use of the House of Representatives.

SEC. 8. That of the abridgment of messages and documents, there shall be printed five thousand copies, two thousand for the use of the Senate, and three thousand for the use of the House of Representatives.

SEC. 9. That of the "usual number" of documents printed by order of Congress, one thousand three hundred and sixty-five (1,365) copies each shall be reserved for binding, and when bound shall be delivered by the Public Printer, as follows: To the Senate document-room, one hundred and fifty copies; to the Senate library, ten copies; to the House document-room, six hundred and fifty copies; to the House library, fifteen copies; to the Library of Congress, fifty-two copies; to the library of each of the executive departments, one copy; to the Department of the Interior, for depositories of public documents, four hundred and eighty copies.

Of the remainder of the "usual number," such documents as form each an entire volume shall be bound in cloth; unless in the case of any volume Congress shall otherwise and specifically direct; and all others left unbound, and they shall be delivered as follows: To the document-room of the Senate, of Senate documents and reports, one hundred and sixty copies; and of House documents and reports, eighty-five copies: to the document-room of the House, of Senate documents and reports, three hundred and twenty-five copies; and of House documents and reports, four hundred copies; to the Department of State, for transmission to the legations in this capital of foreign governments, and to the legations and consulates of the United States abroad, thirty-six copies of Senate documents and reports, and thirty-six copies of House documents and reports; to the Executive Mansion, to each of the executive departments, to the Library of Congress, to the Smithsonian Institution, to the office of the Public Printer, to the Secretary of the Senate, and to the Clerk of the House of Representatives, one copy of each.

SEC. 10. That the Post-Office Department is authorized and directed to transmit free through the mail the documents whose distribution is authorized by this act.

SEC. 11. That the Secretary of the Interior shall report to each Congress, at its opening, the names and locations of the several depositories of public documents receiving the publications of the government under the provisions of this act.

SEC. 12. That sections 501, 502, 503, and 3798 of the Revised Statutes, and all other laws and parts of laws in conflict with the provisions of this act are hereby repealed.

JOINT RESOLUTION providing for the distribution of the Congressional Globe and Record.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Public Printer is hereby authorized and directed to deliver to the document-rooms of the Department of the Interior, in bound form, the volumes of the Congressional Globe purchased from Messrs. Rives, and such other volumes of the Globe and Record, prior to the Forty-seventh Congress, as are in his charge; and the Secretary of the Interior is hereby authorized and directed, from said volumes, to supply, as far as practicable, existing deficiencies in the sets of these documents in the following librabries, in the order named:

First. The library of the Executive Mansion, the library of each of the executive departments of the government, the library of the Supreme Court, and the library of the Court of Claims.

Secondly. The State and Territorial libraries of the United States.

Thirdly. Such other libraries in the United States as contain more than five thousand volumes each.

SEC. 2. That the Secretary of the Interior shall report to Congress the libraries to which these documents are forwarded and the number of volumes delivered to each.

SEC. 3. That, beginning with the Forty-seventh Congress, the Public Printer shall deliver to the Secretary of the Interior four hundred and seventy-seven bound copies of the Congressional Record, which shall be distributed by the Secretary of the Interior as follows: To the library of the Executive Mansion, one copy; to the Library of Congress, four copies; to the library of each of the executive departments, the library of the Supreme Court, and the library of the Court of Claims, one copy each; to each State and Territorial library, one copy; to the depositories of public documents in the several States and Territories of the United States, one copy each; to the library of the Military Academy at West Point, the library of the Naval Academy at Annapolis, the library of the Soldiers' Homes at Dayton, Ohio, Augusta, Me., Milwaukee, Wis., Hampton, Va., and Knightstown Springs, near Knightstown, Ind., one copy each; and all laws providing for the supply of this document to the above-named libraries by any other office or officer of the government are hereby repealed.

JOINT RESOLUTION providing for the preparation and distribution of pamphlet laws and Statutes at Large.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of State is hereby charged with the duty of causing the statutes of the United States passed at each session of Congress, together with recent treaties, postal conventions, and Executive proclamations, to be edited and prepared for publication and distribution.

SEC. 2. That the Public Printer shall, as soon as practicable, after the close of each session of Congress, deliver of the laws of such session published in pamphlet form, as follows: To the document-rooms of the Senate, for the use of the Senate, two hundred and fifty copies; to the document-room of the House of Representatives, for the use of the House, seven hundred and fifty copies; to the document-rooms of the Department of the Interior, so many copies as will enable the Secretary of the Interior to distribute, upon the designation of each Senator twenty copies, and of each Representative and Delegate, fifteen copies for the use of institutions, courts, or individuals within their respective States and districts.

SEC. 3. That the Public Printer shall deliver to the document-room of the Department of the Interior sixteen hundred and fifty copies of the pamphlet laws of each session of Congress, of which the Secretary of the Interior shall deliver as follows: To the President, two copies; to the Vice-President, one copy; to the library of the Senate, for the use of the Senate, fifty copies; to the library of the House, for the use of the House, fifty copies; to the Library of Congress, fourteen copies; to the Department of State, including those for the use of legations and consulates, three hundred and eighty-five copies; to the Treasury Department, including those for the use of the officers of customs, two hundred copies; to the War Department, fifty copies; to the Navy Department, forty copies; to the Department of the Interior, including those for the use of the surveyors-general and registers and receivers of public lands, two hundred and fifty copies; to the Post-Office Department, forty copies; to the Department of Justice, including those for the use of the chief and associate justices, the judges and officers of the United States and Territorial courts, four hundred copies; to the Department of Agriculture, two copies; to the Smithsonian Institution, one copy; to the Public Printing Office, one copy; to each State and Territorial library, one copy.

SEC. 4. That as soon as practicable after the close of each Congress, the Public Printer shall deliver to the document-rooms of the Department of the Interior twenty-eight hundred copies of the Statutes at Large of the United States for such Congress, bound in sheep, which shall be distributed by the Secretary of the Interior as follows: To the President, two copies, one of which shall be for the library of the Executive Mansion; to the Vice-President, one copy; to each Senator, Representative, and Delegate in Congress, one copy; to the librarian of the Senate, for the use of the Senate, seventy-five copies; to the librarian of the House, for the use of the House, two hundred and fifty copies; to the Library of Congress, fourteen copies; to the Department of State, including those for the use of legations and consulates, three hundred and eighty-five copies; to the Treasury Department, including those for the use of the officers of customs, two hundred and sixty copies; to the War Department, fifty copies; to the library of the Military Academy at West Point, one copy; to the Navy Department, forty cop

to the library of the Naval Academy at Annapolis, one copy; to the partment of the Interior, including those for the use of surveyors- eral and registers and receivers of public land offices, two hundred fifty copies; to the Post-Office Department, forty copies; to the partment of Justice, including those for the use of the chief and as- iate justices, the judges, and the officers of the United States and ritorial courts, four hundred copies; to the Department of Agricult-, two copies; to the Smithsonian Institution, one copy; to the Pub- Printing Office, one copy; to each State and Territorial library, and each depository of public documents in the several States and Con- ssional districts, one copy. And the Secretary of the Interior shall ply offices newly created out of the number provided for in this tion.

SEC. 5. That the said pamphlet laws and Statutes at Large, bound in ep, at the Public Printing Office, shall be kept for sale by the Sec- ary of the Interior, who shall sell them at ten per centum advance cost price to any person applying for the same; and he may make angement with booksellers to keep on sale pamphlet laws and Stat- s at Large, but in any such arrangement it shall be provided that same be sold at the government price to all purchasers; and the cretary may allow to any such person keeping the pamphlet laws and atutes at Large for sale such part of the ten per centum above the tual cost as he may deem just and reasonable; and the proceeds of sales shall be paid quarterly into the Treasury.

SEC. 6. That the said pamphlet copies of the acts of each session, and said bound copies of the acts of each Congress, shall be legal evi- nce of the laws and treaties therein contained in all the courts of the ited States and of the several States therein.

SEC. 7. That the powers conferred and the duties enjoined on the Sec- tary of State by the act of Congress approved the twentieth day of ne, eighteen hundred and seventy-four, entitled "An act providing r publication of the Revised Statutes and the laws of the United tates," in relation to the custody, distribution, and sale of the said vised Statutes, the Session Laws, and the Statutes at Large, be, and same are hereby, transferred to the Secretary of the Interior, who all, from and after the passage of this act, possess all the powers and charge the duties in relation to such custody, distribution, and sale pursuance of the provisions and in accordance with the requirements said act of the twentieth of June, eighteen hundred and seventy-four.

SEC. 8. That the Secretary of State shall, upon the requisition of the cretary of the Interior, deliver to the latter officer all copies of the vised Statutes of the United States and of the Revised Statutes re- ing to the District of Columbia, public treaties, and post-roads, and copies of the Session Laws of Congress and the Statutes at Large maining in his office for the purpose of distribution or sale at the date such requisition by the Secretary of the Interior.

JOINT RESOLUTION providing for the sale of public documents.

Resolved by the Senate and House of Representatives of the United States America in Congress assembled, That the Public Printer shall submit the Secretary of the Interior, on the first of each month, a list of such orks as have been delivered to him to be printed during the previous nth; and he shall also, on the first of each month, submit to the Sec-

retary of the Interior a list of such works as have been printed at th Government Printing Office during the previous month, giving in respe to each the title, the number of pages, the cost per copy, and the offic or the office of the government for whose use it is printed; and the Secr tary of the Interior is hereby authorized to sell any public document, which the edition is not exhausted, at the cost of the same.

SEC. 2. That whenever application is made to the Secretary of th Interior for the purchase of a public document not in his charge, h shall make requisition for the same on the officer or office for whose u it has been printed, and said officer or office is hereby directed to supp the same, provided any copies remain not required for strictly offici use.

SEC. 3. That the Public Printer is hereby directed to deliver to th Secretary of the Interior any and all documents now in his hands whic have been ordered for sale by him, the said Public Printer, and a documents hereafter printed which have been or shall be ordered fo sale by the government.

SEC. 4. That the Secretary of the Interior shall require the superin tendent of documents of his department to give bonds in such sum a he may determine.

SEC. 5. That the proceeds of all sales of documents shall be turne into the Treasury, and a detailed report be made annually to Congre of documents sold and the amount received for the same.

HARTFORD, CONN., *December* 1, 1882.

SIR: I transmit with this the report of the Board of Managers of the National Home for Disabled Volunteer Soldiers for the fiscal year ending June 30, 1882.

Respectfully, yours,

W. B. FRANKLIN,
President Board of Managers National Home for Disabled Volunteer Soldiers.

Hon. J. W. KEIFER,
Speaker the House of Representatives, Washington, D. C.

ANNUAL REPORT OF THE BOARD OF MANAGERS OF THE NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS FOR THE YEAR ENDING JUNE 30, 1882.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

The Board *of Managers of the National* Home for Disabled Volunt

Soldiers, in conformity to law make the following report of the in tution for the fiscal year ending June 30, 1882:

Since the last annual report the Board has lost one member by de the President of the United States, James A. Garfield, whose place been filled under the organic law by Chester A. Arthur, his succe in that office. The terms of office of three other members of the Bo viz, Leonard A. Harris, Richard Coulter, and John A. Martin, exp on April 21, 1882, and Congress appointed Leonard A. Harris, Ja S. Negley, and John A. Martin to fill their places, in an act appro August 7, 1882. Their terms will expire on April 21, 1888.

During the year the Board has performed its duties under the org law, as it understands them, with a view of promoting the happi and best interests of the members of the Home, and at the same protecting the interests of the United States. In the opinion of Board all these interests are identical.

Quarterly sessions have been held, each Branch has been once vi by the Board, the discipline and needs of the institution have been c for, the expenditures regulated, the necessary estimates made, and accounts audited.

It is the opinion of the Board that the discipline is good; tha members of the Home are in general as happy as men can be in unfortunate conditions in which their disabilities have placed th that they are well and kindly cared for, and that the money appr ated by Congress for the support of the Home has been honestl pended.

The increase in the number of members during the past year has 680, or about 9 per cent. That of the preceding year was 483, or a 7 per cent., which was less than it had been in any previous year. opinion of the Board, as expressed in the last report, that the numb members of the Home on the existing basis of admission has near rived at its maximum, is therefore not borne out by the facts, alth the death rate increases from year to year.

The organic law of the Home concerning the pensions of the men enacts: "Such of these as have neither wife, child, nor parent dep ent upon them, on becoming inmates of the Home, or receiving therefrom, shall assign thereto their pensions when required b Board of Managers during the time they shall remain therein or re its benefits." (Revised Statutes, title 49, chap. 3, sec. 4832, editi 1878.) This act authorized the Board to take all of the pensions members of the Home except in the single case specified. No ad tage has been taken of this authority except to exact a part of a sion for fines for flagrant violations of rules of the Home by pensio and to pay for articles of clothing when the pensioner exceede monthly.

Section 2 of the act approved February 26, 1881, for payment of sions for the fiscal year ending June 30, 1882, enacts that "All pen payable or to be paid under this act to pensioners who are inmates o National Home for Disabled Volunteer Soldiers shall be paid to the t urer or treasurers of said Home, upon security given to the satisfa of the managers, to be disbursed for the benefit of the pensioners, wit deduction for fines or penalties, under regulations to be establishe the managers of the Home; said payment to be made by the pe agent upon a certificate of the proper officer of the Home that the sioner is an inmate thereof, and is still living. Any balance o *pension* which may remain at the date of the pensioner's discharge *be paid* over to him, and in case of his death at the Home the

all be paid to the widow or children, or in default of either, to his gal representatives." This act expired on June 30, 1882, and was re-ved by the act approved August 7, 1882. Although there was dis-tisfaction on the part of pensioner members of the Home, and par-ularly among those whose pensions were partly confiscated, under e organic law, the passage of the law quoted above does not seem to ve satisfied a large number of the pensioner members, who do not ish to have the expenditure of their pensions regulated in any way the authorities of the Home.

The clause of the law requiring the balance of the pension money longing to a member to be paid by the Home to his legal representa-ves at his death is a great source of trouble and annoyance to the au-orities of the Home, who, for their own protection, as custodians of e money, find themselves obliged to determine who are the legal rep-sentatives of the deceased pensioner, and in many cases there are veral claimants to the money, rendering the decision no easy matter, d creating an unanticipated source of expense to the Home. As rearages of pensions are paid in larger numbers this source of expense ill increase.

In the opinion of the Board much ill feeling will be avoided, and much njust suspicion of the Board of Managers and the other authorities of e Home dispelled, if the Board and its subordinates have nothing hatever to do with the pensions of the members of the Home; and esides, the treasurers of the Home will then be relieved of much hard ork and responsibility, and loss of time, for which they receive no ompensation. The Board, therefore, respectfully recommends the assage of an act repealing all laws which authorize or require the oard of Managers, or its subordinates, to receive or become custodians f the pensions of the members of the Home, enabling each pensioner o draw his money precisely as do all others who do not belong to the ome. Should such an act be passed, it is likely that those pensioner embers who desire to spend their money, will be enabled to do so ooner than they now are, and those members who desire to save it can ave access to the nearest reliable savings bank, enabling them to place t at interest as soon as it is paid. It is not the opinion of the Board hat such a law will permanently injure the discipline of the Home.

In the last report of the Board it was recommended that the benefits f the Home be extended to destitute deserving soldiers unable to earn heir living, who could not trace their disabilities to their service, and hat sailors who served the United States during the War of Secession hould be placed upon the same footing of admission to the Home as re soldiers and sailors who served in preceding wars. Both proposi-ons have been rejected by Congress, as we think, under a misappre-ension, but in any event the persons included in these recommenda-ons are in general as deserving of care by the general government as e the present members of the Home. Men are daily becoming prema-urely disabled from disease, the seeds of which were sown in service, though when they were discharged they were able-bodied. The man-ger before whom such a case comes, if he act according to existing law, ust refuse the man admission, and in general the applicant can only to the nearest poor-house. If the manager admit the man, making strained interpretation of the law on the side of humanity, the Home, ithout further legislation, will soon overflow, and admissions must cease. The case of disabled sailors requires only to be mentioned. Under isting law there is no place where a United States sailor disabled in

the late war, can be cared for, unless he had previously enlisted as a soldier.

It is a mistake to suppose that there will soon be any material diminution of the number of members of the Home. Many soldiers discharged for disability, without pensions as well as pensioners, who have hitherto supported themselves or lived with their families now grown up, begin to look to the Home as the place where they wish to pass their declining years. They all, under the law, are eligible for admission, and such cases will arise for the next generation.

Nearly 50 per cent. of the present members of the Home are under fifty years of age, and although this expectation of life is not as great as is that of able-bodied men of the same age, yet when the facts are considered that these men are not troubled about the care of themselves or their families, are better fed, better housed, and better clothed than are civilians in the same social condition, it is doubtful whether the average duration of their lives will be much smaller than that of able-bodied men in the same conditions of life.

During the past year several additional buildings have been erected at the Branches, and extensive repairs and alterations have been made. These additions have become necessary on account of the gradual increase in the number of members, and the dilapidated state of some of the old buildings, but much still remains to be done in the same direction. The fact that 3,600 men at the Central Branch take their meals in one room which was only intended for seating about 1,100 men, shows that at least one other room of about the same size, with additional kitchen apparatus, should be erected at once.

The action of Congress in permitting the admission of the insane of the Home to the Government Hospital for the Insane was timely and humane. This class of members of the Home cannot properly be cared for at the Home, and their number increases in an increasing ratio. There are already 58 cases awaiting admission to the hospital, and by the time the additional building authorized by Congress is completed, this number will be materially increased.

The Board of Managers has in several reports called the attention of Congress to the fact that as the management of the Home has been kept in the control of Congress, no other department of the government is responsible for it, and consequently no department, bureau, or office in Washington is interested in its welfare. The whole business of the corporation is done by the Board of Managers, and the Board is anxious that its doings shall be carefully watched by Congress, and any mistakes that it may make be corrected by law. It therefore again respectfully invites such investigation of its proceedings and management as Congress may consider proper.

The estimate for the support of the Home for the fiscal year ending June 30, 1884, has been submitted through the honorable Secretary of War. Its amount is $1,122,088.03, the same as that for the current year. The number of members of the Home will probably increase about 500 during the year, but no increase of appropriation is asked, because the sale of the clothing voted to the Home for the last fiscal year has turned out better than was expected, and the Board therefore began the current fiscal year with a surplus which it hopes to carry through to the next year. Should Congress, however, authorize the admission to the Home of destitute soldiers whose disabilities cannot be traced to their service, or to the sailors of the United States disabled in the late war, not otherwise provided for, an increase of appropriation *will be* required and will be formally requested.

The statement of accounts of the acting treasurer for the fiscal year ıding June 30, 1882, is appended hereto. All of his expenditures ıve been audited, and have been approved by the Board. The secreıry's report, which accompanies this, gives the history of the Home ▸r the past year. It has appended to it the printed journal of the ◂oard of Managers, which shows the manner in which its duties have ɐen performed.

By direction of the Board of Managers, a list giving the names, regiıents by States, ages, disabilities, and Home histories of all persons ho have been or are now members of the Home, has been prepared, ıd was ordered to be printed at the Central Branch. The printing ffice at this Branch is so constantly employed with the routine business the Home that several years will be required to print the list (which ▸ntains more than 13,000 names) without an unwarrantable increase in ıe printing plant.

The list is submitted to Congress with this report, and with the ◂commendation that 2,500 copies of it be printed by Congress. It furshes the fullest information possible of the *personnel* of the Home from s organization, and its publication will materially assist the members the Board in their labors, and will be useful to all persons who take ı interest in the Home and in the disabled soldiers who have been its embers.

With the manuscript list is the first signature of the work as the ɔard intended to print it.

W. B. FRANKLIN,
President of the Board of Managers National Home for Disabled Volunteer Soldiers.

HARTFORD, CONN., *October* 18, 1882.

I certify that the above is a correct statement of my account wit National Home for Disabled Volunteer Soldiers for the fiscal year ing June 30, 1882.

W. B. FRANKLIN,
President and Acting Treasur

Report of the Secretary.

OFFICE SECRETARY, 93 NASSAU STREET,
NEW YORK CITY, *December* 1, 188

GENERAL: I forward herewith documents to accompany the an report of the Board to Congress.

They consist of—

1st. The consolidated annual report in tabular form.

2d. The proceedings of the Board of Managers during the year.

3d. The reports of the governors of the several branches.

4th. A list of all the inmates of the Home from the time of its organization to June 30, 1881, giving nativity, State, regiment, character of sability, and present status of each.

This list was prepared under the direction of the Board with a view having it printed at the Central Branch. It was found, however, at the printing facilities of the Home were wholly inadequate to the iblication of so voluminous a document within any reasonable time. was decided, therefore, at the last meeting of the Board, that the list prepared should be transmitted to Congress, with a recommendation at it be printed with the annual report.

The papers referred to above contain all the information that can be rnished in regard to the management and condition of the Home. The ports of the governors show in detail all that is important or desirable know as to their respective branches.

The proceedings of the Board of Managers at its various meetings hibit in full everything that has been done by the Board in performce of its duties.

The annual report is a consolidation of the annual reports of the seval branches.

Very respectfully, your obedient servant,

M. T. McMAHON,
Secretary.

General WILLIAM B. FRANKLIN,
President Board of Managers
National Home for Disabled Volunteer Soldiers.

PROCEEDINGS OF THE BOARD OF MANAGERS OF THE NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS, JULY 6, 1881.

BOSTON, MASS., *July* 6, 1881—10 o'clock a. m.

The board met pursuant to adjournment in regular quarterly meeting at the Brunswick Hotel.

Present, General William B. Franklin, president; Col. Leonard A. Harris, first vice-president; General Richard Coulter, second vice-president; General Martin T. McMahon, secretary; Maj. David C. Fulton, and General Charles W. Roberts.

Absent, the President of the United States, the Chief Justice, the Secretary of War, General John M. Palmer, and General John A. Martin.

No quorum present.

Letters and dispatches were read from the President of the United States, the Chief Justice, the Secretary of War, General Palmer, and General Martin, giving the reasons for their absence.

It was also stated that General McClellan was in Europe.

The Chief Justice wrote that if notified by telegraph that his presence was necessary to make a quorum he would make every effect to attend. He was accordingly telegraphed that his presence would constitute a quorum.

The Board, after an informal discussion as to matters of routine, proceeded to visit the Eastern Branch of the Home, at Togus, Me., arriving there July 7, at 11 a. m.

After inspection of the Home and hearing complaints of the inmates the members returned the same night to Boston.

The Board reconvened at the Brunswick Hotel the 8th of July, at 10 a. m.

Present, those heretofore named as present and the Chief Justice.

A quorum being present, the board proceeded to business.

A dispatch having been received from Washington giving a hopeful account of the condition of the President of the United States, the following dispatch was ordered to be sent to the Secretary of State:

HON. JAMES G. BLAINE,
Secretary of State:

The Board of Managers of the National Home for Disabled Volunteer Soldiers desire to express, through the Secretary of State, their sympathy with the President and his

family in the great affliction which has fallen upon them and the country, and to offer their heartfelt congratulations on the encouraging bulletin received this morning.

W. B. FRANKLIN, *President.*

Colonel Harris, from the committee appointed at the last meeting to consider the application of the Toledo, Delphos, and Burlington Railroad to enter the grounds of the Central Branch, submitted the contract prepared and executed between that corporation and the proper officers of the Home.

The contract was received and directed to be entered on the minutes, and filed with the president of the Board.

This agreement, made this —— day of ——, A. D. 1881, by and between The National Home for Disabled Volunteer Soldiers, a corporation under the laws of the United States, named herein as the party of the first part, and The Toledo, Delphos and Burlington Railroad Company, a corporation under the laws of Ohio, named herein as the party of the second part, witnesseth:

That whereas said party of the first part is the owner of a large tract of land in Jeffe son Township, Montgomery County, State of Ohio, now occupied by and known as The National Home for Disabled Volunteer Soldiers, which said party of the first part claim to hold free of and from any right in the State of Ohio, or any corporation created under the laws thereof, to condemn and use any part thereof for railway or other purposes of a public nature; and,

Whereas the party of the second part is desirous of laying a branch of its railway tracks into and upon a part of the lands so held by the party of the first part, and to erect suitable depot buildings at a convenient point on the line of said railway, or at the terminus of said branch or stem within the inclosure of said National Home for Disabled Volunteer Soldiers; and

Whereas said party of the first, in granting unto said party of the second part permission to enter upon said lands and occupy a right of way for a necessary number of tracks, the party of the first part may be required to change its fences and some of its buildings, involving thereby considerable expense, and as indemnity for such expense, and as part consideration for this agreement, the party of the second part proposes to erect and maintain the necessary transfer facilities to transfer cars from the standard-gauge railroads to the narrow-gauge railroad now building and to be operated by the party of the second part, at its junctions with the Cincinnati, Hamilton and Dayton Railroad, in or near the city of Dayton, Ohio, and with the Dayton and Western Railroad at Stillwater Junction, Montgomery County, Ohio, whereby loaded cars from any standard-gauge railroad may be speedily transferred to and upon the tracks of the Toledo, Delphos and Burlington Railroad, so that the party of the first may obtain freights more cheaply than at present, and also to conduct the business of the party of the second part within the grounds and in their vicinity, in conformity to such rules and regulations as may from time to time be made by the party of the first part; to carry the officers, employés, and inmates of said National Home for Disabled Volunteer Soldiers, as there maintained by the party of the first part, between said Home and Dayton, Ohio, at half the rates of fare that shall be charged the public; and also to deliver freights and cars to and from any railroad, from and to either of said junctions, into and upon the grounds of the party of the first part, to such point as may be designated by its officers, at uniform rates and charges, from either junction, speedily and without delay:

Now, therefore, said parties hereto doth agree as follows:

First. That for and in consideration of the premises, and the agreements hereinafter made by the parties hereto, the National Home for Disabled Volunteer Soldiers doth grant permission, and that only, to the Toledo, Delphos and Burlington Railroad Company to enter upon so much of the land and grounds of the party of the first part, located in Jefferson Township, Montgomery County, State of Ohio, as lies north of the hospital, and between the Cemetery avenue and the Dayton and Eaton turnpike, and occupy sufficient space for three railway tracks sufficiently equi-distant apart to allow cars of the standard gauge to pass on all or either of said tracks if occupied by cars, it being expressly understood that said three railway tracks, for the general use of the party of the second, are to be laid only between Cemetery avenue and the Dayton and Eaton turnpike and east of the ravine. The depot building or buildings within the grounds and land of the party of the first part are to be placed on the line of said railroad at such points as may be designated by the said party of the first part, and are to be erected and maintained by the party of the second part in good order and condition.

Second. In consideration of the permission hereby granted by the party of the first part to the party of the second part, said party of the second part doth hereby agree

construct, lay, and maintain on such grade as may be ordered by the said party of the first part a single-track railway, with all necessary switches and appliances for the delivery of freights and cars from the main line of the Toledo, Delphos and Burlington Railroad to such points within the grounds of the party of the first part, located as aforesaid, as may be designated and directed by the said party of the first part, said railroad within said grounds to be constructed, maintained, and kept in good repair by the party of the second part so long as the permission hereby granted is unrevoked and in force.

Third. It is hereby agreed by and between the parties hereto, in consideration of such permission as aforesaid, that the party of the second part shall, within four months from the date of this agreement, provide, at its own expense, and thereafter maintain at Stillwater Junction of the Toledo, Delphos and Burlington Railroad with the Dayton and Western Railroad, the necessary appliances and facilities to transfer the standard-gauge cars, when loaded or otherwise, from the railway tracks of the Dayton and Western Railroad to the narrow-gauge railway tracks of the Toledo, Delphos and Burlington Railroad; and shall also, in like manner and within the same period of time after the date hereof, provide and thereafter maintain at some point on the Cincinnati, Hamilton and Dayton Railroad, in or near the city of Dayton, Ohio, at its junction with the railroad of the party of the second part, like appliances and facilities for the transfer of standard-gauge cars, loaded or empty, from said Cincinnati, Hamilton and Dayton Railroad to the narrow-gauge railroad tracks of the Toledo, Delphos and Burlington Railroad. It is further agreed by and between the parties hereto that said party of the second part shall, at any and all times, when thereto requested by any of the officers of the party of the first part, transfer and haul such cars so by the party of the first part requested to be transferred and hauled from any line of railroad to the Toledo, Delphos and Burlington Railroad from either or both of said two places of transfer, and transport the same into the grounds of the National Home for Disabled Volunteer Soldiers, situated as aforesaid, and deliver the same at such points therein as may be directed or required by the said party of the first part, or any officer duly authorized to so direct the same; and in like manner to return said cars to the proper junction, and transfer them to the railroad from which received, whenever so ordered in like manner, speedily and without unnecessary delay. The charges made by the party of the second part for such transfer and hauling shall be fair and reasonable, and shall be agreed upon between the parties hereto, and shall in no instance be greater than charged the public regularly for like service; and it is expressly stipulated that the charges for transfer and hauling shall be the same from either of said junctions for cars or freights received from any railroad whatever, namely, Stillwater Junction and the junction of the Toledo, Delphos and Burlington Railroad with the Cincinnati, Hamilton and Dayton Railroad to the National Home for Disabled Volunteer Soldiers, and that no charge, directly or indirectly, shall be made for the return and retransfer of empty cars from the National Home aforesaid to the railroad track from whence received at either of said junctions.

Fourth. The party of the second part doth hereby agree with the party of the first part, in further consideration of the permission hereby granted, that it will run sufficient well ordered and equipped trains of cars for passengers between its depot in the National Home for Disabled Volunteer Soldiers, located as aforesaid, and the Union Depot, in Dayton, Ohio, to conveniently accommodate the public travel and the convenience of the officers, employés, and inmates of the National Home aforesaid, and increase such facilities as the demand of public travel between said two points may require, and that it will carry to and from the National Home for Disabled Soldiers, located as aforesaid; and the Union Railroad Depot, in the city of Dayton, Ohio, the officers, employés, and inmates of said Home at one-half the usual rates of fare charged generally to the public by the party of the second part between said two points. Should the party of the second part establish a schedule of rates of fare at a certain price per mile, or should make a special rate between said National Home and the city of Dayton, for either single trip or for round trips, then the officers, employés, and inmates of the party of the first part are to be charged only one-half of the lowest rates so given to the public by the party of the second part.

Fifth. The party of the first part hereby reserves to itself the right to establish, change, and alter at pleasure such rules and regulations for the management of the operation of said railroad of the party of the second part as to the hours and days when the trains of cars of the party of the second part, either for freight or passengers, may enter the grounds of said National Home for Disabled Volunteer Soldiers.

Sixth. It is hereby expressly understood that no refreshments of any kind are to be sold or given away in the cars of the party of the second part, or in any building or buildings inside the grounds of the party of the first part, or in the vicinity or connected therewith; nor is the party of the second part to permit any amusements, games of chance, shows of any kind, or business of any nature whatever to be conducted in its cars or buildings in or immediately connected with the grounds of the party of the first part.

Seventh. It is further expressly agreed that said party of the first part may at any time rescind this agreement, and may remove said tracks off its lands should it desire so to do. In the event said party of the first part determine to withdraw this permission, then said party of the second part doth hereby agree to waive and relinquish all claims of right to occupy said land hereunder, either in law or equity, and not to bring any action in any court of law or equity to prevent such forfeiture and removal of said tracks.

Eighth. It is hereby expressly understood that the right of way hereby granted is a permission at the sufferance of the party of the first part, only terminable at the will of the said party of the first part, and in so granting the same no rights of the party of the first part to hold said land intact and not subject to the jurisdiction, either voluntary or involuntary, of the State of Ohio, or the party of the second part as a railroad corporation under the laws thereof, is hereby admitted; and it is not intended or meant to be waived in any manner whatever, nor is any implication of such rights to be asserted against the party of the first part by reason of this agreement or such permission; nor shall this agreement be construed to give the party of the second part any permanent or vested right or interest in said lands of the party of the first part so by it occupied, except a right of way simply at the sufferance of the party of the first part.

In testimony whereof The National Home for Disabled Volunteer Soldiers, by its president and secretary, duly authorized thereto, and the Toledo, Delphos and Burlington Railroad Company, by its president and secretary, duly authorized thereto, have hereunto subscribed the names of said corporations and affixed the seals of each respectively, in duplicate, this 30th day of May, A. D. 1881.

TOLEDO, DELPHOS AND BURLINGTON RAILROAD COMPANY,
By JNO. M. CORSE, *President.*
[L. S.] Attest:
HERBERT STEWARD,
Secretary Toledo, Delphos and Burlington Railroad Company.
THE NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS.
By W. B. FRANKLIN, *President Board of Managers.*
[L. S.] Attest:
M. T. MCMAHON,
Secretary Board of Managers, N. H. D. V. S.

The president submitted his accounts as acting treasurer for the quarters ending March 31 and June 30, 1881, also his final account of the pension fund and statement of the Ward fund, which were referred to the auditing committee heretofore appointed.

The president submitted the regulations prepared by the committee heretofore appointed to govern the payment of pensions in accordance with recent legislation by Congress.

The regulations were received and ordered to be entered on the minutes.

SYSTEM OF REGULATIONS GOVERNING PAYMENT OF PENSIONS.

The pensions to be paid to the beneficiaries of the National Home for Disabled Volunteer Soldiers, under the act approved February 26, 1881, making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1882, &c., shall be held by the treasurers of Branches, and be paid over to the pensioners at such times and in such amounts as the governors may direct, with the following reservations:

1st. A pensioner having a wife, child, or parent dependent upon him, may send or may direct that all of his pension money shall be sent to such dependent relative, enough being retained by the treasurer to guard the Home against any loss that might occur on account of issues of clothing or tobacco made to the pensioner, when the pension is large enough to justify such retention.—(Printed Minutes, page 263.)

2d. Pensioners who have no dependent relatives may have withheld from them an amount sufficient to pay for all issues of clothing and tobacco (under restrictions (see Printed Minutes, page 263), and to defray any reasonable expenses likely to be incurred by the pensioner during the quarter, the non-payment of which would cause a loss to the Home.

3d. The governors may prevent a hurtful or wasteful or extravagant use of the pension money in any case by retaining a sufficient amount until in their opinion the *danger of* harm or waste or extravagance has passed.

4th. Any balance which may remain in the hands of the treasurers at the end of

quarter shall be invested as is prescribed by the resolution of the Board of Managers of July 2, 1877 (Printed Minutes, page 405), and the modification of that resolution adopted by the Board on September 21, 1880 (Printed Minutes, page 612). And any balance due the pensioner at the date of his discharge or death shall be disposed of as directed by the act of Congress approved February 26, 1881.

5th. These regulations, which are made by the committee appointed by resolution of the Board of Managers at the March meeting, 1881 (see Printed Minutes, page 655), may be at any time modified in accordance with existing provisions of law, either by action of the Board of Managers or of the committee.

WM. B. FRANKLIN,
President Board of Managers.
MARTIN T. McMAHON,
Secretary Board of Managers.

Several applications were presented in regard to the appointment of the surgeon for the Northwestern Branch.

On motion, the action of the president in appointing Dr. S. J. F. Miller as acting surgeon of that Branch, in place of Dr. Hare, resigned, was approved, and Dr. Miller was thereupon duly elected surgeon of the Northwestern Branch.

Other applications for appointment were presented, and ordered to be placed on file.

A communication from General Patrick, governor of the Central Branch, requesting the appointment of a civilian clerk, was read, and, the action of the president in authorizing such appointment was approved, and the salary was ordered to be fixed at the same rate as that paid to the predecessor of such appointee.

An application was presented by an inmate to establish an exchange office at the Southern Branch for the accommodation of inmates, and after consideration was denied.

The secretary presented a large number of papers, printed and in manuscript, from the various branches of the Land League, protesting against the action of the governor of the Central Branch in connection with the subject of the proposed lecture of Mr. James Redpath.

After a discussion and full consideration, the papers were referred to the president of the Board.

The application of C. M. Martin to be allowed an opportunity of testing a fire extinguisher before the Board or a committee thereof was granted.

It was resolved that such opportunity be furnished in September next, at the meeting of the Board at the Central Branch.

The president submitted a contract duly made and executed between P. T. Woodfin and Holtzclaw Bros., dated June 14, 1881, providing for the construction of the buildings heretofore authorized by the Board at the Southern Branch, for the sum of $26,555.

On motion the contract was approved.

On motion, Dr. J. G. Maxfield, acting surgeon and acting secretary of the Eastern Branch, was appointed surgeon and secretary of said Branch.

The reports of the medical examining boards heretofore authorized (Printed Minutes, page 659), were received, and the following action was taken:

The report of the Northwestern Branch was referred to Major Fulton, local manager, with power to take such action in the premises as he may deem advisable after full consideration of the subject.

The report of the Eastern Branch was approved, and the discharges recommended therein were ordered, as follows:

Blackington, O. N., Company C, Fourth Maine Infantry.

Barrett, James, Company E, Twenty-fourth Massachusetts Infantry.
Boyden, H. W., Company E, Sixty-first Massachusetts Infantry.
Casey, Stephen A., Company C, Forty-fifth Massachusetts Infantry.
Cole, Osgood, Company G, Twentieth Maine Infantry.
Daily, Daniel J., Company D, Ninth Massachusetts Infantry.
Donavan, John, Company C, Nineteenth Massachusetts Infantry.
Donahue, John, Company C, Fourth Rhode Island Infantry.
Dewey, William J. S., Company I, Third Vermont Infantry.
Dawson, Robert, Company C, Twenty-fifth Massachusetts Infantry.
Erhardt, John G., Company E, First Massachusetts Cavalry.
Fitch, George E., Company G, Fourth New Hampshire Infantry.
Hatch, George M., Company C, Nineteenth Maine Infantry.
Joslin, Levi, Company G, Second New Hampshire Infantry.
Jones, Cyrus, Company D, Seventeenth Massachusetts Infantry.
Keyes, S. W., Company K, Sixteenth Massachusetts Infantry.
Keegan, Frank, Company B, Thirtieth Massachusetts Infantry
Kendrick, Michael, Company L, Third Massachusetts Cavalry.
Lyman, James, Company A, Twenty-ninth Massachusetts Infantry.
Mullen, Dennis, Company I, Thirth-eighth Massachusetts Infantry.
McCormick, John, Company I, Second Massachusetts Infantry.
Neal, Lyman C., Company C, Third Maine Infantry.
Paul, Oliver P., Company G, Thirtieth Maine Infantry.
Ricker, Benjamin, Company A, Second Massachusetts Cavalry.
Skelton, John, Company I, First New Jersey Cavalry.
Simmons, Spooner M., Company B, Seventh Maine Infantry.
Toomey, Farrell, Company H, Fifteenth Massachusetts Infantry.
Tulley, Prescott, Company K, Second Massachusetts Infantry.
Turner, Alden, Company G, Twentieth Maine Infantry.
Wilson, John, Navy.
Yeaton, Isaac C., Company E, Fifth Maine Infantry.

The report of the Central Branch was approved, and the discharges recommended therein were ordered, as follows:

Brimley, George, Company D, Tenth Michigan Volunteers.
Bryant, William R., Company C, First Massachusetts Cavalry.
Brown, Benjamin, Company G, Fortieth Ohio Volunteers.
Dixon, George, Company K, Fourth New York Cavalry.
Freehill, John, Company G, Fourth New York Volunteers.
Gallagher, Charles, Company G, First Pennsylvania Artillery.
Gibson, William, Company B, Fortieth Indiana Volunteers.
Henry, Stephen A, Company D, One hundred and twenty-eighth Pennsylvania Volunteers.
Huettel, August, Company K, Sixty-first Pennsylvania Volunteers.
Hunt, Herbert, Company C, Fifty-first Indiana Volunteers.
Johnson, David, Company D, Eleventh Pennsylvania Volunteers.
Linsman, Charles, Company G, Ninety-third Pennsylvania Volunteers.
McElroy, James, Company A, Thirty-fourth Kentucky Volunteers.
McGonnell, Francis, Company G, One hundred and twelfth Pennsylvania Volunteers.
Niles, Ephraim, Company A, One hundred and tenth Pennsylvania Volunteers.
Orr, John, Company I, Tenth Ohio Volunteers.
Osborn, Francis, Company H, First Maryland Volunteers.
Platt, Charles, Company H, Twenty-fourth Pennsylvania, and Company A, First Delaware.
Robinson, Wiliam J., Company F, Eighth Pennsylvania Cavalry.

Scott, Thomas M., Company G, Nineteenth Ohio Volunteers.
Snowwhite, E. H. A., Company C, Seventh Pennsylvania Reserves.
Walmsley, Richard H., United States Navy.

No report was received from the Southern Branch, and, upon motion, eneral Coulter, in the absence of General McClellan, was directed select an examining board for that Branch.

The report of the inspector-general in the case of White, heretofore ferred to him (Printed Minutes, page 648), was received and accepted, ad ordered to be sent to the governor of the Northwestern Branch for s information, and to be filed.

An application from the governor of the Northwestern Branch was ceived and read, asking for a further appropriation of $6,000, in addition to that already made, for the building of an amusement hall, &c., the Northwestern Branch. He states that the architect has represented at a building such as is required cannot be constructed for the sum ppropriated.

After discussion, it was ordered, on motion, that $6,000 be appropriated out of the general fund, in addition to the amounts heretofore appropriated, for the purposes indicated.

The president submitted the following papers, which were received nd ordered to be printed in the minutes:

tatement of estimates, appropriations, receipts, and expenditures of the four Branches for the year ending June 30, 1881.

W. B. FRANKLIN,
President and Acting Treasurer *N. H. for D. V. S.*

TOGUS, ME. *July* 7, 1881.

We, the undersigned, have examined and audited this day the above account of General W. B. Franklin, acting treasurer of the National Home for Disabled Volunteer Soldiers, with the pension fund, and find the same correct and supported by proper vouchers.

R. COULTER,
L. A. HARRIS,
Committee.

Colonel Harris offered the following resolution, which, after full discussion, was adopted:

Resolved, That $5,000 be appropriated, or as much thereof as may be required, for the construction of an avenue from the Home grounds of the Central Branch to the "Old Eaton Road," provided the citizens of Dayton, or their representatives, construct the balance of said avenue from the said "Old Eaton Road" to the corporation line of Dayton; provided, also, that arrangements satisfactory to the the local manager be made for keeping the avenue in repair without expense to the Home.

Colonel Harris also reported that the work on Memorial Hall, at the Central Branch, is progressing favorably, and that the building will be occupied the first of October next, and completed within the estimates.

On motion, it was resolved, after discussion, that the president be authorized to dispose of the clothing appropriated by Congress for the benefit of the Home (act approved March 3, 1881) in such manner and at such times and in such quantities as he may deem for the best interests of the Home.

On motion, it was resolved that the annual report of the Board to Congress be prepared and submitted to the Board at their next meeting.

The president submitted the following estimates for the quarter ending September 30, 1881, which, after careful revision, were agreed upon as follows:

Central Branch, for current expenses and repairs	$154,109 82
Northwestern Branch, for current expenses and repairs	26,130 00
Eastern Branch, for current expenses and repairs	29,937 59
Southern Branch, for current expenses and repairs	20,000 00
For out-door relief and incidental expenses	4,000 00
Total	234,177 41

Whereupon the following resolution was adopted:

Resolved, That the Board of Managers of the National Home for Disabled Volunteer Soldiers estimate and appropriate, out of the moneys which may be provided by law, the sum of $234,177.41, as necessary to meet the current expenses of the four Branches of the Home for the quarter ending September 30, 1881, and for construction and repairs, clothing and bedding, out-door relief, and incidental expenses of the National Home for the quarter; and that the acting treasurer be, and he is hereby, authorized and empowered to take such means as may be necessary to obtain the sum of $234,177.41, the amount so appropriated, from the Treasury of the United States, and to receipt for the same in the name and behalf of the National Home.

On motion, it was ordered that when the Board adjourn it be to meet at 10 o'clock a. m. on Wednesday, the 7th day of September, at the Central Branch, near Dayton, Ohio.

The Board then proceeded to the consideration of applications for readmission to the various Branches of the Home, for remission of penalties, and for the effects of deceased inmates, and made the following orders thereon:

READMISSIONS TO CENTRAL BRANCH.

The following named soldiers, heretofore discharged, are, for sufficient reasons, readmitted unconditionally:

Benjamin Spell, late Company I, Seventy-third New York Volunteers.

James W. Healy, late Company F, Fifth Connecticut Volunteers.
Orson Thompson, late Company E, Ninth New York Artillery.
Frank Faber, late Company B, Twenty-eighth Kentucky Volunteers.
William Dalton, late Company F, Fifteenth New York Engineers.
Michael Curley, late Company I, Fourteenth New York Heavy Artillery.
John Brown, late Company G, Twenty-fourth Pennsylvania Volunteers.

The following named soldiers are readmitted on condition that they do such work as the governor shall direct, without pay, for the period set opposite their respective names:

Cyrus Montgomery, late Company E, Forty-ninth Ohio Volunteers, three months.
Nelson F. Clark, late Company A, One hundred and fifty-third Ohio, hospital steward, United States Volunteers, three months.
John O'Donnell, late Company F, Seventh Pennsylvania Volunteers, is readmitted on condition he pay for his transportation by labor.

In the following cases action was deferred. The applicants may remain ("temporarily at post") under the usual conditions until the further order of the Board:

William Burch, late Company K, One hundred and twenty-fourth Ohio Volunteers.
Paul Dalyn, late Company I, First United States Artillery.
Cornelius M. Laly, late Company D, Sixty-seventh Ohio Volunteers.
George Smith, late Company I, Forty-third New York Volunteers.
Louis Diehl, late Company I, One hundred and thirteenth Ohio Volunteers.

The application of Daniel O'Hanlon, late Company E, Sixty-first Pennsylvania Volunteers, is granted so far as to readmit temporarily at post, he to pay his own transportation and await the further order of the Board.

The applications of the following named soldiers for readmission are denied:

Anthony Kiss, Third Battery New Jersey Volunteers.
Dennis O'Donovan, late Company I, Second District of Columbia Volunteers.
Theodore Davis, late Company E, Eighty-second Pennsylvania Volunteers.
John Hickey, late Company A, Eighty-fifth New York Volunteers.

CENTRAL BRANCH—REMISSION OF PENALTIES.

The application of John Hesson, late Company C, Eighty-first Regiment Pennsylvania, for remission of penalty, is granted as to $24.75, the money to be sent to applicant's daughter.

The petitions of the following named soldiers for remission of penalties are denied:

George Nelson, late Company D, Sixty-ninth New York Volunteers.
William Garahan, late Company H, Seventh New York Heavy Artillery.
John Malone, late Company M, Fourteenth New York Heavy Artillery.

Pierce Powers, late Company F, Fifty-fourth Pennsylvania Volunteers.

James Walsh, late Company A, Eighty-second New York Volunteers.

John M. Reise, late Company G, Fifty-eighth Ohio Volunteers.

William J. Robinson, late Company F, Eighth Pennsylvania Cavalry.

Martin Wiederecht, late Company D, Sixth Ohio Volunteers.

Robert W. McKenzie, late Company H, Twenty-third Massachusetts Volunteers.

Frederick Berensden, late Company F, Sixty-ninth New York Volunteers.

Alexander Ferguson, late Company G, Eightieth Pennsylvania Volunteers.

John McGuire, Captain Company F, Second New York Volunteers.

John Burns, late Company B, Twenty-ninth Ohio Volunteers.

Charles Bloom, late Company B, Second New Hampshire Volunteers.

CENTRAL BRANCH—EFFECTS OF DECEASED INMATES.

The applications for effects of deceased inmates in the following cases are granted, and the treasurer is directed to make payment accordingly, taking the necessary vouchers:

Edward Shippen, attorney, for effects of John Simpson, late Company E, Third New Jersey Volunteers.

Eliza Scogin, widow, for effects of Elijah Scogin, late Company B, Fourth Indiana Cavalry.

P. R. Burke, overseer of the poor, of Karns City, Pa., for $87.89, funeral expenses of Andrew J. Kistler, late Company F, Seventy-eighth Pennsylvania Volunteers.

Catherine Klein, mother, for effects of John Klein, late Company C, Second New York Heavy Artillery.

Rebecca A. K. Jacobs, daughter, for effects of James G. Jacobs, late Company A, Forty-ninth Pennsylvania.

Mary Begley, administratrix, for effects of Patrick Fitz Gibbons, late Company I, Tenth Kentucky Volunteers.

Mrs. Margaret Case, widow, for effects of George F. Case, late Company H, One hundred and eighty-second Ohio Volunteers.

Sister Columba, Saint Elizabeth's Hospital, Dayton, Ohio, for effects of Edward Barry, late Company C, Eleventh Indiana Volunteers.

The application of William R. Madge, father, for the effects of Wreford Madge, late Company C, Fifty-seventh Pennsylvania Volunteers, is granted upon probate of will and necessary proof.

The following applications are referred to Col. L. A. Harris, with power:

Catherine Gruber, daughter, for effects of Jacob Gruber, late Company C, Eleventh Connecticut Volunteers.

Sophie Stephenson, daughter, for effects of James Eutrican, War of 1812.

Rosalia Dykman, widow, for effects of Henry Dykman, late Company B, Sixteenth United States Infantry.

Jacob Hoff and Mary Zehner, children, for effects of George Hoff, late Company A, Fortieth Ohio.

Mortimer Nye, administrator, *for* effects of Gordon Mills, late Company B, *Ninth Indiana.*

The following applications are denied:

Sarah E. Belman, widow, for effects of Samuel S. Belman, late Company A, Ninth Pennsylvania Cavalry.

Cornelius Burk, cousin, for effects of Cornelius Burk, late Company H, Fifth Missouri Cavalry.

General John Heitz, Consul General, Switzerland, for effects of Benedict Geesbaugh, late Company I, Fourteenth Ohio Volunteers.

Catherine Miltern, daughter, for effects of John Schrotz, late Company B, Forty-fifth New York Volunteers.

Caroline Hahne, *nee* Schultze, daughter, for effects of Henry Schultze, late Company B, Twenty-ninth New York Volunteers.

The petition of S. A. Griesmer & Son, undertakers, for payment of funeral expenses, &c., of Jesse Price, late Company A, Sixty-ninth Ohio Volunteers, is denied.

READMISSIONS TO NORTHWESTERN BRANCH.

The following-named soldiers, heretofore discharged, are, for sufficient reasons, readmitted unconditionally:

Sebastian Hoeck, late Company K, Twenty-sixth Wisconsin.

George McLane, late Company H, One hundred and twenty-seventh Illinois Volunteers, is readmitted on condition that he do such work as the governor shall direct, for the period of three months, without pay.

NORTHWESTERN BRANCH—REMISSION OF PENALTIES.

The applications of the following-named soldiers for remission of penalties are denied:

George H. Bethard, late Company I, Forty-sixth Ohio Volunteers.

James Harrigan, late Company E, Fifth Iowa Volunteers.

William H. Kelly, late Company I, Thirty-third New Jersey Volunteers.

Henry G. West, late Company D, Fifth Connecticut Volunteers.

NORTHWESTERN BRANCH—EFFECTS OF DECEASED INMATES.

The applications in the following cases are granted, and the treasurer is directed to make payment accordingly, taking the necessary vouchers:

William J. Delaney, son, for effects of James Delaney, late Company K, One hundred and fifteenth Pennsylvania Volunteers.

Mrs. Henrietta Eckhart, administratrix, for effects of Charles Kuffenkam, late Company I, Twenty-fourth Wisconsin Volunteers.

Mrs. Harriet K. Eeves, widow, for effects of Pemberton R. Eeves, late Company G, Fourteenth Kansas Cavalry.

The following application is denied:

Mrs. Jenny W. Cutshaw, daughter, for effects of Edward A. Kendall, late Company E, First California Cavalry.

The following are denied for the reasons given:

Jacob Zacharias, brother, for effects of Conrad Zacharias, late Company G, Thirty-ninth New York Volunteers. There is no proof of legal right.

Morton F. Brennan, administrator, for effects of William Rowley, late Company C, Ninetieth Illinois Volunteers; no reasons stated why application should be granted.

READMISSIONS TO EASTERN BRANCH.

James McCarthy, late Company A, Thirty-ninth New York Volunteers, is, for sufficient reasons, readmitted unconditionally.

The following-named soldiers are readmitted on condition that they do such work as the governor shall direct, for the periods set opposite their respective names:

Thomas G. Taft, late Company D, Thirty third Massachusetts Volunteers, six months.

James M. Perkins, late Company F, Eleventh Maine Volunteers, four months.

James Stafford, late Company A, Twenty-sixth New York Volunteers, four months.

John Gray, late Company D, First Rhode Island Light Artillery, during his stay at the Home.

The applications for readmission in the following cases are denied:

Henry B. Powers, late Company E, Twentieth Maine Volunteers, and late Company E, Second U. S. Artillery.

Dennis Mahany, late Company I, Ninth Maine Volunteers.

EASTERN BRANCH—REMISSION OF PENALTIES.

The applications of the following-named soldiers for remission of penalties are denied:

John A. Sheridan, late Company D, Fifth New York Volunteers.

Hugh Byrne, late Company —, Third Massachusetts Volunteers.

John G. Cobb, late Company G, Fifty-ninth New York Volunteers.

The application of Ruth A. Kennedy for the continuance of rations on account of her two brothers, lost in the war, is denied, the Board having no power under the law to grant the same.

READMISSIONS TO SOUTHERN BRANCH.

James Broderick, late Company K, Thirty-second New York Volunteers (heretofore denied), is, for sufficient reasons, readmitted unconditionally.

The following-named soldiers are readmitted on condition that they do such work as the governor may direct, without pay, for the periods set opposite their respective names:

John H. Moran, late Company K, Second Rhode Island Volunteers, six months.

James McGreeny, late Company H, Fifth New York Heavy Artillery, three months.

Jeremiah Hagerty, late Company E, One hundred and sixty-fourth New York Volunteers, three months.

George Gimber, late Company I, Fifty-seventh New York Volunteers, one month.

Warren H. Joline, late Company B, One hundred and ninetieth Pennsylvania Volunteers, two months, and to pay for clothing from pension.

John Hanlon, late Company A, Second New York Heavy Artillery, is readmitted on condition that he work to pay for his clothing.

William Shannon, late Company B, Seventieth New York Volunteers, is readmitted temporarily to post, on condition he pay his own transportation, to await final action of the Board.

The application of John Reed, late Company D, Thirty-fourth New Jersey Volunteers, for *readmission*, is denied.

SOUTHERN BRANCH—REMISSION OF PENALTIES.

The following applications are denied:
William Lawson, late Company I, Third New Jersey Volunteers.
George H. Travis, late Company A, First Kentucky Light Artillery.

SOUTHERN BRANCH—EFFECTS OF DECEASED INMATES.

The application of Mary C. Bruce, widow, for effects of Thomas S. Bruce, late Company B, First Maryland Volunteers, is granted, and the treasurer is ordered to make payment accordingly, taking the necessary vouchers.

The application of Frederick Heidelmann for effects of Thomas S. Bruce, late Company B, First Maryland Volunteers, is denied.

On motion, the board adjourned, to meet at the Central Branch, at 10 a. m., September 7, 1881.

M. T. McMAHON, *Secretary.*

PROCEEDINGS OF THE BOARD OF MANAGERS OF THE NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS, SEPTEMBER 7, 1881.

DAYTON, OHIO, *September* 7, 1881.

The Board met in regular quarterly meeting at the Central Branch, near Dayton, Ohio, September 7, 1881, at 10 o'clock a. m.

Present: General William B. Franklin, president of the Board, General Richard Coulter, General John A. Martin, General Charles W. Roberts, Maj. D. C. Fulton, General Martin T. McMahon.

Absent: The President of the United States, the Chief Justice, the Secretary of War, Col. Leonard A. Harris, General George B. McClellan, and General John M. Palmer.

No quorum being present, the Board proceeded to inspect the men, the hospital, and other buildings, and also heard the personal complaints of inmates.

Information being received by telegraph from the Chief Justice and General Palmer, that they would join the Board in Chicago, the Board proceeded, on the 8th instant, to Milwaukee, where the Home buildings and hospital of the Northwestern Branch were duly inspected, and the complaints of inmates heard.

On the 9th instant the Board proceeded to Chicago and reconvened at the Grand Pacific Hotel.

Present: The Chief Justice, General William B. Franklin, General John A. Martin, General Charles W. Roberts, Maj. David C. Fulton, General John M. Palmer, General Martin T. McMahon.

A quorum being present, General Coulter submitted the report of the auditing committee of the Southern Branch, which was received and ordered to be entered on the minutes, as follows:

The visiting committee of the Southern Branch report:

That they visited the Branch and audited the accounts of the treasurer for the several quarters not previously audited, including the quarter ending June 30, 1881, and find the same correct, and supported by proper vouchers.

They further audited the Home store account up to June 30, 1881, and find the same correct, and would beg leave to furnish the following detailed account of the Home store:

It was originally started with a capital of $500, borrowed from the pension fund, which has long since been refunded.

The first audit of that account by the Board included the quarter ending September 30, 1880, showing—

Cash on hand	$5,487 03	
Appraised value of stock	2,103 09	
		$7,590 12

Result of audit by your committee to June 30, 1881, shows:

Cash on hand	$7,868 34	
Appraised value of stock	2,351 86	
		$10,220 20

Thus showing a liberal profit after the expenditure of ample funds for amusement purposes.

Your committee further examined into the erection of a cottage by Captain Woodfin, on the grounds, and which is now occupied by the Home engineer, and they find—

That though a somewhat irregular proceeding, it was done under orders of General Butler. That the cottage was necessary, and has been and is now used by the Home engineer. That Captain Woodfin expended therefor $977.91 out of his own private funds. They therefore recommend a special appropriation of $1,000 to reimburse Captain Woodin therefor.

CHARLES W. ROBERTS.
R. COULTER.

General Martin presented the report of the auditing committee for the Central Branch, which was received and ordered to be entered on the minutes, as follows:

The committee appointed to audit the accounts of the Central Branch would respectfully report that we have examined the books and accounts of Col. J. B. Thomas, treasurer, for the twelve months ending June 30, 1881, and find them correct and supported by proper vouchers. Voucher No. 104, Abstract C, mentioned in our report of September, 1880, as absent, has since that date been received, and was exhibited to us by the treasurer.

The books of the treasurer show funds on hand, June 30, 1881, as follows:

General fund	$72,881 91
Pension fund	13,072 52
Posthumous fund	13,971 92
Contingent fund	211 69
Home store fund	2,675 00

The committee were also shown and examined United States four per cent. bonds in the hands of the treasurer, as follows:

Belonging to posthumous fund	$11,100
Belonging to pension fund	63,300
Total	74,400

The books of the secretary show that on the 30th of June, 1881, the store account was as follows:

Merchandise in store	$3,982 42
Merchandise in restaurant	866 44
Fixtures in store	149 63
Fixtures in restaurant	7,474 18
Total	12,472 67

The liabilities of the Home store, June 30, 1881, aggregating, as shown by the books of the secretary, $6,209, and the credits, $3,198.17, making the net liability, June 30, 1881, $3,010.83, a reduction of liabilities during the past twelve months of $6,976.52.

JOHN A. MARTIN,
D. C. FULTON,
Committee.

General Coulter presented the report of the examining surgeons appointed to visit the Southern Branch, which was received, and, after consideration, the discharges recommended therein of the following named

men as having no disability sufficient, in the opinion of the board of surgeons, to prevent their earning their own living by labor were duly ordered:

Burkhart, J. W., Company K, One hundred and thirty-fourth New York Volunteers.
Barrs, George, Company H, Ninth New York Cavalry.
Burrill, John F., Company C, Seventh New Hampshire Volunteers.
Brady, Bernard, Company C, Third New York Cavalry.
Bohen, John, Company F, Second New Jersey Volunteers.
Burkhart, D. F., Company F, Fifth Pennsylvania Volunteers.
Bridges, Thomas, Company A, Sixth United States Infantry.
Butcher, C. J., Company E, Second Pennsylvania Artillery.
Burns, David, Company I, Fifth Massachusetts Volunteers.
Collins, James, Company B, Twelfth Massachusetts Volunteers.
Esten, Malcolm, Company E, Fifth New York Volunteers.
Hasbrook, Hiram, Seventh New York Battery.
Hare, Martin, Company A, Thirteenth Ohio Volunteers.
Herring, Otto, Company H, Fifteenth New York Heavy Artillery.
Hoare, H. P., Company D, Twelfth New York Volunteers.
Heims, C. F., Company E, Twenty-ninth Missouri Volunteers.
McLally, John, Company D, Sixth Maine Volunteers.
Maurseberger, Charles, Company K, Fifty-eighth New York Volunteers.
Martin, Matt., Company B, One hundred and third New York Volunteers.
Mehaffy, Jos. H., Company D, Fourth Pennsylvania Volunteers.
Nugent, Andrew, Company D, One hundred and sixth New York Volunteers.
O'Neil, John, Company K, Second Massachusetts Volunteers.
Purdy, J. L., Company K, Fifth New York Volunteers.
Ralle, Rudolph, Company E, One hundred and fourth Pennsylvania Volunteers.
Simons, David, Company B, Thirty-first New York Volunteers.
Watkins, J., Company F, Sixth Ohio Cavalry.
McGreevy, James, Company K. Fifth New York Artillery.
Callahan, James, Company A, Sixty-fifth New York Volunteers.

Major Fulton, to whom was referred the claim of Koch & Co., architects, for compensation, made report, which was duly considered, and the petitioners heard in person by the Board. After consideration, it was resolved that the president and acting treasurer of the Board be authorized to pay said petitioners the sum of $350, in full settlement of their claim.

Upon motion, the following resolutions, after full consideration were adopted:

Resolved, That no inmate of the Home shall be discharged for desertion, nor declared a deserter, except by order of the president of the Board of Managers.

Resolved, That hereafter no inmate of the Home who has been dishonorably discharged shall be readmitted to the Branch of the Home from which he was so discharged, except by order of the Board of Managers.

Resolved, That hereafter inmates of the Home who are undergoing punishments shall not be discharged until the penalty shall have been completed or remitted, except by order of the Board.

Resolved, That the president of the Board and the treasurer of a Branch of the Home be authorized to assign and transfer United States bonds held on account of the pension fund, whenever the condition of such fund requires that the same, or any portion thereof, be converted into money, and that the signature of the said president and treasurer, with the seal of the National Home for Disabled Volunteer Soldiers shall be

ficient to make such transfer, and to appoint one or more attorneys for that pur-
e; also that all investments of moneys hereafter made on behalf of the Home, or
r Branch thereof, may be made in the discretion of the president of the Board in
r securities of the United States Government, which said securities he shall cause
be duly registered, in accordance with previous resolutions of the Board.

Resolved, That Col. L. A. Harris, General M. R. Patrick, governor Central Branch, d Col. E. F. Brown, inspector-general, are hereby appointed a committee to ex-ine and report upon a proper system of water supply for the Central Branch, with imates. The report to be made at the next meeting of the Board.

Resolved, That the same committee is directed to report a plan and estimates to rease the laundry facilities at the Central Branch.

Resolved, That the question of the erection of a commissary building at the Central anch be referred to the president and local manager, with power.

General Martin presented a petition on behalf of the Historical and onumental Society of the Central Branch for financial aid toward mpleting the Soldiers' Monument in the cemetery of the Home.

Upon motion it was resolved that 1,000 be appropriated from the sthumous fund of the Central Branch for that purpose.

The president submitted the draft of the annual report of the Board Congress, which was read and approved.

The secretary presented the bond of General W. S. Tilton, treasurer the Eastern Branch, which was approved.

The president presented estimates for the quarter ending December , 1881, which, after careful revision, were agreed upon as follows:

ntral Branch for current expenses and repairs	$143,937 72
rthwestern Branch, for current expenses and repairs	35,204 55
stern Branch, for current expenses and repairs	30,008 50
uthern Branch, for current enpenses and repairs	27,540 00
r clothing and bedding	.....
r out-door relief and incidental expenses	4,000 00
Total	240,690 77

Whereupon the following resolution was adopted:

Resolved, That the Board of Managers of the National Home for Disabled Volunteer ldiers estimate and appropriate, out of the moneys which may be provided by law, e sum of $240,690.77, as necessary to meet the current expenses of the four Branches me for the quarter ending December 31, 1881, and for construction and repairs, thing and bedding, out-door relief, and incidental expenses of the National Home r the quarter; and that the acting treasurer be, and he is hereby, authorized and powered to take such measures as may be necessary to obtain the sum of $240,690.77, e amount so appropriated, from the Treasury of the United States, and to receipt r the same in the name and behalf of the National Home.

On motion, it was resolved that when the Board adjourn it be to meet Willard's Hotel, at Washington, D. C., on Wednesday, the 18th of nuary, 1882, at 11 a. m.

The Board then proceeded to the consideration of applications for admission, for remission of penalties, for effects of deceased inmates, d other petitions from the several Branches.

CENTRAL BRANCH.

The following applications for original admission were denied for the asons stated:

Franz J. Disaga, late Company K, One hundred and fifth Pennsyl-nia Volunteers, being a proper subject for admission to insane asylum his State.

Charles Dumond late Company F, Twelfth United States Infantry, t eligible.

READMISSIONS TO CENTRAL BRANCH.

The following named soldiers heretofore discharged, are for sufficient reasons readmitted unconditionally:

George Smith, late Company I, Forty-third New York Volunteers.

Lewis B. Evans, late Company F, Twenty-third Pennsylvania Volunteers.

Thomas M. Scott, late Company G, Nineteenth Ohio Volunteers.

William Birch, late Company K, One hundred and twenty-fourth Ohio Volunteers.

Daniel O'Hanlan, late Company E, Sixty-first Pennsylvania Volunteers.

William Shumway, late Company K, Eighth Michigan Volunteers, is readmitted on condition that he do such work as the governor shall direct, without pay, for the period of three months.

John Henry, late Company I, Twelfth Pennsylvania Cavalry, is readmitted temporarily at post until further orders, provided he pays his own transportation.

There being no further business, it was, on motion, resolved that the Board adjourn, to meet at Willard's Hotel, Washington, D. C., on Wednesday, the 18th of January, 1882, at 11 a. m.

M. T. McMAHON, *Secretary.*

PROCEEDINGS OF THE BOARD OF MANAGERS OF THE NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS, JANUARY 18, 1882.

WASHINGTON, D. C., *January* 18, 1882.

The Board met in regular quarterly meeting at Willard's Hotel, in the city of Washington, D. C., and was called to order at 11 a. m.

Present, the President of the United States, the Chief Justice, the Secretary of War, General William B. Franklin, president of the board; Col. L. A. Harris, first vice-president; General M. T. McMahon, secretary; Maj. D. C. Fulton, General George B. McClellan, and General Charles W. Roberts.

Absent, General Richard Coulter, second vice-president; General John A. Martin, and General John M. Palmer.

Letters were read from Generals Coulter and Martin, informing the Board that they could not be present.

A quorum being present, the Board proceeded to the consideration of business.

RESOLUTIONS AND REPORTS.

Upon motion, it was resolved that the committee on clothing, heretofore appointed, be authorized to make the necessary contracts for clothing for the ensuing year.

On motion of General Roberts, it was

Resolved, That the question of building an insane hospital at the Central Branch, with the estimates and plans prepared, in accordance with the act of March 3, 1881, be referred to the committee heretofore appointed by the Board to confer with the appropriation and other committees of Congress, with a view to securing the necessary appropriation.

Upon motion of Major Fulton, it was

Resolved, That the president of the Board be authorized, upon the recommendation of the local manager of either Branch, to direct such expenditure from the store and posthumous funds of such Branch as in his judgment may be necessary and proper.

Upon motion of General McClellan, it was

Resolved, That the president of the Board and the local manager be authorized to make such changes in and additions to the main barracks at the Southern Branch as they may find necessary, provided the cost thereof shall not exceed the sum of $32,500.

Upon motion, it was

Resolved, That the president of the Board be authorized to issue a new style of uniforms; also, that he be authorized to sell such clothes as may be unfit for use.

Colonel Harris reported that he had employed a book-keeper, in accordance with the previous direction of the Board, who had visited the Central Branch and arranged a system of keeping the books, which appears to be simple and safe, and the same has been submitted to experts and approved, and asks authority to put it into operation.

Upon motion, it was resolved that the requisite authority be given.

Colonel Harris also reported a contract made by him with the National Avenue Company of Dayton, transferring certain lands outside of the gate on the proposed avenue.

After discussion, on motion, it was resolved that the contract be approved.

On motion, it was

Resolved, That the president be authorized to take such action in regard to the application of the clothing contractors for extension of time as may be just and proper, having due regard to the interests of the Home.

On motion of General McMahon, it was

Resolved, That the yearly salaries of the governors of the various branches be fixed as follows, to date from January 1, 1882:

The governor of the Central Branch	$3,000
The governor of the Northwestern Branch	2,500
The governor of the Eastern Branch	2,500
The governor of the Southern Branch	2,500

On motion of Colonel Harris, the salary of the treasurer of the Central Branch was fixed at $2,400 per annum, dating from January 1, 1882.

On motion, it was

Resolved, That the next meeting of the Board shall take place at Washington on Tuesday, the 11th of April, at 11 a. m.

The resignation of Capt. William Thompson, steward of the Central Branch, was presented, and, on motion of Colonel Harris, it was

Resolved, That we accept with regret the resignation of Captain Thompson. He has proved himself an active, energetic, honest, and efficient officer, and his long and faithful services entitle him to our favorable commendation.

Colonel Harris, from the committee on auditing the accounts of the acting treasurer of the Board, submitted the following report:

WASHINGTON, D. C., *January* 18, 1882.

The undersigned have examined and audited this day the accounts of General William B. Franklin, acting treasurer of the National Home for Disabled Volunteer Soldiers, for the quarters ending 30th September, 1881, and 31st December, 1881, and find the same correct, and supported by proper vouchers.

The balance in his hands on the 31st of December, 1881, was $77,247.78.

We have also examined the disbursements of the Ward fund, and find them correct and supported by the proper vouchers.

L. A. HARRIS.
D. C. FULTON.
GEO. B. McCLELLAN.

Colonel Harris also submitted the following report from the committee on auditing the accounts of the Eastern Branch:

JULY 12, 1881.

I hereby certify that I have this day examined the accounts and expenditures of the Eastern Branch from July 1, 1880, to June 30, 1881, and find the same correct and supported by proper vouchers.

also certify that I have examined the store accounts of same Branch for same time, l find balance on hand as follows, viz:

nds 4 per cent., registered	$3,358 00
sh	1,590 01
rchandise	1,925 48

ll of which is respectfully submitted.

L. A. HARRIS, *Committee.*

Major Fulton reported back the case of Mary A. Schweistal, for the ects of her father, with the recommendation that it be denied.
On motion, the recommendation was adopted.
Major Fulton also reported on the application of the postmaster of the rthwestern Branch for increase of pay, with the same recommendan. which, on motion, was adopted.

MISCELLANEOUS.

The secretary submitted the bonds of the treasurer of the Central anch and the treasurer of the Southern Branch, which, upon motion, re duly approved.
The following application was received, and, on motion, referred to e secretary for examination and report:

HEADQUARTERS ANNA M. ROSS POST, 94, G. A. R.,
SOUTHEAST CORNER GIRARD AVENUE AND HUTCHINSON STREET,
Philadelphia, October 18, 1881.

PERINTENDENT NATIONAL SOLDIERS' HOME, DAYTON, OHIO:

DEAR SIR AND COMRADE: The late William M. Cooper, just previous to his death, esented this post with the deed of and the "Cooper Shop" burial lot in Mount oriah Cemetery, this city. The same adjoins, *direct*, the lot belonging to the Home at ayton. Thinking it can be of little or no service to you for burial purposes, I would k in behalf of this post, for its transfer as a gift, where it will be of service to those the late war who are among us without a place of burial or means to purchase one. ur lot (the old Cooper Shop lot) is pretty well filled, and under direct supervision the post, and kept green in memory of those whom we will all soon follow. I ask is of soldiers for soldiers, which will be but carrying out its design.
Again, I would state our post has mustered to date, 1,009 soldiers of the late re-llion, and have nearly 700 now in good standing, being the largest post in this de-rtment, and some of those who have dropped out will eventually look to us to tend to them that last charity.
If not in your power to grant this request, you will confer a favor by setting me ht as through what channel I shall proceed to better this end. An early reply will lige.

Yours in F., C., and L.,

GEORGE K. MECKE,
C. of A. of Anna M. Ross Post, 94, *G. A. R.*

An application was received in relation to furnishing marble head-ones to the cemetery of the Central Branch, which was referred to olonel Harris for report.
The president submitted the following estimates for the quarter end-g March 31, 1882, which, after careful revision, were agreed upon as llows:

ntral Branch	$147,575 37
rthwestern Branch	34,938 27
stern Branch	31,550 30
uthern Branch	39,226 50
ntral Branch water supply	35,500 00
ndry	14,000 00
uthern Branch, alteration of building	32,500 00
idental expenses Board of Managers and out-door relief	4,000 00
Total	339,290 44

Whereupon the following resolution was adopted:

Resolved, That the Board of Managers of the National Home for Disabled Volunteer Soldiers estimate and appropriate, out of the moneys which may be provided by law, the sum of $339,290.44, as necessary to meet the current expenses of the four Branches of the Home for the quarter ending March 31, 1882, and for construction and repairs, clothing and bedding, out-door relief, and incidental expenses of the National Home for the quarter; and that the acting treasurer be, and he is hereby, authorized and empowered to take such means as may be necessary to obtain the sum of $239,290.44 from the Treasury of the United States, and to receipt for the same in the name and behalf of the National Home; and to expend the sum of $100,000 from the amount realized from the sale of condemned clothing turned over to the Home under the act approved March 3, 1881 (Printed Minutes, page 686), the above two amounts making together the whole amount appropriated.

The Board then proceeded to the consideration of applications for readmission to the Home, remission of penalties, and effects of deceased inmates, and made the following orders:

READMISSIONS TO CENTRAL BRANCH.

The following-named soldiers, heretofore discharged, are, for sufficient reasons, readmitted unconditionally:

Francis Maes, late Company B, Eighteenth United States Infantry.

John J. Thorp, late Company I, Thirtieth Massachusetts Volunteers.

William Walsh, late Company I, Fourth New York Volunteers, three months.

James Donovan, late Company I, Ninety-seventh Pennsylvania Volunteers, three months.

William Anderson, late Company C, First Massachusetts Heavy Artillery, three months.

Farrell Twomey, late Company H, Fifteenth Massachusetts Volunteers, three months.

James Leyden, late Company H, Ninth Connecticut Volunteers, three months.

The following-named soldiers are readmitted on condition that they do such labor as they can, in recompense for their support:

Robert C. Horrigan, late Company E, Fifty-sixth Massachusetts Volunteers.

Prescott W. Tully, late Company K, Second Massachusetts Volunteers.

Stephen H. Casey, late Company H, Fifty-sixth Massachusetts Volunteers.

Dennis Mahony, late Company I, Ninth Maine Volunteers.

In the following cases action is deferred. The applicants may remain "temporarily at post," under the usual conditions, until the further order of the Board:

Charles E. Foster, late Company G, Second New Hampshise Volunteers.

Patrick Galligan, late Company I, Fifth Connecticut Volunteers.

James S. Morang, late Company I, Twenty-fourth Maine Volunteers.

Thomas Mulligan, late Company D, Sixteenth Maine Volunteers.

Jeremiah Noonan, late Company G, Thirty-first Maine Volunteers, may be received "temporarily at post," upon paying his own transportation, until further orders.

The application of James F. Gormley, late Company D, Second Pennsylvania Heavy Artillery, is granted, provided he comply with the original conditions imposed by Colonel Harris.

The application of John Wilson, late gunboat "Ohio," is denied, the applicant being ineligible under existing laws.

READMISSIONS TO SOUTHERN BRANCH.

The following named-soldiers, heretofore discharged, are, for sufficient reasons, readmitted unconditionally:

James McGreevy, late Company H, Fifth New York Heavy Artillery.

John O'Neill, late Company F, Second Massachusetts Volunteers.

Peter McDonald, late Company G, First Wisconsin Heavy Artillery.

John Conroy, late Company I, Second Pennsylvania Volunteers.

Joseph Bole, late Company E, First Maryland Volunteers.

Thomas Bridges, late Company A, Sixth United States Infantry, Mexican war.

The following-named soldiers are readmitted on condition that they do such work as the governor shall direct, without pay, for the periods set opposite their respective names:

John Monahan, late Company F, Thirty-second Massachusetts Volunteers, six months.

David Easton, late Company G, Ninth New York Heavy Artillery, six months.

John H. Moran, late Company K, Second Rhode Island Volunteers, six months.

Thomas Cassidy, late Company D, Ninth New York Volunteers, six months.

Leonard Kean, late Company A, First Texas Cavalry, four months.

Neal McLaughlin, late Company E, One hundred and fifteenth Pennsylvania Volunteers, four months.

Owen McCauley, late Company D, Fourth United States Artillery, Mexican war, is readmitted upon condition that he work out the penalty originally imposed at the Northwestern Branch, together with six months labor, without pay, in addition thereto.

Michael Keith, late Company H, Twenty-third Kentucky Volunteers, is readmitted upon condition that he perform three months' labor, without pay, and pay for his own transportation.

In the following cases action is deferred. The applicants may remain "temporarily at post," under the usual conditions, until the further action of the Board:

Phineas D. Parks, late Company D, Fourth Illinois Cavalry.

James A. Frayne, *alias* Farren, late Company I, Fourth Missouri Cavalry.

William Shannon, late Company B, Seventieth New York Volunteers.

Michael Ihle, late Company I, Sixty-eighth New York Volunteers.

Peter Deegan, late Company L, Eighty-third New York Volunteers.

George Bradley, late Company F, Sixty-ninth Pennsylvania Volunteers.

James Colgan, late Company K, Seventy-ninth New York Volunteers.

The application of John Barrett, late Company D, Sixteenth Illinois Cavalry, for readmission is granted, provided he perform the penalty imposed by the Board of Managers, December 19, 1874 (printed Minutes, p. 273), the applicant to remain "temporarily at post" until the above condition is complied with, when his application for readmission will be acted upon by the Board.

The applications of the following-named soldiers are denied:

James Callahan, late Company A, Sixty-fifth New York Volunteers.

Michael Dougherty, late Company I, Third New Jersey Volunteers.

Thomas F. Davis, late Company H, Third New Jersey Volunteers.

Joseph Miller, late Company K, Fortieth New Jersey Volunteers.

SOUTHERN BRANCH—REMISSION OF PENALTIES.

The application of Thomas Ford, late Company K, Thirty-fifth Massachusetts Volunteers, for remission of penalty, is granted as to one half the penalty imposed.

SOUTHERN BRANCH—EFFECTS OF DECEASED INMATES.

The applications for effects of deceased inmates in the following cases are granted, and the treasurer is directed to make payment accordingly, taking the necessary vouchers:

Mrs. Alfred Miller, sister, for effects of William Madison, late Company I, Fifty-seventh New York Volunteers.

Julia Ann Burket, widow, for effects of Peter Burket, late Company *K, Sixth* New York Heavy Artillery.

The application of Mrs. Harriet Fock, for the effects of Thomas L. ock, late Ordnance Department, Mexican War, is referred to General cClellan, with power.

There being no further business, on motion, the Board adjourned, to eet in Washington, on the 11th of April, at 11 a m.

M. T. McMAHON,
Secretary.

ROCEEDINGS OF THE BOARD OF MANAGERS OF THE NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS, APRIL 11, 1882.

WASHINGTON, D. C., *April* 11, 1882.

The board met in regular meeting at Willard's Hotel, at 11 a. m.

Present, the President of the United States; the Chief Justice; the ecretary of War; General William B. Franklin, president of the oard; Col. L. A. Harris, first vice-president; General Richard Coulter, cond vice-president; General Martin T. McMahon, secretary; General ohn A. Martin; Maj. David C. Fulton; General Charles W. Roberts.

Absent, General George B. McClellan; General John M. Palmer.

A letter was read from General McClellan, announcing that he was etained by illness in his family, but would join the Board at the outhern Branch, on its arrival there.

The first business in order was declared to be the election of officers. ballot was thereupon had. General William B. Franklin was re-ected president of the Board. Col. L. A. Harris was re-elected first ce-president. General Richard Coulter, upon being placed in nomina-on, declined to be a candidate for re-election as second vice-president; hereupon General John A. Martin was elected to that office. General artin T. McMahon was re-elected secretary of the Board.

MOTIONS, RESOLUTIONS, AND GENERAL BUSINESS.

The application of General Patrick, governor of the Central Branch, r a special appropriation of $5,000, for the erection of an insane ward the hospital at said branch, was referred to Colonel Harris, with ower.

General McMahon presented the papers in connection with the appli-ation of Anna M. Ross Post, No. 94, Department of Pennsylvania, G. . R., to have a lot in Mount Moriah Cemetery, in the city of Philadel-hia, now held in the name of the National Home for Disabled Volun-er Soldiers, transferred to Anna M. Ross Post, to be used for the bur-l of soldiers, under the auspices and direction of said post; which pplication was referred, at the last meeting of the Board, to the secre-ry for examination and report. After discussion, it was, on motion,

Resolved. That the consent of the Board be given to such transfer for the purposes dicated in said application (printed Minutes, page 710), and that the secretary be rected to notify the authorities of the Mount Moriah Cemetery of the action of the ard, and request that the transfer be made; provided, however, it be understood at in case of the dissolution or disbandment of the post the lot shall revert to the ational Home.

General McMahon presented the report of the auditing committee of e Northwestern Branch, as follows:

We respectfully report that we have examined and audited the accounts of the rthwestern Branch of the National Home for Disabled Volunteer Soldiers, from

October 20, 1880, when the present governor and treasurer took charge, to June 1881, and find as follows:

Cash receipts for the quarter ending December 31, 1880, were as follows:

Balance from General Hincks, retiring treasurer	$4,25
From general treasurer	28,00
From all other sources	3,91
That the credits allowed the various departments—subsistence, stable, farm, household, and manufacturers, &c.—for supplies and work done, amounted to	6,02
Making total cash receipts and credits, as above	42,19
That the expenses for the same period were:	
Cash	38,73
That the various departments of the Home—subsistence, construction, and repairs, stable, manufactures, hospital, &c.—were credited with	6,02
Making a total of cash expenditures and credits given as above to the different departments of	44,76
Showing a balance against the Home and due the treasurer of the Northwestern Branch of	2,56

That the cash receipts for the quarter ending March 31, 1881, were as follows:

From the general treasurer	$29,000
From subsistence, stable, farm, transportation, manufactures, &c	4,486
Credits given to various departments for supplies, &c	4,491
Making a total of	37,977
That the expenditures during the same period were	28,743
Credits given various departments—subsistence, construction and repairs.	4,491
Making a total of	33,234
Leaving a balance on hand after deducting balance due treasurer at close of last quarter of	2,174

That the receipts for the quarter ending June 30th, 1881, were:

Balance from last quarter	2,174
Receipts from general treasurer	35,575
Cash receipts for subsistence, stable, transportation, manufactures, &c.	3,491
By credits to the various departments—subsistence, stable, farm, manufactures, &c	5,378
Making a total of	47,019
That the expenditures during same period were:	
Cash expenditures	33,096
By credits to the various departments—subsistence, current expenses, stable, construction and repairs, household, manufactures, &c	5,378
Making a total of	38,475
Leaving a balance on hand on the 30th of June, 1881, of	8,544

We find that the accounts for each of the above quarters are supported by proper vouchers, except that three vouchers of the last quarter of 1880, viz:

Voucher 18, Abstract E	$125
Voucher 13, Abstract I	1
Voucher 18, Abstract I	76

are missing from the files; and, also, that in the second quarter of 1881 there is error of $1, caused, no doubt, by a mistake in entering a voucher in the internal count.

Since the examination was made the committee have been informed that the th missing vouchers have been replaced, and that the error of $1, referred to above, a also referred to in the certificate placed by the committee on the treasurer's books the Home, has been discovered and corrected, and that the balance on hand June 1881, is as above stated.

The auditing committee of the Northwestern Branch further rep

it they examined the accounts of the store fund of said Branch, and d for the three quarters ending June 30, 1881, balances as follows:

arter ending December 31, 1880, balance	$5,792 37
arter ending March 31, 1881, balance	3,440 87
arter ending June 30, 1881, balance	6,231 36

M. T. McMAHON.
E. F. BROWN,
Inspector-General.

The case of the application of the executor and legatees of Joseph H. cCoy, late Company C, Fifteenth Ohio Volunteers, for the balance of oney in the hands of the treasurer of the Central Branch, was then ken up, and Hon. John W. Foster, as counsel for the said executor, as heard in person on the subject. After discussion, action was post-ned, and the matter referred to the Chief Justice of the United States r advice. Subsequently, at the suggestion of the Chief Justice, and cause of the large amount involved, it was resolved that the neces-ry means be taken to have a judicial interpretation of the statute, and at the secretary be directed to unite with the representatives of the imants in an agreed case, to be submitted to the courts for final cision.

Pending the consideration of this case, a letter was received from L. Coman, esq., attorney, Newark, Ohio, giving notice that the heirs of cCoy had taken measures to contest the will, and requesting the Board make no payments pending the decision of the courts.

General Sharpe, governor of the Northwestern Branch, submitted ans and correspondence in relation to improvements in the hospital at e Northwestern Branch.

Upon motion, it was—

Resolved, That the sum of $2,400 be appropriated for the purpose of making such provement, viz: The addition of a second story to the corridor connecting the spital wings with the kitchen, in order that food may be served in the upper stories the hospital more expeditiously.

The secretary presented to the Board the proposition of the trustees d founders of Fitch's Home for Soldiers, Darien, Conn., to transfer e same, with the library, art gallery, and furniture pertaining thereto, the National Home for Disabled Volunteer Soldiers, in accordance th the terms of an act of the Connecticut legislature recently passed, thorizing such transfer. After a full discussion of the subject, the llowing resolution was adopted:

Resolved, That this board, while gratefully appreciating the patriotic motives of e authorities of the State of Connecticut, of the trustees of Fitch's Home, and of its under, Mr. Benjamin Fitch, in their munificent offer of that institution and its en-wments to the National Home for Disabled Volunteer Soldiers, is desirous of accept-g the same for the purposes expressed in the proposed deed of gift, provided it can done under existing laws, and in accordance with the established policy of this ard in regard to the number of its Branches; and, therefore, it is further

Resolved, That the subject be referred to the president and secretary of the Board examine the terms of the legislative enactment of the State of Connecticut author-ng the proposed transfer, and also the conditions of deed of gift, with full power d authority to accept the same in the name of the Board, upon being fully satisfied at nothing in the said enactment or in the said deed of gift, or in anything con-ected with the proposed transfer in any manner commits the Board to the mainte-ance of the said Fitch Home as a separate Branch of the said National Home; and on accepting the same, in accordance with the foregoing authority and instructions, e said president and secretary shall communicate the fact to the governor of Con-ecticut, the trustees of the Fitch Home, and to Mr. Benjamin Fitch, the venerable nder of that institution, with the grateful acknowledgments of this Board.

Upon motion, it was

Resolved, That the *governor of the Central Branch* be authorized to organize a

special force from the inmates for guard duty at the Home, and to select and appoint as officers thereof a captain, one first lieutenant, and one second lieutenant, who shall be known respectively as the captain and lieutenants of the guard, and who shall receive a compensation hereafter to be fixed by the president of the Board.

Upon motion, it was

Resolved, That the governor of the Northwestern Branch be authorized to appoint an assistant to the postmaster at that Branch at a salary not to exceed $12 per month, upon the removal of the post-office to Memorial Hall.

Upon motion, it was

Resolved, That the president of the Board be authorized to prepare and publish regulations to govern the issue of, and charges for, clothing at the various Branches.

The president of the Board reported that, in accordance with the authority given at the last meeting, he had extended the time for the completion of the contract for sale of clothing until June 30, 1882, the contractor having deposited, as a condition of such extension, the sum of $12,000, which is to apply on the last payment for such clothing.

On motion, it was

Resolved. That the sum of $4,600 be appropriated for the purpose of erecting a suitable office at the Southern Branch.

On motion, it was

Resolved. That the president of the Board be authorized to appoint a matron for the Southern Branch, and regulate her duties and fix her compensation, whenever proper accommodations can be furnished for her use.

Colonel Harris submitted special estimates from the governor of the Central Branch for wings on barracks 15, 16, and on Amusement Hall, viz, $6,600. After careful examination of the papers submitted, on motion the sum of $6,600 was appropriated for that purpose.

Also special estimates for commissary building at Central Branch, namely, $6,130. After examination the sum of $6,130 was appropriated for this purpose, as requested.

A special estimate for repairs and additions to the gas works at the Central Branch was submitted by the governor of that branch, and, on motion, was referred to Colonel Harris, with power to authorize such repairs and additions, if, upon examination, he deems it for the best interests of the Home.

The governor of the Central Branch submitted the proposals of the Gem City Lightning Protection Company for supplying the Homes with lightning-rods. Upon motion, the application was denied.

On motion of Colonel Harris, it was

Resolved, That the governors of the Central, Northwestern, and Southern Branches be authorized and directed to insure the Memorial Halls at the irrespective Branches to a reasonable amount, the cost of such insurance to be defrayed from the store fund.

The petition of the inmates of the Southern Branch, for the increase of salary of Rev. Thomas J. Murray, was referred to the local manager, General McClellan, for report.

General Coulter submitted the report of the auditing committee upon the accounts of the acting treasurer of the Home, as follows:

We, the undersigned, have this day examined and audited the accounts of General W. B. Franklin, acting treasurer of the National Home for Disabled Volunteer Soldiers, for the quarter ending the 31st of March, 1882, and find the same correct and supported by proper vouchers. The balance in his hands on the 31st of March, 1882, was $136,680.76.

R. COULTER.
JNO. A. MARTIN,
L. A. HARRIS,
Auditing Committee.

he president of the Board submitted the following estimates for the
rter ending June 30, 1882, which, after careful revision, were agreed
n, as follows:

tral Branch	$135,912 47
thwestern Branch	31,224 68
tern Branch	37,917 65
thern Branch	39,682 45
thing	110,000 00
lding	30,000 00
t-door relief	4,000 00
	388,737 25

Whereupon the following resolution was adopted:

Resolved, That the Board of Managers of the National Home for Disabled Volunteer
ldiers estimate and appropriate, out of the moneys which may be provided by law,
e sum of $388,737.25, as necessary to meet the current expenses of the four Branches
the Home for the quarter ending June 30, 1882, and for construction and repairs,
thing and bedding, out-door relief, and incidental expenses of the National Home
r the quarter; and that the acting treasurer be, and he is hereby, authorized and em-
wered to take such means as may be necessary to obtain the sum of $235,841.38,
om the Treasury of the United States, and to receipt for the same in the name and
half of the National Home: and to expend such amount realized from the sale of
ndemned clothing turned over to the Home under the act approved March 3, 1881
rinted Minutes, page 686), as may be necessary to make up the full amount appro-
iated as above.

Pending the consideration of applications for readmission, &c., the
oard took a recess and proceeded to Fortress Monroe.

The Board reconvened at the Southern Branch, Thursday, the 13th
stant, at 10 o'clock a. m.

Present, the President of the United States, the Secretary of War,
eneral William B. Franklin, Col. L. A. Harris, General Richard Coul-
r, General Martin T. McMahon, General John A. Martin, Maj. David
Fulton, General George B. McClellan, General Charles W. Roberts.

Of the whole number present June 30, 1882, 3,299 could read an write, and 321 could neither read nor write; of the latter, 22 per cent were native born and 72 per cent. were foreign born.

HEALTH.

The whole number of deaths from all causes in the Home during the past year was 298, as against 261 last year; number treated in hospital 1,149, as against 1,076 last year. Nearly all these cases were chronic and much the largest proportion was of old men; indeed, the mean age of those treated in hospital is over sixty years, four having reached nearly one hundred years of age, 14 over eighty, and 34 over seventy. Within the last two years we have lost two men who were over one hundred years of age. Fortunately, the Home has escaped the ravages of small-pox, which has been prevalent in our neighborhood; such precautionary measures were early taken that only one or two cases (and those doubtful ones) were permitted to enter the Home grounds, where they were kept isolated for several weeks until all danger had passed away. All inmates were required to submit to vaccination as a preventive. The recent action of the Military Committee in Congress renders it almost certain that our insane inmates are hereafter to be cared for at the Washington Asylum. This is a matter of vast importance, as the number of insane is rapidly increasing and our facilities for taking care of them are but a tithe of what are required for their *treatment* and our safety, as will be seen from the report of the surgeon, marked A, herewith inclosed. Our accommodations are not suffi

ent to meet the wants of our inmates, who are increasing in number d becoming more and more enfeebled by age as well as from the dis- ilities which brought them to this Home. Authority has been given the erection of a cheap building (similar to that in which are wards nd 9) for immediate and temporary hospital use. In this connection lesire to say that the comfort and well-being of the sick in hospital ve been conscientiously cared for by the medical officers and attend- ts, by the matron, and by both the Protestant and Catholic ministers duty at the Home.

STEAM ENGINEERING, &C.

Since the 1st of June last great changes have been made and others in progress in the department of steam engineering, hydraulics, and s. The report of the chief engineer, which is herewith inclosed, rked B, enters into the details of the works under his charge very ly and clearly.

STEAM BOILERS.

An inspection of the steam boilers in the Home had already been mpleted by the Hartford Steam Boiler Inspection and Insurance mpany. The report of that company I inclose, as a proof of the ab- lute necessity which then existed for a thorough overhauling of almost ery boiler in use at this branch. A second report made certifies to a dely different and very satisfactory condition of these boilers and eir connections, copy inclosed, marked C.

WATER SUPPLY.

The extraordinary drought of last season impressed upon us more rongly than ever the conviction that our water supply for the general e of the Home was insufficient to meet our wants, although there was all times a sufficient quantity of water in the lower lake, the capacity our pumping engines, the contracted size of the water pipes and their perfect distribution through the grounds now occupied by barracks and her buildings made it impossible to adequately supply water in sufficient antities at points where most needed, whether for general use or to ard against fire. To meet the increasing demands for water supply, special appropriation was made by your honorable Board at your eeting of January 11, 1882. As it was certain that much larger pipes ust be laid from the deep lower lake up through the smaller lake, hatever system should be adopted, advantage was taken of the ex- eme low water to lay such pipe without waiting the action of the oard. This was done before the fall rains set in, at less cost than ould now be required even to build the coffer-dam. It having been cided within the past month to adopt the stand pipe-system to guard gainst fires, the contracts have been made and the work is now in rogress. (See report of chief engineer.)

SEWERAGE.

In my last report reference was made to the distribution of sewerage ver the grounds of the Home not having their drainage in the direction f the lakes. This distribution was carried out in a most satisfactory man- er, and the pump working regularly through the winter; but an unex-

pected result has followed. The vast amount of sewerage thrown out by the pump (averaging 130,000 gallons per day), after saturating our own grounds, filtered through into the small water-courses to the south and west of the Home grounds, poisoning the waters which supplied the stock on the farms through which they passed, and creating a nuisance of the same character as that which had formerly existed on the north of the Home grounds in the small tributary to the Wolf River. Threats of lawsuits and injunctions caused me to have a survey made of a route to the Miami River, some miles below Dayton and above Carrollton. As this has been regarded from the first as the only route by which the river could be reached at such a point as would make the delivery of our surplus sewerage into its waters unobjectionable, I would respectfully recommend an appropriation for this work. (See special estimates forwarded with board papers on the 5th instant.)

GAS.

As our numbers are constantly increasing, the capacity of our gas-works is entirely insufficient to meet the demands that are made for light. They have been forced to the utmost for nearly three years, every appliance for making and purifying gas having been worked to its extremest capacity, not leaving a single retort in reserve to meet accident. An entire overhauling of the works and the placing therein of an additional number of retorts has been contracted for. It is not intended to do more in this line than will be needful to meet our wants for the next three or four years, in the hope that the electric light may be introduced and utilized in this Home.

NEW BUILDINGS.

The new building for the subsistence department is nearly completed and will soon be ready for occupation. The new laundry building is going up as rapidly as possible, the foundations being already laid, and a large part of the superstructure already up and inclosed. We regard this work as one of very great importance, and believe that it will be productive of the best results in securing to our men the entire control of their own underclothing, which it has not been possible thus far to do for want of the needful facilities. Ground has not yet been broken for the new machine-shops, adjoining the laundry, all our men being employed in connection with the water-works and other imperious demands for present labor, to which reference will be made hereafter.

The report of Chaplain Earnshaw gives a general idea of the religious instruction and services of himself as well as of Dr. Kemper, the Catholic priest, and the Ladies' Christian Association of Dayton. Religious services are also held at 6 o'clock on Sunday evening during the summer months, upon the campus, by the Young Men's Christian Association of Dayton. Two hundred and nine funerals were attended by Chaplain Earnshaw, and 42 by the Catholic priest. The condition of both the Thomas Library and the Putnam Library is very satisfactory. Taken in connection with the large reading-room, which is amply furnished with the daily papers, no community is better supplied with reading matter of every kind than our own. The school term of Miss Eaton closed on the 20th instant. Her duties have been performed in a most faithful, painstaking, and satisfactory manner, but, as the inmates age very rapidly, it is simply a question of time as to the discontinuance of the school in its present form (D).

A glance at the report of Mrs. E. L. Miller, matron in charge of linen-room, &c., marked E, is sufficient to show the absolute necessity for increased facilities in doing the vast amount of work connected with her department. The new laundry building is rapidly approaching completion; so soon as it can be occupied an entire change in the laundry system will be inaugurated, which will add much to the comfort and contentment of the inmates.

The report of the postmaster, marked F, shows the large amount of postal matter passing through this post-office at the Central Branch. With the facilities we now enjoy for dispatching and receiving our mails by railroad, there is no reason why we should be forced to perform the mail service for this office by wagon. Of late we have endeavored, by notices to correspondents and by printed letter-heads, envelopes, &c., to have mail matter directed to "National Military Home, Montgomery County, Ohio," our own proper post-office address, instead of "Soldiers' Home, near Dayton, Ohio." By this means the delay at Dayton of twelve to twenty-four hours will be avoided and much fault-finding saved. In this connection it may be proper to say that while the postmaster at Dayton is doing his best in urging these changes we find a steady resistance on the part of the telegraph lines to afford us relief from unjust charges. In the Home we have our own instruments, pay our own operator, and give all the profits to the telegraph company, yet on the immense number of "paid messages" received at the Home we are charged 25 cents each as delivery from Dayton.

FARM AND GARDEN.

The products of farm and garden cannot well be separated, and are therefore tabulated by the secretary and inclosed herewith, marked G. The inventory of the farm shows the following number of dairy stock kept on the Home farm and working animals for all purposes: Of fine short-horn cows, 20; short-horn heifers (not in milk), 16; common milch cows, 43; common heifers, 7; bull-calf, 1; Jersey cows, 8; bulls, 1; stock sheep, 52; mutton sheep (on hand to-day) 85; hogs, 72; pigs, 73; chickens (old and young), 179; horses (working), 8; mules, 37; 1 yoke steers. All of these mules are valuable animals for Home purposes, with the exception of two or three old ones, used on lawn mowers and at light work. Several of the mule teams are worth from $300 to $400. The drought of last year, which extended over such a wide area in these States, affected, to some extent, our returns from crops, while the exceptional character of the present season thus far has affected our early vegetables, sales of flowers, &c., but has given us increased grass and soiling crops much needed, while beef and mutton remain at their present high prices. Our dairy animals are showing up finely, and make us fair returns. Our working animals are in excellent condition and doing a vast amount of work connected with the Home. The management of the farm and stables by the present superintendent has been most satisfactory.

SHOPS, MECHANICAL TRADES, ETC.

The secretary's report of shops and their products, marked H, gives 15 shops and 338 men employed, at a cost of $97,751.02, returning a value of $109,411.17. Within the last three months the manufacture of cigars has been closed out, as it had ceased to be profitable, and the men there employed were required to meet the increased demands upon

the knitting-shop. With the introduction of the new system of manufacturing our own clothing, it became necessary to obtain larger accommodations for the tailor-shop; an old cheap wooden building in the edge of the woods was repaired and arranged to meet these increased demands upon the clothing department, and possession was taken by the tailors about January 8, 1882. We are now running about three machines and employing 53 men. Thus far only pants, blouses, and vests have been made for issue to beneficiaries. These articles have given the very best satisfaction to the men, and the few sacks which have been manufactured according to the new pattern for pensioners and laborers are exceedingly popular among all classes of the inmates of this Branch; all these articles are made of the very best material, such as I have never before seen delivered under contract for the Army. Of the blankets received under the last contract none have as yet been issued, as we are rapidly replacing bed-sacks by wire mattresses, on which three of the old and very much worn blankets are laid, and as many as are needed of the best already issued and ready for issue of the old pattern, allowed for covering. Should our numbers increase for the next few months as rapidly as in the past, one of the new contract blankets will, early in the winter, be allowed each bed for a covering. One of these is equal in warmth to two of the old issue.

The treasurer's report of the money value of clothing issued and sold to beneficiaries during the last year, inclosed herewith, marked I, shows the free issue to impecunious beneficiaries of $63,910.35, as against $79,702.39 last year, and sales to beneficiaries (receiving from pensions or labor over $5 per month), $1,338, as against $923.28 last year. Number of beneficiaries drawing, 3,220; average value to each, $19.85, a saving to the Home of $15,792.04 on free issues, and increasing our sales by $414.72. This saving is due largely to the system of checks that prevents beneficiaries from selling their clothing outside and recklessly destroying it while in their own possession. Further than this, as it is necessary for a beneficiary to turn over to the property sergeant his worn-out garments before they can be replaced by a new issue, the Home becomes possessed of a large quantity of rags, the greater portion of which has heretofore been lost or otherwise wasted; a report of the property sergeant shows the sales of rags turned over to him within the last year to amount to $1,942.65, besides furnishing the needful quantity for use in the steam departments, for pipe laying, and for mops, &c., as heretofore required in the Home. To this sum should be added the value of working mittens made from old clothes, and of clothing turned over to the quartermaster for reissue, the whole sum amounting to over $3,000.

PENSIONS.

The total number of pensioners at this Branch is 1,776. The treasurer reports $254,279.04 amount of pensions received; $83,744.73 amount paid to families; $71,800 held by Home, at interest; $18,756.37 retained by Home; and $1,068.34 amount of fines, &c., collected. (See treasurer's report, marked J.)

SUBSISTENCE.

The report of Major Watson, in charge of subsistence, marked K, inclosed herewith, gives 19.49, as the cost of ration for first quarter, *21.69 for* second quarter, 20.30 for third quarter, and 22.36 for fourth

arter, making the average cost of ration for the year 20.95. The ex-ordinary rise in prices for all articles of food, especially of meats, fficiently accounts for the increased cost of the ration over that of st year, which was 18.10. It is to be hoped that the abundant harvests w coming in, witht he unusual amount of green forage, will soon re-ce the cost of both the bread and meat ration.

The statement of the secretary, showing the average cost per capita, herewith inclosed, marked L. From causes referred to in the pre-ding article, the cost per capita during the present year amounts to 4.10, as against 103.24 last year. The secretary's report of contingent nd, herewith enclosed, marked M. The secretary's financial statement Home store account places our assets at $13,320.70, with liabilities mounting to $1,502.25, marked N. The statement of expenditures and ceipts of Home store fund, reported by the secretary, is inclosed, arked O.

The report of the chairman of the amusement committee inclosed, arked P, gives the number of dramatic companies giving entertain-ents at the Home, 28; free plays, 16; paid plays, 53; Home band con-rts, 41; total 138.

Statement of the number of visitors to the Home is inclosed, marked , showing an increase over last year of 7,488.

CONDUCT AND DISCIPLINE.

It gives me great pleasure to be able to report most favorably of the nduct of the inmates of this Branch for the last year, especially since eptember last, when the stand taken by the Board of Managers seemed establish the principle that this is a national, and not a partisan in-itution. The question then settled, that the National Home is not to e controlled by local politicians and for party purposes, has given to s government a stability and a character not heretofore known. The mates are quiet, well-behaved, and contented, with only such cases of isconduct as arise from habits of intemperance, mental weakness, and ss of will-power. It has been long since anything like insubordina-on or disaffection has arisen within the Home, not resulting directly om outside influence. A reorganization of the police guard, and a igher character given it by the appointment of its present efficient ead, has done much to preserve the needful order and discipline. A tatement of the number of offenses committed within the last year is nclosed, marked R. Of these offenses a very small number were from auses other than intemperance, involving as penalties only a stoppage f passes to town for a limited period or a few days of dump labor. ollowing the September meeting of the board, and for some weeks hereafter, several attempts were made by shyster lawyers and civil au-horities to bring about collisions with the officers of the Home, and exatious lawsuits were instituted to annoy them; but as these suits mounted to nothing, and the beneficiaries in whose pretended interest hey were instituted pleaded to be received back to the Home from hich they had been discharged, a needed lesson was taught to all par-ies concerned.

As will be seen from the various reports herewith inclosed, a vast amount of labor has been performed by our own men within the last ear. The increasing disabilities of our men has affected the amount of inmate labor, of which they are capable, very materially. In those kinds of labor which can be let in jobs or piece-work inmate labor is a saving, but the average cost of inmate labor, performed by the day,

is probably greater than if performed by contract. In certain lines of skilled labor (plumbing for example) it has become necessary to call in citizen labor from the outside. The new buildings for the subsistence department, for the laundry, and for the new pump houses have been largely carried forward by contract, the excavations and preparations having been already made by our own men. The large amount of excavation and filling in connected with the pipe-laying for the new system of water supply, the grading of the cemetery, and the opening of quarries has made it necessary to keep a large force of men employed whenever the changeable weather of the season would permit out-door labor. The unfinished condition of the lower lake, which affords our only reliable water supply, has made extensions and excavations a necessity. Grading and completing the avenue around the lake, turfing its borders, &c., also involved a large amount of labor. To keep our avenues, roadways, sewers, and grounds generally in order, aside from the regular work of farm, garden, &c., gives constant employment to a large number of men. From these causes, as also from the character of the season, which has prevented us from working the low grounds on the new avenue to town, we are not as far advanced with that work as was anticipated; but with the completion of pipe-laying, lake work, &c., we will soon be able to put on as large a force as can work advantageously. Owing to the heavy fill which is required through all the low grounds, and the distance from the cut which supplies material, the work must progress rather slowly at best, but will probably be all the better, as giving more time for the road-bed to settle.

The attention of the Board is again called to the insufficiency of barrack room for the inmates. Having taken possession of the old cigar-shop, and fitted it up for the reception of beds, we have to-day forty-three beds vacant, which may be filled within forty-eight hours by the return of men on pass and furlough or of men returned from hospital for duty. We have had within the last six weeks as many as forty or fifty men without beds, lying upon barrack floors. On the removal of the laundry to the new building the old can be remodled for barracks, giving about one hundred and sixty-five beds; but this will give an insufficient number of beds to meet the influx of disabled men who flock hither at the approach of winter. The increased number of beds obtained through cigar-shop and laundry will be only two hundred and eight, which will be some thirty or forty below the highest number of inmates in the Home last winter.

In this connection it may be well, also, to say that our facilities for handling over three thousand men at the great dining-hall are very imperfect. We are obliged to seat, say, 1,100 men, three times, at each meal. To do this the employés at the kitchen and dining-room must be up a large portion of the night, and the men must turn out very early in the morning in order that the third table may get through breakfast in any reasonable time for work. A building for the storage of the large amount of public property at the Home is very much needed, much of this property being now insecure and without covering. A special estimate for a store building will be forwarded for the consideration of the Board.

All of which is respectfully submitted.

M. R. PATRICK,
Governor.

A.

NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS,
MONTGOMERY COUNTY, OHIO,
Surgeon's Office, July —, 1882.

General M. R. PATRICK, *Governor:*

I have the honor to submit herewith the following report relative to the working of the hospital department of this Home for the year ending with the 30th June ultimo:

Number treated in hospital	1,149
Number treated in quarters	3,550
Number of insane treated	85
Total	4,784

In explanation of the apparent discrepancy of "men treated in quarters," in my report of 1881, and in the report of the present year, I will say that in the report of the year 1881, the estimate was based on the number of visits and prescriptions made, while the estimate in the report for the present year was made from the number of men treated, and as almost all of these men are old and feeble, and invalids from injuries or diseases contracted years ago, and some of them hypochondriacs or monomaniacs on the subject of their infirmities, and the great efficacy of drugs in such cases, they are constant attendants at "sick call," and are never happy or satisfied unless liberally supplied with medicines, and thus we show for 1881 32,950 cases, while for 1882 only 3,550 cases.

Number of deaths in hospital	251
Number of deaths on furlough	47
Total number of deaths	298

Making the proportion of deaths to the number cared for or death rate 6.22.

Permit me to call your attention to the extreme age of the patients in the hospital. No other public institution in the civilized world, except only a very few that are organized especially for the care and protection of aged people, presents so great a number of valitudinarians with such extreme age; as an illustration take the inmates of wards 1, 2, 3, and 4, about one-third have passed that good old age "three score and ten." Two years ago we lost Benjamin F. La Roy at the great age of one hundred years, and only last winter we lost by death Robert Warnick, who, by well authenticated evidence, had reached the remarkable age of one hundred and three years, showing the mean age of our inmates to be over sixty years. Four have reached almost the 100; fourteen are over 80; thirty-four are over 70.

During the past winter our Home has escaped most of the suffering, terrors, and excitement necessarily attending the terrible pest, small-pox, which has so long and seriously afflicted many of the cities and villages of this locality.

It has been feared by many medical men that from the peculiar habit and inclination of a large class of the inmates of the National Homes to wander over the country without a thought of the dangers of contagion, these institutions would be greatly subjected to all forms of contagious diseases, but time has proved the fallacy of this opinion, and although inmates were constantly coming in during the pest, only one suspicious case developed itself in the Home, and that, by the prompt and intelligent orders of our governor, General M. R. Patrick, was at once isolated, and not a case resulted therefrom.

Having in my first annual report fully explained the great want experienced at that time for more and better buildings and facilities for the proper care and treatment of the insane inmates, and more now, even, than when that report was made, I can only further urge the importance to this class of patients of more and better accommodations and facilities for their proper care and treatment. Almost every week we are receiving one or more of these unfortunate people, whose friends, having an ignorant horror for the very name of lunatic asylum, will use every means to obtain admission to this Home, where the facilities are almost *nil*, rather than send their patients to a well-regulated asylum, where their comforts and treatment are a hundred fold superior to what they can possibly have here with our meager facilities. At this time we have ten or fifteen delirious or violent patients, who, for safety to themselves and others, and for proper treatment, should have special and appropriate quarters and isolation. All these men we are compelled to shut up in six small, illy-ventilated rooms, or else keep them in the ordinary sick-wards, where they are a source of constant trouble to the sick inmates as well as the nurses and attendants of the wards.

In conclusion, I hope that the Board of Managers will fully consider the fact that this hospital was planned and constructed when the inmates of the Home numbered only hundreds, but since that time a constantly increasing number of wounded and suffering, but brave and *noble men, who "rallied* at their country's call," have sought and are *now receiving the benefits and comforts* of its sheltering walls, until its in-

mates are numbered by the thousands, and for the future proper care and treatment of this increased number of gallant men, I beg the Board of Managers will generously heed my respectful call for more room and improved facilities.

A. H. STEPHENS, *Surgeon.*

B.

NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS,
Central Branch, June 30, 1882.

General M. R. PATRICK, *Governor:*

In compliance with your order of date June 1, 1882, I have the honor to submit the following report of the permanent work and improvements made in the engineer department of this Home during the fiscal year ending June 30, 1882.

About June 1, 1881, I assumed charge of the engineer department of this Home, under your direction and management as governor, and I found many changes and improvements necessary to be made for the comfort and safety of those quartered at the Home, and, with your approval and support, much has been accomplished for the betterment of the department, leaving a great deal yet to be done before matters get into smooth working order. The first thing requiring attention immediately was the steam boilers doing service on the Home grounds. On examination I found some of them in a dangerous condition, and others so far gone that repairs must be made at once or serious results were likely to follow, all of which was largely due to the heavy incrustation of lime and other impurities within the boilers, which had manifested itself in cracks, blisters, and laminated places on the shell, requiring new sheets and patches on most of the boilers, and in some cases the removal of tubes for the more thorough cleaning of the same, and to facilitate repairs. Many of the boilers were very much out of level, owing to the tumble-down condition of the furnace walls and insecure support of the boilers. All the valves were in a leaky condition, and all pipe connections badly corroded, making it necessary, after renovating and repairing the boilers, to rebuild the furnaces and repipe the same throughout, using new and improved valves in all connections, all of which was accomplished in ample time for use before cold weather set in. The steam boilers of the Home are now in excellent condition, and, with the exception of a rusted-out breeching at the central boiler-house, which will have to be remedied, no expense of consequence will have to be incurred on them this season.

The next matter requiring attention was the care of and utilization of the sewerage, for which an appropriation had been made some time before and plans approved for its consummation. This work has been accomplished by the construction of a large receiving cistern with pump-house attached, in which has been placed a double-acting plunger-pump, having an easy capacity of delivering a half million gallons in twenty-four hours, taking steam to operate the pumping engine from the hospital boiler-house. From the pump leading out on the farm there has been put down below the frost line 5,124 feet of 6-inch cast-iron pipe, from which there has been put down as laterals 2,136 feet of 4-inch cast-iron pipes with 12 4-inch uprights, so situated as to distribute the sewerage over a large area of tillable land for irrigating and fertilizing purposes.

The average sewerage pumped each twenty-four hours amounts to 130,000 gallons, with a tendency to a material increase, rather than a diminution, which necessitates the extension contemplated to get rid of the nuisance.

During the very dry season of last summer and fall much difficulty was experienced in furnishing a supply of water for the general use of the Home, owing to the inadequacy of the pumping engines in use and the contracted size of the pipes leading from the pumps up to the distributing system of pipes in the populated portion of the grounds, and feeling assured that the time was near at hand when enlarged pumping engines and pipes must be put in, I recommended and you approved of the laying of larger pipes through the lake during the low water, which was done at comparatively small expense with what the same work would cost now with the lake full of water and the necessity for their use so near at hand. Since the appropriation was made for an increased water supply for the Home there has been placed in the ground 324 feet of 12-inch, 276 feet of 10-inch, 1,680 feet of 8-inch, 3,300 feet of 6-inch, and 1,800 feet of 4-inch cast-iron pipe, together with 345 feet of old 4-inch and 545 feet of old 3-inch cast-iron pipe which had formerly been used in the old distribution, with all necessary fittings, valves, fire-hydrants and service cocks, from which latter nearly all service pipes 1½-inch in diameter have been extended into all main buildings, from which a supply of water will be obtained for general use as *well as* for stand-pipe connections for fire purposes. The contracts have been awarded *for pump*-house and stack, pumping-engines, boilers, and stand-pipe, with every as-

it the new works for an increased water supply will be completed and in is fall. The completion of the stand-pipe may be delayed later, but I have ise from the contractors that it will be pushed to completion before cold it is possible to do so.

works are in a very precarious condition, but, as you are aware, and with val, steps are being taken which will not only put the works in good dd materially to their productive capacity, as well as improve the quality

It is contemplated, when the gas-works are remodeled, to be able to tell ction of what each 1,000 cubic feet of gas costs, and so arranged as not to ercy of coal dealers any longer as to the quality of coal they are pleased to

e time is not far distant when the Home grounds and buildings will be with the electric light, and all heating and cooking on the grounds will th gas, which, after the plant is provided, can be done much more satis- t less cost, and vastly less expense for maintenance.

ne fiscal year just closed there has been expended in the engineer depart- aterial, supplies, and labor on the permanent improvements of the Home ng, to wit:

lers.—For the gene al repair of all steam boilers on the Home grounds, and ing of all furnace walls, two new iron boiler fronts and the repair of others; g of all boilers, including new valves and fittings, cost in the aggregate $4,208.88.

—There has been expended for the collection of sewerage from the slaughter- from sundry other points on the grounds, together with making repairs neral care and maintenance of the system, the sum of $1,129.82; also for tion of the sewerage there have been expended for large steam-pump with , together with all cast-iron pipe, fittings, valves, and other material in with said sewerage system, including labor on same, the sum of $5,465.24.

rks.—There has been expended on account of water supply, in repairs to valves entering into the distribution of water, the sum of $229.55. On the new water supply there has been expended to date, for cast-iron pipe lves, fire-hydrants, and other material entering into the laying of pipe, in- or on rolls of engineer department, the sum of $8,761.25.

ere has been expended during the past year on account of repairs to gas ing in additional lamp-posts, the extension of gas-mains and service-pipes, th the general repair of lamps, and labor of maintenance and gas making, $2,364.68.

house.—It has cost to extend a 3-inch water main to the slaughter-house, sary branches for the domestic as well as for fire purposes, including 250 ich 4-ply fire hose, together with all material, connections, and labor, the).37.

ind wards.—There has been expended in the renewal of main steam pipe e tunnel, the enlargement of the supply pipes within the main building, g in of a large hot-water boiler (to replace a leaky one), the putting in of water pipes at insane ward, and the general repair and maintenance of r, and gas service for the past fiscal year, the sum of $1,212.23.

Hall.—It has cost to fit up Memorial Hall with steam-heating apparatus, ll appurtenances thereunto belonging, together with the water supply for well as for fire purposes, including all necessary fire-hose and connections he sum of $1,783.05.

restaurant.—There has been expended on the hotel for extension of steam new rooms, including pipes, valves, &c.; also for two bath-tubs, changing osets and urinals, with additional water supply and drainage from the her with the extension of gas-pipes with gas-fixtures, globes, and all neces- enances with labor added, the sum of $528.36.

—For steam, water, and gas repairs, including all pipes, valves, fittings, ces; also plumber's work in the case of closets, urinals, and sinks, together s of locks, new keys, and other general work in and about the barracks, een expended the sum of $1,518.53.

ll and kitchen.—There has been expended during the year for new hot- r and all connections, new steam and return connections to meat-kettles, th the general repairs to steam heating, steam cooking, plumbing, gas supply, the sum of $496.43.

sidences and quarters.—There has been expended on new work and repairs past year, for steam heating, water supply, gas service, plumbing and vork, including all material used and labor for maintenance, the sum of

—Repairs to steam engine and shafting, including general machinery and gether with steam, water, and gas repairs, embracing all labor and material uring the past year, the *sum of* $143.82.

Conservatory and green-house.—There has been expended for material and repairs in refitting furnaces at green-house, grates and iron work, also for plumbing at conservatory and locksmith work, including hose for use in watering lawns, flowers, &c., the sum of $202.25.

Farm.—During the year there has been steam heating put in at south dairy; also an extension of water pipe at stable and for the care of animals in winter quarters, with repairs to steam heating, gas service, and farm implements, there has been expended the sum of $198.03.

Bath-house.—The repairs to water pipes, gas service, and plumbing work at the bath-house, has cost during the year the sum of $33.56.

Shops.—There has been expended during the past year for steam heating, and the introduction of gas into the new tailor-shop, which, together with the general repairs incident to steam heating, water supply, gas service, and plumbing in the several shops of the Home, for material and labor, the sum of $675.83.

Steam fire department.—There has been purchased for use of the fire department during the year 600 feet of new hose at a cost of $510. The repairs to fixtures in engine house and repairing bursted hose, has incurred an additional expense of $20.92, making in all $538.92.

Steam main.—During the past winter there has been sundry breaks in the steam main and return pipes, largely owing to the expansion and contraction incident to under-ground steam heating, and partly owing to the corroded condition of the pipes, which has occasioned an expenditure for repairs the sum of $373.09.

Church.—There has been expended for repairs on steam-heating apparatus in the church, also on water supply and gas service, including all material and labor, together with the repair and care of church clock, the sum of $47.84.

New commissary building.—The introduction of water and gas into this building has involved an expenditure up to the present time of $176.03.

Post-office.—The placing of an additional radiator in the post-office, together with additional gas lights and ordinary repairs, has cost the sum of $18.62

Home avenue railroad.—On changing the terminus of the Home Avenue Railroad on the grounds, made it necessary to put in a new service pipe and arrangements for supplying their engines with water, which was consummated at a cost of $3.92.

Construction and repair.—There has been a small amount of material furnished and work done not chargeable to any of the above accounts, such as the repair of locks and keys for outside places, the putting up of railing around area at restaurant, the repair of underground leader-pipes to cisterns, the expense of pumping out cess-pools and sewerage cisterns, the supply of oil for general uses, all of which amounts to the sum of $274.50.

In conclusion I would report that the efficiency of this department is very much impaired for the want of a competent plumber to look after and do this class of work, but in all other branches I have had but little trouble in securing the services of inmates possessing the requisite skill to fill the several positions, and to no one am I under greater obligations for faithful, and efficient service, than to Mr. Thomas Hinton, who has not only been prompt to respond to every request, but from his long connection with the engineer department, coupled with his varied mechanical skill, makes him a valuable assistant.

Respectfully submitted.

J. K. RUGG,
Chief Engineer.

C.

[Hartford Steam Boiler Inspection and Insurance Company, of Hartford, Conn. Organized in 1866. J. M. Allen, president; W. B. Franklin, vice-president; J. B. Pierce, secretary.]

AGENCY AT CHICAGO,
May 18, 1881.

DEAR SIR: The Hartford Steam Boiler Inspection and Insurance Company make the following report of the condition of your steam boilers (No. 16) at the Soldiers' Home, situate in Dayton, Ohio, inspected on the 10th day of May, 1881, viz. by Inspector Aid Collins: There are six boilers in central boiler-house, known as east and west batteries. The east battery, or section, are as follows: No. 1 has one burned sheet over fire; No. 2 presents externally a good appearance; No. 3, "tubular," has one plate badly burned and giving down, also tubes leaking in rear head. These defects are caused by an accumulation of incrustation and scale. Should advise that the tubes be taken out, also the burnt sheet repaired; the tubes cleaned and replaced, leaving out four tubes on each side. These tubes are too close to shell. *Unless these* suggestions are carried out, it will be only a question of time when

ıre extended repairs on this boiler would be compulsory. The west battery (Nos. 1, 2, d 3) each have burned plates (slight) over fire, caused by an accumulation of scale. ıe burns are not dangerous, and will not affect the safety of the boiler if properly red for in the way of scaling and the removal of all incrustation. The boilers and connections have been sadly neglected, and everything about them has had no pecial care with a view to safety or economy. The furnace walls are in a tumble- wn and dangerous condition. The boilers are heavily incrustated. All the stop- lves are leaking, so it is impossible for a man to get into the boilers to clean or ke care of them. The try-cocks are all out of order, none of them in working con- tion, they depending upon glass gauges exclusively. The center of fire-fronts Nos. and 2, also pedestals under rear end same boiler, want removing on account of be- g burned and warped out of shape.

LAUNDRY BOILERS—TWO HORIZONTAL TUBULAR.

Aside from incrustation and scale, these boilers are in a very fair condition. The rnace walls are badly out of shape. They want rebuilding. In reference to their tings and connections, they are dangerous—of the worst kind.

STOP-VALVES BETWEEN BOILERS AND SAFETY-VALVES.

These must be changed. Would call attention to the water-tanks over these boil- s. Find that at times the tanks overflow, which keeps the brick-work wet, which ill certainly cause external corrosion and ruin the top of the boilers. This evil ould be obviated.

PUMP-HOUSE—ONE FIRE-BOX AND ONE "ROOT."

The fire-box boiler (horizontal) is in very fair condition; rather above the average ı the grounds. Still there is some incrustation and scale, and slight corrosion at and-hole in rear head.

GAS-HOUSE.

This boiler is of the upright tubular type. It is leaking badly in lower tube or own sheet. It would be advisable to remove the tubes and have it thoroughly leaned. It would be advisable to have four hand-holes cut opposite the lower tube ıeet, so as to remove any accumulation of scale or deposit in the future. This boiler hould be placed so as to admit of room to get at openings for cleaning.

HOSPITAL BOILER-HOUSE.

These boilers have had but little attention as regards management. Find third oint No. 1, third to fourth joints of No. 2, leaking badly; also blister on third sheet lo. 1. The boilers are heavily incrustated, and *dangerously so.* The stop-valves are ll out of order, so much so that the steam cannot be shut off for a thorough internal nspection, much less to remove the accumulation and dirt. The brick-work is badly ut of order and all require rebuilding. Gauge-cocks, none of them in working or- ler; glass gauge used exclusively. The fire-fronts are burned and sprung to such an xtent, that would recommend new fronts for these boilers (Nos. 1 and 2). Would ay thirty-pound fronts instead of the forty-eight now in use.

PORTABLE BOILER, USED FOR VARIOUS PURPOSES.

This is a small portable boiler, used about the grounds and farm for pumping water, awing wood, cutting feed, &c. Its general condition is good, and has had very fair are, and if properly cared for in the future, do not apprehend any danger in the fu- ture.

FINAL.

In conclusion, would say that all the brick-work in central boiler-house, laundry and hospital boiler-house must be rebuilt, all boilers thoroughly scaled, and all in- crustations removed; each and every boiler to be provided with three (3) gauge- cocks direct to the boilers; a refitting of the safety-valves on laundry boilers, and all stop-valves in steam pipes to be refitted so as to shut off all steam at any and all times. All these are necessary for a more successful management and a surer guar- antee of a higher per centage of safety, to say nothing of economy.

Very truly, yours,

H. D. P. BIGELOW,
Chief Inspector.

General M. R. PATRICK,
Governor Soldiers' Home, Dayton, Ohio.

[Hartford Steam Boiler Inspection and Insurance Company, of Hartford, Conn.]

AGENCY AT CHICAGO, *June* 15, 1882.

DEAR SIR: The Hartford Steam Boiler Inspection and Insurance Company make the following report of the condition of your steam boilers (sixteen), inspected from the 12th to the 25th day of May, 1882, by A. Collins, inspector, viz: These boilers were all thoroughly inspected and found in good condition, with very slight exception of No. 1 boiler at laundry and No. 3 east section central boiler-house; each of these boilers have slight leaks at tubes near head; laundry slight leak over fire-sheet, and No. 3 at central house. The boilers present a very good appearance as regards cleanliness; still they could be improved by thorough scaling. The fittings and connections, including all valves, guages, pipes, &c., are in perfect working order and stand approved. The lining of some of the furnaces will want rebuilding through the summer, so as to have them ready for work in winter. In conclusion, allow us to congratulate you on the perfect success in bringing about such good results and improvements in your steam apparatus from such dilapidated wrecks as we found you contending with one year ago.

All of which is respectfully submitted.

H. D. BIGELOW,
Chief Inspector.

General R. M. PATRICK, *Governor,*
Dayton, Ohio.

D.

NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS,
Central Branch, June 30, 1882.

General M. R. PATRICK, *Governor:*

I have the honor, in compliance with circular orders dated headquarters Central Branch, National Home for Disabled Volunteer Soldiers, June 12, 1882, to submit my report for the year beginning July 1, 1881, and ending June 30, 1882.

RELIGIOUS SERVICES.

Religious services have been regularly conducted as follows in church: Sabbath school at 9 a. m.; preaching service at 10.30 a. m.; preaching service in hospital chapel at 3 p. m.; general religious service at church at 7.30 p. m.; lecture and prayer meeting on Wednesday at 7.30 p. m. Daily visits have been made to the sick in hospital, and such religious services as were required were held.

The Ladies Christian Association, of Dayton, have held semi-monthly meetings in the Home church during the year with good success.

The Home Christian Association, comprised of members of different denominations, is in a prosperous condition, and numbers over three hundred members.

Rev. Dr. Charles Kemper, of Dayton, has regularly held services for and ministered to the Catholics of the Home during the year. All the religious services have been well attended.

Two hundred and ninety-eight veterans have died during the year.

Two hundred and nine funerals were attended by the chaplain.

Forty-two funerals were attended by the Catholic priest.

Forty-seven veterans died whilst on furlough, and were buried where they died.

LIBRARY AND READING-ROOM.

The Putnam library has now 5,314 volumes; the George H. Thomas library contains 6,901 volumes; total in both libraries, 12,215. Number of volumes issued and read during the year, 42,884; number of volumes purchased, 10: donated during the year, 425=435.

Number of daily papers received	57
Number of weekly papers received	191
Number of semi-weekly papers received	3
Number of magazines, &c., received	27
Total	278

SCHOOL.

The Home school, Miss Mary J. Eaton teacher, has had on the roll about 70 names during the year, with 36 in attendance at its conclusion. Branches taught—reading, spelling, history, arithmetic, algebra, penmanship, book-keeping, and wood carving.

Respectfully submitted.

WM. ERNSHAW,
Chaplain, Librarian, and Superintendent of School.

E.

NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS,
Central Branch, June 30, 1882.

AL: In compliance with circular orders, dated Headquarters Central Branch, Home for Disabled Volunteer Soldiers, June 12, 1882, I have the honor to he following report of the operations of the laundry and linen-room under rvision for the year ending June 30, 1882:

LIBRARY AND READING-ROOM.

he librarian, George W. Barber, submits the following report of the ıry and reading-room for the fiscal year ending June 30, 1882:

mes added to the library	109
mes in library, including hospital	4,101
mes issued for reading *	6,700
mes bound and rebound	324
y papers on file	26
kly papers on file	107
thlies and periodicals on file	29
l number of papers and periodicals	162

he papers and periodicals are in the English, German, French, and ndinavian languages.

'uring the year a new catalogue of upward of 150 pages was com- d by the librarian and his assistants and printed and bound in the ne printing office.

POST-OFFICE.

he postmaster, George W. Barber, submits the following report of the iness transactions of the National Home post-office for the fiscal r ending June 30, 1882:

ers mailed, by count	13,281	Letters registered	235
le postages represented above.	15,317	Registered letters received	129
ers received, estimated	14,500	Money-orders issued	191
al cards mailed, by count	3,172	Amount of money transmitted	$2,046 63
al cards received, estimated	3,000	Money-orders paid	41
spapers mailed, estimated	4,500	Amount paid on money-orders	$588 81
spapers received, by count	25,500		

)n June 1 the post-office was removed to a room especially designed it in the Ward Memorial Building, which room has been fitted up in elegant and commodious manner, greatly facilitating the transaction)ost-office business.

RELIGIOUS INSTRUCTION.

'he Protestant Episcopal chaplain, Rev. C. L. Mallory, reports as OWS:

have the honor to report that since entering upon my duties as chaplain on the ı of June, 1881, regular services have been rendered each Sunday morning in the pel of the home. On the second Sunday in each month and on the principal holy s, the Holy Communion has been celebrated. For a part of the year I held serv- also on Thursday evenings. I have officiated at thirty-seven funerals of inmates, have buried two children of families residing on the grounds of the Home. For ıt of the year I have been able to pay weekly visits to the hospital, usually on ırsday or Friday. I have baptized one inmate. There has been an encouraging rease in the attendance upon the services, and a marked improvement in the sic, both at Sunday services and at funerals.

Report of the Roman Catholic chaplain, Rev. Ferd. L. Weinman, S. J.:

Following in the footsteps of my esteemed predecessor, now deceased, I have endeav- ıl to the best of my ability to advance the good work so auspiciously begun. have visited the Home regularly at the appointed times with the most encourag- ; results.

have conferred individually with all who came under my charge, and I am pleased know that my efforts have not been in vain.

* By a clerical error in my report for quarter ending December 31, 1881, 661 volumes ly were given as issued for reading, when 1,650 should have been given, making a al for the year, 6,700.

GEO. W. BARBER, Librarian.

I conducted two services weekly in the main building after first visiting all the patients in the different wards of the hospital.

I have performed twenty-seven funeral services, and have administered the Sacrament of Pennance and the Holy Eucharist over three thousand times.

I am exceedingly pleased that the chapel is now exclusively devoted to religious service, and that at an early date, under the direction of our energetic governor and his esteemed lady, it will be appropriately furnished and decorated.

PENSIONS.

Number of beneficiaries who have received pensions during the year, 474, against 470 during the year ending June 30, 1881. The total amount of pensions received during the year, and the disposition made thereof, is shown in the following tabular statement:

Pension to credit of beneficiaries July 1, 1881		$8,030 14	Retained by the Home for:		
Pension money received during the year	$62,698 77		Abstract A, subsistence	$600 19	
Interest received on pension money during the year	250 96		Abstract C, stable	12 37

Total net expenditures							125,072 04	

I certify that the above tabular statement is a correct abstract from the books in my office.

T. C. MOORE, *Secretary.*

COST PER CAPITA FOR THE YEAR ENDING JUNE 30, 1882.

Value of subsistence on hand, June 30, 1881	$1,480 94	
Value of fuel on hand, June 30, 1881	501 74	
Gross expenditures in all departments of the Home during the year ending June 30, 1882	168,057 37	
Total		$170,040 05
Deduct credits for sales, &c., shown in the above table	$42,985 33	
Deduct value of subsistence stores on hand, June 30, 1882	2,298 82	
Deduct value of fuel on hand, June 30, 1882	393 75	
Deduct construction and repairs account	19,581 02	
Deduct cost of transporting beneficiaries to Home before admission	272 29	
Deduct cost of transporting insane inmates	37 75	
Deduct cost of boarding insane beneficiaries	3,607 89	
Deduct cost of manufacturing drawers	1,907 18	
		71,084 03
Net current expenditures in running the Home during the year		98,956 02

Divide 98,956.02 by 729, the average number of beneficiaries actually present, and the result is $135.74.

The average value of clothing issued to each man during the year was $25.06, making the total average cost of keeping and clothing each man $160.80 per year.

COST OF DAILY RATION.

The average cost of the daily ration—including value of all subsistence stores produced by and received from the Home farm and Home stable, the cost of transportation to the Home, the cost of fuel consumed *in bakery*, and the pay-roll of all persons employed in the subsistence

partment—during the year ending June 30, 1882, was $15.13 per ndred, as shown by the following exhibit:

st of subsistence on hand June 30, 1881		$1,480 94
st of subsistence purchased for cash		31,903 41
nount of pay-rolls of employés in bakery and subsistence department		1,408 86
lue of subsistence received from Home farm		3,523 34
lue of subsistence received from Home stable		3,158 71
lue of transportation furnished by Home stable		533 25
lue of material furnished by Home printing office		6 00
lue of material furnished by Home blacksmith shop		50
st of fuel consumed in the bakery		180 00
Total cost of subsistence stores on hand June 30, 1881, and received during the year ending June 30, 1882		48,195 01
lue of subsistence stores sold for cash	$4,440 08	
lue of subsistence stores sold to Home	1,002 41	
lue of subsistence stores issued to beneficiaries, including cost of labor, &c	40,453 70	
lue of subsistence stores on hand June 30, 1882	2,298 82	
Total value of subsistence stores issued and sold during the year and remaining on hand June 30, 1882		48,195 01

The average daily number of beneficiaries subsisted, including men temporarily at st, was 732.26, making the whole number of rations issued, 267,274.
Divide 40,453.70, the cost of subsistence, by 267,274, the number of rations issued, d we have $15.13.

The cost of the ration in 1870 was $23.62; in 1871, $21.27; in 1872, 22.33; in 1873, $22.91; in 1874, $21.69; in 1875, $21.61; in 1876, thir-en months, $19.28; in 1877, $19.19; in 1878, $17.35; in the six months ding June 30, 1879, $14.60; in the fiscal year ending June 30, 1880, 14.31; and in the fiscal year ending June 30, 1881, $14.77 per hundred.

BILL OF FARE.

No permanent diet list is prescribed, either in the general kitchen or ospital, but a bill of fare, adapted as far as practicable to the season, prepared daily for the general kitchen by the governor, and the com-issary employés and cooks are required to conform to it strictly. In e hospital the bill of fare is prescribed by the surgeon.

SUBSISTENCE STORES PURCHASED.

The following tabular statement exhibits the quantity and cost of bsistence stores purchased and issued and sold during the year, and e average price paid therefor, including cost of transportation to the ome:

Articles.	Purchased during the year.		Issued and sold.		Average cost of stores purchased, including transportation.

IMPROVEMENTS.

ng the year a new building has been erected, having on its main post-office, railroad waiting-room, Home store, and restaurant; ond floor is finished and furnished for an amusement hall, and is apted to this *end*. *By direction* of the Board of Managers it is

called the "Ward Memorial Hall," in honor of Horatio Ward, of Virginia, who at his death left $100,000 dollars to the Homes to be used for the benefit of the inmates. The cost of the building was $22,000.

A second story has been added to the corridors connecting the wings with the central building and kitchen of the hospital; this is a much needed improvement as it lightens the labor consequent upon waiting on so many invalids. The cost was $2,350.

STABLE.

The following is a detailed statement of the sale of stable products during the fiscal year ending June 30, 1872:

Articles sold.	Quantity.	Sold for cash, value.	Sold to Home, value.	Total.
Boars	4	$57 50	.....	$57 50

I certify that the above tabular statement is a correct abstract from the books in my office.

T. C. MOORE,
Secretary.

GREENHOUSE.

The greenhouse has been in successful operation during the year, adding greatly to the attractions of the grounds, contributing to the enjoyment of beneficiaries, officers, and visitors, and supplying all plants required for the flower garden and borders at trifling cost.

SOCIETIES.

A post of the Grand Army of the Republic, known as Veteran Post No. 8, has been maintained at this Branch during the year by beneficiaries of the Home, a suitable room having been set apart by order of the governor for its meetings and for the use of its members. A Sunday school society has also been successfully conducted by beneficiaries and their families and friends.

AMUSEMENT AND RECREATION.

The usual methods of providing amusement and recreation for beneficiaries, fully set forth in previous reports, have been continued as far as practicable during the year.

DISCIPLINE.

The following tabular statement exhibits the number and nature of offenses committed against the discipline of the Home during the year ending June 30, 1882, and the amount of penalties imposed, to wit:

Nature of offenses.	No.
Drunk	487
Under influence of liquor	312

Bringing liquor into the Home	9
Absence without leave	1,104
Assault and fighting in quarters	22
Violation of other rules	169
Other misdemeanors	23
Whole number of offenses	2,125
Total amount of fines imposed	$1,453 60
Total number of days' labor imposed as penalties	18,036
Total number of days' confinement in guard-house	1,398
Amount of fines remitted during the year	$98 50

364½ days' labor and 5 days confinement.

The whole number of beneficiaries in the Home during the year was 1,343, of which 540, or 40 per cent., committed 2,125 offenses; and 803, or 60 per cent., have committed no offenses.

Dishonorable discharges.

SANITARY REGULATIONS.

General orders of this Branch No. 19, dated May 18, 1875, requires all beneficiaries of the Home to bathe not less frequently than once a week, and the company sergeants, charged with the execution of this order, submit the following reports:

Report of Sergeant Joseph Horle, Company A:

The provisions of General Orders, No. 19, dated May 18, 1875, requiring men to take a bath once a week, has been strictly enforced during the last fiscal year, with beneficial results to the health of the inmates of the Home and the sanitary condition of the building.

Report of Sergeant Henry Topping, Company B:

I have the honor to report that General Orders, No. 19, has been strictly complied with during the last year, with results beneficial to the health, cleanliness, and comfort of the men.

Report of Sergeant Charles Lidle, Company C:

I have the honor to report that General Orders, No. 19, dated May 18, 1875, has been *strictly* enforced, with general satisfaction.

eport of Sergeant James B. Kennedy, Company D:

have the honor to state that General Orders, No. 19, has been strictly complied
1 during the past year, with results beneficial to the health, cleanliness, and com-
of the men.

eport of Sergeant George Fiedler, band:

have the honor to report that General Orders, No. 19, dated May 18, 1875, relating
athing once a week, has been strictly observed in the band during the past year,
1 results beneficial to health, cleanliness, and comfort of its members.

he Surgeon reports:

he rules of the hospital require each patient to bathe once a week, except the very
l and those confined to their beds, who have a sponge bath administered by the
ses of their respective wards as often as advised by the surgeon.

VISITORS TO THE HOME.

During the year a large number of persons, representing every part
this country and many foreign nations, have registered at the office
l been shown through the buildings, expressing admiration of the
anliness and order which they have observed.

I am, very respectfully, your obedient servant,

JACOB SHARPE,
Governor and Treasurer.

General MARTIN T. McMAHON,
Secretary Board of Managers, National Home for Disabled Volunteer Soldiers.

J. SHARPE,
Governor.

ANNUAL REPORT OF EASTERN BRANCH FOR YEAR ENDING JUNE 30, 1882.

TOGUS, ME., *August* 29, 1882.

GENERAL: There is little to add to the foregoing statistical reports. Everything is going on satisfactorily in the Home. The most noteworthy fact is the increase in the number of the beneficiaries of the Home. During the year ending June 30, 1880, our numbers fell off 6 per centum, and about the same in 1881, but this year there has been an increase of 18 per cent. While this may be partially accounted for by the fact that the Central Home is full, yet it mainly arises from natural causes. Many good men who have heretofore been able to earn partial support have now been forced to succumb to wounds or disease incurred during their army service, and avail themselves of the privileges of the Home. It seems very probable that the number of old soldiers seeking entrance at our gates during the ensuing fiscal year will fully equal that of this year.

Our present facilities are taxed to the utmost to accommodate them.

Respectfully,

W. S. TILTON,
Governor.

General M. T. MCMAHON, *Secretary*,
No. 73 Nassau Street, New York City.

Addenda to Annual Report of Eastern Branch for year ending June 30, 1882.

7.

They come from the following-named States:

Maine	240	Delaware	2
New Hampshire	136	Maryland	7
Vermont	29	Ohio	12
Massachusetts	600	Indiana	5
Rhode Island	80	Illinois	10
Connecticut	60	Iowa	2
New York	300	Minnesota	2
New Jersey	15	Kentucky	4
Pennsylvania	30	California	2

11.

Their trades or occupations are as follows:

Barbers	9	Machinists	28
Bakers	22	Masons	36
Blacksmiths	14	Molders	17
Butchers	16	Musicians	23
Carpenters	56	Mill operatives	32
Clerks	42	Painters	46
Cigar-makers	17	Physician	1
Curriers	15	Printers	15
Dentists	2	Seamen	25
Druggists	2	Shoemakers	94
Engineers	11	Stone-cutters	13
Harness-makers	23	Tailors	27
Hostlers	19	Telegrah operative	1
Jewelers	16	Tinsmiths	14
Farmers	91	Upholsterers	5
Laborers	763	Plumbers	10
Lawyer	1	Weavers	30

Of the whole number cared for 611 were born in the United States and 925 were foreign born. Nativity of the latter:

Bavaria	1	Norway	1
Bohemia	1	Nova Scotia	5
Canada	26	Saxony	1
Cuba	1	Sandwich Islands	1
England	68	Switzerland	2
France	8	Scotland	21
Germany	99	Ireland	679
Italy	2	United States	611
Mexico	1	Wales	8

23.

Religious services are held as follows: Sabbath-school at 2.30 p. m. Services are held every Sunday afternoon in Amusement Hall, at 3.30 p. m., by Rev. Samuel Upjohn.

Catholic services are conducted by Rev. Jeremiah McCarthy once a fortnight, at 2 p. m. Saturday and 8 a. m. Sunday.

The attendance at all religious services are very large, and continually increasing, showing the deep interest taken by the men in the benefits of religion. It has also a restraining influence on their minds, bringing many to a sense of their duty, and restraining them from excesses in drink, to which they are strongly tempted on account of the many low groggeries surrounding the Home.

SOCIETIES.

We have three—two temperance organizations and a post of the Grand Army.

Table exhibiting the average number of beneficiaries present, absent, and sick, the total gain and loss from all causes, the number present on November 30 each year, and the whole number of beneficiaries cared for during each year since the establishment of the Eastern Branch, to and including June 30, 1879, six months of fiscal year, year ending June 30, 1880, July 1, 1881, to and including June 30, 1882.

W. S. TILTON,
Governor.

ANNUAL REPORT OF THE SOUTHERN BRANCH, NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS.

NEAR FORTRESS MONROE, VA., *August* 29, 1882.

GENERAL: I have the honor to submit the following report of this Branch for the fiscal year ending June 30, 1882:

Total number present June 30, 1881	706
Total number present June 30, 1882	770

There has been an increase in the number admitted and cared for compared with preceding year. This is due partly to the over-crowded condition of the Central Branch, but mainly from disabled soldiers seeking here a change of climate as well as a place of refuge. The number of those advanced in consumption and other pulmonary affections is remarkable; presumably the mild climate of this Home is preferred by patients and their friends. In view of the increased numbers of those suffering from incurable diseases, we have reason for gratitude in our relatively low death-rate, the infirm and ailing condition of many of our newly-admitted inmates being considered. There has been no form or semblance of epidemic disease.

The strict sanitary measures enforced, the temporary quarantining of newly-arrived inmates, and the wholesale use of vaccine virus (every officer and inmate having been vaccinated) has saved us from having during the year a single case of small-pox, although we had reason to fear that many of our inmates had been in contact with parties suffering from that disorder while en route to the Home.

The unrivaled facilities for salt-water bathing, boating, and fishing tend to preserve the health and occupy the minds of inmates.

Owing to the remodeling of our main building about four hundred of our men were transferred to tents at the beginning of summer; while this has caused some discomfort, in comparison with the regular quarters, yet the men on the whole enjoy tent life, and I do not know but it has been beneficial rather than otherwise.

Very respectfully,

P. T. WOODFIN,
Governor.

General M. T. MCMAHON,
Secretary Board of Managers, New York City.

AMUSEMENTS.

hing, boating, fishing, billiards, bowling-alley, dominoes, chess, checkers, dramatic presentations, concerts, lectures, band con- &c.

GREEN-HOUSE.

rose house, well stocked with choice roses, and 20 hot beds have added. One hundred and thirty flower beds kept and stocked 65,000 choice plants and flowers, all propagated at the Home. are 5,000 new and rare plants at present in the house.

LAUNDRY.

Ninety-nine thousand one hundred and twenty-six articles have washed, ironed, and issued, and 51,518 articles washed and issue ironed.

There is no school at this branch.

BATHING.

Each inmate is required to bathe once a week, while the commo bath-house at the wharf is open at all hours without limitation.

RELIGIOUS SERVICES.

Weekly religious services have been held by Protestant clergyn Baptist, Methodist, and Episcopal alternately. Catholic services Sabbath morning and on holy days. All services are well atte The sick in hospital are regularly visited by the chaplains of faith.

VISITORS.

There have been quite a number of visitors, but not so many former years, as, owing to building operations and the men being in tents, a large number of picnics have been recommended to other localities until improvements are completed.

IMPROVEMENTS.

There have been very great improvements during the year. T Memorial Hall has been built, giving us a dining-room, which easily 800, a commodious kitchen, a theater seating 900, which is fitte in the best manner and in style to allow of the presentation of any and a billiard-room with four tables. Commodious headquarters been erected, and expensive additions and alterations to main buil have been commenced, which, when completed, will leave nothing w ing, except additional hospital accommodations, to render this bra completely fitted for the purpose it is intended to fulfill.

New stables have also been erected at Buck Row farm.

Respectfully submitted.

P. T. WOODFIN,
Governor

Post return of Southern Branch National Home for Disabled Volunteer Soldiers, for ending June 30, 1882.

RECORD

OF

DISABLED VOLUNTEER SOLDIERS,

WHO NOW ARE, AND HAVE BEEN,

MEMBERS

OF THE

NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS,

FROM ITS COMMENCEMENT TO JUNE 30, 1881.

[Extract from the Proceedings of the Board of Managers of the National Home for Disabled Volunteer Soldiers.]

Resolved, That the Secretary prepare and have published, at the Dayton Home, a list of the inmates of the several Homes from the date of their establishment, arranged by regiments consecutively from each State, giving name of inmate, regiment, company, date of admission, length of service and rank in the army, nature of disability, amount of pension, if any, and place of birth (State or country), and date of final discharge. The list shall be published in pamphlet form, and three hundred copies shall be printed and distributed by direction of the Board of Managers.—[*Printed Minutes, page* 639.]

47TH CONGRESS, 2d Session. } HOUSE OF REPRESENTATIVES: { MIS. DOC. No. 14.

EXPENSES OF PRESIDENT GARFIELD'S ILLNESS AND DEATH.

LETTER

FROM THE

FIRST COMPTROLLER OF THE TREASURY,

TRANSMITTING

Report of the board to audit the expenses of the sickness and death of the late President Garfield.

JANUARY 3, 1883.—Referred to the Select Committee to audit expenses of the late President James A. Garfield's illness and burial, and ordered to be printed.

TREASURY DEPARTMENT,
Washington, D. C., January 2, 1883.

SIR: The board of audit constituted by the sixth section of the act of Congress approved August 5, 1882, known as the deficiency appropriation act, have the honor to acknowledge the receipt from Hon. Edward McPherson, Clerk of the House of Representatives, of a resolution adopted by that body on the 19th of December, 1882, as follows:

Resolved, That the board heretofore appointed to audit the expenses attendant upon the last sickness and death of Hon. James A. Garfield, late President of the United States, are hereby instructed to report to this House a schedule of all the claims presented to said board, the action of the board upon the same, the allowances made, and generally all their transactions in the premises.

And in answer thereto state that the schedule hereto annexed, marked A, shows all the claims presented to said board, the action of the board upon the same, and the allowances made.

The board met at the Treasury Department August 30, 1882, and issued a circular, a copy of which was transmitted to all persons known or supposed to have claims under the act referred to, and a copy of which is hereto annexed, marked B.

On the 11th day of November, 1882, the board met and proceeded to hear and examine all claims presented to that date, and adjourned from day to day until the 11th day of December following, at which time they determined all questions arising out of all claims presented and all proposed allowances for services rendered and supplies furnished, and made their award and issued their certificate signed by each member of said board, setting forth the amount awarded to each person, and on what account the services were rendered or supplies furnished, and on the 12th day of December transmitted said award and certificate to the Hon. Charles J. Folger, Secretary of the Treasury, a copy of which is hereto annexed, marked C.

Since the making of said award, the following claims, mentioned in said Schedule A, have been filed and have not been allowed, to wit:

Claim of Shoomaker & Hertzog, Washington. D. C., (by William Shoomaker, surviving partner), for wines furnished for use of the late President during his last illness $16 00

Claim of F. M. McMillan, of Milton-on-Hudson, New York, for services as engineer and expert in designing and superintending the construction of the refrigerating apparatus used at the Executive Mansion during the illness of the late President 450 00

Claim of Samuel H. Sentenne, assistant engineer Navy Department building, for extra services as machinist at the Executive Mansion in connection with the cooling apparatus used during the illness of the late President 200 00

Claim of William M. Ellis, laborer in Navy Department, for extra services rendered at the Executive Mansion and elsewhere, during the illness of the late President, independent of claimant's regular duties in the Navy Department. (No amount claimed.)

Claim of Thomas E. Lynch, late machinist in the Washington navy-yard, for extra services at the Executive Mansion in connection with the cooling apparatus used during the late President's illness 156 00

Claim of Robert Harris, assistant messenger in the Interior Department, for extra services at the Executive Mansion, and elsewhere, as driver, during the late President's illness, outsike of claimant's regular duties in the Interior Department 150 00

Claim of Edwin Hodge, laborer in Post-Office Department, for extra services at the Executive Mansion and elsewhere, as driver, during the late President's illness, outside of claimant's regular hours in Post-Office Department. 100 00

Claim of Joshua McNeal, police officer (Metropolitan police), for extra services at Executive Mansion grounds, during the illness of the late President 225 00

Claim of William Cunningham, mounted policeman (Metropolitan force), for extra services at Executive Mansion grounds during the late President's illness 165 00

Claim of Charles Kerby, mounted policeman (Metropolitan police), for extra services at Executive Mansion grounds during the late President's illness.. 165 00

Claim of William W. Perry, sergeant Metropolitan police, for extra and special duty at Executive Mansion grounds, during the late President's illness. Claim for ——— dollars.

All the claims presented and the papers relating thereto have been transmitted to the Register of the Treasury, to be filed in his office.

I have the honor to be, very respectfully,

WILLIAM LAWRENCE,
President Board of Audit.

Hon. J. WARREN KEIFER,
Speaker of the House of Representatives United States.

Schedule of claims growing out of the illness and burial of the late President James A. Garfield, presented to the board of audit constituted by section 6 of the act of Congress approved August 5, 1882, known as the deficiency appropriation act; showing the names and residence of the respective claimants, the character of their several claims, the amounts claimed by them respectively, the amounts awarded and certified for payment by the board of audit, and also the claims that have been disallowed by the board.

B.

REGULATIONS.

Claims growing out of the illness and burial of the late President James A. Garfield.

The statute relating to the claims above named is as follows:

[PUBLIC—No. 205.]

AN ACT making appropriations to supply deficiencies in the appropriations for the fiscal year ending June thirtieth, eighteen hundred and eighty-two, and for prior years, and for those certified as due by the accounting officers of the Treasury in accordance with section four of the act of June fourteenth, eighteen hundred and seventy-eight, heretofore paid from permanent appropriations, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums be, and the same are hereby, appropriated, out of any money in the Treasury not otherwise appropriated, for the objects hereinafter stated, namely:

* * * * * * *

SEC. 6. That a board of audit, consisting of the First and Second Comptrollers of the Treasury and the Treasurer of the United States, is hereby constituted, to whom shall be referred all claims and the determination of all just and reasonable allowances to be made growing out of the illness and burial of the late President James A. Garfield; that the said board shall hear, and examine, and determine all questions arising out of said claims and proposed allowances, and shall make an award in each case for services rendered, or supplies furnished, which, when received, shall be taken in full compensation of all demand whatsoever; that said board of audit shall issue a certificate, signed by each member of said board, setting forth the amount awarded to each person, and on account of what services rendered, or supplies furnished, and shall transmit said certificate to the Secretary of the Treasury, who shall cause to be paid the several persons named therein, or their legal representatives, the amount so certified; and to enable the Secretary of the Treasury to pay said awards the sum of thirty-seven thousand five hundred dollars, or so much thereof as may be necessary, is hereby appropriated; and of this amount not more than thirty-five thousand five hundred dollars in all shall be certified and paid for medical services and attendance; and in making said awards it shall be lawful for said board to make allowances to employés of the government for extra services in amounts not exceeding three months their current pay: *Provided,* That no claim shall be considered and no allowance shall be made by said board on or after January first, eighteen hundred and eighty-three: *And provided further,* That the aggregate amount of awards made by said board shall not exceed the amount hereby appropriated: *And provided further,* That no claim shall be considered under this section unless the person filing the same shall file a release under seal of all claims against the representatives of the late President growing out of said illness and burial.

Approved, August 5, 1882.

The following forms and instructions are submitted for the use of claimants under the foregoing statute:

Form of account for professional or personal services and supplies furnished.

The estate of James A. Garfield, late President of the United States, to John Smith, Dr.

[Here describe fully the services rendered, giving in detail the time occupied, the kind of service, by whose direction, authority, or employment, and all particulars necessary to a correct understanding of the claim, with the requisite facts to show its validity as a claim, and the amount which should be paid. This is a requirement of the law—not a regulation of the board of audit.

Public accounts must show a "statement of items" (Watkins *vs.* United States, 9 Wall., 764); "vouchers" must be submitted with the account or claim "to the accounting officers" (*Id.*); for "without such evidences before the accounting officers there could not be any *intelligent scrutiny of the claim,* nor any decision which would be satisfactory to the claimant or to the public" (*Id.*).]

Form of oath to be annexed to a claim.

UNITED STATES OF AMERICA,
District of Columbia, City and County of Washington, ss:

I, John Smith, being duly sworn, on oath say that I am owner of the foregoing claim against the estate of James A. Garfield, deceased, late President of the United States; that said claim is justly due to me from said estate and the legal representatives of said deceased; that no payment or payments have been made thereon, and that there are no offsets or offset or counter-claim against the same to the knowledge or belief of this affiant; that the services [supplies] therein mentioned were rendered [furnished] and the charges therefor as therein stated are reasonable and just [that the expenses as therein charged were actually incurred and paid at the dates specified, and the amounts paid, as therein stated, were the actual, reasonable, and necessary amounts therefor, and the usual amounts for similar items of expense]; that the facts stated and allegations made in the foregoing claim and statements therein are true; that the personal services [supplies furnished] for which said claim is made were rendered [furnished] by affiant at the request of ——— ———, and under the direction of ——— ——— and at ———, and were rendered necessary by the illness [or burial] of the late President James A. Garfield, and were rendered [or furnished] in consequence thereof [and the prices charged in said claim for the articles of supplies therein mentioned were the ordinary, reasonable, and usual prices for such articles]; that this affidavit made for the purpose of verifying said claim and of securing to this affiant the benefit of the provisions of section six of the act of Congress approved August 5, 1882, known as the Deficiency Appropriation Act, and for the purpose of presenting said claim to the board of audit consituted by said section as a claim against the United States, and for the purpose of releasing all claims against the representatives of the late President James A. Garfield.

——— ———.

Sworn to by said ——— ———, before me, and by him subscribed in my presence, this —— day of ———, 1882.

——— ———.
[Official signature and seal.]

When the claim is for "services rendered," the words in brackets in the foregoing form [*supplies*] and [*furnished*] may be omitted.

When the claim is for "supplies furnished," the words "*services rendered*" may be omitted.

It is well to have all claims carefully prepared, to avoid delay, which might be occasioned if corrections should be required.

When there are *no items of expense*, the clause in relation to that subject may be omitted. The clause in the foregoing form "that the personal services for which said claim is made were rendered by affiant at the request of," &c., is not requisite as to medical and surgical services.

Form of release to be annexed to the foregoing form.

UNITED STATES OF AMERICA.
District of Columbia, City and County of Washington, ss:

Whereas the sixth section of the act of Congress approved August 5, 1882, known as the Deficiency Appropriation Act, constitutes a board of audit to whom shall be referred all claims, and the determination of all just and reasonable allowances to be made, growing out of the illness and burial of the late President of the United States James A. Garfield; and whereas said section of said act authorizes said board to hear, examine, and determine all questions arising out of said claims and proposed allowances, and to make an award in each case for services rendered or supplies furnished, which, when received, shall be taken in full compensation of all demands whatsoever; and whereas the foregoing claim for ——— dollars in my favor is now by me presented to said board of audit under and by virtue of said section, and for the purpose of securing to me the benefit thereof as therein authorized, and subject to the provisions and conditions of said act, and for the purpose of accepting the award therein authorized to be made: Now, therefore, in consideration of the premises, and of the benefit to me accruing by reason thereof, I hereby release all claims against the representatives of the late President James A. Garfield, growing out of said illness and burial above mentioned.

In testimony whereof, I hereto subscribe my name and affix my seal this —— day of ———, A. D. 1882.

——— ———. [Seal of wax or wafer.]

Executed in the presence of us—

——— ———.

——— ———.

[Witnesses.]

Claims may be filed with either member of the board of audit. The board will require such evidence in support of claims as may be deemed necessary and proper.

WILLIAM LAWRENCE,
First Comptroller.
W. W. UPTON,
Second Comptroller.
JAS. GILFILLAN,
Treasurer of the United States.

TREASURY DEPARTMENT,
Washington City, August 30, 1882.

C.

o the honorable CHAS. J. FOLGER,
Secretary of the Treasury of the United States:

Whereas the sixth section of an act of the Congress of the United States, entitled An act making appropriations to supply deficiencies in the appropriations for the scal year ending June thirtieth, eighteen hundred and eighty-two, and for prior ars, and for those certified as due by the accounting officers of the Treasury in accdance with section four of the act of June fourteenth, eighteen hundred and seventyght, heretofore paid from permanent appropriations, and for other purposes," approved, August 5, 1882, provides:

"That a board of audit, consisting of the First and Second Comptrollers of the easury, and the Treasurer of the United States, is hereby constituted, to whom shall referred all claims and the determination of all just and reasonable allowances to made growing out of the illness and burial of the late President James A. Garfield; t the said board shall hear, and examine, and determine all questions arising out aid claims and proposed allowances, and shall make an award in each case for servs rendered, or supplies furnished, which, when received, shall be taken in full mpensation of all demand whatsoever; that said board of audit shall issue a certate, signed by each member of said board, setting forth the amount awarded to h person, and on account of what services rendered, or supplies furnished, and ll transmit said certificate to the Secretary of the Treasury, who shall cause to be d to the several persons named therein, or their legal representatives, the amounts rtified; and to enable the Secretary of the Treasury to pay said awards, the sum fty-seven thousand five hundred dollars, or so much thereof as may be necessary, reby appropriated; and of this amount not more than thirty-five thousand five dred dollars in all shall be certified and paid for medical services and attendance; in making said awards it shall be lawful for said board to make allowances to ployés of the government for extra services in amounts not exceeding three months heir current pay: *Provided*, That no claim shall be considered and no allowance ll be made by said board on or after January first, eighteen hundred and eighty-e: *And provided further*, That the aggregate amount of awards made by said board ll not exceed the amount hereby appropriated: *And provided further*, That no claim ll be considered under this section unless the person filing the same shall file a ree under seal of all claims against the representatives of the late President, growing of said illness and burial";

nd whereas, under and by virtue of said act, each of the several persons and claimhereinafter named referred to and filed with said board of audit named in said ion a claim for services rendered, or supplies furnished, growing out of the illand burial of the late President James A. Garfield;

nd whereas said claimants respectively did, at the time of the presentation and g of their respective claims, present and file therewith a release under seal of all ms against the representatives of the late President, growing out of said illness burial, and did present and file with their respective claims evidence in support reof;

nd whereas said board of audit did hear and examine said several claims and the dence in support thereof and relating thereto;

nd whereas said board of audit did, and now does, determine all questions arising of said claims and the proposed allowances thereon:

ow, therefore, it is hereby made known, declared, and certified that we, William wrence, the First Comptroller in the Department of the Treasury of the United tes, William W. Upton, the Second Comptroller in said Department, and James llan, the Treasurer of the United States, as the members of and constituting said ard of audit, having heard and considered said claims and the evidence in support reof and relating thereto, and having now determined all questions arising out of id claims and the proposed allowance thereof, do now hereby award and determine at there shall be, and is, allowed, to be paid to said claimants, respectively, in full

compensation of all demand whatsoever, the sums hereinafter mentioned, services rendered and supplies furnished by them respectively, which sums are mined to be a just and reasonable allowance to said claimants respectively, and sums so determined, allowed, awarded, and certified are to be paid to said respectively, or their legal representatives; and said sums are certified to the ble the Secretary of the Treasury, to be paid accordingly.

And the said board of audit does now issue this, its certificate of the matter said, signed by each member of said board, setting forth the names of said cla the amounts awarded and herein certified to be paid to them respectively, and count of what services rendered, or supplies furnished, said amounts are so a and the said board of audit does hereby award to said claimants, respectively lows:

'H CONGRESS, } HOUSE OF REPRESENTATIVES. { MIS. DOC.
2d Session. } { No. 15.

CERTAIN WORKS ON RIVERS AND HARBORS.

LETTER

FROM

HE SECRETARY OF WAR,

DRESSED TO HON. H. F. PAGE, CHAIRMAN COMMITTEE ON COMMERCE,

TRANSMITTING

Certain information relative to works on rivers and harbors.

UARY 5, 1883.—Referred to the Committee on Commerce and ordered to be printed.

WAR DEPARTMENT,
Washington City, January 4, 1883.

IR: I have the honor to inclose herewith a letter from the Chief of gineers, giving certain information relative to the river and harbor ·ks, which, I understand, was prepared in pursuance of a request le directly by you to him.

Very respectfully, your obedient servant,

ROBERT T. LINCOLN,
Secretary of War.

Ion. H. F. PAGE,
Chairman Committee on Commerce,
House of Representatives.

OFFICE OF THE CHIEF OF ENGINEERS,
UNITED STATES ARMY,
Washington, D. C., December 30, 1882.

IR: Pursuant to the request of the chairman of the Committee on ımerce of the House of Representatives to furnish that committee ı an estimate of the amount of funds which will remain unexpended he 30th of June next for rivers and harbors, the officers in charge ı called upon to submit such estimates for each of their several s. The information thus obtained will be found embodied in the ı tables submitted herewith, marked A, B, C, D, E, F, and G.

ble A gives the amounts which will probably be on hand on the June, 1883, for works or objects for the prosecution of which the s have received authority; and in the second column is given the

probable date at which certain of the balances will be exhausted. A considerable part of the above balances will be covered by contracts now existing or entered into before the 30th June next. The aggregate amount of these balances is $4,949,612.06.

Table B gives items of appropriations in river and harbor act of August 2, 1882, the authority for the expenditure of which has not been issued. How much of it will remain on hand on the 30th June next will depend upon how soon orders authorizing its expenditure are received. The aggregate of this table is $622,475.

Table C includes items of apropriations in act of August 2, 1882, for which projects for work have not been completed, and hence the prosecution of the same has not yet been authorized. How much of this aggregate amount will remain unexpended on 30th June next cannot now be stated. At present it amounts to $98,000.

Table D gives items of act of August 2, 1882, upon which work has been deferred by orders from this office to await the further action of Congress. The aggregate of this table is $97,000.

Table E gives items of act of August 2, 1882, in which the amounts are not sufficient to warrant commencement of works. These amounts will probably remain unexpended on 30th June next, unless they are increased by further appropriations at the present session of Congress. The aggregate is $11,000.

Table F gives list of works and objects on account of which the appropriations will be exhausted on or before the 30th June, 1883.

Table G gives a list of appropriations undrawn against for two years or more; the balance now in Treasury and an explanation for each. The total amount of this table is $601,257.35.

I have the honor to suggest that this report, with accompanying papers be furnished to the House Committee on Commerce for its information, in accordance with the request of its chairman above referred to.

Very respectfully, your obedient servant,

H. G. WRIGHT,
Chief of Engineers, Brig. and Bvt. Maj. Gen.

Hon. ROBERT T. LINCOLN,
Secretary of War.

A.

Improving Rock Island Rapids, Mississippi River		3,000 00	
Improving harbor at Rock Island, Ill		6,669 62	
Improving Missouri River from Sioux City, Iowa, to Fort Benton, Mont		19,534 76	Sept. 1. 1
Improving harbor at Grand Marais, Minn		10,000 00	
Improving harbor at Duluth, Minn		20,000 00	
Dredging Superior Bay, Wisconsin		22,000 00	
Constructing dam at Goose Rapids, Red River of the North, Minnesota and Dakota		25,000 00	
Improving Mississippi River above Falls of Saint Anthony		4,800 00	
Improving Falls of Saint Anthony, Minnesota		7,000 00	
Reservoirs at headwaters of Mississippi River		200,000 00	
Improving Coosa River, Georgia and Alabama		20,000 00	Sept. 30.
Improving Clinch River, Tennessee		2,000 00	Sept. 30.
Improving Cumberland River above the mouth of the Jelico, Kentucky		4,750 00	
Improving Caney Fork River Tennessee		4,000 00	
Improving Obeys River, Tennessee		5,000 00	
Improving Oostanaula and Coosawattee Rivers, Georgia		1,000 00	
Improving Ohio River:			
General improvement	$30,000		Jan. 1
Davis Island dam	54,500		Dec. 1.
		84,500 00	
Improving falls of Ohio River		49,500 00	
Harbor of refuge near Cincinnati, Ohio		16,000 00	
Improving Monongahela River, West Virginia		26,500 00	
Ice harbor at mouth of the Muskingum River, Ohio		7,000 00	
Improving Kentucky River, Kentucky—general improvement		30,000 00	Aug. 15
Improving Big Sandy River, Kentucky:			
General improvement	$85,000		May 31
Louisa and Tug Forks	2,000		Sept. 1
		87,000 00	
Improving Little Kanawha River, West Virginia		40,000 00	Sept. 1
Improving Guyandotte River, West Virginia		1,000 00	Sept. 15
Improving Tradewater River, Kentucky		3,500 00	Oct. 1
Improving harbor at Ontonagon, Mich		10,000 00	Aug. 31
Improving harbor at Marquette, Mich		7,000 00	
Harbor of refuge at Grand Marais Mich		64,000 00	Dec. 1
Improving harbor at Menomonee, Wis		10,000 00	Aug. 1
Improving harbor at Oconto, Wis		12,000 00	Nov. 1
Improving harbor at Green Bay, Wis		9,000 00	Oct. 1
Improving harbor of refuge at entrance of Sturgeon Bay Canal, Wisconsin		5,000 00	Sept. 1
Improving harbor at Kewanee, Wis		4,000 00	Aug. 1

Improving Frankford Creek, Pennsylvania	$10,000
Improving Indian River, Delaware	10,000
Ice harbor at Reedy Island, Del	25,000
Improving Meherin River, North Carolina	5,000
Improving Edisto River, South Carolina	5,000
Improving Salkahatchie River, South Carolina	5,000
Improving harbor at Key West, Fla	25,000
Improving Manatee River, Florida	12,000
Improving Caloosahatchee River, Florida	5,000
Improving Cahaba River, Alabama	20,000
Improving Tallapoosa River, Alabama	15,000
Improving South Forked Deer River, Tennessee	3,000
Dry-dock at the Des Moines Rapids Canal, Mississippi River	30,000
Ice harbor at Dubuque, Iowa	20,000
Improving Chippewa River at Yellow Banks, Wisconsin	30,000
Improving Little Tennessee River, Tennessee	5,000
Improving South Fork of Cumberland River, Kentucky	3,000
Improving mouth and harbor of Cedar River, Michigan	15,000
Improving Grass River at Massena, N. Y	3,000
Improving Sackett's Harbor, New York	7,000
Improving Skaget, Stillaquamish, Nooksack, Snohomish, and Snoqualmie Rivers, Washington Territory	20,000
Improving Chehalis River, Washington Territory	3,000
Improving Sacramento River, California: For the improvement and protection of the navigable channels of the Sacramento and Feather Rivers, $250,000, less amount allotted to the Sacramento River for snagging operations, removal of bars, &c., $40,000	210,000
Improving Old Town Creek, Mississippi	3,000
Improving Royal River, Maine	10,000
Total	622,000

C.

Projects have not yet been completed and approved for the following works, a August 2, 1882. When these projects have been prepared and have received the proval of this office, they will be submitted to the Secretary of War for his act No actual operations thereon can be commenced till the authority of the Secretar War has been received therefor.

Harbors of refuge on Lake Pepin, Wisconsin	$20,000
Improving harbor at Lynn, Mass	60,000
Improving harbor at Pensaukee, Wis	10,000
(See Annual Report of Chief of Engineers, 1882, page 270.)	
Improving Woodbury Creek, New Jersey	5,000
Improving Racoon River, New Jersey	3,000
Total	98,000

D.

Work has been deferred by the Chief of Engineers under the following appro tions (act of August 2, 1882), to await future action of Congress:

Improving Corsica Creek, Maryland $5,000
(See Annual Report of Chief of Engineers, 1882, page 130.)

Improving New River, North Carolina 5,000
Work under this small appropriation would be neither beneficial nor economical, and it is therefore held to await further appropriation.

Improving harbor at Georgetown, S. C 7,000
At present this work cannot be undertaken with any reasonable economy owing to absence of dredging plant in the vicinity. A further appropriation added to this would probably secure such plant, and the officer's recommendation that the money should not be expended at present has been concurred in.

Improving Kentucky River, Kentucky; erection of a lock and movable dam at Beattyville, at junction of Three Forks	$75,000
Not expended for want of authority to purchase site for the lock and dam.	
Improving French Broad River, North Carolina	5,000
Total	97,000

E.

The amounts appropriated are not sufficient to warrant commencement of work under the following items of appropriations (act of August 2, 1882):

Improving Maurice River, New Jersey	$3,000
Improving Mantua Creek, New Jersey	3,000
Improving Roadstead into Back Bay of Biloxi, Miss	5,000
Total	11,000

F.

List of works on account of which the appropriations will be exhausted June 30, 1883.

Improving harbor at Rockland, Me.
Improving Lubec Channel, Maine.
Improving Lamprey River, New Hampshire.
Improving harbor at Plymouth, Mass.
Improving harbor at Provincetown, Mass.
Improving harbor at Scituate, Mass.
Improving Merrimac River, Massachusetts.
Improving harbor at Wareham, Mass.
Improving Taunton River, Massachusetts.
Improving Little Narragansett Bay, Rhode Island.
Improving harbor at Newport, R. I.
Improving Block Island Harbor, Rhode Island.
Improving Connecticut River, Connecticut (below Hartford.)
Improving harbor at Bridgeport, Conn.
Improving harbor at New Haven, Conn.
Improving harbor at Milford, Conn.
Improving harbor at New London, Conn.
Improving harbor at Norwalk, Conn.
Improving harbor at Stonington, Conn.
Improving Housatonic River, Connecticut.
Improving Thames River, Connecticut.
Removing obstructions in East River, and Hell Gate, New York.
Improving Raritan River, New Jersey.
Improving South River, New Jersey.
Improving Canarsie Bay, New York.
Improving Flushing Bay, New York.
Improving Sumpawamus Inlet, New York.
Improving Newtown Creek, New York.
Improving Cheesequakes Creek, New Jersey.
Improving Elizabeth River, New Jersey.
Improving Mattawan Creek, New Jersey.
Improving Manasquan River, New Jersey.
Improving Rahway River, New Jersey.
Improving Woodbridge Creek, New Jersey.
Improving Delaware River, between Trenton, N. J., and Bridesburg, Pa.
Improving Delaware River, below Bridesburg, Pa.
Improving Rancocas River, New Jersey.
Improving Schuylkill River, Pennsylvania.
Ice harbor, at Marcus Hook, Pa.
Improving harbor at Wilmington, Del.
Improving Mispillion Creek, Delaware.

Improving Duck Creek, Delaware.
Improving Cohansey Creek, New Jersey.
Improving Ice harbor at New Castle, Del.
Improving Broad Creek, Delaware.
Improving Susquehanna River, near Havre de Grace, Md.
Improving Choptank River, Maryland.
Improving Appomattox River, Virginia.
Improving New River, Virginia and West Virginia.
Improving Great Kanawha River, West Virginia.
Improving harbor at Breton Bay, Leonardtown, Md.
Improving Staunton River, Virginia.
Improving Urbana Creek, Virginia.

G.

Balances of appropriations prior to act of August 2, 1882, remaining on the books unexpended against for two years or more, no part of which is likely to be expended during the present fiscal year.

Constructing lock and dam on Mississippi River at Meeker's Island, Minnesota (act March 3, 1873) $25,000
Estimated cost, $922,121. Funds not available, because parties holding land-grants have not made acceptable release to the United States, as required by act of March 3, 1873. Until land-grant is relinquished to United States, no appropriation will be asked for this work unless otherwise ordered by Congress. (See Report of Chief of Engineers, 1881, page 241.)

Improving Harlem River, New York (acts June 18, 1878, and March 3, 1879) 400,000
Awaiting the acquisition of right of way by commissioners of supreme court of New York for proposed canal or cut to connect Harlem and Hudson Rivers. It is understood that the commissioners are prepared to make report to the court. (Report of the Chief of Engineers, 1882, Appendix D 5, page 655.)

Improving harbor at San Francisco, Cal. (act June 23, 1874) 3,892
Balance of $50,000 for removal of Rincon Rock. The work has been completed. (Report of the Chief of Engineers, 1877, page 992.)

Improving Eagle Harbor, Michigan (acts June 18, 1878, and March 3, 1879) 3,500
(See page 2115, Report of Chief of Engineers, 1882. Balance held for application to repairs, &c., that may become necessary.)

Improving Umpqua River, Oregon (act March 3, 1871) 4,685
No further work proposed. (See Report of Chief of Engineers, 1876, page 116.) A survey was ordered by the act of March 3, 1879, between Scottsburgh and its mouth. (See Report of Chief of Engineers for 1880, page 2333.)

Breakwater and harbor of refuge between Straits of Fuca and San Francisco, Cal. (act March 3, 1879) 139,748
Work deferred until Congress shall have made a much larger appropriation with which to begin.

Improving harbor at Cambridge, Md. (act March 3, 1879) 2,500
Held in reserve for expenditure when necessity may arise therefor. (See Report of Chief of Engineers, 1882, page 133.)

Improving harbor at Belfast, Me. (act June 14, 1880) 3,000
(See Report of Chief of Engineers, 1882, page 491.) The work projected is completed, and the appropriation does not appear to be needed for the present at least.

Improving Connecticut River, between Hartford and Holyoke (act June 14, 1880) 10,000
(See Report of Chief of Engineers, 1882, page 88.) Means available ample to continue work of temporary alleviation, but not enough to begin the permanent plan of improvement, which will require three years for its completion, at a cost of $1,332,805. This plan has never been sanctioned by Congress by appropriations for the same.

Improving East Chester Creek, New York (acts March 3, 1879, and June 14, 1880) 7,000
(See Report of Chief of Engineers, 1882, pages 103, 104.) Not sufficient to commence work on approved project, which will require $82,500 for its completion.

Improving harbor at Manistique, Mich. (acts June 14, 1880, $1,000; and March 3, 1881, $1,000) 2,000
Work suspended by reason of refusal of the company controlling the harbor to rectify their pier lines when rebuilding same. (Report of the Chief of Engineers, 1882, page 268.)

DEPARTMENT OF THE INTERIOR

BULLETIN

OF THE

UNITED STATES

GEOLOGICAL SURVEY

No. 1

ON HYPERSTHENE-ANDESITE AND ON TRICLINIC PYROXENE IN AUGITIC ROCKS, BY WHITMAN CROSS; WITH A GEOLOGICAL SKETCH OF BUFFALO PEAKS, COLORADO, BY S. F. EMMONS, GEOLOGIST-IN-CHARGE OF ROCKY MOUNTAIN DIVISION

WASHINGTON
GOVERNMENT PRINTING OFFICE
1883

ADVERTISEMENT.

The publications of the United States Geological Survey are issued in accordance with the statute, proved March 3, 1879, which declares that—

"The publications of the Geological Survey shall consist of the annual report of operations, geo-ical and economic maps illustrating the resources and classifications of the lands, and reports upon neral and economic geology and paleontology. The annual report of operations of the Geolog-l Survey shall accompany the annual report of the Secretary of the Interior. All special memoirs d reports of said Survey shall be issued in uniform quarto series if deemed necessary by the Director, t otherwise in ordinary octavos. Three thousand copies of each shall be published for scientific changes and for sale at the price of publication; and all literary and cartographic materials received exchange shall be the property of the United States and form a part of the library of the organ-tion. And the money resulting from the sale of such publications shall be covered into the Treas-y of the United States."

ANNUAL REPORTS.

From the above it will be seen that only the Annual Reports, which form parts of the reports of the cretary of the Interior and are printed as executive documents, are available for gratuitous distri-tion. A number of these are furnished the Survey for its exchange list, but the bulk of them are pplied directly, through the document rooms of Congress, to members of the Senate and House. cept, therefore, in those cases in which an extra number is supplied to this office by special resolu-n, application must be made to members of Congress for the Annual Reports, as for all other exec-ve documents.

Of these annuals there have been already published:

. First Annual Report to the Hon. Carl Schurz, by Clarence King, 8°, Washington, 1880, 79 pp., 1 p.—A preliminary report describing plan of organization and publications.

I. Report of the Director of the United States Geological Survey for 1880–'81, by J. W. Powell, 8°, shington, 1882, lv, 588 pp., 61 plates, 1 map.

CONTENTS.

Report of the Director, pp. i–lv, plates 1–7.

Administrative Reports by Heads of Divisions, pp. 1–46, plates 8 and 9.

The Physical Geology of the Grand Cañon District, by Capt. C. E. Dutton, pp. 47–166, plates 10–36.

Contributions to the History of Lake Bonneville, by G. K. Gilbert, pp. 167–200, plates 37–43.

Abstract of Report on the Geology and Mining Industry of Leadville, Colorado, by S. F. Emmons, pp. 201–290, plates 44 and 45.

A Summary of the Geology of the Comstock Lode and the Washoe District, by George F. Becker, pp. 291–330, plates 46 and 47.

Production of Precious Metals in the United States, by Clarence King, pp. 331–401, plates 48–53.

A New Method of Measuring Heights by means of the Barometer, by G. K. Gilbert, pp. 403–565, plates 54–61.

Index, pp. 567–588.

he Third Annual Report is now in press.

MONOGRAPHS.

he Monographs of the Survey are printed for the Survey alone, and can be distributed by it only ugh a fair exchange for books needed in its library, or through the sale of those copies over and e the number needed for such exchange. They are not for gratuitous distribution.

far as already determined upon, the list of these monographs is as follows:

The Precious Metals, by Clarence King. In preparation.

Tertiary History of the Grand Cañon District, with atlas, by Capt. C. E. Dutton. Published.

III. Geology of the Comstock Lode and Washoe District, with atlas, by George F. Becker. In press.
IV. Comstock Mining and Miners, by Eliot Lord. In press.
V. Copper Rocks of Lake Superior and their continuation through Minnesota, by Professor R. D. Irving. In press.
VI. Older Mesozoic Flora of Virginia, by Prof. Wm. M. Fontaine. In press.
Geology and Mining Industry of Leadville, with atlas, by S. F. Emmons. In preparation.
Geology of the Eureka Mining District, Nevada, with atlas, by Arnold Hague. In preparation.
Coal of the United States, by Prof. R. Pumpelly. In preparation.
Iron in the United States, by Prof. R. Pumpelly. In preparation.
Lesser Metals and General Mining Resources, by Prof. R. Pumpelly. In preparation.
Lake Bonneville, by G. K. Gilbert. In preparation.
Dinocerata. A monograph on an extinct order of Ungulates, by Prof. O. C. Marsh. In press.
Sauropoda, by Prof. O. C. Marsh. In preparation.
Stegosauria, by Prof. O. C. Marsh. In preparation.
Of these monographs, No. II is published, viz:
II. Tertiary History of the Grand Cañon District, with atlas, by C. E. Dutton, Capt. U. S. A., 4°, 264 pp., 42 plates, and atlas of 26 double sheets folio. Price $10.12.
Nos. III, IV, V, and VI are in press and will appear in quick succession. The others, to which numbers are not assigned, are in preparation.

BULLETINS.

In its Bulletins the Survey will print such papers relating to the general purpose of its work as do not properly come under the heads of ANNUAL REPORTS or MONOGRAPHS.
The Bulletins will each contain but one paper, and be complete in itself. They will, however, be numbered in a continuous series, and will in time be united into volumes of convenient size. To facilitate this each Bulletin will have two paginations, one proper to itself at the top, and at the bottom one which belongs to it in the volume.
Of this series of Bulletins this paper forms No. 1, and is also the first part of Volume I.
Its price is ten cents.
Correspondence relating to the publications of the Survey, and all remittances, should be addressed to the

WITH A

GEOLOGICAL SKETCH OF BUFFALO PEAKS COLORADO

BY

S. F. EMMONS
GEOLOGIST IN CHARGE OF ROCKY MOUNTAIN DIVISION

WASHINGTON
GOVERNMENT PRINTING OFFICE
1883

LETTER OF TRANSMITTAL.

UNITED STATES GEOLOGICAL SURVEY,
DIVISION OF THE ROCKY MOUNTAINS,
Denver, Colo., October 1, 1882.

SIR: I have the honor to transmit herewith a paper by Mr. Whitman Cross on Hypersthene-Andesite, with a brief sketch by myself of the geology of Buffalo Peaks.

The material from which it has been prepared was obtained during the geological study of the Leadville region, and would naturally have been included in the monograph on that district but for the following reason: The andesites from Buffalo Peaks, which, at first glance, appeared to be most characteristic augite-andesites, were found by Mr. Cross on careful examination to differ essentially from the normal order as commonly described. In tracing out the relations of these rocks to the closely-allied so-called augite-andesites, Mr. Cross has obtained results which, if substantiated, give to these investigations a much more general than local character, and make them of value to lithologists in general; so that it seems desirable that they should be published by themselves in the form of a special paper.

Very respectfully, your obedient servant,

S. F. EMMONS,
Geologist in Charge.

Hon. J. W. POWELL,
Director United States Geological Survey.

INTRODUCTORY GEOLOGICAL SKETCH OF BUFFALO PEAKS, MOSQUITO RANGE, COLORADO.

By S. F. Emmons.

During the summer of 1880, a little over two months' field-work was devoted by the party under my charge to a geological study of a portion of the Mosquito or Park Range, as an essential preparation for the investigation of the remarkable ore deposits of the Leadville region.

The area covered by the geological map prepared at this time, which included a length of about 20 miles along the crest, comprised not only its most elevated portion, but also, with a single exception, the most interesting part of the range from a geological stand-point. This exception was found in the Buffalo Peaks, a double-pointed mountain mass rising about 1,000 or 1,500 feet above the main crest, some 10 miles south of Weston's Pass, at the southern limits of our map. Two days were devoted to a hasty examination of these interesting peaks; but, although as many weeks might have profitably been employed in their study, for the reason that the geological phenomena here exhibited had no apparent connection with the ore deposits at Leadville, it was not considered advisable at the time to devote any more of the brief working season of this elevated region to an extraneous study, however interesting. Inasmuch, however, as the microscopical investigations of the specimens collected at that time, made by Assistant Geologist Mr. Whitman Cross, have led to the discovery of hitherto unrecognized characteristics in an important group of Tertiary volcanic rocks, which is set forth in the following pages, it may not be inappropriate to preface his paper with a brief geological sketch of the structure of these peaks, and of their relation to the rest of the range.

The Mosquito Range north of Weston's Pass is made up of Palæozoic beds about 4,500 feet in thickness, extending from the Cambrian to the Upper Carboniferous, with intercalated sheets or intrusive masses of various quartz porphyries and porphyrites, resting on Archæan granite and gneiss. The elevation of the range, which took place at the close of the Cretaceous period, was accompanied by the compression of these beds into a series of sharp folds, characterized by a steep side to the west, or towards the Archæan island, round which the sediments were originally deposited, and by numerous longitudinal faults, with

an upthrow to the east, more or less parallel to the axes of the folds, with which, in general, they are intimately connected.

Towards the south this structure becomes gradually simplified, and the porphyry bodies thin out. At Weston's Pass, already, in place of the complicated system of faults and folds observed in the latitude of Leadville, two great anticlinal and synclinal folds are found, whose axes have the direction of N. 30° W., and whose eastern member has been raised by displacement along a fault plane having about the same direction. One of these folds occupies the main crest of the range, and its corresponding fault runs along the trough of the synclinal on the west, by whose movement the Archæan granite is raised on the crest of the range about 2,000 feet above its corresponding position under the Palæozoic beds which form the surface at the pass itself. The thickness of the interbedded porphyry sheet, which opposite Leadville reaches over 1,000 feet, has here diminished to a little over 20 feet.

The other fold forms a secondary elevation, called Sheep Ridge, on the foot-hills, five miles east of the crest. Here the fault line corresponds very nearly with the axis of the anticlinal fold, which is also that of the ridge, the movement of displacement gradually decreasing in a southerly direction, until the fault ridge becomes simply the elevation of an anticlinal fold. About five miles farther south, at the junction of the Little Platte, which from Weston's Pass flows southeast along the trough of the synclinal, and of Rough-and-Tumbling Creek, which drains the north slope of Buffalo Peaks, not only have the two great faults disappeared, but the two systems of anticlinal folds are merged into a single monoclinal.

Topography is here in singular sympathy with geological structure. Both the main crest and the secondary ridge to the east have the same general direction, with the strike of the geological formations, while the average direction of the topographical crest of the range, as a whole, is more nearly north and south, and its structure consequently that of a series of ridges *en échelon*. Sheep Ridge on the east disappears completely under the plain before the valley of the Little Platte is reached, and is succeeded by an isolated butte called Black Hill, formed by a massive outburst of crystalline rhyolite, breaking through and spreading out over the upturned edges of the Upper Coal Measure formation. The main ridge, which forms the eastern wall of Weston's Pass, descends rapidly to the south, reaching the level of the valley as the Little Platte bends east to flow out into the plains of the South Park, just above its junction with Rough-and-Tumbling Creek. Between these two creeks and near their junction is a series of low ridges formed by strata standing at a great variety of angles and with varying directions of strike, which show the effect of the merging of the double system of folds to the north into the simple monoclinal structure which prevails to the south.

The topographical divide of the range therefore leaves the main crest

at Weston's Pass, and crosses to a second ridge, which overlaps it, on the west of the pass. Stretching southeastward in the direction of the strike, it continues with apparent regularity as far as the Trout Creek Pass, about 20 miles distant along the crest of the range. The structure of this portion of the range, as determined in our hasty visit, seems quite simple. On the west, towards the Arkansas Valley, it presents steep precipitous slopes of Archæan granite. The crest of the higher portion of the ridge is covered by a thin shell of easterly-dipping Cambrian quartzite whose average thickness in this region is about 150 to 200 feet. Resting conformably on this is the White or Silurian Limestone, of about equal thickness, succeeded by the Lower Carboniferous or Blue Limestone, also about 200 feet in thickness; then 2,000 to 2,500 feet of silicious beds, which have been designated the Weber grits; and along the extreme eastern flanks of the range the Upper Coal Measure beds, which consist partly of limestone and partly of coarse reddish sandstone. In the plains along the eastern foot of the range are found occasional ridges of the red sandstones and shales of the Trias, from which it is probable that the salt of the salt springs east of Buffalo Peaks has been derived.

Midway in this monoclinal ridge, and resting on the upturned edges of the strata, are the horizontal beds of andesitic lavas which form the Buffalo Peaks. Their western base rests on granite, immediately under the quartzite, while their eastern flows, whose limits were not ascertained, probably extend well out over the Upper Coal Measure formation. The direction of strike of the sedimentary beds, on the north side at least, seems to have been but little affected by this extrusion of volcanic material; but in immediate contact with the lava, as will be shown later, they have been considerably metamorphosed.

The Buffalo Peaks form an extremely picturesque mountain mass, whose highest point rises to an elevation of 13,541 feet above sea-level, or about 4,000 feet above the adjacent valleys. It consists of a narrow curving ridge forming about one-third of a circle, its concave side toward the north, with a culminating point at either extremity of the arc, the connecting saddle being about 500 feet below their summits. From the northeast base of the eastern peak spreads a broad, flat, massive shoulder, whose area is considerably greater than that of the main peaks. Between the two peaks lies a semi-circular amphitheatre about 2,000 feet deep, in which the appropriately named Rough-and-Tumbling Creek takes its rise, and flows first northward, then eastward to its junction with the Little Platte. The upper 500 feet of the two main peaks is formed of hornblende-andesite of decidedly trachytic habit. Its matrix is of a brownish-gray color, with small crystals of white feldspar and frequent needles of black hornblende. In it columnar structure is very well developed, especially on the connecting ridge between the two peaks, where the columns are often only a few inches in diameter. At this point, rounded fragments of Archæan rocks included in the ande-

site are of frequent occurrence. There is also a very considerable development of hyalite on the weathered surface of the rocks, and fulgurite is found at the summit of the higher or western peak, lining small holes made by the electric fluid.

The base of the hornblende-andesite is extremely well defined, as shown in the frontispiece, by a horizontal line at about the level of the saddle connecting the two main peaks. Below this, as well as could be seen on the walls of the amphitheatre where they were sufficiently steep not to be obscured by *débris*, the mass of the mountain seems to be made up of tufas and of half-glassy modifications, which are also horizontally bedded, conformable with the base line of the hornblende-andesite. A section was made down the steep spur extending from the north base of the eastern peak into the amphitheatre, giving a freely estimated thickness of 1,000 to 1,500 feet of these tufaceous varieties.

SECTION.

1. 200–500 feet.—Hornblende-andesite.
2. 50 feet.—Semi-vitreous tufa of bright red color, with streaks of black and reddish glass running through it, and containing crystals of basic minerals and of feldspar, with innumerable small inclosed fragments of lavas and other rocks not always determinable.
3. 100 feet.—Beds of similar material, rather black in color. Among inclosed fragments rounded masses of granite, up to 6 feet in diameter, are frequent. Through the mass are thin seams or beds of black glass of a perlitic structure, like an obsidian, with plentiful small fragments of feldspar scattered through the mass.
4. 100 feet.—White and lilac colored porous tufa, with fragments of light-colored trachytic rock, rich in smoky quartz (dacite or rhyolite?).
5. 200 feet.—Tufaceous breccia, with boulders of black, vitreous-looking hypersthene-andesite.
6. 5 feet.—Bed of *dacite (rhyolite?)*.*
7. 50 feet.—Light-colored tufa with fragments of dacite (rhyolite?).
8. 500–700 feet.—Space somewhat covered, mostly of tufa, inclosing fragments of a great variety of rocks.

The next outcrop below the base of the spur was found to be limestone and shales, probably belonging to the Weber grits formation, dipping to the northeast at an angle of about 45°, and having the regular strike of the sedimentary rocks of the region. Within these tufa beds and weathered out on their surface, were found an immense number of

*The rock described here as dacite (rhyolite?) is one which, from the specimens at hand, it has been impossible to assign definitely to either of these two classes. Macroscopically it resembles the rhyolites, having large smoky quartz and glassy-looking feldspars in a lilac-colored matrix, and possessing a very decided trachytic habit. Microscopical examination fails to determine definitely whether the one specimen in the collection contains more orthoclase or plagioclase feldspar. A partial chemical analysis is equally unsatisfactory, giving silica, 66.500; potash, 2.567; soda, 3.868. It is identical with a rock found breaking through the granite, near the town of Granite, in the Arkansas Valley, west of the Buffalo Peaks. A further field examination will be required to satisfactorily determine the character and relations of this rock.

more or less rounded fragments of included rocks, consisting mainly of granite and various lavas; the latter of which, as far as examined by Mr. Cross, have proved to be of the same character as the northeastern shoulder, *i. e.*, hypersthene-andesite.

The rock of the eastern shoulder, as far as examined, is a dark, nearly black, compact, semi-vitreous rock of conchoidal fracture, which in the field was determined at once as an augite-andesite. The average level of this eastern spur is some 700 or 800 feet lower than that of the summit of the peaks. As far as our observation extended, this rock was not found in mass in direct connection with the hornblende-andesite.

At the northeast base of the eastern peak, about midway between well-defined outcrops of the two rocks, a German miner had sunk a shaft on the flat surface of the ridge, in an iron-stained, clayey material, undoubtedly the result of decomposition of the lava, in which he found very large, irregular masses of milk-white, common opal. Some of these masses reached several feet in diameter, and when broken open it was generally found that their centre consisted of opaque, flint-like chalcedony; showing that in this case the opal had probably resulted from the hydration of chalcedony concretions within the mass of the rock. It was also observed that while the internal kernel of flint readily gave sparks when struck with steel, the exterior opaline portion was not of sufficient hardness to do this. A chemical examination was made of the flint-like kernel and of the white opaline alteration product, with the following result:

	Flint.	Opal.
Specific gravity	2.570	2.023
Hardness	6.	5.5
Loss by ignition (water)	1.843	2.584
Insoluble (in caustic potash) silica	32.430	0.710
Soluble silica	65.727	96.706
	100.000	100.000

From which it would seem that the change to the opaline form is not simply the result of hydration, since the increase in water in the latter case is only 0.741, or a little over a third more than in the original form of the secretion, but that this must have been accompanied by some molecular change, by which the percentage of soluble silica has become nearly one-half greater.

The outcrops of the upturned sedimentary beds could be traced up to the very entrance of the amphitheatre; the Weber shales, as already mentioned, had been already observed at the base of the eastern peak; the Lower Quartzites resting on the granite form the main crest of the range immediately north of the western peak, while at the northeast base of this peak, at the entrance to the amphitheatre, there was

a cropping of white and blue silicified limestone, showing in a very interesting manner a relic of the solfataric action which probably succeeded the eruption of the lavas. Here the bedding is distinctly seen; the color of the limestone, its granular structure and characteristic veining are still preserved; but the whole mass is completely transformed into silica, and the surfaces frequently coated with a thin white opaline deposit. Chemical tests of three specimens brought from these outcrops, one white or drab, the other two blue limestone, showed the following contents in silica:

	Per cent.
White limestone	97.1
Bluish limestone	97.7
Darker limestone	78.9

with an apparently more than normal proportion of manganese, especially in the darker colored specimen.

The southern slopes of the peak were not examined, but from the summit outcrops of the upturned sedimentary beds could be seen continuing on southward beyond the base of the peak, apparently in a direct line with those observed on the north. The very centre of the amphitheatre was also not visited, as the soft slopes resulting from the decomposition of the tufa beds promised but few outcrops.

Two important questions present themselves in the consideration of the structure of this interesting mass; neither of which, unfortunately, can be considered as definitely decided by the hasty observations made during this visit:

First. Are the peaks the relics of an old volcanic crater?

Second. Was the hornblende- or the hypersthene-andesite the earlier flow?

To the first question the circular form of the main ridge, and its bedded structure, seem at first glance to give a decidedly favorable answer. More mature consideration shows that the present form was mainly due to glacial and post-glacial erosion, whose work in this region has been on such a stupendous scale that evidently the present form of the peaks affords little guide as to the original condition of the mass. Had the present semi-circular ridge once formed part of the crater, we should expect to find some relic of the rest of the circle resting on the ridges to the north; but with the exception of the northeast shoulder, which consists of a distinct rock, and which is evidently also the result of a distinct flow, no lavas were found north of the entrance to the amphitheatre.

As regards the relative ages of the two varieties of andesite, it is to be observed, first, that the hornblende-andesite is the higher of the bedded series; and, second, that from the tufaceous beds no fragments of the hornblende-andesite were obtained; while those of hypersthene-andesite were of very frequent occurrence. On the other hand, the flat eastern shoulder, which is probably formed of hypersthene-andesite, re-

resembles in its form the lateral flows which come from the side of already built-up volcanoes; and as a general rule the more basic augite-andesites have been found to be younger than the hornblendic varieties. In the case of lavas, superposition is by no means necessarily a proof of later origin, inasmuch as the later flows often force themselves under those already existing. Still, in the present case, it must be acknowledged that the evidence, as far as obtained, is in favor of the earlier origin of the hypersthene-andesite.

A third point of interest for future investigation is the determination of the true character and relations of the dacite (rhyolite?) rocks.

The fact that in the present stage of microscopical lithology the old test of the absence of striation lines visible under the microscope is no longer sufficiently conclusive to determine a feldspar as orthoclastic, renders of doubtful value the earlier classification of many rocks as trachytic or andesitic. Many facts already observed by us suggest a doubt whether von Richthofen's classification of volcanic rocks will be found to hold good everywhere in Colorado, and even that many modifications of the relations of the older eruptive rocks, as well as of those of Tertiary age, may be found necessary. The field of work is great, and will involve long and laborious studies before definitive results can be obtained. In the western portion of the Cordilleran system Tertiary volcanic rocks and recent lavas are in vast preponderance, and the older eruptives have been found thus far in but few points. In Colorado, however, while the development of Tertiary eruptive rocks is considerable, it seems probable that a very large proportion of the eruptive rocks will prove to belong to those generally classed as older, from their lithological characteristics alone; of these, however, the most widely developed class may doubtless prove to be Post-Cretaceous, and of those which belong lithologically to the class of Tertiary eruptives or volcanics, there are many whose period of eruption can be but little later than this period.

ON HYPERSTHENE-ANDESITE AND ON TRICLINIC PYROXENE IN AUGITIC ROCKS.

By Whitman Cross.

CHAPTER I.

HYPERSTHENE-ANDESITE FROM BUFFALO PEAKS, COLORADO.

The microscopical and chemical investigation of certain andesites from the Buffalo Peaks in the Mosquito Range, Colorado, having proved conclusively that a rhombic pyroxene is, after plagioclase, the most essential constituent, the writer was led to examine carefully all similar rocks at his command. As the results attained are wide-reaching, and affect many well-known European rocks, the observations made on the Buffalo Peaks rock will be given in detail in Chapter I; the results of the comparative study are embodied in Chapter II.

The "Introductory Geological Sketch" by Mr. S. F. Emmons renders any further description of the Buffalo Peaks unnecessary; all reference to topographical or structural detail will be found sufficiently explained in that sketch.

DESCRIPTION OF ROCK.

Those rocks which are to be specially considered in the following pages occur principally as included fragments in the tufa beds, and were found in place only on the shoulder of the main peak which projects to the northeast.

This latter rock is compact, dark or almost black in color, showing minute glassy feldspars, which, by reason of their transparency, seem dark also. A careful examination shows a number of small, dark-green grains and prisms, which are undoubtedly pyroxene, and glistening ore particles. In the fresh state the base in which these minerals lie has a vitreous lustre.

The fragments found in the tufa vary in outward appearance. Part of them are as dark and compact as the one just described, while others are lighter colored, with more distinct crystals of feldspar and a some-

what porous groundmass. In the darker ones, the feldspars are in part of a clear yellowish tinge, producing a very deceptive resemblance to the partially decomposed olivine of basaltic rocks.

When examined under the microscope in ordinary light, these rocks seem to be typical augite-andesites of very simple composition; clear plagioclase crystals, pyroxene in small crystals and irregular grains, with magnetite and apatite, are the only mineral constituents to be recognized. These larger individuals lie in a groundmass composed of thin plates of plagioclase, light-green microlites of pyroxene, and minute octahedrons of magnetite, with a glass basis between them, which is usually clear, though sometimes devitrified by light-brownish globulites. In the rock occurring in place, the microlites are unusually large, while in the others they sink to extraordinarily minute needles.

PECULIARITIES OF THE PYROXENE.—Examined in polarized light, none of the elements, except the pyroxene, show noteworthy peculiarities. A study of the pyroxenic constituent forces one to the conclusion that *a rhombic mineral, probably hypersthene, is largely predominant, while a great number, if not all of the remaining individuals, must be considered as triclinic in crystallization.*

This conclusion is based on the following microscopical and chemical investigations:

In the first place, on testing under the microscope, in polarized light, all the prismatic sections and small prisms whose vertical axis seemed to lie in the plane of the thin section, with regard to their optical orientation, it was found that at least one-half, and generally a much larger proportion, possessed an axis of elasticity parallel to the vertical crystallographic axis. Now, the only section of a monoclinic mineral, in the prismatic zone, which could act in this manner, is plainly that parallel to the orthopinacoid. And any one who has tested the prismatic sections of augite or hornblende, in slides of massive rocks, knows how rarely a section can be found so nearly parallel to the orthopinacoid that no deviation of the direction of total extinction from the vertical crystallographic axis can be detected. The justifiable conclusion is therefore reached, that nearly all of the sections in question belong to a rhombic mineral.

In the next place, the sections apparently cut perpendicularly to the vertical axis present another remarkable deviation from the rule. While such sections should give no data for the separation of rhombic from monoclinic pyroxene, since in both the directions of extinction coincide with the diagonals of the prism, it is here found that in only a portion of the sections does this relation actually exist, and, further, the numerical ratio between those cross-sections with normal and those with abnormal optical relations is, in any given slide, nearly equal to the ratio between those prismatic sections showing the rhombic and those with deviating optical orientation. It is at once suggested that the cross-sections showing normal optical action belong to the same

mineral which, in longitudinal sections, appears as rhombic, while the prismatic sections, which are seemingly normal augite, belong to the apparently triclinic mineral.

The rhombic mineral as shown by the chemical investigations (p. 29) must be considered as hypersthene. Its pleochroism, though distinct, is by no means strong. A section nearly or quite at right angles to the prism has a light greenish-yellow color, and the changes on revolving it through 90° are too slight to be expressed. In prismatic sections the hypersthene is pale-green in color when its vertical axis is perpendicular to the principal section of the nicol, and greenish-yellow when these directions are parallel. In the latter position there is sometimes a tinge of brown. The other pyroxene is not pleochroic to any noticeable degree. It is always of a pale-green color.

The cross-sections of hypersthene are very well defined. They show the characteristic eight-sided figures of pyroxene, with a distinct prismatic cleavage, and, quite subordinate in some of the sections, a cleavage parallel to the pinacoids. In most of the sections showing a rhombic character, the pinacoidal faces are predominant, the prism simply truncating the angles of the rectangle formed by the former faces.

The hypersthene does not show the prismatic cleavage in longitudinal sections so plainly as the triclinic mineral. The lines are finer, and cross-fissures are common. The terminations, too, are often quite regular, being doubtless caused by domes. (See Fig. 9, Plate II.) It is in the small crystals especially that the regular form of a rhombic mineral is most plain. In the dark and compact rocks there is less difference between these two minerals than in the lighter and porous ones. In the latter one finds some crystals of hypersthene, which are fibrous, with an incipient decomposition proceeding from the cross-fissures along the vertical cleavage planes. (See Fig. 8, Plate II.)

TRICLINIC PYROXENE.—Those cross-sections, showing an anomalous position of the axes of elasticity, are in many ways remarkable. The outlines are similar to those of monoclinic augite, being eight-sided figures, with a distinct cleavage parallel to what may be taken as the prism. The deviation of the angle of extinction from the normal one for monoclinic minerals is *not* constant. Very many of the crystals are apparent twins, and the twinning plane bisects the prism angle in all observed cases.

For convenience, it will be assumed that this plane is the macropinacoid, in accordance with the common law of augite. The divergence of the direction of total extinction from this assumed macrodiagonal is in most cases 20° to 25°, but cases are not rare of its exceeding this average up to 38° 30′ as observed maximum. It is more often above 25° than below 20°. It is not uncommon to find several angles of extinction indifferent portions of the same cross-section. This will be best understood by a reference to the figures of Plate II.

Plate II.—Fig. 1 represents a section with partially regular outline,

and a cleavage most pronounced in two directions, cutting each other at an angle of nearly 90°. In ordinary light it seems like a simple section of pale augite. In polarized light it appears at first to be a trilling whose composition face is ∞ P ∞. On determining the direction of total extinction, the (in figure) upper and lower portions are found to agree with an angle of 27° 30′ from the assumed macrodiagonal. The central portion, however, has an angle of extinction of 10° 30′, cutting the macrodiagonal in corresponding direction with the preceding. Its relations to the other portions are, therefore, not those of a plate in true twinning position. Moreover, within the central portion, is a small irregular patch, with cleavage parallel to that of the rest, having a third angle of extinction, viz, 6° 30′, and also in the same general direction.

The phenomenon is hence to be regarded as an intergrowth of substances with common crystallographic, but differing optical orientation. The central portion shows brilliant colors of polarization in certain positions, while the other parts vary only in degrees of light and shade.

In Fig. 2, the extinction of several parts is, as indicated, with angles of 19° 30′ and 37°. In this case, however, the parts are related as in a trilling crystal, the direction of extinction of the central portion cutting the macrodiagonal in the manner necessary had there been a revolution of 180° about the normal to the macropinacoid. The parts with extinction of 19° 30′ polarize somewhat more intensely than the others.

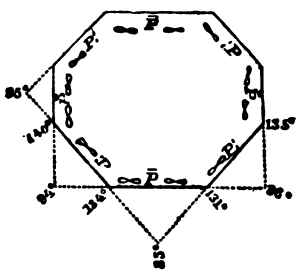
Fig. 3 shows a crystal 0.16^{mm} in diameter, with twin structure, the angles of extinction being respectively 24° and 29° for the two halves. The former gives more brilliant colors in polarized light.

Many small sections are very similar to Fig. 4, with about the same angle of extinction. Fig. 6 represents an apparent intergrowth of rhombic and triclinic pyroxene. The rhombic character is not demonstrable of course, but it seems most probable, as the intergrowth of hypersthene and other pyroxene in prismatic sections is often visible. (See Fig. 5.) The hypersthene polarizes brightly, while the other mineral neither gives distinct colors nor becomes very dark in any position between crossed nicols, so that its nature cannot be determined.

Although measurements of crystal angles made on chance sections in a slide of a fine-grained rock cannot, from the nature of the case, be accurate, an attempt was made to determine approximately the chief angles of the prismatic zone of this questionable mineral. As far as could be judged the section of Fig. 1 was cut very nearly at right angles to the vertical axis, and its bounding planes were sharply defined. The angle *b* of upper right-hand quadrant was first determined. The mean of several measurements, taken in different ways, was almost exactly 140°. To obtain the angle *a*, a measurement from ∞ P̆ ∞ to the plane of intergrowth was made, as ∞ P ∞ was not well defined; 131° was the result within a few minutes. The angle of the two pinacoids was next measured at 94°, which would be necessary for the two pre-

ceding determinations. The angle *a* was determined as a mean of several trials at 134° 47′, the prism angle between faces on right-hand of section = 95° (nearly).

A section of the prism of this mineral, at right-angles to the vertical axis, would therefore have the accompanying form:



The figures of the plate will be seen to have a very similar form. If the sections Figs. 2 and 3 were of normal twins, according to a pinacoid face, there should be a re-entering angle visible, in case the above measurements are correct. On some of the sections seen, this seemed to be actually the case, but they were too small and indistinct to admit of measurement.

In some of the cross-sections the cleavage is apparently better developed parallel to one of the prismatic directions than to the other; for example, see Fig. 1; but this difference is very slight, and no weight can be laid on it.

TRICLINIC PYROXENE IN OTHER ROCKS.

The writer has noticed, and briefly described, an apparent triclinic pyroxene in certain crystalline schists in Brittany.[1] The phenomenon was there less distinct than in the present case, and it was then thought probable that it was an anomalous optical action of the monoclinic augite, the cause of which was unknown. No twin structure or intergrowth was there noticed, and the divergence of the direction of extinction from the normal one was even more variable than in the case in hand. The material, too, was less favorable for accurate observation, yet the two instances are so similar that in all probability they are due to the same cause.

A third occurrence of this same phenomenon has been observed by the writer in a feldspar basalt from Grand River, above the Hot Springs, Middle Park, Colorado. Mr. S. F. Emmons, in passing through the Park, collected specimens of several basalts, and one of them shows, under the microscope, a pyroxene seeming in ordinary light typical of the normal augite of such rocks. It is not pleochroic to any describable degree. Its cross-sections are eight-sided figures, with a strongly marked cleavage. Fig. 7, Plate II, represents a cross-section of a twin

[1] W. Cross: "Studien über bretonische Gesteine." Min. und pet. Mittheilungen. G. Tschermak, (Neue Folge), III, p. 396.

crystal observed in this basalt. The angles of extinction for the two halves, 19° and 22° from twinning plane, are perhaps within the limits of possible error of observation in a section whose exact position cannot be determined. All other cross-sections show similar relations, but the angle of extinction varies from 18° to 33° from a diagonal of the prism. In longitudinal sections the action is normal.

The finding of pyroxene with such abnormal optical properties in three distinct rocks, from such widely separated localities, led naturally to the examination of the pyroxene in the common augite rocks, such as diabase, basalt, &c. The result of such examination is to show that even in well-known rocks a portion of the pyroxene does not exhibit in polarized light the properties required of a monoclinic mineral. In many cases, sections of the supposed augite, which, from all available data, seemed to be cut very nearly at right angles to the vertical axis of the crystal, were found to act abnormally between crossed nicols. A number of instances are given below, mainly from well-known European localities, where this abnormal action was noticed. In each of these rocks, at least one section of pyroxene was found, which, without examination in polarized light, would be considered, as determined by the following tests, to be a typical cross-section of augite. In the first place, if, in a given rock, the pyroxene was found to possess a prismatic development, an eight-sided figure with the proper angles was required. Parallel to two of these outlines there must be a very distinct cleavage, the angles formed by cleavage planes being measurable at very near 87° and 93°. By means of the micrometer screw, it could be shown in each case that the cleavage plane lay nearly or quite parallel to the axis of the microscope.

In each of the rocks mentioned below, a section of apparent augite, determined, as above, to be nearly or quite perpendicular to the vertical crystallographic axis, was found to extinguish light between crossed nicols at a very decided angle from the diagonals of the prism. In all cases cited, the section was clear, fresh, and free from all visible disturbing elements. In a few cases, where the maximum of darkness was not very distinct, the interference cross of the calcite plate and the most sensitive colors produced by the quartz plate were used in the determination.

The instances referred to are as follows:

1. *Diabase.*—Ilkendorf, near Nossen, Saxony.
2. *Diabase.*—Near Elbingerode, Hartz Mountains, Germany.
3. *Diabase.*—Burg in Nassau, Germany.
4. *Olivine-diabase.*—Björfvas, Dalarne, Sweden.
5. *Melaphyre.*—St. Wendel on the Nahe, Germany.
6. *Hornblende-andesite.*—Bolvershahn, Siebengebirge, Germany.
7. *Hornblende-andesite.*—Jakuben, near Tetschen, Bohemia.
8. "*Augite-andesite.*"—Mount Cotopaxi, Ecuador, South America.

9. "*Dolerite.*"—Löwenburg, Siebengebirge, Germany.
10. "*Dolerite.*"—The Meissner, Hessen, Germany.
11. *Feldspar-basalt.*—Bildstein, Vogelsberg, Germany.
12. *Feldspar-basalt.*—Holmestraud, Sweden.
13. *Nephelinite.*—Meiches, Vogelsberg, Germany.
14. *Feldspar-basalt lava.*—Mount Ætna, eruption of 1537.
15. *Nepheline-basalt.*—Robschitz, near Bilin, Bohemia.
16. *Nepheline-basalt.*—Herchenberg, Laacher See, Germany.
17. *Leucite-basalt.*—The Abtei, Laacher See, Germany.
18. *Leucite-basalt.*—Veitskopf, Laacher See, Germany.
19. *Leucite-basalt.*—Niedermendig, Laacher See, Germany.
20. *Haüyne-basalt.*—Cranzahl, Saxony.
21. *Leucite lava.*—Mount Vesuvius, old eruption.

In very many other cases the same behavior was noticed, but less decidedly. Especially in comparison with the hornblende of diorite, porphyrite, &c., is the abnormal behavior of pyroxene noticeable.

So far as is known to the writer, this abnormal action of supposed augite has never been dwelt upon, if indeed it has been noticed at all. None of the available material contains the questionable mineral, in size or perfection, suitable for isolation and crystallographic investigation; hence the correctness of the view here advanced, that it is triclinic, cannot be proven. The only other explanation possible is that of an "optical anomaly."

If this mineral be triclinic in crystallization, it is manifestly different from either Babingtonite or Szabóite, the only known triclinic pyroxenes, and forms a new species, whose chemical composition does not, in all probability, vary greatly from that of common augite. The variations in optical behavior suggest an analogy with the triclinic feldspars.

Whether the observed behavior be finally explained in accordance with the hypothesis here advocated or not, an interesting and important subject for further investigation is certainly indicated.

CHEMICAL COMPOSITION OF THE ROCK.

The rock selected for chemical analysis is that occurring in place on the northeast shoulder of the main Buffalo Peak. (Coll. No. 144.) For a description of its structure and constituents see page 19. The rock was very fresh, and the minerals recognized in it are plagioclase, two pyroxenes, magnetite, and a little apatite. Between these is a brownish glassy base.

The specific gravity was taken at a temperature of 16° C. The analy-

sis was made by Mr. W. F. Hillebrand, chemist to the Rocky Mountain Division of the Survey.

Specific gravity	2.742
SiO_2	56.190
Al_2O_3	16.117
Fe_2O_3	4.919
FeO	4.433
MnO	trace
CaO	6.996
BaO	trace
SrO	trace
MgO	4.601
Na_2O	2.961
K_2O	2.368
H_2O	1.028
P_2O_5	0.266
Cl	0.022
	99.901

There is but little in the analysis which requires special explanation. The percentage of K_2O is considerably larger than would be expected, as none of the larger crystals of feldspar can be considered as sanidine. The amount of P_2O_5 found, with the Cl, indicates that minute needles of apatite must be quite abundant in the groundmass, though but few can be recognized as such. BaO and SrO are seldom given in analyses of andesites—probably, in many cases, because they were not sought for.

ISOLATION AND ANALYSIS OF HYPERSTHENE.

In order to establish the identity of the pyroxene, which seemed from its optical behavior to be rhombic, an attempt was made to isolate the same for analysis. It is scarcely necessary to mention in this connection that the desire to compare the Buffalo Peaks rock with the hypersthene-bearing andesite of the volcano of Santorin in the Grecian archipelago led to the chemical investigations which follow; and it may be safely assumed that the chief results of the investigations of Fouqué on the Santorin lavas are known even to those to whom the final volume, with its wealth of minute observations and splendid illustrations, is not accessible.[1]

INVESTIGATIONS OF FOUQUÉ ON THE LAVAS OF SANTORIN.—Fouqué found that the lava of the eruption of 1866, which at first glance seemed a typical augite-andesite, contained in reality two pyroxenes, which he isolated and determined as normal augite and *hypersthene*. He also found hypersthene in older rocks of this same volcanic group. It is the first

[1] F. Fouqué, "Santorin, et ses éruptions", Paris, 1879.

nstance where the presence of a rhombic pyroxene in "augite-andesite" has been chemically and optically proved beyond dispute.

As the so-called Thoulet solution of the iodide of mercury in the odide of potassium was not available at the time the investigations were in progress, recourse was had to the method employed by Fouqué (*l. c.*, p. 190) in separating the iron-bearing minerals of the Santorin lavas from the other constituents.

METHOD USED IN ISOLATION OF HYPERSTHENE.—A specimen of the rock was crushed until all passed through a sieve containing sixty meshes to the inch. Only that portion of the powder was used which was retained by a sieve having eighty meshes to the inch, as uniformity in size of the grains acted upon by the acid is desirable, and the finer powder is objectionable on several accounts (see Fouqué, *l. c.*). The grains thus obtained were placed in a platinum dish, and treated with strong fluorhydric acid, which attacks first the feldspars and other substances free from or poor in iron. According to Fouqué, concentrated acid is best, in which case, in pouring the powder, little at a time, into the acid, there is a more or less violent ebullition without the application of external heat. On the ceasing of this ebullition it may be presumed that a large part, if not all, of the easily attacked minerals is dissolved. The action is stopped by dilution with water. If matter still remains which it is desired to remove, the water is poured off and the powder treated again with acid. In the present case the acid was not concentrated, and hence considerable heating was necessary. In all cases the powder should be rapidly stirred with a platinum spatule. On discontinuing the action of the acid, there is always more or less gelatinous silica deposited upon the remaining grains. This is removed by repeated washings and rubbing of the powder under water with the finger. The magnetite is then separated with a small magnet.

A specimen of the Buffalo Peaks rock (Coll. No. 144) of which the complete analysis was made, treated as above at different times, yielded a powder in which there were only a few white grains remaining. The acid did not seem to attack them very readily, and before they entirely disappeared a considerable portion of the pyroxene was also dissolved. The residue was finally obtained quite pure, and yielded upon analysis the results under I and II below. Fouqué found (*l. c.*, p. 195) that if the mixture of augite and hypersthene derived from the Santorin lava were further treated with fluorhydric acid, the augite was much more easily attacked, as it contained less iron, and that he could in this way finally obtain hypersthene with but little admixture of augite. In the present case the microscope showed a large amount of augite with the rhombic mineral, in the rock section, but the analysis shows the substance analyzed to have been nearly pure hypersthene; hence, it is presumable that the quantity of pyroxene which was dissolved in removing the white grains above referred to must have been chiefly augite. Microscopic examination of

material left in Analysis I (which has been made since this was v after the feldspar had disappeared, showed a decided admi augite with hypersthene; the augite was, however, removed by treatment with acid.

Another specimen from the Buffalo Peaks, from a boulder in beds (Coll. No. 150), was treated in the same manner. This n chosen because the microscope showed a large amount of ve rhombic pyroxene and but little augite. The powder obtain examined with the microscope and found to be almost absolut from impurities. Its analysis is given under III.

MICROSCOPIC INVESTIGATION OF ISOLATED MATERIAL—Th scopic study of the isolated crystals and fragments shows cle rhombic nature of the mineral in question. The crystals obtai often 0 3^{mm} in length, and 0.15^{mm} in thickness. In all those susp being rhombic, the pleochroism is much stronger than has b scribed for the sections observed in the slide. (See p. 21.) The in color are from a dark reddish-brown to a very distinct green, in from greenish-yellow to pale green. Every such prism extinguish parallel to the vertical axis. The grains of augite are more of a green color, and only very faintly pleochroic. In the material o from specimen (Coll. No. 150) affording III, probably not mo one per cent. of the grains are augite. Many prisms are quite and it would not be at all difficult to isolate a large number crystals of almost the exact appearance of those reproduced by in Plate LX, Fig. 2, of his previously cited work. The crystal Buffalo Peaks rock are usually stouter than most of those pict Fouqué, but are quite as regular in form. Fig. 9 of Plate II crystal from the thin section of the rock which furnished the for Analysis III.

ANALYTICAL TABLE.—For comparison, the composition obt Fouqué for the hypersthene of the Santorin lava of 1866 is give IV; under V the analysis of the "augite" from the "augit-an the highest peak of the "Sierra de Mariveles" in the island o given by Oebbeke;[3] and under VI, the analysis by Damour of known hypersthene from St. Paul's Island, on the coast of L as given by Dana.[4]

The isolation of the hypersthene, and Analyses III and III, fied out by Mr Hillebrand.

specific gravity of III was taken at 23° C.

CUSSION OF ANALYSIS.—In I and II the alkalies were not tested
ıd in II and III all the iron is given as FeO, because the special
ıination of the protoxide was not successful. The amount of Fe_2O_3
ıt, is in all probability about the same as in I. The amount of iron
d from grains of magnetite included in the pyroxenes of II and
small. The crystals are unusually free from inclusions of all kinds.
I_nO of II is taken from I, and is undoubtedly very nearly correct,
ırtions analyzed being derived from the same rock. In III is in-
l a small amount of feldspar attached to hypersthene grains, and
could not be dissolved without losing too much of the latter min-

comparing II and III with the other analyses of the table, it is clear
hey are much nearer to typical hypersthene (VI) in composition
he rhombic mineral of the Santorin lava, whose identity with
sthene has been recently admitted, even by Rosenbusch,[5] who had
t expressed doubts upon the subject.[6] The varying quantities of
n I, II, III, and IV may indicate that the simple silicate, $CaSiO_3$, en-
ıore largely into the composition of rhombic pyroxene, as occur-
ı rocks, than has heretofore been supposed.

ı only instance since the work of Fouqué, known to the writer, where
eochroic pyroxene of an "augite-andesite" has been isolated and
ned with regard to its crystal system, is in the case of the rock
the Sierra de Mariveles, which was investigated by Oebbeke (*l. c.*),
which gave Schwager the composition V of the table. Oebbeke
y pronounces the mineral to be augite and not hypersthene. In
ase, as in those mentioned later (p. 34), the grounds given for
etermination are by no means satisfactory. The only *evidence*
by Oebbeke in favor of the monoclinic system is the following:

iew of Fouqué's work on Santorin, in Neues Jahrbuch, etc., 1880, II, p. 310.
enbusch, Massige Gesteine, p. 418.

He examined a few of the isolated pleochroic prisms by attachin singly to a piece of wax in such a manner that he could test the di of extinction parallel to each face of the prismatic zone, and in eac tal examined he found oblique extinction in some position. The found, on examining the material which furnished Analysis I many pleochroic prisms did not give definitely an extinction par the vertical axis when lying loosely on an object glass in air; b the same grains mounted in balsam were much more clear and dis their optical behavior, and always in favor of the rhombic syste the case of such tiny grains, especially when obtained by the cr of rock to powder, the examination of optical properties in th very unsatisfactory. The reflection of light from uneven surfac disturbing influence of fissures, of included substances, &c., all make the optical examination of minute particles in air unreliab mounted in balsam, the liability to error is much less.

The substance which yielded the composition V was isolated by of the Thoulet solution, and would represent a mixture of rhomb monoclinic pyroxenes, were both present in the rock. The fig V are certainly abnormal for any augite known to occur as a ro stituent, but are easily explained on the supposition of a mix augite with a bronzite or hypersthene.

CHAPTER II.

RHOMBIC PYROXENE IN OTHER ANDESITES.

The resemblance of the Buffalo Peaks rock to that variety of augite-andesite which has always been regarded as most typical, naturally demanded that all available examples of the latter should be examined in regard to the character of the pyroxenic constituent. The particular variety referred to is that characterized by a glassy base, often brownish in color, in which lie a multitude of minute microlites of plagioclase and pyroxene, with magnetite grains. The same minerals occur in porphyritic individuals, though by no means so prominently as in other varieties of andesite. Hornblende and biotite are often entirely wanting and are rarely abundant. Olivine appears occasionally. This variety is especially abundant in Hungary, Transylvania, and Servia.

As many of the rocks examined come from well-known European localities, the observations in each particular case will be concisely given. Unfortunately, only their sections, without hand specimens, were available.[7]

In each section the attempt was made to observe and record the direction of total extinction in every prismatic section of pyroxene of sufficient size to allow exact determination.

TABULATED RESULT OF OBSERVATIONS ON AUGITE-ANDESITES.—The ratio of prismatic sections with rhombic, to those with monoclinic optical orientation, was found to be in the rock from:

(1) Bohunitz, near Schemnitz, in Hungary ..... as 8 : 2
(2) Podhrad, near Schemnitz, in Hungary ..... as 15 : 5

(12) Borač, Southern Servia	
(13) Mount Cotopaxi, Ecuador, South America	as 10: 3

DISCUSSION OF TABLE.—In Nos. 4, 5, and 6, only the larger sections were counted. There are many of about 0.4mm to 0.5mm in length, all of which extinguish light parallel to the vertical axis.

The few sections in which the optical behavior was not distinct were neglected.

The microlites of pyroxene, in cases where they could be tested, seemed for the most part to be monoclinic, but the determination was seldom satisfactory.

It appears, therefore, that in all those cases mentioned above, a rhombic pyroxene is much more abundant in porphyritic individuals than augite. For it cannot be supposed that such constant results could be obtained through mere chance. It is true that sections of augite parallel to the orthopinacoid are not to be distinguished optically from rhombic pyroxene, but it is not possible to explain the above figures in that way.

The same difference in appearance between the two pyroxenes is to be noticed in the above rocks which was described in the case of the Buffalo Peaks andesite. The rhombic mineral is pleochroic in the same manner (p. 21), while the monoclinic is not noticeably so. There is also a difference in development. The rhombic pyroxene, which, through analogy with the cases described, will be hereafter designated as hypersthene, is better developed than the augite. Its crystals show terminations as if from domes quite frequently, and its cross-sections are sharper, being chiefly bounded by pinacoidal outlines. The augite grains are much more irregular as a rule, and contain glass and magnetite inclusions in greater abundance than the hypersthene crystals. An apparent intergrowth of the two was not unfrequently noticed, as in the rocks from Bohunitz and Roszaj-Ingnies.

AUGITE-ANDESITES OF THE 40TH PARALLEL.—Through the courtesy of Mr. Arnold Hague the slides of the andesitic rocks collected during the geological exploration of the Fortieth Parallel, and which have been described by Prof. F. Zirkel,[9] were placed at the disposal of the writer. The results obtained from the examination of these slides agree fully with what has been stated concerning the European rocks. In all but two of those rocks described by Professor Zirkel as "augite-andesites" a very large part of the pyroxene seems identical

loaned to the writer by Mr. Arnold Hague, United States Geologist, the custodian of the collections belonging to the Fortieth Parallel Survey. The rocks bear respectively the numbers 24, 25, and 19 of the Austrian Survey, and are labeled "Grauer Trachyt, Richthof." They are all typical rocks, in fresh condition, of the class under discussion.

[9] F. Zirkel, Microscopical Petrography. Washington, 1876, p. 221.

ith that which is regarded as probable hypersthene in the above rocks. he two exceptions (Mic. Nos. 514 and 515) are basaltic in habitus and arry olivine.

REVIOUS OBSERVATIONS OF RHOMBIC PYROXENE IN AUGITE-ANDESITES.

HISTORICAL.—The number of instances known to the writer where he presence of rhombic pyroxene in "augite-andesites" has been at ll emphasized is extremely small. J. Niedzwiedski[10] described in 1872 rock from St. Egidi, in Steiermark, as "Hypersthen-Andesit." In 877 this rock is mentioned by Rosenbusch[11] as the single rock known hich can bear that name. In 1880 E. Hussak[12] pronounced it an ordiary augite-andesite, and, so far as the writer is aware, his verdict has ot been questioned. Reference will again be made to this case later.

The occurrence of rhombic pyroxene even as an accessory constituent f augite-andesites has been but rarely announced.

R. von Drasche[13] has mentioned bastite as occurring in augite-andesite om Videna, in Steiermark.

Rosenbusch[14] at the time of issuing his often cited work (1877), while ot denying that a rhombic pyroxene may occur in augite-andesites, is ill inclined to consider those pleochroic prismatic sections of pyroxene n which light is extinguished parallel to the vertical axis, as chance ections of augite parallel to the ortho-pinacoid. It is in great measre owing to this judgment, no doubt, and to the undoubted presence of leochroic augite in recent rocks, that many observers have seemed to ismiss all thoughts of rhombic pyroxene if in the same slide with pleoroic sections, such as have been described, normal augite with its blique extinction could be found. Thus, E. Hussak (*l. c.*) disposes of the ypersthene andesite of Niedzwiedski with the simple assertion that the roxene is monoclinic, because he has found apparent prismatic secons in which extinction took place at more than 30° from the vertical is. Inasmuch as he had previously confirmed the statements of von rasche[15], it seems highly probable that augite is not specially abundant this andesite.

[14] H. Rosenbusch, Massige Gesteine, p. 411.
[15] E. Hussak, Verhandl. d. k. k. Geol., Reichsanstalt, Vienna, 1878, p. 338.

Hussak[16] has also published the results of microscopic investigation on the eruptive rocks of the region about Schemnitz, in Hungary. While the rocks of this district have been frequently studied by eminent investigators, such as Zirkel, vom Rath, and Doelter, the publication of Hussak is here considered as the most recent known to the writer. Augite-andesite, of the type especially under consideration, is very abundant near Schemnitz. Hussak mentions a large number of occurrences, among them those of Bohunitz and Podhrad, and the great similarity of most of them is evident. The pyroxenic constituent is always called augite, although some of it extinguishes light parallel to the vertical axis. Decomposition products resembling bastite were also noticed. The pleochroism is quite strong and the pinacoids are markedly predominant. The angle of extinction in two cases is given as 47° and 49°.

The general description given by Hussak corresponds closely to that required by the two slides in possession of the writer, from Podhrad and Bohunitz, except that no allowance is made for two species of pyroxene.

The short description accompanying the slides of the Fuess collection (see p. 31) mentions no other pyroxene than augite, even in those cases where every prismatic section seems to be rhombic.

The determination of hypersthene in the lavas of Santorin, and the statements of Oebbeke concerning the pyroxene in the "augite-andesites" of the Philippine Islands, have already been cited. (p. 29.)

In all other descriptions of or references to augite-andesite of the chief type which have come under the observation of the writer, it is impossible to obtain satisfactory data concerning the pyroxene. In nearly all of them, however, the pleochroism and predominance of the pinacoids are dwelt upon, which, in the light of the present investigation, justifies the suspicion that rhombic pyroxene is not wanting. Two instances will be given where the existing descriptions of "augite-andesites" suggest the identity of the supposed "augite" with the rhombic pyroxene of the rocks here described.

Rosenbusch[17] mentions that the augite of the "augite-andesites" from Chimborazo and Tunguragua, in the Andes of South America, is strongly pleochroic. Artopé[18] has given analyses of several augite-andesites from the Andes, among them being two from Tunguragua. One of these shows nearly 6 per cent. MgO, while in two other cases nearly 4 per cent. MgO is given. The augite-andesite from Cotopaxi, examined by the writer, showed 10 apparently rhombic pyroxenes to 5 monoclinic.

Again, Cohen[19] describes the porphyritic augite crystals of two Ha-

[16] E. Hussak, Sitzungsbericht d. k. Akad. d. Wiss., Vienna, July, 1880, p. 164.

ian andesites as "*kräftig pleochroitisch*" in the same manner shown the Buffalo Peaks hypersthene, while the microlites in the groundss do not seem to be so. Also, the augite of an "*Augitandesitbimstein*" nd between New Britain and New Ireland, in the South Pacific Ocean, trongly pleochroic in the same manner.

RHOMBIC PYROXENE IN DIABASIC ROCKS.

he possibility that a rhombic pyroxene may occur in some augite-esites has been admitted by Rosenbusch,[20] who, while denying that pleochroic pyroxene, so common in augite-andesites, is rhombic, exsses a belief that the final discovery of a rhombic pyroxene in a subup of the augite-andesites is even highly probable. This probabilarises out of analogy with the diabase-porphyrites of the left bank the Lower Rhine, which contain enstatite. It is interesting and sigcant that this analogy is borne out in Colorado.

ENSTATITE-BEARING DIABASE FROM COLORADO.—At Morrison, near ver, there is in the Archæan gneiss a narrow dike of a dark aphanrock. Under the microscope this rock is seen to consist chiefly of row prisms of plagioclase and a colorless pyroxene. The angular ces between these are filled in part with a colorless anisotropic neral, which may be orthoclase, and with a dark groundmass. The is apparently magnetite, and is almost exclusively confined to the undmass, where it occurs in regular aggregations, and seldom in gle grains. These aggregations seem often like devitrification prots, and a glass base is in places to be identified. The pyroxene urs chiefly in prisms of about 1^{mm} in length by 0.2^{mm} in thickness. such individuals are colorless, have numerous cross-fissures, and ingnish light when the vertical axis is parallel to the principal sec- of one of the crossed nicols. The cross-sections show a dominant velopment of the pinacoids. The cleavage is most pronounced parel to the prism, but there are many irregular fissures, and some parallel the pinacoids.

The absolute identity of this mineral with enstatite has not been ven, but there seems to be no good reason for doubting it. The maining pyroxene is in smaller prisms and has a very slight pinkish or. Nearly all of these prisms have an angle of extinction exceeding °, and they belong undoubtedly to augite.

The age of this rock cannot be determined, but it has throughout the bitus of a Pre-Tertiary eruptive.

RHOMBIC PYROXENE IN HORNBLENDE-ANDESITE.

The presence of a rhombic pyroxene in the hornblende-biotite-andes has been seldom announced.

[20] Rosenbusch, Massige Gesteine, p. 411.

Rosenbusch[20] found it in one dacite; Lagorio[21] found pyroxene i tain andesites of the Caucasus which acted optically like a rh mineral, yet he does not pronounce it such.

In the hornblende-andesite from Buffalo Peaks, pyroxene, v analogous to that of the hypersthene-andesite, is quite abundan the tufas of the same locality hypersthene is often associated with blende and biotite.

A slide in the possession of the writer, from Moisar (Mocsar Hungary, shows hornblende, biotite, and apparent hypersthene. groundmass of this rock is much less prominent than in the t "augite-andesites," yet seems to be essentially of the same char and the occurrence may represent a transition form.

The Fuess collection (see note, p. 29) contains two beautiful h andesites from Gorni Milanovatz, and Slatni, in Central Servia, in v the pyroxene seems to be rhombic, with scarcely an exception. I blende and biotite are abundant in the same. On the other hand pyroxene in the andesite from Jakuben, near Tetschen, in nor Bohemia, though strongly pleochroic, is still unmistakeably au The pleochroism of this augite is, however, very different from which is characteristic of andesitic hypersthene. Augite, somet faintly pleochroic, can often be found in andesites and trachytes o Siebengebirge, the Auvergne, and other districts, but in these c sections with rhombic optical action are very rare and cannot be sidered as indicating a rhombic mineral.

CLASSIFICATION OF ANDESITIC ROCKS.

NEED OF A RECLASSIFICATION.—The group of the andesites, inc ing all Tertiary eruptive rocks with plagioclase and one or more of minerals hornblende, biotite, or pyroxene as essential constituent more in need of a natural subdivision than any other in the categor modern petrography. This statement will hardly be disputed.

The division into hornblende and augite-andesites has often been sailed, with justice, on the ground that very many rocks contain h blende and augite in about equal quantity, making the transition st of as frequent occurrence as either of the extremes. On the other h the division of the augite-andesites has been justly defended, by p ing to the "original," or the typical rock, in which hornblende and bi seldom play any other than a very subordinate part, and which has

[20] Rosenbusch, Massige Gesteine, p. 300.

[21] A. Lagorio, "Die Andesite des Kaukasus," Dorpat, 1878, p. 18.

ound in widely separated parts of the world, with a truly remarkable persistence of characteristics.

A glance at the rocks which, according to the prevailing principles of classification, must be called augite-andesites, shows three subdivisions. At one extreme are those rocks upon whose characteristics the objections to the prevalent classification are grounded. These occurrences, united with the great majority of hornblende-biotite-andesites are usually characterized by a trachytic habitus. In these, feldspar is by far the dominant element, and often sanidin forms an important part of it. The structure of the groundmass is prevailingly much more crystalline than in the so-called augite-andesites proper, and plagioclase is especially abundant in it. Quartz or tridymite is often present.

At the other extreme are the rocks, comparatively few in number, which, though possessing the basaltic habitus, are still strictly andesites through the absence or rarity of olivine. As examples of this class may be cited numerous rocks of the Auvergne described by von Lasaulx,[22] and the rock from the Löwenburg in the Siebengebirge, commonly called "dolerite," but classified by Rosenbusch[23] with the augite-andesites. Between these are the normal "augite-andesites."

Chemically considered, the andesites with trachytic habitus are somewhat different from the normal augite-andesite. The percentage of silica is noticeably higher. Thus Lagorio[24] states concerning the andesites of the Caucasus that they vary in amount of silica from 61.33 to 77.40 per cent. Doelter[25] gives the variation in quartz-bearing andesites of Transylvania and Hungary as from 57 to 69 per cent. The typical augite-andesites seldom contain more than 60 per cent. silica, and the average runs quite constantly between 56 and 58 per cent.[26]

The separation of the normal augite-andesites from those with trachytic habitus has often been justified by their geognostic relations. Near Schemnitz, in Hungary, where both types are abundantly represented, the augite-andesites proper were long ago distinguished as "*trachytes semivitreux*" by Bendant. Von Andrian states as a result of the geological survey of the region in 1865, speaking of the "*jüngere andesite*," that "*Übergänge in den (amphibol-) andesit lassen sich auch da, wo beide neben einander vorkommen, nicht nachweisen.*" (Cited as above by Hussak (*l. c.*).) In many other places the normal augite-andesite has been distinguished from the "trachytic" variety, as younger.

RESULTS.

1. An apparently typical augite-andesite from the Buffalo Peaks is found to contain *hypersthene* as its chief pyroxenic constituent.

2. The remaining pyroxene of this rock must, from its optical behavior, be considered either as *triclinic* in crystallization, or as augite with anomalous action through some unexplained cause. The occurrence of apparent twins and of intergrowth with hypersthene render the *former* explanation most plausible. Pyroxene with similar behavior was found in many well-known augitic rocks.

3. In all so-called "augite-andesites" of the truly typical character which are accessible to the writer, twenty-eight in number, the greater part of the pyroxene corresponds optically and structurally to the hypersthene of the Buffalo Peaks rock.

4. There is nothing in the current description of the "augite-andesites" referred to, which can be regarded as *positive* evidence that hypersthene is not abundant in them.

5. In all so-called "hornblende-andesites" with a structure similar to that of the typical "augite-andesites" which were examined, some fifteen in number, the same apparent hypersthene is more or less abundant.

6. The pyroxene of those andesites with "trachytic habitus" seems to be normal augite.

7. The conclusion is that the chief subdivision of the augite andesites may much more properly be called *hypersthene-andesite.* To this latter group are to be added certain rocks containing hypersthene, which have been classed with the hornblende-andesites. A separation of the remaining andesites into augite and hornblende-biotite bearing groups does not appear justifiable.

It does not seem probable that future investigations will show the occurrence of hypersthene to be so closely connected with a certain structural form as is indicated by the preceding observations. If, however, it should prove to be the case, the group of the hypersthene-andesites will be one of the best defined in petrography.

It is hoped that the correctness or falsity of the above conclusion will be speedily settled by other determinations of the nature of the pyroxene in the so-called augite-andesites.

[CONGRESS, } HOUSE OF REPRESENTATIVES. { MIS. DOC.
l Session. } { No. 17.

.ILROADS NOT COMPLETED IN TIME FIXED BY LAW.

LETTER

FROM

E COMMISSIONER OF THE GENERAL LAND OFFICE

TRANSMITTING

her information concerning railroads that were not completed within the period fixed by law.

JANUARY 15, 1883.—Ordered to be printed.

DEPARTMENT OF THE INTERIOR,
Washington, January 13, 1883.

IR: Your letter of the 21st ultimo, calling for further information cerning railroads that were not completed within the period fixed by , was received and referred to the Commissioner of the General Land ce. I have the honor to transmit herewith copy of his report on the ject, under date of the 11th instant.

Very respectfully,

H. M. TELLER,
Secretary.

ion. T. C. POUND,
Chairman Committee on Public Lands,
House of Representatives.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., January 11, 1883.

R: I am in receipt, by reference from you for report, of a letter ad- sed to you by Hon. T. C. Pound, chairman of the Public Lands Com- ee of the House of Representatives, in which he says:

the 28th day of March last you transmitted to the House of Representatives a re- f the Commissioner of the General Land Office giving information respecting land- railroads, called for by a House resolution of February 9, 1882 That report ned the names of a number of railroads to whom grants of land have been either directly or through the State, who had not completed their roads within ne prescribed by law, and other information called for by that resolution. This was printed as House Ex. Doc. No. 144. Supplementary to that report, and purpose of action on pending bills before this committee, I respectfully request u cause this committee to be informed at the earliest moment practicable.

Here follows a series of questions, seven in number, which I shall endeavor to answer in the order in which they are presented, by arranging the questions under separate heads, and giving a question and answer under each head.

I.—"Whether any companies therein named have since said report made any progress in building or towards completion of their lines of railroad."

Since March 27, 1882, the date of report referred to, the following described evidence of construction of railroads has been received at this office:

ATLANTIC, GULF, AND WEST INDIA TRANSIT RAILROAD.

Certificate of the governor of Florida, dated August 5, 1882, of the construction of $26\frac{52}{100}$ miles of road from Ocala, Marion County, in the direction of Tampa.

PENSACOLA AND GEORGIA (NOW PENSACOLA AND ATLANTIC) RAILROAD.

Two certificates of the governor of Florida, dated December 6, 1882, of the completion of two sections of 20 miles each of road.

First section.—Commencing in Walton County, at a point 60 miles east of connection with Alabama and Florida (now the Pensacola) Railroad, and running eastwardly towards Chattahoochee, on the Apalachicola River.

Second section.—Commencing on the east bank of the Choctawhatchee River, in Washington County, and running eastwardly toward Chattahoochee. Total, 40 miles.

NORTH WISCONSIN RAILROAD.

Certificate of the governor of Wisconsin, dated July 20, 1882, of the completion of 20 miles of road beginning at a certain point in section 18, township 43, range 7 west, and ending at station 1,056 in section 14, township 45, range 6 west. Certificate of governor of Wisconsin, dated July 20, 1882, of the completion of 20 miles of road, beginning at a certain point in section 35, township 40, range 12 west, and ending in section 25, township 43, range 12 west. Certificate of the governor of Wisconsin, dated October 23, 1882, of the completion of 20 miles of road, beginning at a certain point in section 25, township 43, range 12 west, and ending in section 22, township 46, range 12 west. Total, 60 miles.

NORTHERN PACIFIC RAILROAD.

On September 19, 1882, six maps, showing 200 miles of constructed road in Montana Territory, beginning at a point on the south bank of the Yellowstone River, about 1½ miles west of O'Fallon Creek, and ending at a point on west bank of Canyon Creek, 7 miles west of the town of Billings, in section 22, township 1 south, range 25 east, accepted by the President of the United States on September 16, 1882. On September 19, 1882, one map showing 25 miles of constructed road, beginning at the Northern Pacific Junction near Thomson, and ending near Bluff Creek in Superior, Wisconsin, accepted by the President of the United States September 16, 1882. On October 12, 1882, a map showing 3

miles of constructed road, beginning at a point 3 miles south of Sand Point, in Idaho Territory, and ending at a point on the west bank of Clark's Fork of the Columbia River, about 5 miles south of Elk Creek, Montana Territory, accepted by the President of the United States October 9, 1882.

On October 22, 1882, a map showing 25 miles of constructed road in Montana Territory, beginning at a point 275 miles eastward of Wallula Junction, in Washington Territory, and ending at a point 300 miles distant from said junction, accepted by the President October 20, 1882.

On December 7, 1882, three maps, showing 100 miles of constructed road, beginning at a point on the west bank of Canyon Creek, 7 miles west of the town of Billings, Montana Territory, and ending at a point on the south bank of the Yellowstone River, west of Little Boulder Creek, and opposite the old Crow Agency, accepted by the President of the United States December 5, 1882.

On December 7, 1882, a map showing 4.58 miles of constructed road, accepted by the President of the United States December 5, 1882, beginning at a point in the city of Bismarck, on the east bank of the Missouri River, in section 4, township 138 north, range 80 west, fifth principal meridian, and ending at a point on the west bank of the Missouri River, in the village of Mandan, in section 26, township 139 north, range 81 west. Total 404.58 miles.

ATLANTIC AND PACIFIC RAILROAD.

On December 19, 1882, two maps showing sixth and seventh sections of 25 miles each of the central division of road, constructed in the Indian Territory, beginning at a point 1.54 miles west of the crossing of the Missouri, Kansas and Texas Railway, and ending at a point 50 miles west of place of beginning; also eight maps showing sections 9 to 16, inclusive, of road constructed in the Territory of Arizona, beginning at a point 200 miles west of junction of this railroad with the New Mexico and Southern Pacific Railroad, near Isleta, N. Mex., and ending at a point 200 miles westward of the place of beginning. Total, 250 miles, accepted by the President of the United States December 14, 1882.

II.—"All cases of such grants where no work has been done toward building the road so far as the department is advised."

I have not been advised of the construction of any portion of the following-named railroads since March 27, 1882, viz:

In Mississippi.—Gulf and Ship Island, Tuscaloosa and Mobile, Mobile and New Orleans (also in Alabama and Louisiana).

Alabama.—Coosa and Tennessee, Coosa and Chattanooga, Elyton and Beard's Bluff, Memphis and Charleston.

Louisiana.—Railroad from New Orleans to the State line in direction of Jackson, Miss.

Arkansas.—Iron Mountain, authorized by second section of act of July 4, 1866, from southern boundary line of Missouri to Helena, Ark.

III.—"All cases where efforts are now being made to complete the proposed roads and earn the grants."

All of said cases are stated under the first head, except that of the Oregon Central Railroad, hereinafter referred to under the fifth head,

and the Vicksburg, Shreveport and Texas Railroad, hereinafter referred to under the seventh head.

IV.—"The quantity of land, if any, patented to the said several roads, if any, since said report."

No lands have been approved or patented for any uncompleted road since said report of March 27, 1882, was made, except in the case of the Wisconsin Central Railroad, hereinafter referred to under the seventh head.

V.—"All cases where claims for the completion or further construction of any of said roads have been made or filed as a basis for the claim that further quantities of land be patented to the State or companies."

The following-named roads are embraced in the terms of this inquiry: Atlantic, Gulf and West India Transit, Pensacola and Georgia, North Wisconsin, Northern Pacific, Atlantic and Pacific. All of said roads are named under the first head, portions of the same having been constructed during the past year.

The Oregon and California, formerly the Oregon Central Railroad Company, in April and September of last year filed certain maps of definite location of road in Oregon and asked for a withdrawal of lands lying opposite said road. I referred said maps to you with letter of September 23, 1882 (copy herewith inclosed marked A), and declined to recommend the withdrawal asked for. No action has been ordered by you in said case since said date. I have been unofficially advised that the New Orleans Pacific Railway Company, formerly New Orleans, Baton Rouge and Vicksburg Railroad Company, have filed in your office evidence of the construction of the major portion of their located road, and have made claim for the lands lying opposite thereto, but I have not received any official information on the subject. The Vicksburg, Shreveport and Texas Railroad might properly be included under this head, but its status will be found hereinafter under the seventh head.

VI.—"As to the roads, toward the building of which nothing has been done, whether the building of them has been probably abandoned, if known, and the cause of delay in building the same."

I am not in possession of any information which leads me to believe that any of the roads named under the second head will be constructed.

The president of the Gulf and Ship Island Railroad Company, however, as shown by the records of this office, applied to you July 17, 1882, by letter (copy herewith, marked B), for a withdrawal of lands along the line of the road as located in 1860. You referred said letter to this office for report, which was submitted to you on July 24, 1882 (copy herewith, marked C), and on October 20, 1882, by letter of that date (copy herewith, marked D), you rejected said application. No cause is assigned for the delay and failure in building this road.

VII.—"Any information the department may possess which may be useful in determining whether any of the said grants should be declared forfeited and the lands to revert to the government."

No attempt has been made, nor is any contemplated, so far as I am

On the 5th September, 1882, you referred to this office, for report and recommendation, a letter dated August 24, 1882, filed by W. K. Mendenhall, attorney for the Oregon and California Railroad Company, and map accompanying the same, showing the definite location of the line of said railroad from station 2,376×50, in township 31 south, 7 west, to the north line of section 33, 34 south, 6 west.

Mr. Mendenhall requests that you direct the withdrawal of the lands along the line of definite location, as shown by these maps, in accordance with the act of July 25, 1866, granting lands to aid in the construction of said road.

The line of road, as shown upon the said maps, appears to have followed the direction indicated in the granting act, to a point in section 33, 34 south, 6 west, about 38 miles north of the State boundary, and in a direction to connect with the line of the California and Oregon Company of California, which has located its road to the north line of township 46 north, 5 west, in a northerly line from its starting point on the Central Pacific road.

The act approved July 25, 1866 (14 Stats., p. 239), provided for the construction of a railroad from Portland, Oregon, to the Central Pacific in California; the California and Oregon Railroad Company to construct that part of the road in California, beginning at a point on the Central Pacific Railroad, and running thence northerly to the northern boundary of the State, and the Oregon and California Company to construct that part of the said road in Oregon, beginning at Portland, and running thence southerly to the southern boundary of Oregon, where the same should connect with that part of the said line to be built by the first-named company.

The act required the completion of the entire road on or before July 1, 1875. By the act of June 25, 1868 (15 Stats., p. 80), the time for completing the said road was extended to July 1, 1880.

The estimated length of the lines of said road in Oregon is 315 miles. Prior to July 1, 1880, 197 miles of road, from Portland to Roseburg, were completed. No evidence of further construction has been received at this office.

In view of the fact that the statutory period within which the entire road should have been constructed has long since expired, and of the further fact that legislation concerning all grants in like condition has been proposed and is now pending, this office is not prepared at this time to recommend the acceptance, by the department, of these maps, nor any further withdrawal of lands for the benefit of the grant in question.

The maps are accordingly returned herewith, together with the letters filed with the same.

Very respectfully,

N. C. McFARLAND,
Commissioner.

Hon. H. M. TELLER,
Secretary of the Interior.

B.

JACKSON, MISS., ———. 1882.

To the Hon. Secretary of the Interior:

The undersigned, president of the Gulf and Ship Island Railroad Company, corporated under the laws of the State of Mississippi, would respectfully represent to the Hon. Secretary of the Interior:

That Congress, by the act of 11th of August, 1856, granted to the State of Mississippi, for the construction of the Gulf and Ship Island Railroad, alternate sections of public lands for a width of six miles, &c. (vol. 11, Statutes at Large U. S., p. 30). (A like grant was by the same act made for two other roads.)

In 1860, a definite location of the Gulf and Ship Island road was made, map of which was filed in the Interior Department. This location and map was intended to give notice to the United States, and the land office department, of the area and location of the land granted, so that the same should be reserved from further sales. The undersigned would further represent that the legal effect and operation of said act of Congress was to vest in the State of Mississippi a present estate in fee in said lands, subject to a condition subsequent; that is to say, subject to a right in the United States, by positive act, to claim a restoration of said lands to the public domain on the non-completion of the railroad within the time limited, namely, ten years.

The undersigned insists that by virtue of the said act of Congress the State of Mississippi became owner in fee of said lands, in trust from the railroad, and will so continue owner until Congress resumes the grant.

The undersigned further insists that the grant by Congress separated said lands from the public domain, and devoted them to the use and purpose named in the act of Congress; and that a disposition of any of saids lands, by sales by the local land office, is absolutely illegal and violative of the terms of the grant in the act of 11th of August, 1856. This is clearly the ruling of the Supreme Court of the United States, in

No lands have been approved to the State for the benefit of the road, and no portion of the road has been constructed. There is not any evidence on file as to the disposition made by the legislature of Mississippi of the grant made for the benefit of this road. A bill (H. R. 6390) is now pending before Congress providing for the repeal of so much of the act of August 11, 1856, as makes a grant for the benefit of the road in question.

There is also a bill (H. R. 868) pending before Congress which proposes to grant to the State of Mississippi to aid in the construction of the Gulf and Ship Island Railroad "all the public lands heretofore granted for the same purpose" by the act of August 11, 1856. In view of the facts above stated I decline to recommend the withdrawal asked for by Mr. Adams.

I return herewith Mr. Adams's letter.

Very respectfully,

N. C. McFARLAND,
Commissioner.

Hon. H. M. TELLER,
Secretary of the Interior.

D.

DEPARTMENT OF THE INTERIOR,
Washington, October 20, 1882.

SIR: I have considered the contents of letter (without date, but received July 17 last) from Wirt Adams, esq., president of the Gulf and Ship Island Railroad Company, in which he requests that the local officers of the State of Mississippi be directed to refrain from further sales or disposition of lands in the even sections within the limits of the grant for said road by act of August 11, 1856; also your report to me of July 24 thereon.

Briefly, the facts appear as follows:

Congress, by act of August 11, 1856 (11 Stat., 30), made a grant of six sections of land per mile to the State of Mississippi for a road from Brandon to the Gulf of Mexico. The act provided for the sale by the State of the lands granted as follows: The first 120 sections could be sold in advance of the construction of any portion of the road, and a like quantity following the completion of any continuous twenty miles of road. The act also provides that if the road be not completed within ten years "the lands unsold shall revert to the United States." A map of definite location of the road was filed in your office November 27, 1860, and "accepted as the basis of the grant." No withdrawal was ever made upon the map of definite location. On the 22d of October, 1856, the local land officers in Mississippi were instructed in effect by your office, that upon the filing in their respective offices of a certified map of a line of route of said road as "definitely fixed," they should, without awaiting further instructions, cease to permit pre-emption entries or locations, for any purpose, upon "the lands within fifteen miles of said route."

No map of definite location appears to have been filed in any of the local land offices in Mississippi, and pre-emption entries were therefore permitted within the limits of the road up to the commencement of the war of the rebellion, when said local offices were closed.

When these offices were reopened following the war, homestead entries only were permitted upon the lands in question, for the reason that an act of Congress approved June 21, 1866, reserved all the public lands in Mississippi and other Southern States for homestead purposes.

On June 22, 1876, an act was passed restoring lands in said States to pre-emption entry after having first been offered at public sale.

Under the provisions of this act all the vacant lands in Mississippi were in 1878 and 1879 offered, and such as were not disposed of at public sale have since been held subject to homestead, pre-emption, or private entry. No reservation was made for the road in question. This condition has continued all these years since 1860 without protest or objection from any quarter, and no claim has been made in behalf of the State, or any company organized under her laws, to any lands under or by virtue of the act of August 11, 1856, until the receipt of Mr. Adams's letter a few weeks ago.

There is no evidence on file in this department as to what disposition, if any, was made by the legislature of Mississippi of the grant made for the benefit of this road. A bill (H. R. 6390) is now pending before Congress, providing for the repeal of so much of the act of August 11, 1856, as makes a grant for the benefit of the road in question.

There is also pending a bill (H. R. 868) which proposes to regrant to the State of Mississippi, to aid in the construction of the Gulf and Ship Island Railroad, "all the public lands heretofore granted for the same purpose" by the act of August 11, 1856.

In view of the foregoing facts, I must decline to direct the withdrawal of the lands asked for by Mr. Adams.

You will inform him of my action in the matter, furnishing him a copy of this letter.

Very respectfully,

H. M. TELLER,
Secretary.

The COMMISSIONER OF THE GENERAL LAND OFFICE.

E.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., April 14, 1882.

SIR: I have the honor to transmit herewith the report of Mr. P. J. Glover, a special agent of this office, relative to the present condition of the lands embraced in the grant made by Congress, June 3, 1856 (11 Stat., 17), for the construction of a railroad from Girard to Mobile, in the State of Alabama.

The granted lands were included within six alternate sections in width on each side of the contemplated road, exclusive of lands previously sold, pre-empted, reserved, or otherwise appropriated. Indemnity selections for specified losses were authorized to be made within 15 miles from the line of the road.

Among the material conditions of the grant were the following:

1. The lands were to be exclusively applied to the construction of the road.
2. They were to be disposed of only as the work progressed.
3. They were to be subject to disposal by the legislature of the State solely for the purpose mentioned.
4. No more than one hundred and twenty sections included within a continuous length of twenty miles of the road could be disposed of by the State in advance of construction.
5. When the governor should certify to the Secretary of the Interior that twenty continuous miles of the road had been completed, another 120 sections of the granted lands within a continuous length of 20 miles might be sold, and so on until the road was finished.
6. The road was to be completed within ten years from the date of the act.
7. If the road was not completed within ten years, no further sale of the granted lands was to be made, but the lands then unsold were to revert to the United States.

The map of the definite location of the road was filed June 1, 1858.

No record is found in this office of any certificate from the governor as to the completion of any part of said road, but it appears that up to January 31, 1861, there had been certified to the State of Alabama, on account of this grant, an aggregate of 504,145 acres of public land, being all, or nearly all, the land then vacant within both the granted and indemnity limits between Girard and Mobile. Of the land so certified, 208,767 acres were within the granted limits, and 295,377 acres within the indemnity limits.

It further appears as a matter of fact, as shown by Mr. Glover's report, which corresponds to the general information of this office, that the road was completed from Girard to Union Springs, a distance of 54 miles, in 1861, and that a further portion, from Union Springs to Troy, a distance of 30 miles, was commenced after the close of the war, and completed in 1871, making the total length of constructed road 84 miles. It is understood that construction definitely ceased at Troy.

Mr. Glover finds that the whole amount of public land available for the purpose of this grant, between Girard and Union Springs, was 1,601 acres within the granted limits, and 1,399 acres within the indemnity limits.

The records of this office show that these were the amounts certified to the State between said points, and that the amount certified between Union Springs and Troy was 9,327.88 acres within the granted limits and 9,397.84 acres within the indemnity limits, or a total of 18,725.72 acres between the latter points. The total amount certified between Girard and Troy, and which was all the public land of the United States remaining between those points at the date of the definite location of the road, was 21,723.31 acres. The amount of land certified to the State in excess of the amount that could be claimed as inuring to the grant along the line of actually constructed road is therefore 482,421 acres.

It does not appear that any portion of the land certified to the State had been sold or used for the purpose of the road at the date of the expiration of the time allowed for construction, neither does it appear that any portion of the land had been certified over to the railroad company at that period.

By the act of the legislature of the State of Alabama, approved February 1, 1858, the State accepted the grant in aid of the construction of the Girard and Mobile Railroad, upon the terms, conditions, and restrictions contained in the act of Congress making the grant.

The second section of the legislative act provided that the lands, powers, and privileges granted and conferred by Congress to aid in the construction of a railroad from Girard to Mobile "are hereby granted to and conferred upon the Mobile and Girard Railroad Company * * * for the purpose and under the restrictions specified in said act of Congress, as soon as said company shall execute and deliver to the governor of this State a bond, faithfully to use said lands for the purpose of its donation, and to abide by and perform the provisions and conditions in the said act of Congress contained."

In a letter addressed to Mr. Glover by the private secretary of the governor of Alabama, dated August 19, 1881 (copy herewith), it is stated that in the records of the executive office there is nothing to show when the road was begun, the progress of its construction, or the date of its completion to its present terminus at Troy, and no evidence that the company ever executed a bond "to faithfully use said lands for the purpose of its donation, and abide by and perform the provisions and conditions" of the act of the general assembly approved February 1, 1858, or that the governor ever certified to the Secretary of the Interior the completion of any twenty continuous miles of the road.

In June, 1857 (9 Opinions, 41), Mr. Attorney-General Black expressed the opinion that grants to States, similar to the grant in question, vested in the States a fee simple title to the granted lands without a patent; that the definite location of the road would locate the grant, and that lists of lands embraced in the grant might be furnished for information just as any other information would be given from the records of this department, but that such lists would have no influence on the title.

It is to be presumed, and is, I believe, a matter of fact, that the lists of lands within the limits of railroad grants which in 1860, and prior thereto, were certified to States, as in the present instance, were so certified under the opinion of the Attorney-General as information from the records of this office, and that the same did not purport to convey the title. Whatever title the State had was derived from the granting act and was subject to its provisions, conditions, and limitations. The lists defined the lands which were supposed to be subject to the operation of the grant, leaving the question of the title to the described lands where it was left by the statute, and as it would have remained if no lists had been certified, and as it did remain after as well as before such certification.

This I conclude to be the fact as to lands certified within granted limits. As to the lands embraced within indemnity limits which were certified to the State in advance of the construction of the road, and before any right of indemnit selection had been acquired, and to which no such right has ever been acquired, the question arises whether under the act of Congress of August 3, 1854 (section 2449 Rev. Stat.), said certifications were not wholly without legal force or effect.

In any event it would appear that whatever title the State might have had, or might claim, to any of the lands described in the certified lists, whether such lands were within the originally granted, or the indemnity limits, was subject to the forfeiture provision of the granting act after June 3, 1866.

Subsequent to that period application was made to this office for copies of the originally certified lists, which were furnished under date of November 29, 1870, coupled with a statement from the Commissioner that the title to the described lands had lapsed to the United States because of the non-completion of the road.

By the act of the legislature of the State, approved February 10, 1876, the governor was authorized and required to transmit to the proper railroad companies the lists of all lands certified from time to time by the Commissioner of the General Land Office, and to indorse on the same his approval, and it was provided that the lists so indorsed should operate as a conveyance to the railroad companies, respectively, of all the right, title, and interest the State may have derived under the act of Congress of June 3, 1856.

It appears from a printed statement purporting to be a memorial to Congress by the Mobile and Girard Railroad Company, a copy of which has unofficially been furnished me and is herewith inclosed, that on December 3, 1879, the governor of Alabama indorsed over to said company the lists of lands certified to the State in 1860 and 1861, as hereinbefore recited. It is to be presumed that the certified copies obtained in 1870 were the lists mentioned as having been so indorsed.

It is stated in this memorial that the company disposed of about 96,000 acres of the land "in payment of services to commissioners and agents in selecting said lands and obtaining certificates for the same."

Mr. Glover reports the result of his investigations into this transaction, by which it appears that on April 25, 1868, the Mobile and Girard Railroad Company entered into a contract with Abraham Edwards, then register of the United States land office

ntgomery, by which the company agreed to convey to said Edwards an amount
d equal to 10 per cent. of all such land as should be acquired by the railroad
ny; that on June 24, 1868, the company conveyed to said Edwards one undi-
tenth part of the lands that had been certified to the State, but which had not
een indorsed over to the company; that by a resolution of the board of direct-
ssed October 31, 1868, the railroad company agreed to convey to said Edwards
ent. additional of all of such lands for which the said Edwards should secure
s to the company; that on January 21, 1871, and after certified copies of the
l lists had been obtained from the General Land Office, a partition was made
lands, and three-twentieths thereof, amounting to 96,476 acres, were selected
nveyed to Edwards by deed from the company, he relinquishing the undivided
th previously conveyed. It also appears that John A. Pickersgill, of New
nd Thomas Ewing, of Ohio, were parties in some interest with Edwards in
nsaction. These facts, Mr. Glover states, are matters of record.

ould appear from this recital that the 96,476 acres reported by the company as
been disposed of "in payment of services to commissioners and agents in se-
said lands and obtaining certificates for same," were so disposed of without
ate purpose. The selection of the lands for certification by the Commissioner
General Land Office was made prior to 1861, and hence it is apparent that the
atively small expense attending such selection could not have been an element
consideration for which this deed was given. The only "selection" to which
xpense to the company may have been involved must have been the selection
y the "commissioners" or "arbitrators" who made the partition above referred
i le the "services" contracted for by the company and satisfied by the deed of
acres of land, would appear to have been of an imaginary character. I con-
that the conveyance of said 96,476 acres did not amount to a *bona fide* disposal
lands.

company further set forth that they have sold to sundry parties about 164,000
nore of the land, of which 116,000 acres was sold at less than 5 cents per acre,
the company say was its full value.

as stated by Mr. Glover in the paper transmitted to me by you relative to his
tment as special agent, that a considerable purchaser from the company was,
r some time had been, engaged in cutting timber from the lands, and using the
n the construction of railroads in Georgia.

ch cutting and removal have taken place on the 116,000 acres referred to, it is
nable that whatever may be the value of the land for agricultural purposes, it
ave an additional and considerable value for the timber upon it. A sale of
ble timber lands at 5 cents per acre could hardly, I suppose, be held to be a
de sale.

whatever the facts may have been in respect of these attempted conveyances
railroad company, the parties assuming to derive under the company's claim of
ad knowledge of the defective character of that claim, and cannot therefore be
ed as innocent purchasers.

not advised whether the company now operating this road, and which is pre-
to have constructed that portion of the line between Union Springs and Troy,
not the same company that built the road from Girard to Union Springs; nor am
sed of the terms upon which the present company, if different from the former
cquired the property and franchises of the original corporation, nor whether the
paid would indicate that the contingent expectation of coming into the posses-
f the forfeited land grant was or was not a consideration in the case.

it is shown that no apparent title to any of the lands was acquired by any cor-
on until 1879, and I do not know upon what ground it could be assumed that
ate then had authority to transfer this grant.

re can be no doubt, I think, that any disposal of the land by the State, except
horized by the act of Congress making the grant, was illegal and void, and con-
no rights upon the assignees of the State.

reviously stated, the total amount of land that could be claimed as inuring to
tate by virtue of the actual construction of the road from Girard to Troy, is
.31 acres. Whether or not the legal title to this land should be sought to be
red to the United States, would, I suppose, be a proper subject for legislative
leration.

legal title to the remainder of the lands described in the certified lists, amount-
482,422 acres, should, I think, be recovered by judicial proceedings, which may
less be instituted to enforce the forfeiture of the granted lands, and to vacate
le, if any, that passed by the erroneous certifications of lands within indemnity

spectfully recommend proper action to this end. Should this view meet with
oncurrence, the necessary description of the lands embraced in the certified lists
e furnished whenever the same may be desired.

The following papers are inclosed herewith:
1. Mr. Glover's report, with accompanying papers.
2. Memorial of the Mobile and Girard Railroad Company.

Very respectfully,

N. C. McFARLAN
Commis

Hon. S. J. KIRKWOOD,
Secretary of the Interior.

F.

WASHINGTON, D. C., *February* 20,

SIR: Inasmuch as the House of Representatives has recently called upon you lution for information relative to the progress of construction, and other facts re certain railroad land grants, and it is understood to be your desire and intenti spond to said resolution by giving a full and detailed report of all the facts a tistics falling within the scope thereof, I have the honor to file herewith the affid Francis P. Stubbs, of Monroe, La., and F. Y. Dabney, chief engineer, showing th ress of the work of construction, and the reasons which have operated to pre construction of the road known as the Vicksburg, Shreveport and Pacific Rai Louisiana, viz: The affidavit of Francis P. Stubbs, shows that that portion of t lying between Red River (at Shreveport) and the Texas State line, a distanc miles, and that portion lying betwen Vicksburg and Monroe, a distance of 7 had been built prior to the commencement of the late civil war (1861); t eastern division of the road was almost entirely destroyed by the hostile ar the year 1863, and has been rebuilt since the close of the war; that after the the war, in 1866, an owner of four of the first mortgage bonds of the road s fully succeeded, under a decree of the State courts, in obtaining control of th and its franchises, whereupon an action in chancery was commenced in the States circuit court of Louisiana to annul this sale, which action finally res the setting aside the action of the State courts, and the sale of the road to its owners in 1880, under a decree of the Supreme Court of the United State this litigation absolutely destroyed the credit of the rood, and its ability money to continue the work of construction; that the new company, on com possession, immediately commenced building the unconstructed portion of th and the work of construction is now progressing with great energy.

The affidavit of F. Y. Dabney, chief engineer and superintendent, showing t unfinished portion of the road is being built as rapidly as men and money can plish that result, and that an iron bridge over the Ouchita River costing upw $150,000 has been built in the past few months.

There are other important facts to which I desire to invite your attention.

By the construction of 94 miles of road this company earned 360,960 acres of which amount it has received title for 353,212 acres, leaving a balance due an tified of 7,748 acres.

An examination of the records of your office relating to the lands throughout entire limits of this grant has been made within the past three months under mediate supervision, and the uncontrovertible fact is revealed that there mains of vacant unappropriated lands subject to selection in satisfaction of thi in both 6 and 15 mile limits, but 20,632.30 acres.

If the 7,748 acres earned and not listed be deducted from this 20,632.30 vacant lands, the remainder, 12,904.30 acres, will be found to truthfully repre whole amount of lands subject to forfeiture for failure of the company to com road within ten years from the date of the granting act.

I invite your especial attention to these facts, as they refute the false and u statements which have been made that hundreds of thousands of acres of la withdrawn from market under this railroad grant.

Very respectfully,

M. D. BRAINARI
Attorney for V. S. and P. R.

Hon. N. C. McFARLAND,
Commissioner General Land Office.

G.

STATE OF LOUISIANA,
Ouachita Parish:

Before me, Julius Ennemoser, United States commissioner for the western of Louisiana, duly qualified commissioner, and sworn on this the 17th of A. D. 1882, personally came and appeared before me, Francis P. Stubbs, a c

parish and State, and to me well known, who having been duly sworn by me, ses and says:

has been a resident of said parish and State for more than thirty years last past. he was one of the original stockholders of the Vicksburg, Shreveport, and Texas oad Company, organized in the year 1853, for the purpose of constructing a oad from a point opposite Vicksburg, on the Mississippi River, westward through arishes of Ouachita and Caddo, to the Texas State line. That he was elected a tor in said corporation in the year 1858, and served as such until his resignation 53.

at the said company, at the commencement of the war between the States, had ructed that portion of their line extending from the Mississippi River to Mon- on the Ouachita, called the Eastern Division—had in 1863 nearly completed Vestern Division, the portion comprised between the Red River and the Texas line, altogether about ninety-four miles, and had done some work on the Middle ion, that comprised between the Ouachita and the Red Rivers.

at this work was done with means obtained from the stock subscribed, but ipally with the proceeds of the first-mortgage bonds of the company, secured mortgage executed upon the railroad, its property, rights, and franchises, and ands donated to through the State of Louisiana by the United States govern- , as per act approved June 3, 1856, to the railroad company. That many of these s were sold, the entire proceeds thereof, between seven and eight hundred thou- dollars, used in the construction of the road.

at in 1863, that portion of the road between the Mississippi and Ouachita Rivers, sed to the devastating overflows incident to the destruction of the levee system— prey to ceaseless and successive efforts on the part of the Federal as well as the ederate armies under special orders from their commanding officers—was almost ly destroyed, and the wonderfully prosperous country through which it ran be- a barren wilderness, which was not improved during the continuance of the Its destruction by the armies of both contending parties was full and complete.

at in 1866, shortly after the close of hostilities, an owner of a few (4) of the first- gage bonds obtained from the State courts an order of seizure and sale for the e debt against the whole property, and at sheriff's sale the property was adjudi- l to the plaintiff and six other gentlemen associated with him for the price of thousand dollars. The property so adjudicated included all the lands donated ne United States to aid in building the railroad, estimated then to be about 000) four hundred thousand acres.

e purchasers at this sale took possession and control of the property, and being nized into the North Louisiana and Texas R. R. Co. by the legislature of Louisi- proceeded to rebuild that portion of the road which had been destroyed as afore-

large majority of the holders of the mortgage bonds refused to acquiesce in this and the actions of the purchasers, and an action in chancery was brought in the ed States circuit court for Louisiana to annul the sale made by the authorities. is suit of Henry R. Jackson *et al. vs.* V. S. & T. R. R. Co., Ladeling & others, had for its object & purpose a foreclosure of the mortgage.

e litigation absolutely destroyed the ability of the new organization, the North isiana and Texas R. R. Co., to raise, by the means ordinarily resorted to, the funds ssary to rebuild and furnish the road, and in consequence of the litigation the k of finishing road suspended until the final termination of the same adverse to the ns of the purchasers—the North Louisiana and Texas R. R. Co.—and in Decem- 1879, the V. S. & T. R. R. Co., all its rights, privileges & franchises, with its lands, t of way, &c., especially including the lands derived from the United States and ially included in the mortgage, was sold under a decree of the Supreme Court of United States permitting it, was purchased by a committee of & representing the ers of the original first-mortgage bonds, as above described.

is committee, acting for their constituents, under the laws of Louisiana, organized present company, investing it with all its property, rights, franchises, land, &c. hus the Vicksburg, Shreveport, and Pacific Railroad Company, the present organi- on, derived its right to own and control the property, and its corresponding duty uilding and furnishing the road, long delayed by no fault of the original corpo- on, or of the holders of its securities, or those who now own it, under the final lement of the wasting proceeding in chancery.

mediately on coming into possession, the present company entered actively the k of finishing the railroad in accordance with the original purpose of its pro- ors, and now, with the eastern western divisions in successful operation, the pany is actively engaged in building the unfinished portions of the line; many tractors are in the field, and the times and conditions of the contracts require, er heavy penalties, the completion within the current year.

le utmost energy will to complete the work is manifest by the management.

Coupled with the undoubted ability of the company, financially, the public now has little doubt of the final completion in the early future.

Affiant states further that the facts above set forth are within his personal knowledge, he having been in some capacity connected with the organization having for their object the building of the railroad ever since its inception.

All of which affiant swears to the best of his knowledge and belief.

FRANK P. STUBBS.

Sworn and subscribed before me this 17th January, 1882.

JULIUS ENNEMOSER,
U. S. Commissioner, West District Louisiana.

DISTRICT OF COLUMBIA,
County of Washington:

W. A. Smith, being duly sworn, on oath says that the foregoing is a correct copy of the original affidavit of Frank P. Stubbs.

W. A. SMITH.

[SEAL.] F. M. HEATON,
Notary Public.

H.

STATE OF LOUISIANA,
Ouachita Parish:

Before me, Justice Ennemoser, United States commissioner for the western district of Louisiana, duly qualified, commissioned and sworn, on this the 18th day of January, A. D. 1882, personally came and appeared F. Y. Dabney, a resident of said parish and State, and to me well known, who, having been duly sworn by me, deposes and says:

That he is the chief engineer and superintendent of the Vicksburg, Shreveport and Pacific Railroad, and has been filling that position since the first of July last past: that previously to that time and since January, 1880, he was in the service of said railroad company as engineer; that the present management assumed control of said railroad on the first day of June last, and that the following results have been accomplished by them, looking to a speedy completion of the unfinished portion of the line between the town of Monroe and the city of Shreveport, a distance of ninety-five and a half miles by the line of survey:

First. That the eastern half of this gap, extending from Monroe to Arcadia, about forty-eight miles, has already been put under contract—one firm having recently taken the entire work of graduation, bridging, and cross-ties for that distance. That about 2,300,000 cubic yards of earthwork are involved in this contract—145,000 cross-ties and over 10,000 linear feet of bridging. That the contractors are under pledge (with heavy forfeit in case of failure) to complete it, as follows:

The first 12 miles out of Monroe, by or before July 30, 1882. The second 12 miles out from Monroe, by or before August 30, 1882. The third 12 miles out from Monroe, by or before Sept. 30, 1882. And the fourth and last 12 miles out from Monroe, by or before October 30, 1882. That work on this division was commenced about the first instant; that clearing and grading forces are being distributed gradually over the entire distances; that cross-tie cutters are at work, and that he is safe in asserting that the whole will be pushed as rapidly as the seasons will permit.

Second. That on the western half of the gap, extending from Arcadia to Shreveport, a distance of forty-seven and a half miles, the final location of the route was finished in the early part of last month (December), since which time he has had several of his assistants busily engaged in working up the profiles and estimates of that portion of the line, preparatory to letting it out to contract; that this work has been unusually hurried, in response to repeated letters and telegrams from the consulting engineer of their railroad system at Cincinnati, urging the necessity for haste in order to put the work under contract as soon as possible; that all the calculations of estimates & preparation of profiles were finished on the 16 inst., and have gone forward to Cincinnati; and that he thinks he can safely assert here that it is the company's intention to lose no more time in awarding a contract for this second division of the "gap" than is absolutely necessary for enabling the newspaper advertisements of the letting to become properly disseminated throughout the country.

Third. That a first-class railroad iron draw-bridge, spanning the Ouachita River at this place (Monroe) has been under construction for 12 months or more past; that it consists of four spans; two spans of about 250 feet each; one (the draw span) of 300 feet, and one of 100 feet; that these spans are supported by solid piers of brick masonry on substantial pile foundations; that the bridge is now approaching comple-

sion, and will probably be finished within the next thirty days, and that it will cost about $150,000.

Fourth. That among the most important matters presenting themselves for immediate consideration by the present management on assuming charge of the road was the condition of the roadbed on the operated portion of the line from Delta to Monroe; that out of a total distance between these points of seventy-three (73) miles, about forty (40) miles are inundated annually by the winter and spring rise in the Mississippi River; that the river water, after reaching a certain stage, discharged itself through what is known as "Ashton Crevasse," near the Arkansas line; that this surplus water is conducted by the Bayou Macon, and other intervening streams, upon the line of their road, gradually filling up the swamps & low basins, and eventually overflowing their track; that these overflows involve an almost total suspension of business, & for periods of time varying from one to four months; that so serious an incubus upon the prosperity of the road demanded prompt action, and that the management lost no time in taking the necessary steps for remedying the evil; that a contract was entered into about the first of September last for the raising of the track over this entire distance of forty miles, involving over 700,000 cubic yards of earth and some 6,000 additional feet of bridging, to say nothing of the cost of track-raising.

That although the work may not have been pushed with that vigor which the urgency of the case demanded, it is through no failure on the part of the R. Rd. company, and that it is safe at least to assume that in no event will they be subjected to another overflow after the one which is now threatening has passed.

All of which affiant swears to the best of his knowledge and belief.

F. Y. DABNEY.

O

TH CONGRESS, } HOUSE OF REPRESENTATIVES. { MIS. DOC.
2d Session. } { No. 18.

LLOTMENT OF LANDS IN SEVERALTY AMONG INDIAN TRIBES.

MEMORIAL

OF

THE CREEK NATION

ON

e subject of lands in severalty among the several Indian tribes, with accompanying papers.

JANUARY 29, 1883.—Referred to the Committee on Printing.
FEBRUARY 3, 1883.—Ordered to be printed.

the Senate and House of Representatives of the United States:

Referring to the bill now before Congress authorizing the allotment Indian lands in severalty, and to the petition of one or more tribes the Indian Territory for the transfer of the title to their lands from e tribe to its individual members—

The undersigned delegates' representing the Creek Nation of Indians ing in the Indian Territory and liable to be affected, directly or in-rectly, by any change in the existing land system, beg leave to call at-ntion to some of the results of former tribals of Indian tenure in sev-alty which are not generally known, and to other results which have ver before been presented to or considered in either branch of Con-ess.

It will be seen, 1st, that former experiments in allotment have had e effect in most instances of reducing the great body of the commu-ty subjected to the trial to a state of pauperism and beggary; 2d, at in several instances the experiments have affected injuriously the tality of the Indians upon which they were tried; that is, that during e period of allotment, the death-rate in the bodies referred to increased d that it was diminished among the same Indians after their return the tenure in common. In other words, it will be found that more an half of the Indian communities who have tried the experiment, ve not only been reduced thereby to extreme destitution, but have ually suffered a considerable reduction in their numbers, caused by atly increased mortality.

Before proceeding to any detailed statement, it may be well to pre-se:

1st. That it is not the intention of this memorial to object to the indi-

vidual ownership of improvements made upon land by the members of any Indian tribe, band, or nation, but simply to show the injurious effect of a transfer of the *title* or *fee* of the land from the nation, tribe, or band to the individuals composing it. The individual ownership of improvements prevails with the best results among the five nations represented in part by your memorialists; whereas the attempts heretofore made to effect a permanent change in their tenure from the nation to its constituent parts have been followed, as will be hereafter seen in this memorial, by disastrous results.

2d. The preliminary remark should also be made that those who care nothing for the Indian or his welfare will find in this memorial references to record evidence showing that the proposed change in Indian land titles has a direct tendency to saddle upon some of the States of the Union an "intolerable burden of vagabondage, pauperism, and crime," words used by the late Superintendent of the Census, General Francis A. Walker, in speaking of what he had seen while Commissioner of Indian Affairs of the practical working of efforts to break up tribal governments and to throw its subjects into closer relations with the whites as citizens of the United States.

In the annual report from the Indian office for 1862, the Commissioner, speaking of the central superintendency, says that since his preceding report (for 1861):

> Lands have been allotted in severalty to the Sacs and Foxes and to the Kaws. Allotment to the Delawares has also been completed. A treaty has also been concluded with the Pottawatomies and with the Ottawas providing for a similar allotment to such as may desire it.
>
> A fruitful source of difficulty which detracts from the success of our Indian policy is found in the fact that most of the reservations in this [central] superintendency are surrounded by white settlements, *and it has heretofore been found impossible to prevent the pernicious effects arising from the intercourse of vicious whites with the Indians. To remedy this, it has been suggested that the various tribes should be removed to the Indian country south of Kansas.* (Report 1862, pp. 23, 24.)

Acting upon the plan thus "suggested," in less than ten years after the date of the report from which the foregoing extract is taken, the five tribes therein mentioned had removed in whole or in part to the Indian Territory. The allotments referred to proved in all five cases a failure. The great bulk of those who tried them went back to the tenure in common, most of them holding lands as other Indians hold them in the Indian Territory.

PERNICIOUS EFFECT UPON VITALITY.

Some of the "pernicious effects" to which the Commissioner refers may be inferred from the following extracts from the annual report for 1868, six years later, of Superintendent Murphy, then in charge of the central superintendency:

> The Indian tribes of this superintendency, once so numerous and powerful, are rapidly falling away, and are destined at no distant period to be known only in history. Humanity demands for this unfortunate race that their journey to the land of shadows be smoothed by the tender care of a magnanimous government. How rapidly they are passing away will appear from the following facts:
>
> In 1854 the Kaskaskias, Peorias, Weas, and Piankeshaws were confederated, and their number at that time was 259. Their present number is 179, showing a decrease of 80 in fourteen years.
>
> In 1854 the Miamies numbered 193. They now number 92, a decrease of 101 in fourteen years.
>
> In 1846 the Sacs and Foxes, of the Mississippi, numbered 2,478. They now number 957, including those in Iowa, a decrease of 1,521 in twenty-two years.
>
> In 1830 the Ottawas, of Blanchard's Fork and Roche de Bœuf, numbered 400. Their present number is 151, a decrease of 249 in thirty-eight years.

In 1847 the Kansas or Kaw Indians numbered 1,500. Their present number is 620, a decrease of 880 in twenty-one years.

In 1846 the Pottawatomies numbered 3,235. Their present number is 2,025, showing a decrease of 1,210 in twenty years.

In 1839 the Shawnees numbered 963. Their present number is 649, a decrease of 314 in twenty-nine years.

In 1862 the Kickapoos numbered 409. Their present number is 269, showing a decrease of 140 in six years. This decrease it partly owing to the fact that about 60 of the last-named tribe emigrated to Mexico in the year 1863. (Ind. Aff. Rep. 1868, p. 259.)

A clearer view of the foregoing details is given in the following recapitulation:

Kaskaskias, Peorias, &c., in 1854, 259; in 1868, 179; loss in fourteen years, 80.

Miamies in 1854, 193; in 1868, 92; loss in fourteen years, 101.

Sacs and Foxes in 1846, 2,478; in 1868, 957; loss in twenty-two years, 1,521.

Ottawas in 1830, 400; in 1868, 151; loss in thirty-eight years, 249.

Kansas in 1847, 1,500; in 1868, 620; loss in twenty-one years, 880.

Pottawatomies in 1848, 3,235; in 1868, 2,025; loss in twenty years, 1,210.

Shawnees in 1839, 963; in 1868, 649; loss in twenty-nine years, 314.

Kickapoos in 1862, 409; in 1868, 269; loss in six years, 140.

Total loss, 4,495.

Four of the tribes designated by Superintendent Murphy are mentioned in the preceding extract from the report for 1862 as having had, or being about to have, their lands allotted in severalty. Every one of the eight tribes specified had been subjected to that process, and in every instance it was a failure. Attention is invited to the fact indicated in the official returns that in five tribes out of the eight the death-rate was higher during the allotment period than it was before or after. In two others it was higher during that period than it was after the return to the other system. In one tribe only—the Kansas—the decline was greater both before and after than it was while holding in severalty.

POTTAWATOMIES.

Of the survivors indicated by Superintendent Murphy in 1868, 2,025, more than 40 per cent. of the whole were Pottawatomies.

Provision for allotment was made in their treaty of 1861, which secured a proportionate share of land for those wishing to hold in common.

The report for 1863, pp. 27 and 28, shows that the aggregate was then 2,274, and that allotments to 1,375 individuals were nearly completed.

A roll prepared by Edward Walcott, specially commissioned for the purpose, commenced in 1863, was increased to 1,414 in May, 1865.

At the same time he prepared a roll of those desiring to hold in common, embracing an aggregate of 780, including men, women, and children, and also some who had previously been placed on the allotment list, and who were, therefore, to be deducted from the aggregate of 1,414.

The whole number on both rolls, as finally approved, May 6, 1865, was 2,180, and that number was made the basis for the subsequent partition of tribal funds between the "citizen" Pottawatomies, and the "Prairie" band, who retained the tribal organization and elected to hold their lands in common.

Before the distribution was made, however, a portion of the 780 withdrew from the "Prairie" band and took allotments. The trust fund account in the annual report for 1871 indicates, on p. 673, that 1,518

Pottawatomies had received a pro rata share of tribal funds; and the report for 1873, p. 357, shows that 86 more "citizens" had been paid in like manner, making an aggregate of 1,604 "citizens," the number mentioned on p. 366 of same report for 1873, and also "six persons who have become citizens," mentioned on the same page, in all 1,610 "citizens" and "570 Indians comprising the Prairie band of Pottawatomies," charged on the same page with $26,838.28 as their share of certain tribal funds.

The language used in the trust fund reports and in the act of Congress of March 3, 1873 (17 Stat., 452), authorizing the sale of bonds to pay "86 2180th parts" to 86 citizens, shows that 2,180 was regarded in May, 1865, when the Walcott roll was approved, as the entire number of the Pottawatomies at that time.

The distribution of funds, as above shown, was on the basis of $\frac{1610}{2180}$ to the citizens, and $\frac{570}{2180}$ to the Prairie band, holding in common.

For this band there was set apart under their various treaties a reservation in Kansas amounting, as shown by the report for 1881, p. 265, to 77,358 acres.

The same report, p. 106, states that the Indians belonging to the reserve number 750, of whom 280 were in Wisconsin, 40 in the Indian Territory, and the residue of 430 on their reserve in Kansas, the aggregate of 750 being 180 more than the residue of 570 remaining on the roll of 2,180 in 1865, after deducting 1,610 who became citizens, an increase of 180 or 31½ per cent. in sixteen years.

The citizen Pottawatomies are frequently spoken of in the reports as having squandered their resources and taken refuge in the Indian Territory on the reservation provided by their treaty of 1867. The report for 1872 indicates (pp. 39 and 89) that 1,600 had gone there. Later reports show that there were only 300 on that reservation.

From the census returns for 1880, it appears that the whole number of Indians out of tribal relations in the four counties of Jackson, Pottawatomie, Wabaunsee, and Shawnee, in the State of Kansas, the counties in which the citizen Pottawatomie allotments were taken, was 370, which added to the 300 in the Indian Territory makes an aggregate of 670, which comprises all of the citizen Pottawatomies of whom any trace can be found in the printed reports or census returns. The residue of the 1,610, 940, seem to have disappeared since 1873. This decrease, equal to an average annual loss of 117.5, or more than 7¼ per cent. on 1,610, is so much in excess of any other noted, and is in such strong contrast with the increase during the same period in the "Prairie" band of the same Indians, that there is reason to doubt the correctness of the statement. The data from which the conclusions are derived are given in the appendix.

SACS AND FOXES OF THE MISSISSIPPI.

Next to the Pottawatomies, the Sacs and Foxes of the Mississippi constitute the largest tribe mentioned in the extract from Superintendent Murphy. In their case the decline, both actual and proportionate as stated by him, is much greater.

Unlike the Pottawatomies nearly all of them can be traced. They have not declined, but slightly increased, since they ceased to hold in severalty.

Their number in 1868, as stated by Superintendent Murphy, was 957, including those in Iowa. The last report for 1881 shows that the number in Iowa and the Indian Territory was at that date 795, to which

must be added the Mokohoko band still in Kansas, in all 175, according to p. xxxix of the report for 1880, making an aggregate of 970, an increase of 13 since 1868.

Superintendent Murphy says they numbered 2,478 in 1846, 957 in 1868, a decrease of 1,521 in twenty-two years, or 61 per cent., equal to an average annual decline of 2.8 per cent.

Their allotments in severalty under the treaty of 1859 were completed in 1862. (Report 1862, p. —.)

They then numbered, as shown by the report for 1862, p. 108, 1,180. In 1868, as above stated, it was 957, a decline of 223 in six years, nearly 19 per cent., and more than 3 per cent. per annum during allotment period.

In the fall of 1869 the greater part of them removed to the Indian Territory, where their lands are held in common.

Subsequent reports show occasional wanderings to and from their new homes, their settlements in Iowa, and their former residence in Kansas, the figures ranging from 400 to 500 in the Indian Territory, 300 to 355 in Iowa, and 150 to 200 in Kansas, there being no evidence of any decline during the last twelve years.

It would be a serious mistake to attribute the average annual loss of 3 per cent. during the six years of allotment wholly to that cause, as the loss had been nearly as great during the twenty years preceding allotment, being nearly 50 per cent. in the interval between 1842, when the number was 2,348, and 1862, when it was 1,180.

Allowance must also be made for the errors which frequently occur in Indian enumeration. Rolls for the distribution of annuities or rations are often in excess of the truth. On the other hand, their migratory habits frequently cause the omission of those who ought to be included. This is especially true of the Sacs and Foxes, who often pass in large parties to and from the settlements before referred to in Kansas, Iowa, and the Indian Territory, and also in Nebraska, the home of their kinsmen, the Sacs and Foxes of the Missouri.

But the excessive mortality prevailing among the Sacs and Foxes attracted the attention of their agents before and after their allotments were made. Before allotment it was attributed to habits of idleness and dissipation, engendered by large annuity payments, amounting in 1859 and 1860 to $55 per capita.

Their allotments were completed in 1862. In the report for that year the agent, Hutchinson, speaks of a decline of 161, partly owing to absence, and adds: "But with this allowance the percentage of decrease is fearful." (Report 1862, p. 108.)

His successor, Agent Martin, in the report for 1866, p. 267, says their number, 766, "is a decrease from the enrollment of the previous year, which can only be accounted for by the inevitable fate which governs all Indian tribes."

In the report for 1867, p. 299, Agent Wiley, alluding to a decrease of 57 during the year, says, "their census roll points to the fact that they are being fast gathered to their fathers."

The numerical returns show that the decrease continued so long as they remained on their allotments in Kansas.

In strong contrast to the expressions above quoted is the experience of that part of the tribe living in Iowa.

The first mention of them is in the report for 1866, which states, on p. 271, that when the allotments were made under the treaty of 1859, one of the chiefs being opposed to allotment, refused to be enrolled for the purpose, and to the full extent of his power prevented others from

being enrolled. For this "contumacious conduct" he was deprived of his chieftainship by the agent, with the approval of the government, and thereupon, without the consent of the authorities, went with some five or six lodges to Iowa, where they have remained.

Their right to a share of the annuities being subsequently recognized, the agent appointed to pay them states, in the report for 1867, p. 347, that they made their home on a tract of 80 acres which they had purchased in 1857. Before the payment they asked him to retain $2,000 of their money for an additional tract of 99 acres.

In 1868 they paid $3,500 for another tract; "have now 399 acres," costing $7,300. (Report 1868, p. 306.)

The report for 1881, p. 265, shows a further increase, swelling the whole to 692 acres.

The reports for 1867, p. 347, and 1868, p 306, show that the true number entitled to the separate payment in May, 1867, was 252.

Their number in 1881 was 355. (Report, pp. 105 and 280.)

This increase of 103, over 40 per cent., in thirteen years is doubtless due in part to accessions from their kinsmen elsewhere, as the vital statistics from 1875 to 1881, both inclusive, show only 64 births to 57 deaths. No returns are given prior to 1875. But in 1873 the agent, Howbert, calls attention to the fact that while those of the tribe in Kansas and the Indian Territory have "rapidly dwindled in numbers," those in Iowa have increased in an equally rapid ratio, numbering by the census just taken 335, an increase of 18 during the last year, including five additions from other settlements, being a net gain of 13, equal to 4 per cent. in one year. (Report 1873, p. 182.)

The impression that those in the Indian Territory had "rapidly dwindled" was doubtless made by the report for the preceding year of an unusually sickly season, "one to every ten of the Indians have died." (Report 1872, p. 245.) With that reduction the number was 433 in 1872, and has since been varied, chiefly by arrivals and departures of those living in Kansas. In 1881 it was 440. The vital statistics show 52 births to 41 deaths during the years 1878, 1880, and 1881, the only years in which they are given.

There is nothing in any of the reports, except that for 1872, above recited, to show any excessive mortality or decline among any of the Indians of this tribe since the removal of the main body to the Indian Territory in 1869.

SHAWNEES.

Provision was made for the partition of the Shawnee lands in their treaty of 1854. Allotments of 200 acres each were given to those who wanted them. An equal proportion was set aside for those wishing to hold in common.

Up to December 1, 1860, patents had been issued to 720. (Report 1860, p. 14.)

One hundred and sixty-one were enrolled to hold in common. (Report 1865, p. 500.)

Thirty-three thousand three hundred and ninety-three acres were set apart for those holding in common, as appears from the lists of reservations in the annual reports—enough, at the rate of 200 acres each, for 166 persons, which would make an aggregate of 886 in 1857, when the surveys and allotments were first made. (Report 1857, p. 169.)

There is nothing in the reports for 1857, 1858, 1859, or 1860 to show the number of the Shawnees during those years.

The report for 1862, p. 110, says that the whole number is 850, and that "all but about 100" hold their lands in severalty, under patents from the United States.

On p. 346 of the report for 1866, the number given is 660, of which 594 hold in severalty; 66 in common.

How and when the reduction occurred in the number holding in common does not appear. The letter of Commissioner Walker of January 13, 1872, in H. R. Ex. Doc. 64, second session, Forty-second Congress, shows that selections in severalty had been made for 69 of them, for whom patents were issued.

In 1868, p. 259, the whole number is said to be 649, of which it appears from p. 377 of the next year's report that 64 held in common.

The number, therefore, holding in severalty in 1868 was 585. The number to whom patents were issued was 789—720 as shown by the report for 1860; to which add the 69 in 1867, as shown by Commissioner Walker in the document above referred to, makes a total of 789; from which deduct the 585 survivors in 1868, leaves a loss of 204, or nearly 26 per cent. in the eleven years elapsing since 1857, when the work of allotment commenced.

The Commissioner states in the report for 1869, p. 33, that by an arrangement with the Cherokees made that year, the "severalty" Shawnees were to become citizens of that tribe. The "Black Bob" band, holding in common, did not wish to go with them. The reports for 1870, pp. 271 and 289, indicate that a part, but not all of them, had removed.

The Cherokee census for 1880 shows that there were 503 Shawnees in the Cherokee country. The Indian office report for the same year shows that there were then in the Quapaw Agency 25 "Cherokee Shawnees," making a total in the Indian Territory of 528; to which add for Shawnees in Monticello Township, Johnson County, Kansas, as shown by census of 1880, 16, makes a total of 544 against 585 in 1868—a loss of 41 against the number in 1868 of 585, or 7 per cent. in twelve years against 26 per cent. during the eleven years of allotment.

Of those holding in common for whom the Black Bob reservation was set apart—enough for 166, though the number given in the report for 1865 is only 161—no account appears beyond the statement of Commissioner Walker that patents had been subsequently issued for 69 who had made selections in severalty, and the further statement on p. 51 of the report for 1865, that they were compelled to leave their homes in the early years of the war. Their cabins were destroyed. They became scattered, and have been unable since to recover their lands. The number reported in 1868 was 64. They are said in the report for 1881, p. 278, to number 60.

If the original number was 166, as is inferred from the size of their reservation (33,393 acres divided by 200) and if no allotments were subsequently made for them except the 69 made in 1866, there should have been 97 in 1868, instead of the 64 reported in that year, a loss of 33, or 25 per cent. of the original 166. Whether any part of them joined other tribes, or whether they all died, there is nothing in the reports to indicate.

The experience of the "Absentee Shawnees" who separated from the main body and settled in the Indian Territory forty years ago, shows that under favorable circumstances there is no tendency in this tribe to decrease. As in other cases, the aggregate is occasionally varied by migration. But since 1873 the returns, so far as separately given, show an excess of 52 births over the deaths in four years out of a population of 600.

to become citizens, while those wishing to remain in the tribal
were to hold in common the lands provided for them by the same tr
in the Indian Territory.

The first notice of their number in the Indian county is in the r
for 1871, which shows that there were then 151 in the Quapaw Ag
The report for 1881 shows 150 in the same agency, a loss of only o
ten years.

It is proper, however, to state that a list was filed in the Indian
in April, 1871, showing 164 in the tribe and 55 citizens, in all 219,
more than the aggregate reported by both agent and superintende
1868.

On the other hand, the correctness of the list of 219 filed in 1
disputed in a memorial recently presented to Congress, support
numerous affidavits pointing out in detail its errors, and showing
the aggregate of the united tribes did not exceed 144 in 1870, incl
19 doubtful cases, which if omitted would leave only 125.

Without attempting to reconsider these conflicting accounts
sufficient to remark:

1st. That the mortality among these bands had attracted the att
of the government agents in 1868.

2d. That no evidence of excessive mortality appears in the r
since their removal to the Indian Territory; on the contrary, the re
as far as they go, show an excess of births over deaths.

3d. If the Indian list of 164 was correct, and they all moved
Indian country, the decline has been only 14, or 8.6 per cent. in
years, a smaller proportionate loss than the difference between
1870 and 259 in 1854.

MIAMIES.

Superintendent Murphy says the Miamies numbered 193 in
But the annual reports show that 207 were enrolled for paymen
year, and the report for 1860 states that since March 4, 1857, lan
been allotted and patented to 230 Miamies, in accordance with
treaty of 1854.

the reports to show that more than 64 actually went to the Indian Territory. The number of Miamies registered as in the Quapaw Agency in the report for 1880 is 64. In the report for 1881 it is 59. If the whole 72 actually removed to the Indian country, of which there is no proof, they have lost 13, or 18 per cent., in eight years, a rate of decrease very nearly though not quite as great in proportion as the lowest estimated decline during their allotment period in Kansas.

If, as the annual reports and the papers on file in the Indian Office indicate, 55 Peorias and 34 Miamies, holding lands in the counties of Linn and Miami, in Kansas, were made citizens in 1870 and 1873, the decline among them has been very much more serious. The census shows that in 1880 there were only 30 Indians in those two counties, a falling off of 59 or 66 per cent., in ten years.

OTTAWAS.

The Ottawas of Blanchard's Fork are represented as having numbered 400 in 1830. The report for 1862, p. 24, states that their lands had been surveyed and an early allotment secured. The same report, p. 109, says their number in 1862 was 208, showing a loss of 192 in 32 years, or 48 per cent., equivalent to an average of 1½ per cent. per annum.

In 1868 they were reduced to 151, having lost 57, or 27 per cent., in six years, equivalent to 4½ per cent. per annum.

In a treaty proclaimed that year (1868) homes were secured for them in the Indian Territory, where, in 1871, their number is stated in the statistical tables to be 149. Ten years later, in 1881, the number in the tables is 109, a loss of 40, or 27½ per cent. in ten years.

But there is nothing to show that the decrease in the Indian Territory was caused by mortality. The principal decline was between 1879, when the number was 140, and 1881, when it was 109, a loss of 31. But during the same period the births in this band exceeded the deaths, and their agent, Dyer, reports that in the Quapaw Agency, to which they belong, the Indians are "not diminishing, but increasing in numbers."

It is therefore probable that the falling off of 31 between 1879 and 1881 was owing to such absences as are frequently noted in the enumeration of other tribes.

That the Ottawas are not an exception in this respect, but are also more or less migratory, is shown by the statement in the report for 1865, that "their loss of some 30 by small-pox, besides deaths from other diseases, had been made up by accessions from the Ottawas of Michigan," a fact which indicates that the actual mortality while in the allotment state was greater than the rate stated in the subjoined tables. Their number at that time being only 200, 30 deaths in one year constitute a larger percentage of loss than any other recorded among the eight tribes under consideration.

KANSAS.

There is nothing in the reports to show that the vitality of either of the two remaining tribes, the Kansas or Kaws and the Kickapoos, was injuriously affected by allotment.

Among the Kansas the death rate seems to have been greater both before and after the period of allotment than while it lasted.

Their number in 1847 was 1,500.

In 1859 provision was made for the allotment of their lands, which

was completed in 1862. Their number, as stated in the report for that year, p. —, was 775, a decline of 725, or over 48 per cent., in fifteen years.

In 1873 they removed to the Indian Territory. The number that year is not given. In 1872, the year before, it was 593. During ten years of allotment, therefore, they lost 182, or less than 24 per cent. of 775, the number when it took effect.

In 1881 they were reduced to 303, a loss of 290, 49 per cent. in nine years.

The chief cause of their rapid decline is indicated in the reports.

In the report for 1872, p. 231–'2, Agent Stubbs says, "The health of this tribe is reasonably good, considering the constitutionally diseased condition of many, and their manner of living, though it is a noticeable fact that the tribe is steadily on the decrease."

The same agent says, in 1874, p. 219, "Syphilis is spreading rapidly through the tribe, and doing incalculable damage."

Agent Beade says, in the report for 1877, p. 94, "They are decreasing in numbers from year to year. Disease contracted with dissolute whites before their removal to the Indian Territory permeates the tribe, and seems to be incurable."

Agent Miles says, in 1879, p. 70, "They are rapidly diminishing in numbers, having lost about half their number in seven years, caused mainly by contagious diseases, with which the tribe is largely infected."

The same agent says, in 1881, p. 86, "Most of the full-blood adults are diseased, and the trace of the common enemy is plainly noticed in the children."

The locality of this tribe, on the Kansas River, along the line of one of the main thoroughfares for the California emigrants in 1849 and the next ensuing years, sufficiently accounts for their decline before 1862.

KICKAPOOS.

The wandering habits of a portion of the Kickapoos make it impossible to learn from the reports of their agents whether at any given period they were as a whole increasing or decreasing.

Superintendent Murphy calls attention to their decline from 409 in 1862 to 269 in 1868, a loss of 140 in six years, which he says was partly owing to the emigration of 60 of their number to Mexico in 1863.

The report of 1881 shows an aggregate of 650, or 241 more than the largest number mentioned by Superintendent Murphy in 1862, before the falling off to which he alludes, the increase being due to the return in 1875 of several hundred from Mexico after many years' absence.

This treaty of 1862 provided, as in some other cases, for two classes—those who chose to receive allotments, the others to hold in common.

In 1865, out of 238 then on the reservation in Kansas, 109 had taken allotments; 129 held in common.

The reports indicate a prejudice among the Kickapoos against allotment, which probably caused the abandonment of many allotments after their selection.

The report for 1869, p. 365, shows that out of a total of 265 the number then holding in common was 172, while those holding allotments numbered 93—an increase of 43 in the one case and a falling off of 16 in the other.

The report for 1880, p. 106, speaks of still further abandonments, and the report of 1881 states that the whole number then belonging to the reservation was 270, of whom only 40 occupied allotted lands.

The number actually on the reserve in 1881 was 240, the remaining 30 being in the Indian Territory with the Mexican Kickapoos, who number 180.

So far as can be learned from the vital statistics in the reports, the Kickapoos in the Indian Territory are increasing from natural causes, while those in Kansas are not.

In Kansas, to 79 births in seven years there were 80 deaths, a loss of one.

Among those in the Indian Territory, 59 births were reported in four years, against 36 deaths, a gain of 23.

WYANDOTTS.

The Wyandotts are not mentioned in the extract from Superintendent Murphy's report, though they were in his superintendency in 1868, and the decrease in their case was quite as remarkable as in that of some of the other Indians he specifies.

Their treaty of 1855 provided for dissolution of tribal relations, division of lands, and issue of patents to individuals who were, with a few exceptions, to become citizens.

The report for 1863, p. 238, describes a small portion as prosperous, but "a majority of them are in a much worse condition than they were before the treaty of 1855." Many of them who had comfortable homes, it says, "are now homeless." It would be an act of charity to secure a permanent home for them in the Indian Territory, "and if possible, save the remainder of the tribe from destruction."

Superintendent Murphy, in the report for 1866, p. 245, speaks of their affairs as in "a most deplorable condition," and thinks it best for them to get a home in the Indian country.

Such a home was secured for them by purchase from the Senecas, in a treaty concluded February 23, 1867.

That treaty provided that the lands secured were to *be held in common* by those, and those only, who *constituted the tribe*, of which none were to be allowed to become members except by the free consent of the tribe after its reorganization, and unless the agent certified that the party desiring to become a member is, "through poverty or incapacity," unfit to be a citizen, and is "*likely to become a public charge.*"

In the report for 1870, p. 258, Superintendent Hoag says that most of them have removed and nearly all will remove to the new home; that, situated as they have been, "subject to all the demoralizing influences that always infest such small tribes near large settlements, *their numbers have been fearfully decimated*, and their property squandered."

The report for 1871, pp. 461 and 499, shows that there was some feeling between the citizen and non-citizen classes, and that the tribe was reorganized in the Indian Territory, on the principle of excluding those who had been made citizens by the treaty of 1855, and recognizing as Indians, in pursuance of the treaty of 1867, only those who, under the third article of that treaty, had been classed either as exempt from citizenship, or as incompetent to manage their own affairs, or as orphans.

Full lists, now on file in the Indian office, were prepared by Special Agent Mitchell in July, 1871, of the survivors and descendants of those enrolled under these different heads, or as citizens in 1855, and including every Wyandott Indian then living who properly belonged, by descent or otherwise, to the tribe as enrolled in 1855.

The lists thus prepared showed an aggregate of 428, a decline of 126 in sixteen years, the number enrolled in 1855 being 554.

or 11 per cent. in less than nine years.

Additional particulars show that of late years the Wyandott in the Indian Territory have been unmistakably increasing.

Many circumstances combine to make the Wyandott enumer exceptionally reliable.

I. Lists were carefully prepared under the treaty of 1855 of a members of the tribe, each family arranged together, the whole i separate classes: 1st. Those who were competent to manage the affairs. 2d. Those who were not competent. 3d. Orphans, idiot insane. 4th. Those temporarily exempt from citizenship.

II. A register of the Wyandotts in Kansas and elsewhere, quired by the treaty of 1867, indicated those who, as Indians, w constitute the tribe, including the incompetents and orphans, a cluding those who had become citizens, none of the latter to be ad into the tribe except by its consent and on the certificate of the of incapacity for citizenship.

III. When the tribe was reorganized the citizen Wyandotts, t the newly acquired lands in the Indian Territory, were informe they could not be protected in such occupation. The questio arising as to who were and who were not members of the trib were prepared by the agent and approved by the department, the Wyandott council in 1871-'72-'73, based upon previous re

CHOCTAWS AND CREEKS.

The cases thus far considered have been confined to tribes having al-
ments in Kansas.
Experiments in allotment have been tried elsewhere on a larger scale
th results equally unfavorable to vitality.
Provisions for individual reservations or allotments in severalty occur
treaties with the Cherokees, Choctaws, Chickasaws, and Creeks.
By far the most extensive are those found in the treaty of 1830 with
e Choctaws, of 1832 with the Creeks, and of 1832 and 1834 with the
ickasaws, as they entered largely into the emigration policy of Presi-
nt Jackson's administration, which inaugurated the transfer of the
e leading tribes of the Indian Territory from their former homes east
the country they now hold west of the Mississippi.
The first treaty expressly providing for such a transfer was made
th the Choctaws in September, 1830. Originally intended to effect
e removal of the entire tribe to the country west, previously sold to
em, it was forced by the opposition to emigration into presenting the
ternative of going west as a tribe or remaining east as individual citi-
ns of the States, with a full proportionate share of the tribal terri-
ry to each one so remaining. It was hoped and expected by the
nited States commissioners that nearly all would go, but they were
mpelled to give every one desiring it the right to remain.
That feature of the treaty was expressed in its fourteenth article,
nich gave every Choctaw head of a family an unrestricted right to be-
me a citizen of the States, and to secure a grant in fee simple for a
ction of land, with a smaller additional quantity for each unmarried
ild.
One thousand five hundred and eighty-five heads of families, repre-
nting over 6,000 people, endeavored to avail themselves of this pro-
sion. Less than 150 succeeded in securing the lands to which they
ere entitled.
The Creek treaty of 1832 gave every Creek family a half section of
nd, with an additional quantity for each chief. Six thousand six hun-
red and ninety-six allotments were made, two thousand more in that
ne tribe than in all other tribes put together under the present system,
s shown by the report for 1881. The effect of these allotments, and
eir injurious consequences to the Creek people, will be shown pres-
ntly.
The Chickasaw treaties of 1832 and 1834 went beyond the Choctaw
d Creek treaties in giving reservations or allotments of two sections
each family, one section to each single person over twenty-one, and
lf a section to each orphan under twenty-one.
But there was this essential difference between the allotment features
the Chickasaw treaties and those in the treaties with the Choctaws
d Creeks: The Chickasaw allotments were meant for temporary use
ll a suitable home could be procured for the tribe beyond the reach
State laws. They were not intended or expected to be permanently
tained, but simply to be used as part of the means of effecting the
ansfer from the holding in common east of the Mississippi to a similar
olding west of the Mississippi. Careful provision was made for the
isposal, by intelligent and competent Indians belonging to the tribe, of
he lands of ignorant Indians who were not qualified to protect their
wn interests, and no individual or family was permitted to retain
ny land any longer than the nation might remain in the country. (7
Stat., 388.) The treaties providing for allotment were made in 1832 and

1834. The new home was purchased from the Choctaws in 1837. The removal of the whole tribe was effected soon afterwards, the allotments having been sold, and having thus accomplished the object for which they were intended.

A different state of affairs existed among the Choctaws and Creeks, and is to a certain extent indicated in their treaties.

The Chickasaws wanted to emigrate, and in accordance with that wish their allotments were made with special reference to sale.

The Choctaws and Creeks wanted to retain their old homes, and understood allotment to mean what it now promises other Indians—the assurance of keeping their homes forever. Allotment reconciled them to their treaties; not because they wanted separate land titles, but because they did not want to emigrate, and allotment was the only alternative. It was, for that reason, the indispensable feature, without which neither the Choctaw nor the Creek treaty could have been made.

The history of the Choctaw negotiations, in Senate Doc. 512, first session Twenty-third Congress, vol. 1, p. 251, shows that no progress was made till separate land grants were offered to every family desiring to remain in the ceded territory.

It will be seen that the Creek treaty could not have been made without a similar provision.

The Choctaws and Creeks really wanted to avail themselves of the benefit of allotment. About one-third of the Choctaws and all the Creeks then east of the Mississippi tried to do so. They constitute the only material portion of the five nations that made the effort to secure permanent homes in that way. It will be seen that the Choctaws and Creeks constitute the only portion of the five nations that have unmistakably diminished in numbers.

How far or to what extent the decline among the Creeks and Choctaws was affected or produced by their experiments in allotment cannot be ascertained. Both tribes were undoubtedly diminished in numerical strength by the exposure incident to emigration and by change of climate and the malarial effects of opening and settling a new country. They have also since lost by exposure during the late civil war. But the Cherokees and Chickasaws suffered in the same way from the same causes. It is fair to assume that the difference in their favor and against the Choctaws and Creeks is due in part, at least, to the mischievous effects of the allotment experiments tried by the two last-named tribes.

That those experiments were calculated to affect their vitality injuriously can easily be shown.

The Creeks, in 1832, ceded all their lands east of the Mississippi, reserving from the cession a half section, or 320 acres, to be selected by each head of a family, with an additional quantity for each chief. Patents in fee simple were to be issued at the end of five years to those who wished to retain their lands.

Without waiting for a patent the owner of each reserve could, at any time after it had been located, sell it, if so disposed, for a fair price, subject to the approval of the President, who was to appoint officers for the purpose of certifying to the fairness of the sale.

Under this arrangement 6,696 allotments were made.

Notwithstanding the vigilance of several supervising agents a system of fraud was inaugurated as soon as the sales began in January, 1834, and was kept up as long as the allottees remained in the country. Hostilities broke out among the Creeks in May, 1836, which led to a resolution of the House of Representatives calling for an investigation of the frauds in the "purchase of the reservations of the Creek Indians,

d the cause of their hostilities." Messrs. Crawford and Balch were pointed commissioners for that purpose. Their report, transmitted to ngress February 14, 1837, tells the whole story. It appears in H. Ex. Doc. 154, second session, Twenty-fourth Congress.

Mr. Balch, on p. 11, after setting forth the leading features of the aty, the desire of the United States that the Creeks should remove the country west of the Mississippi, and the stipulation that the Inns should be free to go or stay as they pleased, says the allotment a half a section of land to each head of a Creek family "was an inent vice in this treaty, but it was unavoidable. * * * It was s allotment that reconciled the nation. They were fed by the deive hope that they could live on their reserves, and cultivate and d them for their own separate use, like the whites."

Ir. Crawford, on p. 56, says:

he government gave a most reluctant assent to the principle of reservation which been the prolific parent of most of the misfortunes of the misguided Indians. President remonstrated and reasoned with the other contracting party against a ulation that must work injuriously, but in vain. The Creek chiefs were prepared esist, and did oppose the receipt of so much of the consideration in any other , insisting that upon no other principle would they treat.

Both commissioners give a detailed account of the subsequent prodings. Mr. Balch says, on p. 12:

he first sales of the reserves were made about January, 1834. Immediately there- r, the purchasers commenced a partial system of swindling upon the Indians. * * * money paid to the Indians was taken away from them, after they had acknowled a sale, either by fraud or force. In some cases in which they were unwilling eturn what they had received, they were whipped into acquiescence. In others y were paid in bank notes, a kind of currency for which they feel great contempt which they surrender for a small amount of specie.

he practice of personation was not unusual. Indians were bribed to appear be- the agents and declare that they were the owners of reserves belonging to others, they were permitted to acknowledge contracts for the sale of the same.

lthough many frauds were perpetrated throughout the year 1834, of the existence which the agents were apprised, still it was difficult to detect and defeat them. oe who were engaged in plundering these unlettered savages were emboldened success, and early in 1835 a plan was concocted to sweep from them all the reves that remained uncertified, amounting to more than fifteen hundred.

On p. 14 he says:

he talk of Opoethleysholo, at once full of dignity, beauty, and eloquence, a copy ereof is appended, marked V, is a condensed but faithful narrative of truths which not questioned by any candid and liberal man either in Georgia or Alabama. If Indians had been honestly dealt by in the sale and purchase of their reserves re are the best reasons for believing that they would have gone off to Arkansas ceably in the spring of 1835 (p. 14).

The following extract is taken from the talk of Opoethleyoholo above erred to:

he land speculators in order to get the Indians' reservations of land would harden people against the counsel of the chiefs and sell to the Indians pistols and powder, ves and lead; would give bad counsel to them and say to them "If the chiefs atpt to restrain or interfere with you kill them"; and that in this way the late redations and disturbances that had so suddenly and in so unlooked for a manner ken out in the nation had been created and produced (p. 40).

Mr. Balch adds on p. 14:

t would seem then that another leading cause of the late hostilities of the Creeks o be found in the multiplied frauds which had been practiced upon them by indinal white men, who had continued to cheat them out of their property.

Commissioner Crawford says, on p. 54:

nable to comprehend their rights and too willing to part with them for a disprotionate considerati n, the Indians are still, without properly appreciating, tenas of their landed interests though generally silent they were not unexcited spec-

tators and auditors of what was passing. They stood upon their own land while the currents and eddies of fraud were flowing and whirling around them with such rapidity and force as to threaten the undermining of the ground below their feet. Is it wonderful that in their cabins it should be the subject of conversation; in their social meetings of spirited remark; at their dances and ball plays of impatient and exciting complaint, and in their councils of inflammatory and fiery debate? Among civilized men it is difficult to impose restraint upon a sense of wrong, with the savage impossible (p. 54).

The effect of all these frauds upon the condition of the Indians is thus stated by Commissioner Balch:

As the means of subsistence derived from the cleared Indian lands were lessened, the Indians were constrained to place greater reliance upon the game of the forest. But this resource failed to a great degree. They dared not hunt upon the Georgia side of the Chatahoochee. * * * Under these calamitous circumstances many of the Creeks wandered off in small parties and committed aggressions upon the property of the white settlers (p. 15).

It is abundantly proved that early in 1834 many of them were in a state of suffering from the want of food.

Towards the close of the year, and in the beginning of 1835, this condition became deplorable. Corn and meat were exceedingly scarce. The white people who had moved in, and who possessed means, purchased, at enormous prices, all the provisions that were to be sold. It is said, and no doubt truly, that the Indians often stripped off the inner bark of trees, and, after boiling it in water, drank this decoction as a substitute for food (p. 15).

During the years 1834 and 1835 the number of suicides committed by these people was enormously large. The warriors went into the woods and hanged themselves with grape vines (p. 17).

The experience of all time attests that there is no condition of human suffering in which the mind reaches such a high pitch of desperation, or in which the selfish feeling rises to so great a degree of intensity as that of starvation.

It does not admit of a doubt that when the Creeks commenced their late depredations many of them were in this condition, which was one of the causes of their hostilities (p. 15).

Seven thousand Choctaws were exposed to sufferings of the same sort as those described by Commissioner Balch. Their case did not attract so much attention, because they never resorted to hostilities, and because the wrongdoer was not the land speculator, but the government which sold to the whites the lands pledged to the Indians. In many instances the Indian occupant never heard of any defect in his title till he was dispossessed by the purchaser at the land office. In the Creek case the transactions were on a larger scale, with three times as many Indians concentrated at a few supervising offices. The Choctaws were less than a third of the number scattered over a larger area, their cession being double the size of the Creeks. The outrages upon their rights, though quite as aggravated, were not sufficiently numerous at any one time or place to make the same impression upon the public mind, or to excite the same general feeling of indignation as that provoked by the Creek frauds. Detailed accounts of some of the wrongs which they suffered can be found in various public documents, particularly in 7th Pub. Lands, 627, and H. R. Rep., 663, first session, Twenty-fourth Congress.

The final result in both cases was that the allotment features of both treaties were a complete failure.

The Creeks broke out into hostilities, as already stated, which led to the forcible removal by the United States troops of the entire body of those left in Alabama, without regard to their reservations, whether sold or unsold, those not sold being virtually a total loss, the owners having never to this day received a single cent for them.

A few of the Choctaws managed to secure their homes. Some of the others, after a long struggle, received a small pittance in money and in depreciated land scrip in place of the lands and improvements of which

ey had been deprived. Others failed to get any equivalent whatever. ltimately the great body of them joined their brethren in the west.
Concerning the effect upon vitality of the condition which both Choc-ws and Creeks were in while in a state bordering upon starvation, ch as Commissioner Balch has described, it can only be said in gen-al terms that the Cherokees and Chickasaws have increased, while e Choctaws and Creeks, under circumstances precisely similar in all her respects, the effort to secure homes in severalty alone excepted, ve decreased in numbers.

The lowest estimates of the Choctaws and Creeks before their re-oval across the Mississippi are higher than the highest estimates for 80.

The highest estimates of the Cherokees and Chickasaws, before the moval of the main body of either tribe to their country west, are wer than the lowest estimates for 1880.

The Choctaws were estimated by the War Department, in 1825, at -,000. (Am. State Papers, 2d Indian Affairs, 546.)

In 1831, the number living on tracts cultivated during the preceding ar was reported to be 19,554. (Am. State Papers, Public Lands, 7, 6–130.)

The Indian office report for 1880 states that there were then in the dian Territory 15,800; the census for 1880 shows that there were in ssissippi 1,857, making a total of 17,657. The lowest estimate for 30 was 19,554, showing a decline of 1,897.

The actual decline was probably much greater, as there is reason to lieve the number before emigration exceeded 22,000.

The loss sustained by the Creeks was far more considerable.

They were estimated, in 1825, at 20,000. (2d Indian Affairs, 546.) e report for 1880 rates them at 15,000, which would make a loss of 00. But that is not half the actual loss.

In 1828, a portion of the Creeks, estimated at 2,500, removed to the esent Creek country, west.

A census taken in 1833 showed that the number then east was ,762, making, with the Creeks west, a total of 24,262.

The next enumeration was in 1857, when the whole number was as-tained to be 14,188, a decline of 41 per cent. in twenty-four years. 1881 the estimate is 15,000, showing a small gain in the next twenty-ir years, notwithstanding the heavy losses sustained during the war.

The War Department estimate before referred to, which rated the octaws and Creeks at 41,000, placed the Cherokees at 15,000; the ickasaws at 3,625 = 18,625. The Indian office report for 1880 num-s the Cherokees at 19,720; the Chickasaws at 6,000 = 25,720; show-a gain of 7,095.

This, however, is in excess of the truth, as the Cherokees aggregate ludes 4,000 adopted citizens. The Cherokee census for 1880 shows t the number of Cherokees "by blood" is 15,307, an increase of 307, ich, added to the Chickasaw increase of 2,375, makes a total of 2,682.

The two tribes therefore which made efforts to secure permanent homes severalty have declined, while the two which made no such efforts ve risen in the scale of population.

The Secretary of War, General Cass, who had been so favorably im-ssed with the allotment features of the Choctaw treaty as to recom-nd it as a model in treating with the Seminoles, and evidently used himself as a model in preparing the treaty negotiated by him with e Creeks in 1832, was so struck with the accounts of the frauds com-

mitted under that treaty that in his annual report for 1835, written six months before the Creek hostilities commenced, he says:

> I consider the experiments which have been recently made to provide for the maintenance of the Indians by reservation allotments for their use, with the power of alienation however guarded, to have wholly failed. (Ex. Doc., No. 2, first session Twenty-fourth Congress, p. 27.)

President Jackson, who, according to the extract quoted from Mr. Crawford's report, had consented reluctantly to that feature in the treaty, said in his message to Congress, December 7, 1835:

> All preceding experiments for the improvement of the Indians have failed. They cannot live in contact with a civilized community and prosper.

The seventh volume of the United States Statutes at Large contains several expressions of President Jackson's determination not to sanction any treaty provisions for individual reservations, particularly on pp. 488, 493, and 494, relating to reservations, on p. 488, for the Cherokees, and on pp. 493–'4 for the Ottawas and Chippewas of Michigan, the same tribe for whom allotments were made by treaty twenty years later with disastrous consequence, as proven in the report of Hon. H. S. Neal, herewith submitted as Appendix A.

In the annual report from the Indian Office for 1843, p. 27, it is stated that a resolution was passed on the "3d March last" by the Senate prohibiting reservations of land in the future negotiation of Indian treaties.

No more allotments were made under treaties until the practice was renewed by Commissioner Manypenny in treaties concluded in 1851 under circumstances detailed in the appendix.

SIOUX OF FLANDREAU.

Another instance of decrease in population among Indians holding land in severalty is that of the Sioux of Flandreau.

Mr. Neal, in his report, p. 26 (Appendix, p.), specifies them as one of the four tribes or bands with whom tenure in severalty has been a success. Their number, 364, he takes from the report for 1877. The report for 1881, pp. 128 and 282, shows only 306, a decline of 58 in four years.

The fact that the deaths among them had exceeded the births is reported by their agent in 1877, and again in 1878.

In 1877, speaking of the increase and decrease of Indian population, he says:

> For the last four years I have kept an account of the births and deaths, which I think quite accurate, and in that time there have been fourteen more deaths than births, though the last two years the births have exceeded the deaths. (Rep. 1877, 516.)

On p. 32 of the report for 1878 he says:

> It will be seen that there are several more deaths than births the past year, and that in the absence of any epidemic.

The statistical tables in the report for the same year give 364 as their number.

The next year's report represents it to be 331, a shrinkage of 33. There is no return of births or deaths.

The number in 1880 is 304, and in 1881 it is 306. During the same period of two years, 55 births and 32 deaths are reported. No explanation is given of the decline in the aggregate number, amounting, as already stated, to 58 in four years.

CHEROKEES, CHOCTAWS, CHICKASAWS, CREEKS, AND SEMINOLES.

It has been conceded on high authority that the five leading tribes the Indian Territory, which we, in part, represent, constitute an exption to the supposed general rule of gradual diminution or melting ray of the Indians in the United States. The historian Bancroft thinks at up to their removal west they had increased in numbers. Mr. allatin, in his synopsis of the Indian tribes, has "no doubt of their crease" during the forty years preceding emigration.

The joint special committee appointed by Congress in 1865 to inquire o the condition of the Indian tribes, express the opinion in their reort, p. 3, that "the Indians everywhere, with the exception of the bes in the Indian Territory, are rapidly decreasing in numbers." gain, on p. 4, "the tribes in the Indian Territory were most happy exempted from the constant tendency to decay up to the comencement of the late civil war. Until they became involved in that ey were actually advancing in population, education, civilization, and ricultural wealth."

Their entire number, east and west, was estimated by the Indian Office 1825 (Am. St. Pa., 2d Ind. Affrs., 546) at 64,625. The Indian Office port shows the number in 1880 to be 59,187; Cherokees east of the Mississippi, 2,200; the census for 1880 shows that there were in Mississpi, 1,857; in Florida, 180; in Alabama, 213=63,637. The decrease fifty-five years being 988, a shade over 1½ per cent.

A further examination of the official returns will show that their numerical strength was not so great by one-sixth after emigration as it was fore; that their population in the Indian Territory was 60,817 in 60; that by the war and its consequences they were reduced to ,982, a reduction of more than one-sixth, which they have since arly recovered, their number now in the Indian Territory being, as ove stated, 59,187, a gain of nearly 10,000 in the last ten years.

NEW YORK INDIANS.

The New York Indians, the remnants of the Six Nations or Iroquois federacy, constitute another prominent exception.

Speaking of them in the report for 1872, p. 16, Commissioner Walker s:

> six reserves are held and occupied by the Indians in common. While the Indian s of the continent, with few exceptions, have been speedily decreasing in numbers, se of New York have of late more than held their own, as is shown in an increase 00 in the present reports over the reported number in 1871.

Their agent in the report for 1875, p. 335, says the census taken by State that year shows a population of 4,955, an increase in ten rs of 866.

The report for 1881 shows, as compared with the preceding year, 1880, decline of 40, the deaths having considerably exceeded the births; t as compared with 1875 it shows a gain of 280, being 5,235 in 1881 ainst 4,955 in 1875, or more than 5½ per cent. in six years.

Evidently, therefore, so far as the tribes and bands specified in this merial are concerned, those holding their lands in common have, as a genl rule, retained their numerical strength better than those who have ld them as individuals by separate titles; and those who have tried h systems have fared better, in point of numbers, under the tribal n under the individual system, the Kansas or "Kaws" constituting the

after tribe will sink with the pressure of our population into wre
ness and oblivion. Such has been their past history." (Am. State
2d Ind. Affs., 276.)

Ten years later, on the 30th January, 1832, one of his success
the War Department, General Cass, writes to the Senate Commit
Indian Affairs that "the same general causes which are every
producing want and misery among the Indians *who are placed
mediate contact with our settlements* are operating upon the Semi
(8th Ind. Removals, 751, Sen. Doc. 512, first session Twenty-third
gress.)

Governor Gilmer, in his message to the Georgia legislature, Dec
11, 1829, says: "Long experience has satisfied all that the Indian
when surrounded by white men, continue to disappear till shut ou
existence." (*Ib.*, 223.)

The foregoing extracts from Calhoun, Cass, and Gilmer are
from the report of Hon. H. S. Neal, H. R. 188, third session Fort
Congress.

To the same effect Chancellor Kent, in his commentaries, quote
Judge Burnet's Notes on the Early Settlements of the Northwest

> The commencement, progress, and close of the degeneracy and ruin of th
> western Indians began at the treaty of Greenville, in 1795, which opened a
> intercourse and corrupting influence with the whites, and which, in less th
> years, terminated in the extinction of a race of men once numerous, powerful
> and uncontaminated with the corruptions of civilization, and who were the
> and undisputed sovereigns of the entire country from Pennsylvania to the Mis
> (3d Kent, 400, note.)

Judge Burnet spoke as an eye-witness. He was in the habit o
ing through the Indian settlements every year, sometimes oftene
he attributes the difficulty of reclaiming Indians, in part, to the f
with which they learn and practice the vices of the white man. (
ments in the Northwest, p. 388.)

If it was an evil, as Mr. Calhoun and Governor Gilmer said, t
round Indian tribes with white settlements; if, as Secretary Cas
want and misery are produced among Indian tribes placed in c
with "our" settlements; if, as Judge Burnet said, friendly inter

ts, whose lands were divided under the treaty of 1855, says that a jority of the tribe are in a "much worse condition" than they were ore their lands were divided and allotted in severalty. "Many who l comfortable homes, by dissipation have squandered their all, and now homeless." "It would be an act of charity to secure in the In- n Territory a permanent home for them, and, if possible, save the ainder of the tribe from destruction."

n the report for 1870, p. 258, Superintendent Hoag, speaking of the e Indians, says:

tuated as they have been in the vicinity of Kansas City, subject to all the de- lizing influences that always infest such small tribes near large settlements, their bers have been fearfully decimated and their property squandered.

he report for 1862, p. 112, says:

ter the Shawnee selections were made towns were laid out all over the reserva- and in every town from one to ten liquor shops were opened. * * * The g men and women became an easy prey to these unholy traffickers.

gent Taylor, in the report for 1868, p. 262, says:

e tribe (Shawnee) is rapidly diminishing in numbers. Some of them have already ht homes in the Indian country, while others are roving round, having no per- nt abiding place, and many more have fallen from the effects of intoxicating ks.

uperintendent Hoag, in the report for 1870, p. 257, speaks of the ngful holding by intruders of Shawnee lands, which, if sold, would ply them with the necessary comforts of life, "for lack of which y of these poor Shawnees have gone to premature graves."

gent Adams, in the report for 1868, p. 269, says of the Kickapoos: is decrease has been owing to the common causes which are con- tly wasting away the aboriginal tribes in close contact with civiliza- ."

gent Colton, in the report for the same year, 1868, p. 268, after aking of small-pox and cholera as having much to do with the rease of the Kaskaskias and Peorias, says there is yet enough these figures to command attention, and to startle the reflecting." l again "it is not difficult to perceive that in a few years these once rful tribes will be extinct. I am inclined to the opinion that their oval to a country by themselves, such as is contemplated, in the ntry south of Kansas, will have the effect of ultimately regenerating m."

uperintendent Murphy, in the report for 1868, speaks of the annoy- es and losses to which the Sacs and Foxes were subjected by intrud- . He says, their reserve, all allotted, is "overrun with settlers who itively refuse to leave." The report for 1869, says, on p. 362, "White n have taken possession of this reservation, and have held it against retary of the Interior, Commissioner of Indian Affairs, superintend- , agent, and the soldiers who have been sent here."

ll of the Sac and Fox land above referred to was held in severalty. e mortality among them, while that tenure lasted, is shown on pages —— and in the appendix.

he best general view and summing up of the treatment of Indians ding desirable lands is given by Commissioner Manypenny, in No- nber, 1856, shortly after he had himself inaugurated the system of rtition.

n page 21 of the report for 1856 he says:

he rage for speculation and the wonderful desire to obtain choice lands cause se who go into our new Territories to lose sight of and entirely overlook the rights

of the aboriginal inhabitants. The most dishonorable expedients have in many cases been made use of to dispossess the Indian, demoralizing means employed to obtain his property.

He says that in Kansas—

Trespasses and depredations of every conceivable kind have been committed on the Indians. They have been personally maltreated, their property stolen, their timber destroyed, their possessions encroached upon, and divers other wrongs and injuries done them.

The obvious fact that the combined power of a number of Indians organized as a tribe must be greater to resist such aggressions upon land belonging to the whole than that of any individual Indian in defending his own separate share, constitutes one of the strongest objections to the partition of Indian lands and the transfer of title to individual holders.

ALLOTMENT DOES NOT PROMOTE PROGRESS.— *Wyandotts.*

The Board of Indian Commissioners, on p. 9 of their ninth annual report, say that, "It is too plain for argument that no people will make real progress in civilization without the incentive to labor and enterprise that the right to individual ownership to property inspires."

To this remark Mr. Neal, who quotes it on p. 32 of his report, hereinbefore referred to and subjoined in the appendix, replies:

So far from this being true, the statistics prove that the only real progress in civilization ever made by any considerable number of North American Indians has been made by those holding lands in common, a fact which seems to have been completely ignored by the board and by the several heads of the Indian Bureau and Indian Department, who have so often recommended the division of Indian lands.

Mr. Neal proceeds to give statistical details showing the relative condition and progress for the Michigan Indians holding in severalty as compared with others holding in common, showing decline on the one hand and improvement on the other, and that, tried by the test of the Indian Office tables, the Michigan Indians are behind the average Indian population of the Union, while the New York Indians and the five nations of the Indian Territory your memorialists in part represent—all holding in common—are largely ahead of that average. (See Appendix, pages .)

It will be seen that Mr. Neal's report was submitted March 3, 1879, and that none of his statistics are later than those found in the Indian Office report for 1877.

Later reports show striking indications of the improvement of other tribes holding in common and of decline in one tribe mentioned by him as an exceptional case of success in individual ownership.

Among those holding in common that have made decided progress are the Pottawatomies of the Prairie Band, whose increase in population has already been noted.

Mr. Neal, on p. 15, speaks of their savage state, quoting from the report for 1870, which describes them, on p. 276, as resisting every effort to induce them to abandon their idle habits and resort to the cultivation of the soil; adhering tenaciously to their ancient Indian customs, habits of hunting, and mode of life, 419 souls living in 50 habitations, of which 35 were bark lodges, 15 log cabins, and *one* frame house; their furniture consisting mainly of a few rusty kettles, dirty blankets, and the usual equipments of savage life.

Their advance in eleven years, though gradual, as shown by the accounts of three successive agents, has been very considerable. The statistical tables show that in 1881 the houses they occupied numbered 108.

During the year (says the agent, Linn, on p. 107) they have built twenty substantial houses, neat in appearance, and of respectable dimensions. Nearly all of those uses have superseded structures of rude design and inconvenient arrangement, and number of houses is therefore not increased, but the individuality of the Indian s been developed thereby. * * * Though it has been but about eight years si ce houses of the kind described could be counted on the fingers of the hands, there are w but few families but what live in them.

A fourth of these houses have been built at the sole expense of the upants. The lumber for the rest has been paid for out of the interest their improvement fund. The necessary labor was either performed paid for by the individual Indians interested. Their houses, with table space for yards, are all inclosed, generally with very neat fences. arge number of them are furnished with cooking stoves, chairs, dishes, steads, and other necessaries of civilization.

Agent Newton, in the report for 1878, page 73, says—

a period of five years they have progressed from a discouraged and seemingly less community, living generally in wigwams and cultivating but small patches ground, to a community of prosperous farmers, raising cattle, hogs, horses, and les.

His successor, Agent Linn, in the report for 1879, page 84, says he visited every house they occupied, and that there can be no doubt their advancement is of a substantial character; that they are law-ding and peaceful members of society.

The same agent says, in the report for 1880, page 99—

With the exception of a superintendent of farming, whose duties are varied, no sons are employed to aid the Pottawatomies in their agricultural pursuits. They ak prairies with their own teams, make rails, run the necessary lines, and build ces to inclose their breaking, all in such a thorough manner as to elicit the favora- notice of every visitor on their reserve. They have, without doubt, as good rail ces as there are in the State of Kansas.

In the same report he says it is undeniable that they are thoroughly nest with their white neighbors and with each other; that they industrious, and have learned to acquire property, which they hold th a tenacity that in time will enrich them.

Similar remarks by the same agent appear in the report for 1881, ich states, on page 108, that they have sixteen mowing machines, ich "they have kept running since the 1st of August," the agent's port being dated September 10.

Their agricultural development is best shown in the Appendix C 1, ich contains an exhibit of their condition in twelve successive years, ginning with 1870 and ending in 1881. A view is also given of their ative condition in 1870 and 1881 as compared with the five different oups of Indians contrasted in Mr. Neal's tables, showing that in 1870 ey were in every respect as farmers below the average Indian popu-ion of the United States; and that in 1881, in five out of eight dif-ent classes or divisions in the statistical returns, they stood number e; in two other divisions they stood number two, being excelled by e Five Nations in the Indian Territory. In one, and only in one divis-n—the quantity of vegetables raised, were they behind any of the her groups specified in Mr. Neal's report.

SACS AND FOXES OF IOWA.

Another, and in some respects different and more striking, case of provement on the part of Indians holding in common is that of the cs and Foxes of Iowa, who, as previously stated, in order to avoid ing enrolled for allotment in severalty, left their homes in Kansas d went to Iowa, where they have since remained.

Acting Commissioner Marble, in the report for 1880, page 37, gives an account of their separation from the body of their people substantially the same as that set forth in preceding pages of this memorial, with the additional fact that they were permitted to live in Iowa by the State legislature in 1856, and that their lands are held for them in trust by the governor and the United State agent.

The Commissioner describes them as industrious, peaceable, and temperate in their habits, and as having accumulated personal property to the amount of $20,000, in addition to land for which they have paid $14,000.

For nearly four years, he says, they have refused to receive their annuities, owing to an objection to signing a new form of pay-roll, conflicting, as they believe, with their religious opinions.

In the report for 1881, pp. 41 and 42, Commissioner Price says they still refuse to sign a pay-roll for annuities now four years due, notwithstanding last season was very unfavorable for farming, and they are suffering in consequence. He adds, that they are industrious and temperate, and regrets that they will not receipt for their annuities, as they are in want, and he is persuaded that almost all would make good use of the money.

In agricultural progress they cannot well be compared with other tribes, as they own but a small quantity of land, less than 700 acres (all bought and paid for with their own money), selected chiefly for grazing, not much of it fit for cultivation. Moreover, part of their time is spent in hunting, and a great deal of it in working for other people. Their idea of farming seems to be to raise food for their own consumption, and ponies for sale.

In 1871 they had 90 acres in cultivation; in 1880, 215. In 1870 they raised 2,000 bushels of corn; in 1880, 8,000 bushels. In 1871 they owned 210 head of horses; in 1880, 900 head—sold during the year 200 head. Their furs and peltries sold in 1871 for $1,115; in 1880 for $2,000.

They are represented as generally earning from $1,000 to $1,200 during harvest time every year.

Their individual property was valued in 1873 at $12,000; in 1880 at $20,000.

Their purchases of land commenced in 1857, when they bought 80 acres with the proceeds of furs and ponies. Ten years afterwards, when they first received their separate share of tribal annuities, before any of it was paid, they set apart $2,000 for the purchase of an additional tract, and have continued to buy more till the sum paid has amounted to $14,000.

In some of the earlier reports they are described as vagrants and beggars. No such terms are used in the later accounts.

In 1871 the farm-work is said to be chiefly done by women, but the men show more disposition to work than formerly.

In 1875 all the able-bodied men and boys down to twelve work in harvest.

Their improvement in other respects is very remarkable.

In 1875 they had trouble from insufficient fencing and ponies running at large; also from close proximity to towns and contact with evil-disposed white men (pp. 290, 291).

In 1876 (pp. 59, 60), situated as they are in a large and wealthy neighborhood, they will have to conform to laws if they are to remain peaceable. Their property has been taxed, their stock distrained for damages, and suits enforced for debt.

The same agent in 1877, p. 114, says they are beginning to under- and their obligations under the law, are peaceful, have not been ıilty of any misdemeanors, and have quietly submitted in numerous stances to petty impositions without redress.

The same agent, in 1878, p. 70–72, says that, considering their location, has been a subject of remark that no crimes have been committed by ıem against the whites or among themselves for the last three years. .e adds that they have a strong desire to acquire more land, which ınders them more permanent and serves to keep them together.

His successor, Agent Davenport, says in the report for 1879, p. 81, ıat from all he can learn from persons living near them their conduct he past year has been very good. Not a single crime committed on he whites or among themselves. They are quiet and orderly, very ind to each other. The young men deserve great praise for their good ehavior. There is very little drunkenness, and every effort is made y the chief and council to suppress it. The women of the tribe are ell behaved, modest, and chaste.

He uses substantially the same language in the report for 1880, p. 97, ıd adds that they are quiet, orderly, and careful to obey the laws. he children are under good control. Not an orchard or garden in eir neighborhood has been disturbed; not a single crime has been ınmitted. They are firm as a rock in their religious belief, and strictly llow the traditions of their fathers. They are very strict in bringing their children to do right according to their views. Disobedience is ınished by fasting, not by the rod. They take good care of the sick, e aged, the crippled, and blind.

The same agent, in the report for 1881, p. 105, says:

> They are a very good people. They have behaved remarkably well during the st year. Their conduct toward the whites has been friendly, honorable, and up- ght. I have not heard of a single quarrel or disturbance among them during the st year. The chief and council have done all they could to suppress intemperance. ere have been but few cases of drunkenness, and then it was the fault of the white an that gets the liquor.

The foregoing extracts are given not only as an evidence of decided oral improvement, but also as an illustration of the value in that one stance of that tribal authority which is one of the objects of the al- tment system to destroy. It was the tribal influence of a chief that ok these Indians from Kansas to Iowa. It was the tribal influence of chief that preserved them from the disastrous effects of allotment ffered by their brethren, and if the agent's reports are right, tribal fluence and authority have pretty successfully endeavored to preserve ıem from the evils of intemperance.

SIOUX OF FLANDREAU.

One of the four exceptional cases of success in individual landhold- ıg cited in Mr. Neal's report is that of the Sioux of Flandreau.

The decrease in their number since 1877, the period to which Mr. Neal efers, has already been stated.

An abstract of their agricultural condition, as shown in the annual eports for eight years, beginning in 1874 and ending in 1881, is given the Appendix D 1. It shows a general decline in acres cultivated, roduce raised, and stock owned.

In strong contrast with this exhibit is a similar view of the Santee ioux in Appendix D 2, embracing the same period, but extending back ıe year, as it begins in 1873.

The Flandreau Sioux originally belonged to the Santee band, from which they separated in 1869 to make a settlement in Dakota, where they have taken homesteads and still live.

It was intended that allotments should be secured to the Santee Sioux. Both the Commissioner and the agent regret the want of necessary legislation for the purpose, and the Indians are represented as greatly depressed on that account. But the tables in the appendix of figures from the reports show that the Santee Sioux have steadily advanced in agricultural wealth and prosperity without separate land titles, while their kinsmen of Flandreau with such titles have declined.

The decline indicated in the table will be found to accord with the report of the agent, Lightner, who says, in the report for 1880, p. 122:

> The opinion is that one-third of them have given evidence of improvement; some are at a stand-still, others are retrograding. * * * *They must increase their farming interest, or they cannot sustain themselves.* But few of them cultivate land enough to live from. They do not take care of their live stock and do not accumulate any.

The tables in the appendix show that they cultivated less land in 1881 than they did in 1880, when the above remarks were made. Their live stock was probably of the same average value.

OFFICIAL OPINION.

In opposing the change of Indian land titles from the tenure in common to the tenure in severalty your memorialists are aware that they differ from nearly every one of note holding office under the government in connection with Indian affairs, and with the great body of philanthropists whose desire to promote the welfare of the Indian cannot be questioned.

To the official support of that policy there is, however, one exception. The late Superintendent of the Census, General Francis A. Walker, who was Commissioner of Indian Affairs in 1872, in his report for that year, and in his "Indian Question," published in 1874, carefully avoids saying one word in favor of allotment. But in what he does say in stating the objections to making citizens of Indians he sums up powerfully the evil tendencies of allotment.

After stating the results as thus far developed in several tribes he says, on p. 141:

> It will be thus seen that of those Indians upon whom the experiment of citizenship has been tried more than half, probably at least two-thirds, are now homeless, and must be re-endowed by the government or they will sink to a condition of hopeless poverty and misery. * * * The dissolution of the tribal bonds, and the dispersing of two hundred thousand Indians among the settlements, will devolve upon the present and future States beyond the Missouri an almost intolerable burden of vagabondage, pauperism, and crime. * * * Unless the system of reservations shall soon be recast, and the laws of non-intercourse thoroughly enforced, the next fifteen or twenty years will see the great majority of the Indians on the plains mixed up with white settlements, wandering in small camps from place to place, shifting sores upon the public body, the men resorting for a living to basket making, beggary, and hog stealing, the women to fortune telling, beggary, and harlotry, while a remnant will seek to maintain a little longer in the mountains their savage independence, fleeing before the advance of settlement when they can, fighting in sullen despair when they must. It is doubtless true that some tribes could still remain together as social, even after being dissolved as legal, communities; but the fate we have indicated would certainly befall by far the greater part of the Indians of the plains were the reservation system broken up in their present social and industrial condition. To believe that a pioneer population of two, three, or four millions, such as is likely to occupy this region within the next twenty years, can, in addition to its own proper elements of disorder, safely absorb such a mass of corruption, requires no small faith in the robust virtue of our people and in the saving efficacy of republican institutions.

On pp. 139, 140, and 141 he says:

The experiment of citizenship with the more advanced tribes is at the serious risk, amounting almost to a certainty, of the immediate loss to the Indians of the whole of their scanty patrimony through the improvident and wasteful alienation of the lands patented to them, the Indians being thus left without resource for the future except in the bounty of the government or in local charity. On this point a few facts will be more eloquent than many words.

The United States have, by recent treaties or legislative enactments, admitted to citizenship the following Indians: In Kansas, Kickapoos, 12; Delawares, 20; Wyandotts, 473; Pottawatomies, 1,604; in Dakota, Sioux (of Flandreau), 250; in Minnesota, Winnebagoes, 159; in Wisconsin, Stockbridges to a number not yet officially ascertained; in Michigan, Ottawas and Chippewas, 6,039; in the Indian Territory, Ottawas of Blanchard's Fork, 150. Time has not yet been given for the full development of the consequences of thus developing responsibility upon these Indians, but we already have information that a majority of the Pottawatomie citizens, after selling their lands in Kansas, have gone to the Indian Territory and reassociated themselves as a tribe; that of the Wyandotts considerable numbers have attached themselves to the reorganized tribe in the Indian Territory; that of the citizen Ottawas of Blanchard's Fork, nearly all have disposed of their allotted lands and are still cared for to some extent by the government as Indians; that of the Ottawas and Chippewas of Michigan, a majority certainly, and probably a large majority, have sold the lands patented to them in severalty, in many cases the negotiation preceding the issue of patents, two parties of white sharpers contesting for the favor of the agent in the way of early information as to the precise land assigned, and the disappointed faction in at least one instance resorting to burglary and larceny for the needed documents.

The Indians mentioned in the foregoing extracts are all enumerated in the list of fourteen tribes on page 27 of Mr Neal's report, which gives further details of the mischievous effects upon them of allotment and citizenship.

Additional particulars respecting the Pottawatomies, Wyandotts, and Ottawas of Blanchard's Fork are given in preceding pages of this memorial, tending to show that death has saved many of them from the evils so forcibly described by General Walker.

To call attention to those evils, to the "condition of hopeless poverty and misery," the "vagabondage, pauperism, and crime," which, sooner or later, must be the fate of a large majority of those Indians who hold their lands by separate individual titles, is one of the main objects of this memorial.

G. W. GRAYSON,
L. C. PERRYMAN,
Creek Delegation.

APPENDIX A.

[House Report No. 188, Forty-fifth Congress, third session.]

MARCH 3, 1879.—Laid on the table and ordered to be printed.

Mr. NEAL, from the Committee on the Territories, submitted the following report, to accompany bill H. R. 1596.

The Committee on the Territories, having had under consideration the bill (H. R. 1596) to provide for the organization of the Territory of Oklahoma, beg leave to submit the following report thereon, with the recommendation that said bill do not pass:

The object of the bill is to provide a territorial form of government for the country heretofore held exclusively for Indians, and now known as the Indian Territory, being the region south of Kansas, west of Missouri and Arkansas, and bounded on the south by Texas, and on the west by Texas and New Mexico. More than three-fourths of it consists of tracts called reservations, which have been set apart for the use of Indian tribes or bands, there being twenty such reservations occupied by thirty-three different bands.

Five of these reservations, equal in extent to nearly half the Territory, are owned and inhabited by the Cherokees, Choctaws, Chickasaws, Creeks, and Seminoles, who constitute more than three-fourths of its population.

Delegates representing these five nations have memoralized Congress and have appeared in person before the committee in opposition to the bill, and to any other measure of like nature.

It is objected:

1. That the fourth section of the bill provides for a legislative assembly, to consist of members "having the qualification of voters," *i. e.*, according to section 5, "all citizens of the United States, of the age of twenty-one years and upwards, who shall have lawfully resided in the Territory one year prior to the passage of this act." This would embrace 12,287 whites who are now in the Indian Territory "lawfully," as shown by the annual reports of the Commissioner of Indian Affairs for 1876 and 1877. Deducting from that number 2,261 white citizens of the Cherokee, Choctaw, Chickasaw, Creek, and Seminole tribes, as shown by Report No. 95, H. R., second session Forty-fifth Congress, leaves 10,026 whites not citizens or members of said tribes to whom a share in their government would be given, without the consent of said tribes and contrary to the spirit and meaning of their treaties, namely:

First article Choctaw and Chickasaw treaty, 1855, Revision of Indian Treaties, 276.

Seventh article Choctaw and Chickasaw treaty, 1866. (*Ibid.*, 289.)

Tenth article Choctaw and Chickasaw treaty, 1866. (*Ibid.*, 292.)

Fifth article Cherokee treaty, 1835. (*Ibid.*, 69, 70.)

Thirty-first article Cherokee treaty, 1866. (*Ibid.*, 97.)

Fifteenth article Creek and Seminole treaty, 1856. (*Ibid.*, 111.)

Twelfth article Creek treaty, 1866. (*Ibid.*, 121.)

Ninth article Seminole treaty, 1866. (*Ibid.*, 817.)

2 The eighth section provides for a judiciary with the jurisdiction now pertaining to United States courts in matters applicable to the Indian country, and "such other jurisdiction not inconsistent with this act as may be conferred by the laws of the Territory." This provision disregards the restrictions of the treaties of 1866 above referred to, all of which provide that the legislation of Congress "shall not in any manner *interfere with* or annul their present tribal organization, rights, laws, privileges, and customs," and it virtually abrogates the guarantees of exclusive jurisdiction in the treaties above cited prior to 1866.

3. Sections 18 and 19 provide for the allotment of the lands held by each tribe in tracts of 160 acres to each individual member, and also for the sale of the residue without any restriction as to purchaser.

These provisions, it is urged by the Indians, violate their ancient law and custom of tenure in common, as well as the provisions of their treaties with the United States.

In view of the two-fold character of these various objections, it is proposed to consider:

1st. The binding force of treaties, the power of Congress to change or to abrogate them, and, if such power exists, under what circumstances it is proper to exercise it.

2d. Whether sufficient cause exists for abrogating or annulling treaties with the tribes in the Indian Territory, and in that connection,

3d. To what extent the bill under consideration would violate such treaties, and,

4th. How far such measures are justifiable or expedient.

1ST.—BINDING FORCE OF TREATIES.

The first expression of opinion in any official quarter after the adoption of the Constitution, as to the binding force of Indian treaties, is found at the close of Marshall's Life of Washington, in vol. 2, page 4, of *notes*.

A treaty had been made with the Creeks in August, 1790, containing a secret stipulation for the introduction of goods, duty free, for the benefit of the trading establishment of the Principal Chief, McGillivray. Respecting this article, President Washington consulted his cabinet before signing the treaty. The Secretary of State, Mr. Jefferson, was of opinion that the stipulation might be safely made. He said that "a treaty made by the President, with the concurrence of two-thirds of the Senate, was a law of the land and a law of a superior order, because it not only repeals past laws but cannot itself be repealed by future ones. The treaty, then, will legally control the duty act and the act for licensing traders in this particular instance." From this opinion Chief Justice Marshall adds, "There is no reason to suppose that any member of the cabinet dissented." It is worthy of especial notice as relating to the first treaty ever negotiated under the present Constitution.

In direct contradiction to Mr. Jefferson's opinion is the decision of the Supreme Court in the

CHEROKEE TOBACCO CASE,

(11th Wallace, pp. 616–624), upon the question whether certain provisions of the United States revenue laws, extending to "articles produced anywhere within the external limits of the United States," annulled a right given the Cherokees in Art. 10 of their treaty of 1866, to sell any of their manufactured products without paying any tax which is now, or may be, levied by the United States.

The court decided that an act of Congress may supersede a prior treaty; that the same principle which was applied in Taylor *vs.* Morton (2d Curtis, 454) to treaties with foreign nations, applied with equal force to treaties with Indian tribes which could not be more obligatory. In other words, if a treaty points one way, and a subsequent act of Congress points another, the courts are bound to conform to the act of Congress, regardless of inconsistent treaty stipulations.

The opinion of the dissenting judges, Bradley and Davis, rests on points not material in this connection, and does not conflict with the doctrine laid down in Taylor *vs.* Morton.

That case turned on a violation under the revenue laws of a treaty stipulation with Russia, admitting her goods on as favorable terms as like articles from other countries. "The Constitution," said the court, "has made treaties a part of our municipal law; but it has not assigned to them any particular degree of authority, nor declared whether laws so enacted shall or shall not be paramount to laws otherwise enacted. No such declaration is made as to the Constitution itself." And when it became necessary to determine whether an act repugnant to either Constitution or treaty was an operative law, the question could only be answered by considering the nature and object of each species of law.

After speaking of municipal as distinguished from public law, and of the importance of preserving national faith, the court says the question is not whether the act of Congress is consistent with the treaty, but *whether that is a judicial question to be here tried.* That the act in question is within the legislative power of Congress, unless that power is controlled by the treaty, is not doubted. * * * There is nothing in the mere fact that a treaty is a law which would prevent Congress from repealing it. Unless it is for some reason distinguishable from other laws the rule which it gives may be displaced by the legislative power at pleasure.

The court then refers to power to declare war, which, *ipso jure*, repeals all provisions of existing treaties with hostile nations, and adds:

"To refuse to execute a treaty for reasons which approve themselves to the conscientious judgment of the nation is a matter of the utmost gravity and delicacy, but the power to do so is prerogative of which no nation can be deprived without deeply affecting their independence."

The power to repeal, it is urged, must exist somewhere; no body other than Congress possesses it; Congress exercised that power in the act of July 7, 1798, abrogating treaties with France. The power to decide whether a treaty with a foreign government has been violated; whether a particular stipulation has been disregarded by one party, so that it is no longer obligatory on the other, is a power which has not been confided to the judiciary, but to the executive and legislative departments. (2d Curtis, 459.)

The substance of the decision, therefore, is, that as the power to annul treaties, or rather *to declare them no longer obligatory*, must exist somewhere, it properly belongs to Congress as a necessary consequence of other powers, especially that of declaring war.

DEBATE ON JAY'S TREAEY.

The general drift of opinion in the early days of the republic respecting the rights and duties and powers of Congress in connection with treaties is shown by the debates in the House of Representatives in 1796 on the treaty made in the preceding year with Great Britain, known as "Jay's treaty;" debates characterized by Colonel Benton as the "groundwork of high constitutional knowledge," standing forth as the "first class which our Congressional history has afforded." They were started by a resolution calling upon the President for papers relating to the treaty, and were chiefly confined to the question whether or not the assent of Congress was in any case essential to the validity of a treaty made with the sanction of the President and the Senate. In this debate Mr. Gallatin said a law could not repeal a treaty, "because a treaty is made with the concurrence of another party, a foreign nation, that has no participation in framing the law. * * * It is a sound maxim in government that it requires the same power to repeal a law that enacted it." (1 Bent. Abridg., 644–5.)

Mr. W. Smith, of South Carolina, said several treaties had been concluded with

Indian tribes under the present Constitution. These treaties embraced all the points which were now made a subject of contest, settlement of boundaries, grants of money, &c. When ratified by the President and Senate they had been proclaimed as the law of the land. They had not even been communicated to the House, but the House, considering them as laws, had made the appropriations as matters of course, as they did in respect to other laws. * * * * It was not pretended that the Constitution made any distinction between treaties with foreign nations and Indian tribes; and the clause which gives Congress the power of regulating commerce with foreign nations, and on which the modern doctrine is founded, includes as well Indian tribes as foreign nations. (*Ibid.*, 652.)

Mr. Williams said there was no other way of repealing treaties but by mutual agreement of the parties, or by war. To break one article of a treaty was to break the whole, and war or a new treaty must be the consequence. (*Ibid.*, 682.)

DEBATE ON A TREATY WITH GREAT BRITAIN.

A debate of the same nature occurred in 1816 upon a bill to carry into effect the stipulations of a treaty with Great Britain; a bill described by Mr. Wm. Pinkney, Representative from Maryland, as the "echo, the fac simile" of the treaty. Like the debates in 1796, it turned mainly on the power of Congress to control treaties made by the President and Senate.

Mr. Gaston, of North Carolina. A law may repeal a treaty. This was done in the case of the treaty of 1798 with France, repealed by an act of Congress; and a treaty may repeal a preceding act of Congress, as must be admitted to be the case with the treaties of peace with Great Britain and the regency of Algiers repealing the acts declaring war against those nations. (5 Bent. Abridg., 500.)

Mr. Throop. Because a treaty is a compact it is superior to a law. This is the distinction between a treaty and a law which renders a treaty paramount to a law. A treaty is a compact between two States, which cannot be departed from by one without violating the faith of that State and the rights of the other. (*Ibid.*)

Mr. Calhoun. "It is said that a subsequent law can repeal a treaty." Strictly speaking, he denied the fact. Whenever a law was proposed declaring a treaty void, the House acted not as a legislative body, but judicially. The only question that could occupy its attention when a treaty is to be declared void is whether, under all the circumstances of the case, the treaty is not already destroyed by being violated by the nation with whom it is made, or by the existence of some other circumstance, if other there can be; the House determining this question, is the country any longer bound by the treaty? Has it not ceased to exist? The nation passes in judgment on its own contract, and this from the necessity of the case, as it admits no superior power to which it can refer for decision.

If any other consideration moves the House to repeal a treaty, it can only be considered in the light of a violation of a contract acknowledged to be binding on the country. A nation may violate its contract, may even do it under form of law, but he was not considering what might be done, but what might be *rightfully* done. It is not a question of *power*, but of right. (*Ibid.*, 502. Also Annals Cong., Jan., 1816, 530.)

Mr. Cuthbert. Who in this country is the party concerned as principal in a treaty contract? The people. Who their agent? The treaty-making power. Where are the instructions of the agent to be found? In the Constitution. And can a contract be considered as complete and of binding force that has not received the sanction which, according to its character, is required by the instructions of the principal? * * * But the faith of the nation, we are told, is pledged by a treaty. Ah! that is the question in discussion. *Is* the faith of the nation pledged? Certainly the faith of the nation is not pledged, when a treaty requires the sanction of a law, until that sanction is afforded. It is the seal manual that stamps the hitherto incomplete engagement, (5 Bent., 509.)

Mr. Stanford did not believe the Constitution gave the House of Representatives any direct share in the treaty-making power, yet that it had an indirect control over a certain class of treaties he could not doubt, meaning such only as could not go into effect without the passage of some act of Congress. (*Ibid.*, 529.)

Mr. Pickering. According to the doctrine maintained by the advocates of this bill there have never been any valid treaties between the United States and foreign nations since the organization of the government, for no law of Congress has re-enacted their articles, as is attempted by this bill, or by a general enactment pronounced them to be the law of the land. For instance, treaties of 1795 with Great Britain and Spain. Congress passed laws making appropriations, not to give validity to treaties, but simply to carry them into effect. But shall treaties operate a repeal of laws of the United States? Yes. But as treaties may thus annul laws, so may those laws annul treaties; and when Congress shall, by a formal act, declare a treaty no longer obligatory on the United States, the judges must abandon the treaty and obey

the law; and why? Because the whole authority on our part which gave existence and force to the treaty is withdrawn by the annulling act. He referred to treaties with France abrogated in 1798, and said, "As in this, so in every other case in which Congress shall judge there existed good and sufficient cause for declaring a treaty void, they will so pronounce either because they intend to declare war, or because they are willing the United States should meet a war to be declared on the other side, as less injurious to the country than an adherence to the treaty. But should Congress, without adequate cause, declare a treaty no longer obligatory, they must be prepared to meet the reproach of perfidy." (*Ibid.*, 531.)

Mr. Hopkinson. This House may, in the exercise of power over some collateral matter (as money), interfere with and perhaps prevent the fulfillment or execution of a treaty, but they do it by a violation of public faith and not by invalidating a treaty which bound it. They may refuse to grant the means necessary to perform the contract, but they cannot decree it to be no contract. (*Ibid.*, 541.)

ABROGATION OF TREATIES WITH FRANCE.

Turning back to 1798 for a debate more directly in point, the House of Representatives, having under consideration a bill from the Senate declaring treaties with France void—

Mr. Sewall. It is a novel doctrine to pass a law declaring a treaty void. But the necessity arises from the peculiar situation of the country. In most countries it is in the power of the chief magistrate to suspend a treaty whenever he thinks proper. Here, Congress only has that power. We have during this session, in a variety of cases, suspended the treaties in question by authorizing measures of hostilities against France. It would be proper to set the treaties aside by legal authority; but we ought not to say the treaties are void and of no effect. They must have effect as historical facts. They must have effect in our appeal to the world on the ground of their having been violated, and in our claim on France on account of those violations. He therefore proposed a new form of bill. (Annals of Cong., July, 1798, 2120.)

Mr. Dana. The proper mode is to declare stipulations of the French treaties no longer obligatory on the United States. This we may justly do in consequence of their being disregarded by France. Such a declaration must be regarded as abrogating all those articles of treaties which are executory, such as stipulations for the future conduct of the parties. Declaration would not have any effect on articles which are executed, such as contain cessions or renunciations of territorial claims, and where a corresponding possession has taken place. (*Ibid.*, 2121.)

Mr. Dana moved to amend by substituting, "The United States are of right freed and exonerated from the stipulations of the treaties heretofore concluded between the United States and France, and that the same shall not henceforth be regarded as legally obligatory on the government or citizens of the United States"; which was adopted without a division, and now appears on the statute-book. (*Ibid.*)

Mr. Gordon. If this bill passes it will be considered a novel thing—tantamount to a state declaration to annul a treaty—and there ought to be the grounds annexed to it which led to the measure. (*Ibid.*, 2122.)

Mr. Dana did not generally favor preambles; but whence is it that the United States may abrogate treaties with France? Is it because the legislature may at pleasure set aside a treaty? If it is proper to do this without any external cause a preamble is needless. France has violated the faith pledged by her treaty with America. This, by the law of nations, puts it within the option of the legislature to decide as a question of expediency whether the United States shall any longer continue to observe their stipulations. It is owing to the perfidy of the French Government that the abrogation of our treaties with that nation has become justifiable and necessary. As an American he hoped the United States would always regard the faith due to treaties, and that all their acts would on the face of them appear consistent with it. In this respect he wished the conduct of the American Government to exhibit a marked contrast to French perfidy. (*Ibid.*, 2123.)

A violation of treaties was not of itself sufficient for setting them aside. A treaty might be violated by the imprudence of some one in authority, or by persons without authority, and yet the foreign government might be willing to redress the injury. In such a case it would ill become the government to dissolve friendly relations. Why is it now deemed requisite to abrogate? It is because France has not only violated but persists in violating; therefore, to show that the United States was justifiable, he was in favor of retaining the preamble. (*Ibid.*, 2124.)

Mr. Gallatin was opposed to preambles; but this is a novel proceeding. He knew of no precedent of a legislature repealing a treaty. It is therefore an act of a peculiar kind, and it appeared to him necessary that Congress should justify it by a declaration of their reasons. (*Ibid.*, 2126.)

The preamble was then adopted as it now stands on the statute-book, in the following words:

"Whereas the treaties concluded between the United States and France have been repeatedly violated on the part of the French Government, and the just claims of the United States for reparation of the injuries so committed have been refused, and their attempts to negotiate an amicable adjustment of all complaints between the two nations have been repelled with indignity; and whereas, under the authority of the French Government, there is yet pursued against the United States a system of predatory violence infracting the said treaties and hostile to the rights of a free and independent nation." (1 Stat. at Large, 578.)

Thus it will be seen from the tenor of the debates that the question of abrogating treaties, or rather of declaring them no longer obligatory, is one for Congress and not for the courts, and that whenever any such step is under consideration, Congress, in the language of Mr. Calhoun, acts "not as a legislative body, but judicially:" that is a question of right, of justice, and of good faith.

The only treaties which Congress has thus far abrogated by any special act are the treaties with France referred to in the foregoing debates. The justification in that instance, as shown by the preamble above quoted, rested upon the repeated violations by France of its treaty stipulations.

2. DOES ANY CAUSE EXIST FOR ABROGATING TREATIES WITH TRIBES IN THE INDIAN TERRITORY?

No such ground is assigned for the proposed infraction of the treaties with the tribes in the Indian Territory. It is not pretended that the Indians have not executed their part of the contract embodied in those treaties. They gave up large bodies of valuable lands, and a material part of the price of those lands was the guarantee of certain rights. It is now proposed to repeal those guarantees, not for any failure of consideration on their part, but on the ground that their welfare and the welfare of the whites requires that the right thus guaranteed be annulled.

It is proposed in the bill before the committee—

1st. To open their country to white settlements.

2d. To extend the laws of the United States and the jurisdiction of United States courts over them.

3d. To abolish tribal relations and make them citizens of the United States.

4th. To change their land titles from a tenure in common to a tenure in severalty.

These measures are urged as essential to the welfare alike of the Indians and the whites.

The welfare of the whites who made the contract and have received the price paid by the Indians for their immunities need not be considered in determining the question whether or not the contract should be abrogated, unless, indeed, it should appear that such abrogation was absolutely necessary as a matter of self-preservation, that the destruction of the rights of 60,000 Indians was essential to the safety of 40,000,000 whites, which will not be pretended in any quarter.

So far as the Indians are concerned, the evidence is overwhelming and conclusive that some at least of the changes proposed instead of benefiting are calculated to destroy their race, and it will be seen that they are all in violation of the very essence of the agreement under which the five nations were induced to cross the Mississippi.*

As far back as 1882, Mr. Calhoun, then in charge of Indian affairs as Secretary of War, called attention to the evil effects of surrounding Indian tribes with a dense white population. "In that state," he says, in reply to a resolution of the House of Representatives, "tribe after tribe will sink with the progress of our settlements and the pressure of our population into wretchedness and oblivion. Such has been their past history." (Am. State Papers, 2d Ind. Aff., 276.)

His successor, Mr. Barbour, made a treaty in May, 1828, with the Cherokees west of the Mississippi, which speaks of them as having "freed themselves from the harassing and ruinous effects consequent upon a location amidst a white population, and secured to themselves under the solemn sanction of the guarantee of the United States, as contained in this agreement, a large extent of unembarrassed country, and offers inducements to their brothers yet remaining in the States to join them and enjoy the repose and blessings of such a state in the future." (7 Statutes, 312.)

This is the language of the Secretary of War, uttered in a treaty approved by the President (John Quincy Adams) and Senate. Expressions of the same character occur constantly in the War Department correspondence during the succeeding administration of President Jackson.

The Secretary of War, Governor Cass, writes to the Creek chiefs, in November, 1831, that—

"For twenty years I have been in habits of daily intercourse with the Indians. I have seen and lamented their misfortunes, and still see and lament them. * * *

* Contract with whites.

e not found a single tribe which is not poor, dispirited, and declining, * * *
why is this? You know as well as I do, it is because your people will drink ar-
spirits, will be indolent, and will associate with our bad citizens. * * * Can
avoid this state of things in your present situation? * * * You have but one
dy before you, and that is to remove to the country west of the Mississippi. (8
n Removals, 365.)†".
nuary 10, 1832, he writes to a Cherokee delegation:
f, as the President believes, and as all experience has heretofore shown, your peo-
re not in a condition to resist the operation of those causes which have produced
culable injuries to the Indians, every dictate of prudence requires that you should
don your present residence, &c.—a removal west of the Mississippi being the
remedy for the evils of your position." (*Ibid.*, 738.)
his letter to the Creek chiefs, January 16, 1832, he urges them to go "where no
white men will trouble you." (*Ibid.*, 743.)
the chairman of the Senate Committee on Indian Affairs, he writes, January 30,
that "the same general causes which are everywhere producing want and misery
g the Indians *who are placed in immediate contact with our settlements* are operating
the Seminoles." (*Ibid.*, 751.)
Hon. D. Newnan, February 10, 1832: "I consider this measure (Cherokee re-
l) indispensable to the very existence of these Indians." (761.) And to Hon.
. Wilde: "Where they are, ruin awaits them at any rate." (763.)
the President, February 16, 1832, speaking of the emigration policy, he says

—

circumstances beyond the control of this government, which may be traced to the
est periods of the intercourse between the Europeans and the Indians of this con-
t, and which are yet in active operation, have reduced this once powerful race to
dition which seems to leave no alternative betwen extinction and immediate re-
l." (Page 770.) And, again, on page 777, 'An *interdict upon all communications*
en our citizens and the Indians, except so far as may be necessary, for the com-
and improvement of the latter, is an essential part of any plan for their perma-
establishment."
ne of the features of certain propositions for the removal of Cherokees, made by
etary Cass, April 17, 1832, was that "all white persons, unless specially authorized
he laws of the United States, shall be excluded from their country." (816.)
the same general effect is a passage in the message of Governor Gilmer to the
gia legislature, December 11, 1829:
Long experience has satisfied all that the Indian tribes, when surrounded by white
continue to disappear till shut out from existence." (223.)
e Creek chiefs, in a letter to the Secretary of War, dated April 8, 1831, say:
We cannot avoid repeating to you the necessity of keeping white people out of our
try. It never will answer for the *white and red men to live together*. They cannot
. Murders have already taken place both by the reds and whites. We have
d the red men to be brought to justice. The whites go unpunished. We are
and our words and oaths go for naught. Justice we don't expect nor can we
We may expect murders to be more frequent should the whites be permitted to
among us. They bring spirits for the purpose of practicing fraud. They daily
s of our property. They bring white officers among us and take our property
bts we never contracted. We are made subject to laws we have no means of
rehending. We never know when we are doing right." (*Ibid.*, p. 425.)
bsequent experience does not seem to have changed the opinions of the Indian
tment on this subject.
Secretary of the Interior, Mr. Cox, on the 21st May, 1870, in a document in-
d by the President, said:
he policy of preserving the Indian Territory as free as possible from intrusion by
settlers in any form has been hitherto regarded as firmly established in this
ry. Negotiations for the removal of Indians from the small reservations in
as and Nebraska to the Indian Territory have been based upon this policy, and
ler to carry it out with any degree of success it is necessary to adhere to it as
as possible." (Ind. Office Rep. 1871, 467.)
Board of Indian Commissioners, in their fourth annual report, for the year
on page 11, say:
he convictions of the board that it is the imperative duty of the government to
e to its treaty stipulations with the civilized tribes of the Indian Territory, and
tect them against the attempts being made upon their country for the settle-
of the whites, have undergone no change. To repudiate, either directly or by
ndirection our solemn treaty obligations with this feeble people would be dis-
r, meriting the scorn of the civilized world. The passage of any law for the

† Part of Senate Doc. No. 512, 1st sess. 23d Cong.

The report for 1877 recommends the same policy of concentration upon l
ervations, and speaks of the "encroachments of *greedy white men*, who surrou
and continually plot to deprive them of their property."

Thus the Indian Bureau of the present day repeats the opinions expresse
Calhoun in 1822, welding together as it were the official experience of half a
and preserving unbroken the policy of excluding from their country all who
Indians, prescribed in the early treaties as far back as 1785,* enforced by Co
the different acts regulating intercourse with the Indian tribes from 1802 do
reiterated in the railroad land-grant clauses of the treaties of 1866 with t
taws, Chickasaws, Creeks, and Seminoles, which all provide that such lan
neither be conveyed to nor occupied by any one not a citizen of the nation i
it lies. (Revision of Indian Treaties, 118, 288, 814.) Still stronger provision
exclusion of white persons are embraced in the treaties of 1865, which secur
in the Indian Territory for the Cheyennes and Arapahoes, the Comanches and
(*Ibid.*, 123 and 316.)

EXTENSION OF UNITED STATES LAWS TO INDIAN CONTROVERSIES.

The application of the laws of the United States and of the jurisdictio
courts to offenses committed by one Indian against the person or property of
Indian and to civil causes of action is objected to on the ground that such ex
would violate the following treaty stipulations:

The fourth article of the Choctaw treaty of 1830 obliges "the government
ple of the United States" "to secure said Choctaw Nation of red people the j
tion and government of all the persons and property that may be within the
west, so that no Territory or State shall ever have a right to pass laws for t
ernment of the Choctaw Nation of red people and their descendants; and
part of the land granted them shall ever be embraced in any Territory or Sta
the United States shall forever secure said Choctaw Nation from and against a
except such as from time to time may be enacted in their own national counc
inconsistent with the Constitution, treaties, and laws of the United States,
cept such as may and which have been enacted by Congress to the extent th
gress, under the Constitution, are required to exercise legislation over Indian
(7 Statutes, 333.)

The seventh article of the treaty of June 22, 1855, with the Choctaws and
saws provides that "so far as may be compatible with the Constitution of the
States and the laws made in pursuance thereof, regulating trade and intercour
the Indian tribes, the Choctaws and Chickasaws shall be secured in the unres
right of self-government and full jurisdiction over persons and property withi
respective limits," "excepting" all who are not citizens of either tribe &c

eaties heretofore ratified and in force, and not inconsistent with the provisions is treaty, are hereby reaffirmed and declared to be in full force." (Revision of an Treaties, p. 97.)

e twelfth article of the Creek, the ninth article of the Seminole, and the tenth arti- f the Choctaw and Chickasaw treaties of 1866, all contain similar provisions, reaf- ng all former treaty stipulations; and the tenth article of the Creek, seventh le of the Seminole, and seventh article of the Choctaw and Chickasaw treaties, ie same date, all contain provisions that Congress shall not "interfere with or l their present tribal organization," or their "rights, laws, privileges, or cus- ." (Revision of Indian Treaties, pp. 120, 121, 289, 292, 815, 817.)

ese provisions are broad, full, and complete. Their validity has been uniformly gnized by Congress. Its legislation has carefully avoided any interference with es committed by one Indian on the person or property of another Indian, and anything like the extension of jurisdiction over civil cases.

e Indian office reports for the last three years have recommended a departure this policy of non-interference, but in this it varies from all the earlier expres- and pledges of the government and ignores its past experience.

esident Jackson, in his message to Congress of December, 1829, urging the set- apart unoccupied territory for the permanent home of Indians, recommended it should be guaranteed to the Indian tribes as long as they should occupy it, each having a distinct control over the portion designed for its use, and where they be *secured in governments of their own choice*, subject to no other control from the ed States than such as may be necessary to preserve peace on the frontier and een the several tribes. In August, 1830, before any of the treaties providing for al cession and consequent emigration had been made, he wrote to the Chicka- , calling attention to the recent extension of State laws, and urging them on account to emigrate. He says "States have been created which claim the to govern and control your people as they do their own citizens, and to make answerable to their civil and criminal code." He asks, "if you are prepared to mit yourselves to the laws of Mississippi, surrender your ancient laws and cus- , and live under those of the white man?" He goes on to say that those laws not oppressive, but expresses the opinion that the Chickasaws can only be per- ated by removing to a country beyond the Mississippi. (8 Ind. Rem., 240–1.)

mmissioners Eaton and Coffee, a few days later (August 30, 1830), speaking for President to the same people, at the same place, said:

He knows you cannot live under those laws. To do so will render you a mierable, ppy people. * * * He knows that all your ancient usages will be broken n and constant interruptions, troubles, and difficulties be felt. * * * We se our red brothers for their own sake to remove, that they may rest in a country from the white man's interruption." (*Ibid.*, 245.)

page 246 they are told that the Northwestern tribes "cannot live amongst the es."

the 18th September the same commissioners addressed the Choctaws on the subject, the extension of the laws of Mississippi and the consequent necessity migration. They asked, "Are you willing to be sued in courts, there to be tried unished for any offense you may commit? to be subjected to taxes, to work roads, and attend in musters? for all these you must do." They urged the aws to go to a country where the President "can keep *the white man's laws interrupting and disturbing you.* * * * *There no State or Territory will be cre- nd he will have it in his* power to protect you *fully in your usages, laws, and cus-* (*Ibid.*, 257.)

preamble to the treaty made by these commissioners with the Choctaws as- the extension of the laws of Mississippi over the Choctaws as the reason for g the treaty. (7 Stat., 333.)

retary Eaton to the Creek chiefs, May 16, 1831, speaks of the extension of the f Georgia, Alabama, and Mississippi over the Indians within their limits, and out the consequences which the Creeks can only escape by emigration. (8 Rem., p. 290.)

retary Cass, in a letter to the same people of November 1, 1831, already referred s to them that in the West "you will be remote from the white people, inde- nt of any State authorities, and *allowed to manage your concerns in your own way*" 6.) And on the 16th January, 1832, he writes to the Creek delegation then in ington that west of the Mississippi, "beyond the jurisdiction of any State, nder the protection of the United States, you can *enjoy your own institutions* ut the fear of interruption (p. 742).

a letter to Governor Gilmer, of Georgia, on the removal of the Cherokees, Gen- Eaton, Secretary of War, said:

is undeniably true that to remove from their present home affords the only hope eir preservation and happiness. * * * Pending the examination of these

mild climate, a fertile country, and the *means of preserving their institutions with interference of the white people*" (p. 331).

In the instructions to the commissioners appointed to treat with the Indians the act of July 14, 1832, Secretary Cass says: "In the great change we are no ing them to make it is desirable that all their political relations, as well among selves as with us, should be established *upon a permanent basis beyond the nece any future alteration*" (p. 873).

Finally, in 1838, after the greater part of the work of emigration had been plished, President Van Buren, in his message to Congress, spoke of the guara the Indians of their exclusive possession of their country West, "*forever exem all intrusion by white men*," as part of a policy settled more than thirty yea viously.

These extracts show conclusively that so far as the leading tribes are conc the main consideration held out to induce them to emigrate was that they wo cape from the white man's law and go where they could confidently rely on governed by their own peculiar customs. That feature, as is shown above, corporated in the treaties of 1830–'35, was renewed again in the treaties of 184 and 1856, and was again renewed in 1866.

How well fitted they were to exercise that right is shown in a passage quoted from p. 11 of its report for 1874, in which the Board of Indian Commis assert that the "civilized tribes" of the Indian Territory "have long since abl onstrated their capacity for self-government." On p. 13 of the same rep board says that "life and property are more safe among them and there ar violations of law than in the Territories."

The Indian agent, Marston, in his official report on the condition of these September 11, 1877 (Annual Report, p. 107), says: "The Indians in each of t tribes of this agency have laws of their own by which to govern themselv these laws the innocent are protected and the guilty punished." In the re 1876, p. 61, he says that the Cherokee government "is conducted with marked and dignity." On p. 60 of the same report he says that each one of the five or nations" "has a constitutional government with legislative, judicial, and tive departments, conducted upon the same plan as our State governments, tire expenses of which are paid out of their own funds."

There is certainly nothing in these official accounts to justify any viola treaty stipulations by Congressional interference with the governments th scribe.

The reports show:

That the tribes who are governed by their own laws in the Indian Territo general rule have done better and are now doing better than those out of it governed by State laws.

That the tribes who have kept up the tribal organization as a rule have done than those who have dissolved it.

That the best progress heretofore made by any considerable number of

zation of an Indian Territory, based on the general principles of excluding
tes, abolishing tribal relations, and apportioning lands among individual Indians,
1 which great stress was laid. A leading feature, however, was that nothing was
e done without the consent of the Indians.
eaties were made in President Jackson's first term with the Choctaws and the
ks, having emigration for their object, but intending to give each emigrant
privilege of selling his improvement, and to secure to each family desiring to re-
n, a home with title in fee-simple. (See fourteenth and nineteenth articles Choc-
treaty 1830, and first three articles Creek treaty 1832; 7 Statutes, 335, 336, 366.)
h treaties, in their reservation features, proved to be miserable failures. Large
ms are now pending on the government to make good the injuries sustained by
Indians.
ie report from the House Committee on Indian Affairs, No. 663, first session
nty-fourth Congress, contains evidence, on page 43 and page 44 (see eighth vol-
Public Lands), showing that the agents of the government actually interfered
event the Indians from securing the lands provided for in the treaty. The nature
he difficulties they had to encounter in other respects is also shown on pages 52
78 of Senate Document No. 168, first session Twenty-eighth Congress.
ie operation of individual reservations under these treaties doubtless caused the
to be abandoned, as appears from expressions in the supplementary Cherokee
ty of 1835 (7 Statutes, 488) and the Ottawa and Chippewa treaty of 1836. (*Ib.*,
) With one or two exceptions nothing more of it was heard until 1854, when the
riment was renewed on a large scale by Commissioner Manypenny. The history
ie

MANYPENNY TREATIES

of their working throws more light on the subject under consideration than it is
ible to obtain from any other source.
ie original design of the emigration policy was to secure to the Indians the entire
itry west of the Mississippi outside of Missouri and Arkansas, and as late as 1825
f what is now Wisconsin. (2d Indian Affairs, 543.)
a report to the President February 16, 1832, Secretary Cass speaks of the coun-
outh of Missouri River and west of the State of Missouri and Territory of Ar-
as as having been purchased for "division among emigrated Indians, with a
to their *final establishment*." (8 Ind. Rem., 768.) The idea of *final permanent*
blishment in those regions was impressed upon the Indians in all the negotiations
iminary to their removal. The acquisition of California was not then antici-
d, much less the discovery of gold and silver on the Pacific coast. When those
ts occurred, an immense transcontinental thoroughfare was unavoidably opened
igh the country set apart for Indians, and into which they had been assured that
e people should not be permitted to penetrate. One of the results was an act of
ress approved March 3, 1853, authorizing the President to negotiate with tribes
of Missouri and Iowa for the purpose of extinguishing their title. The duty
ssigned to Commissioner Manypenny, who reports on the 9th November, 1853,
sult of councils held with some fourteen or fifteen tribes.
says in the annual report for 1853, p. 28, that it had always been understood
one but Indians were to occupy that country, and that consequently the In-
were "excited"; that the emigrant Indians "seemed to have a vivid recollec-
f the assurances made to them at the time of their removal, that their present
ions should be their permanent homes, and that the white race should never in-
e with their possessions" (p. 32). The Commissioner told them they would do
r to sell out and remove to some less exposed place. He adds in his report that
position of Nebraska, with reference to our Pacific possessions, renders it a
r of vast importance that it be speedily opened and actual settlers invited into
the most liberal terms."
treaties were made that year. Out of a large number subsequently negotiated
n, six were with emigrant tribes living in the country previously set apart ex-
ely for Indians. All of these treaties embo y the allotment principle, and one
em provides for the dissolution of tribal relations. Two others with Indians in
igan contain both features. Of these treaties all but one were made in May and
, 1854. The bill organizing the Territories of Kansas and Nebraska became a
May 30, 1854, and of course an overwhelming stream of settlers began to pour in.
e policy inaugurated by Commissioner Manypenny was followed by his succes-
Treaties were made in 1859 with the Sacs and Foxes of Mississippi and with the
sas Indians, both providing for allotments, and in 1860 a treaty was made with
Delawares, the first of a series which added to the allotment system the new feat-
f providing for

RAILROADS.

In November, 1861, a similar treaty was made with the Pottawatomies, and in June, 1862, one with the Kickapoos.

The phraseology of these three treaties is peculiar. They all express a conviction on the part of the Indians of the benefits to be derived from railroads in enhancing the value of their lands, and in one case—the Pottawatomies—in carrying the surplus product of their farms to market. Two of the tribes entertain the opinion that the "Leavenworth, Pawnee and Western" possesses advantages over all other railroad companies. The third "entertains the opinion" that the "Atlantic and Pike's Peak Company" possesses those advantages. All three tribes desire that the companies specified shall have the preference in buying their lands, the Kickapoos and Pottawatomies at $1.25 per acre; the Delawares at an appraisement, which practically amounted to the same thing, 223,966 acres being appraised at $286,742. (Revis. Ind. Treas., 351.)

Whether the lands thus secured to railroad companies, and which then as now were considered the best in Kansas, were or were not worth more than $1.25 an acre, the reports do not indicate. But they do show that most of the Indians who prized railroads so highly got out of their way as soon as they could secure homes elsewhere. The three tribes seem to have numbered when the treaties were made about 3,400. Of these, according to the last report for 1877, less than 700 remain in their former homes, the largest proportion being in the smallest band, the Kickapoos. The Delawares went in a body to the Indian Territory, and of the Pottawatomies, the tribe that wanted the means of getting the surplus product of their farms to market, more than three-fourths went to the Indian Territory. The place marked with their name on the Indian Office map is more than 100 miles beyond the reach of any railroad. The 450 left to enjoy the facilities for getting "the surplus product of their farms to market" are described in the report for 1877 (page 118) as cherishing "prejudices against civilized customs," residing in dwellings made of bark, "generally with an open space in the top for the smoke to escape, and really unfit for occupancy." Out of 50 of their dwellings, the report for 1870 says that 35 were bark lodges, and describes them as adhering "tenaciously to ancient Indian customs." These are some of the same Indians described in the treaties as desiring to promote civilization by selling part of their land and to increase the value of what they retained by getting a railroad to cross it, and as preferring one particular company, because they believed the construction of its road "is now rendered reasonably certain."

It will be seen a little further on that the working and effect of these treaties has been such as no doubt to add to, if it has not created, a general feeling of hostility to railroads on the part of the Indians affected by them.

One more treaty remains to be mentioned, that of 24th June, 1862, with the Ottawas of Blanchard's Fork and Roche de Bœuf, which was modeled on the Manypenny plan of dissolving tribal relations, and dividing lands in severalty. But before looking into the detailed working of any one case, it may be well to give an idea of the general result as described by Commissioner Manypenny himself, on page 21 of his report in November, 1856, two years and a half after the date of the first treaty. He says:

"The rage for speculation and the wonderful desire to obtain choice lands cause those who go into our new Territories to lose sight of and entirely overlook the rights of the aboriginal inhabitants. The most dishonorable expedients have in many cases been made use of to dispossess the Indian, demoralizing means employed to obtain his property."

In Kansas, he says:

"Trespasses and depredations of every conceivable kind have been committed on the Indians. They have been personally maltreated, their property stolen, their timber destroyed, their possessions encroached upon, and divers other wrongs and injuries done them."

He speaks of the "disorderly and lawless conduct" of those who, "while they have quarreled about the African, have united upon the soil of Kansas in wrong-doing toward the Indian."

That in this respect, history was simply repeating itself, is shown by the account given twenty years earlier by Col. J. J. Abert, of the United States Army, of his observations among the Creeks, to whom he had been sent on a special mission by the War Department in May, 1833, three years after the laws of Alabama had been extended over them, and thirteen months after the ratification of the treaty assigning a portion of their lands to each family:

"You cannot form an adequate idea of the deterioration which these Indians have undergone during the last two or three years from a general state of comparative plenty to that of unqualified wretchedness and want. * * *

"The free ingress into the nation of the whites, encroachments upon their lands, even upon their cultivated fields; abuses of their persons and property; loss of

rs, who, like locusts, have devoured their substance, and have inundated their
s with whisky, have destroyed what little disposition to cultivation they may
have had. * * * * The corn crop this season will not be sufficient to feed
than one-fourth of them. * * * * They are browbeaten, cowed, and im-
l upon, and depressed with the feeling that they have no adequate protection in
nited States, and no capacity of self-protection in themselves.
hey dare not enforce their own laws to preserve order for fear of the laws of the
s; in consequence more murders have been committed in the last six months
for as many previous years. (10 Ind. Rem., 424)."
ese two accounts, one of Indians in Alabama in 1833, the other of Indians in
as in 1856, so strikingly alike in their tenor, come from gentlemen of high char-
. Colonel Abert was long and favorably known at Washington as the head of
Bureau of Topographical Engineers. Commissioner Manypenny, twenty years
he had left the Indian Bureau, was requested by an administration to which he
politically opposed to serve as chairman of the commission to negotiate with the
le Sioux.
rther particulars of the working of the system of treaties above enumerated will
und in later pages. For the present it is enough to say that those treaties in
practical application made necessary the changes effected in the

TREATIES OF 1866

the Cherokees, Choctaws, Chickasaws, Creeks, and Seminoles, who then owned
what is now known as the Indian Territory except about 200,000 acres in its
east corner, and as one of the results of the war were required to cede a portion
for the benefit of their brethren in Kansas who, as it will be seen, had been
h: to the verge of ruin by the system of allotments and the dissolution of their
relations.
ctically there was a repetition in 1866 of what had occurred between 1830 and
Then a country west of the Mississippi had been purchased for Indians living
f that river. In 1866 part of the south half of that region had to be repurchased
dians living in the north half of it. The limits of the region guaranteed to the
ant tribes "forever" had already been curtailed, and the object of the treaties
6 was to provide for a further curtailment.
door was opened by the then proprietors of what is now known as the Indian
ory to over 8,000 Indians from the State of Kansas, including between five and
ndred for whom a home was purchased in February, 1867, from the Senecas,
nees, and Quapaws, which brings to notice the treaties of 1867 with those bands
one part, and also with the Wyandotts, Ottawas, and Confederated Peorias, all
instrument, concluded February 23, 1867, and with the Sacs and Foxes of the
sippi, and the Pottawatomies about the same time, all having the same object—
curing of homes among Indians in the Indian Territory for Indians who could
e in security among white people—who were, in fact, clamorous to get out of
hite man's reach.
ong the fifteen tribes visited by Commissioner Manypenny in 1853 there was one,

THE WYANDOTTS,

in case a Territory was organized, wanted to change their system, and "con-
to the new order of things." In January, 1855, they made a treaty, which de-
them sufficiently advanced in civilization, and that "being desirous of becoming
ns, their relations as an Indian tribe shall be dissolved and terminated," except
as their continuance may be necessary for certain purposes, and such of the
ns as might desire it were to continue on a tribal footing. Those who wished
e to be citizens. Their lands were to be divided. Those who were able to take
f themselves were to receive patents in fee-simple. In other cases lands were
inalienable for five years; and after that, could be sold only with the consent
e President.
s doubtful whether any better subjects could have been selected for such an ex-
ent. As far back as 1809 their progress in agriculture had attracted attention
e's Rep. on Ind. Affs., Appendix, p. 16).
Calhoun, in a report to Congress January 15, 1820, places them in the front
among Indians who had made advances in civilization (2d Ind. Affs., 200), and
Burnet, in his "Notes on the early settlement of the Northwest," speaks from
nal observation of their rapid advances in civilization from 1821 to 1828 (pp.
).
the experiment was a signal failure. The treaty was proclaimed March 1, 1855.
n years afterward a special agent was employed to investigate their affairs,
statement appears in the annual report of the Indian Office for 1866. He says:

"By far the larger part of the Wyandotts prefer to continue the tribal organization, have long been absent from the lands patented to them, and are living in the Indian Territory. Many others who have lived and acted as citizens desire to return to the tribal state outside of the encroachment of white settlers. No matter how much they may try to live like white people, the whites think Indians have no rights white men are bound to respect. They are constantly robbed of stock and other property," &c. (p. 254).

He adds that both the citizen and Indian parties wish to remove to the Indian Territory, and that those constituting the "Indian party" claim to be the tribe, and insist that the government should ignore the others (*Ib.*).

In February, 1867, a treaty was made which, after stating that some of the Wyandotts, having sold their land, are still poor and that others had become citizens who were not fitted for the responsibility of citizenship, proceeds in the thirteenth article to provide a home for them to be held "in common," and for a registration "which shall show the names of all who desire to be and remain Indians and in a tribal condition" (Revision of Indian Treaties. 840, 844).

According to prevailing opinions and theories this was a step backward, and ought to have had an injurious effect. Practically it worked precisely the other way.

The annual reports from 1871 to 1877 show a steady and continuous improvement resulting from restoration to the tribal condition and tenure in common.

In the report for 1871, on page 499, they are described as "now a tribe, having recently completed a reorganization." Superintendent Hoag, on page 461, alludes to the "condition of poverty, ignorance, and demoralization into which it has been so unfortunately thrown." He says, "the present faction holding tribal authority are incapable of making advancement to a better condition. Having neither funds, credit, nor force, it is left to them to say whether their brethren, who were *unconsciously* and *unwillingly made citizens*, shall be reinstated as members of the tribe."

In 1872 the Commissioner says, on page 39, they are poor and making slight progress.

In 1873, they "have had a year of prosperity and have made considerable improvement in their farms and buildings; have kept the greater portion of their children in school" (p. 213).

In 1874, page 229, they "have been earnest in their efforts to improve their condition."

In 1875, they "are steady, industrious, and progressive, engaged in agriculture, and have raised crops sufficient for their subsistence" (p. 101).

In 1876, they are "in a very fair condition"; take great interest in education; as well disposed as the average whites in the adjoining settlements; have "good farms, and are improving financially" (p. 57).

In 1877, "they are as a rule enterprising and energetic. All are engaged in farming, some of them having fine large farms, with all the conveniences of civilized life about them." They "number about 250," and "have had 65 of their children in school during the year" (p. 103).

The foregoing details are given because they show beyond all doubt that it is a mistake to assert that the tribal condition with lands held in common is unfavorable to improvement.

There are other facts relating to this tribe worthy of serious attention.

The report for 1855 shows that on the pay-roll for 1854 there were 554 Wyandotts.

Commissioner Walker says, in 1872 (p. 38), "they number at present 222 souls. Ten years ago there were 435."

Thus, in 1862, seven years after they were made citizens and their lands were divided, the reduction in their number was 119—more than one-fifth—and this reduced number sustained a further reduction during the next ten years of nearly *one-half*.

On the other hand, from 1872 up to 1877 the reports show a small increase, last fall's statistical table indicating 246 against 222 in 1872.

It is possible that part of the loss prior to 1872 may have been due to "citizen Wyandotts" in Kansas, and that the subsequent gain may have been in part derived from the same source.

But of the fact that these Indians decreased in numbers while living in Kansas among white people, and that their present condition is more favorable to longevity there can be little question.

Superintendent Murphy, in the report for 1868 (p. 259), calls attention to the rapid and general reduction in population of the tribes in Kansas, specifying in three instances periods subsequent to 1853, when the Manypenny negotiations commenced, and says that their well-being demands removal "to a new home, away from the encroachments of white settlers."

OTTAWAS OF BLANCHARD'S FORK.

The same treaty of 1867 with the Senecas, Shawnees, and Quapaws, which secured a home for the Wyandotts, made a similar provision for the Ottawas of Blanchard's

Fork, for the Confederated Peorias, &c., and for the Miamies, who were all holding lands in severalty in Kansas, and the first-named, the Ottawas, had, in 1862, made a treaty similar to the Wyandotts, dividing their lands, dissolving their tribal relations, and declaring them citizens, but with the restriction that neither of the two latter changes should take place until the end of five years after the date of the treaty. In 1867 this restriction was extended two years, and a home in the Indian Territory was purchased for those who might prefer that region to their allotments in Kansas.

The report for 1872 speaks of their condition as anomalous; "they have become citizens of the United States, yet reside in the Indian country, possess a reservation there, and maintain a purely tribal organization." The Commissioner, on the same page (38), describes them as well advanced in civilization, many of them industrious and prosperous farmers. Although numbering only 150, they had 52 children at school.

The report for 1877 says they are energetic in farming, nearly every head of a family in the tribe having an improvement of his own, ranging from a few acres to one hundred and sixty (p. 103).

The removal of the Ottawas from Kansas to the Indian Territory is worthy of especial notice, as they had, with the evident intention of remaining permanently in Kansas, appropriated, by the treaty of 1862, 20,640 acres of their land for the support of a school for their children. The school was established according to the treaty, but but was ultimately managed, as shown by the Indian office report of 1872, page 87, "*wholly for the benefit of the whites*," *being* "*of no assistance or advantage whatever to the Indians.*" An act of Congress approved June 10, 1872, required the Secretary of the Interior to have the school property appraised, and to take possession of it for the benefit of the Indians. The property was appraised at $108,318.55, but the person holding it refused to turn it over. Another act was passed March 3, 1873, providing for a special commission to examine and dispose of the matter.

Whether the Ottawas ever derived any further benefit from the fund of which they were thus deprived does not appear in the subsequent reports. Superintendent Hoag, in whose district they live, speaks in the report for 1871 (p. 463), of the injustice they have suffered from the loss of their school property in Kansas as calling loudly for redress (p. 463).

THE PEORIAS AND MIAMIES

were also provided with homes in the country of the Senecas and Shawnees by the treaty of 1867.

Both tribes in 1854 had consented to a partition of their lands, and both had become considerably reduced in numbers. The Peorias removed to the Indian Territory soon after the treaty of 1867, and are described by the Commissioner in 1872 as intelligent, well advanced in civilization, and successful in raising crops (p. 38). The Miamies then still in Kansas on their allotments are said, on page 32 of the same report, to be "greatly demoralized, their school has been abandoned, and their youth left destitute of educational advantages." The Commissioner adds that "considerable trouble has been for years caused by white settlers locating aggressively on lands belonging to these Indians, no effort for their exclusion having been thus far successful."

One fact in connection with Miami lands, which is stated on pages 144 and 145 of the report for 1874, is worthy of notice. A portion of them, amounting to 2,493 acres, were advertised for sale by order of the Secretary of the Interior on the 4th November, 1873; 165 acres were sold, for which the amount received was $1,823.56, from which, of course, was deducted the expense incurred in advertising. By a curious coincidence *the cost of advertising amounted to precisely the same sum!* The land brought $1,823.56, and the advertising bills were $1,823.56. It is true that only 165 acres were sold out of 2,493 offered. But it must have struck the Miamies that selling land was expensive, if 75 cents an acre had to be paid for advertising it.

In March, 1873, an act was passed to abolish the tribal relations of the Miamies, under which separate lists were to be made on the one hand of those who wished to become citizens, and on the other hand of those desiring to join the Peorias in the Indian Territory. Under that act, out of the remnant of 106 representing the 500 Miamies who emigrated in 1846, thirty-four became citizens, and seventy-two were placed on the Indian list to join the "United Peorias and Miamies."

"'The good effect of this consolidation,' says their agent in 1877, 'has been seen in the energy with which they have been engaged in enlarging old and making new improvements. * * * They have good houses and barns, and many large farms well stocked with cattle, horses, and hogs. Their children have attended school with regularity, the attendance aggregating 87' out of a population of 202 (p. 103)."

POTTAWATOMIES.

But of all the experiments in citizenship and tenure in severalty, the one which is

on the whole the most instructive is that tried upon the Pottawatomies, as for a while it promised to be eminently successful.

Their treaty of November 15, 1861, before referred to as providing for a sale to a railroad company, assigned land in severalty to those desiring it, while others were to hold, as before, in common. Those who received patents might at the same time become citizens. In February, 1867, another treaty was made looking to homes in the Indian Territory, and requiring a registration of those desiring to go to the new reservation and of those wishing to remain and become citizens. Under that provision more than three-fourths of them did become citizens, not all at once, but gradually. Of the first 600 who had thus registered the report for 1868 says, on page 255, that they "comprised the most industrious and intelligent of the tribe, and will make useful and respected citizens."

The report for 1869 (p. 33) speaks of the same Indians as "well educated and successful farmers."

In 1870 (p. 275) "a large number of those who have received land in severalty are proving themselves worthy of the high trust." They have "large cultivated fields, fine dwellings, and numerous herds of improved stocks of cattle, horses, hogs, &c., all bearing testimony to the wisdom of their choice."

In 1871 the accounts begin to change—speak of many of them as "good citizens, with large, fine stone and frame buildings for residences, barns, and granaries, and some of the best fences around their fields; * * * many of them men of influence in church and state."

The agent adds, however:

"I regret to say that this is not the case with quite a large number of those who have thrown off their tribal relations. They now declare their act in becoming citizens to have been premature; in their sober moments say they were intoxicated with the idea of becoming citizens. They have squandered their land and money in gambling, drinking whisky, and other evil habits, and are now thrown upon their own resources as poor as the poorest" (p. 496).

Superintendent Hoag, on page 460 of the same report, says of them that—

"A few have borne the change well and are prosperous; unfortunately a much larger proportion have retrograded into intemperance and poverty. The policy of allowing Indians to become citizens in the midst of white people is ruinous to the former, and should no longer be pursued. They are not usually able to withstand the corrupting influences which are thrown around them by designing and dishonest men, who cling to them like leeches until they have possessed themselves of all their property, and then abandon them to the charge of public or private charity."

The report for 1875 (p. 80) says that about 1,400 became citizens. "After having received and squandered their share of bountiful tribal funds they take refuge from white competition and taxes alongside their Sac and Fox brethren" on the Indian Territory.

Commissioner J. Q. Smith (p. xxv, report for 1876) speaks of "the Pottawatomies who, after becoming citizens, squandered their substance, and have now returned as Indians *dependent upon the bounty of the government.*"

A letter from the Indian office, dated January 14, 1878, to the Secretary of the Interior, states that "there are now 1,600 Pottawatomies, who have become citizens of the United States, residing in the Indian Territory," under an act approved May 23, 1872, providing that they shall neither acquire nor exercise, under the laws of the United States, any right or privilege in the Indian Territory other than those enjoyed by the members of the Indian tribes lawfully residing therein.

Of the Pottawatomies who have thus gone back to the Indian Territory on the footing of Indians, giving up their privileges as citizens, Commissioner Walker says, on page 39 of the report for 1872, "Most, if not all of them, are capable of taking care of themselves, and many of them are well educated, intelligent, and thrifty farmers."

DELAWARES.

This description seems to apply pretty generally to the Indians who declined to avail themselves of the privileges of citizenship. Out of over 1,000 Delawares having that right, according to Commissioner Walker (Ind. Question, p. 140), only twenty used it, the rest, numbering 1,005 (Report for 1869, p. 375), settled among the Cherokees as members of that tribe in 1869. The Cherokee agent says of them, on page 232 of the report for 1872, that "They are among our most industrious and enterprising citizens. Some of them are opening very large farms, and setting out orchards, and surrounding themselves with fine herds of horses and cattle." "They are now just finishing a beautiful house of worship. It is small, but will excel any house of worship in this nation as to style and general appearance. They have the means to pay for it already contributed by themselves. They are also taking great interest in personal religion and in education."

No one will pretend that such men are not competent to decide for themselves whether the tribal relation or citizenship is best suited to their wants, and whether or not their "very large farms" are sufficiently secure under the Indian title.

The same remark applies to various other tribes that preferred the Indian tenure, particularly to the Ottawas, who, as it has already been shown, were sufficiently intelligent to make extensive appropriations for education, and, after securing the privileges of citizenship, voluntarily abandoned them.

The Wyandotts, who returned from citizenship and severalty to their former tribal condition, are described in the reports, particularly in those for 1872 and 1875, as superior to the rest of their people in energy and intelligence.

KICKAPOOS.

Reference has already been made to the treaty of 1862 with the Kickapoos in connection with railroads. The same treaty provided for partition of lands, those receiving patents to become citizens, and a census to be taken, showing in a separate list those preferring to hold in common. To this latter class there belonged in 1872 (Rep., 387) 181, while 109 held by allotment. Commissioner Walker's "Indian Question" (p. 140) shows that 12 had become citizens, making a total of 302 in 1872, or 290 exclusive of citizens. The reports indicate a gradual reduction, the aggregate in 1877 being only 248. Whether the decrease is owing to recent citizens not enrolled, to stragglers, or to mortality arising from unfavorable surroundings in a white population, or any other cause, does not appear. In the report for 1877 (p. 119) "the agent for these Indians says their treaty (of 1862) "established a division of interest between the allottees and those who hold in common, that in their present relations is prejudicial to both parties." He adds that several of the allottees have applied "to be received back in the reserve in common, and others seem to have abandoned the desire to receive head-money and become citizens." He thinks it would "be wise to place the parties making the request back into the tribe, and have the lands allotted to them appraised and sold, and the proceeds applied for the benefit of the tribe in common."

A similar division of interest and consequent ill-feeling among the

SHAWNEES

is indicated in the report for 1869 (p. 34), those holding in common not being on good terms with the "severalty Indians," the two classes being created by the treaty of 1854. The latter class were then, in 1869, about to be, and have since been, incorporated in the Cherokee Nation.

Subsequent reports speak of constant encroachments upon the rights of both parties by intruders who "occupy and improve the fairest lands," their Indian owners being driven from their homes and appealing to the government for aid to keep them from actual starvation (1870, pp. 256 and 257). Similar statements appear in the report for 1871 (p. 461) and for 1873 (p. 200), the Indians being crowded out of reservations worth from $10 to $30 per acre, and compelled to seek homes as beggars in the Indian Territory.

The most striking instance of the impossibility of preserving Indian reservations from the aggressions of neighboring white settlers is that of the

SACS AND FOXES OF THE MISSISSIPPI,

who had their lands allotted in severalty under the treaty of 1859. In 1867 they made another treaty with a view to selling out their homes in Kansas and securing a tract in the Indian Territory, where they now live.

In the report for 1868 (p. 256), Superintendent Murphy says they have suffered many annoyances and losses from white settlers—so much so, that the military had to be sent to the reservation for their protection. He adds that "the reserve is still overrun with settlers who positively refuse to leave," setting at defiance all the authorities, as shown by the report for 1869, which says, on page 362:

"White men have taken possession of this reservation and have held it against President, Secretary of Interior, Commissioner of Indian Affairs, superintendent, agent, and the soldiers who have been sent there."

MICHIGAN INDIANS.

The cases of citizenship and tenure in severalty thus far considered have been con-

fined to Kansas and the Indian Territory, those cited in Kansas numbering over 4,000, as will be seen by the subjoined table, p. 27.

The same experiment has been tried on a somewhat larger scale in Michigan upon the Ottawas and Chippewas, and the "Chippewas of Saginaw, Swan Creek, and Black River," comprising an aggregate population in 1875 of 7,695, more than half the aggregate of the fourteen bands specified in the table.

Commissioner Walker describes them in 1872 (p. 17) as well advanced in civilization," with allotted lands for which they have received patents, and are "citizens of the United States." Those having no allotments can secure homesteads under the act of June 10, 1872.

Their agent, Richard M. Smith, who had known them twenty years, believes, in 1871 (p. 509), that their further advancement will be checked; that of over 8,000 Indians in Michigan very few are competent to take charge of their own affairs, and he speaks of heavy losses in land and timber immediately after the first issue of patents. He thinks the "general result will be an unnecessary amount of poverty and wretchedness, and hasten their utter extinction."

Subsequent reports in the main speak favorably of both tribes, giving precedence in point of civilization to the Chippewas of Saginaw, until the last, for 1877, when all but 600 out of a total of 2,500 in 1877, are said on page 122 to have sold their land, and "each band" has purchased elsewhere "a small tract," with a view to gardening in a small way, picking berries, making baskets, and fishing, "thus eking out an existence which, if they could not have disposed of their lands," might have been made "comfortable." Others again are said to be working manfully on their farms.

On the same page the larger bands, the Ottawas and Chippewas, are said to be the most civilized from the fact of two hundred years of "intimate relations with the French," it being "really difficult to tell" one of this band from a Frenchman.

The opening of their unoccupied lands to homestead entry, the agent thinks, was "a great error, so far as the peace and well-being of these people was concerned." The Indians have "become discouraged, and think their labor will all be lost, their improvements and land taken from them as they have been in numerous cases. They do not work with that energy they otherwise would."

The statistical tables in the annual reports show an unmistakable decline in agricultural productions and in farm property in the years 1876 and 1877, as compared with former years.

All the accounts show a falling off in these two tribes in education.

Commissioner Walker states, in 1872 (p. 18), that in 1862 they had 30 schools with 1,068 scholars, while in 1872 there were but 8 schools with 323 scholars. The last report shows only 6 schools and 253 scholars. This was in a population of 10,056, as it included two other bands. The figures present a strong contrast to the statements respecting the small bands of Wyandotts, Ottawas, Peorias, Miamies, &c., of the Quapaw Agency in the Indian Territory, who to a population of 1,345 had 5 schools and 322 scholars. The later reports do not specify the schools in each separate tribe of Michigan Indians. In 1875 one of them, the Ottawas and Chippewas, are set down at a population of 6,115, with one school and 30 scholars. The details in the Quapaw Agency for that year are not given; but in 1877 they show 140 Ottawas of Blanchard's Fork with one school and 36 scholars, the difference in favor of those in the Indian Territory being in the ratio of 50 to 1.

Their agent, in the last report (p. 123), deplores the decline of the Michigan Indians in education—says very few of their children are receiving any instruction. They "are growing up in ignorance and consequently in vice."

WISCONSIN INDIANS.

Of the five remaining bands on the list of fourteen who have been made citizens two are in Wisconsin, namely, the Brothertown Indians and the Stockbridges. Originally both were from New England. They afterwards lived more than fifty years in New York, and then bought land of the Menomonees in Wisconsin.

The Brothertowns state in a petition, dated December 27, 1830, on pages 206-9 of vol. 8 of "Indian Removals," that they are of the Mohegan, Montauck, Narragansett, Nahantic, and New England tribes, and that agriculture "has been the principal pursuit of ourselves and our ancestors for nearly one hundred and fifty years."

The same paper shows that there were then about 400 of them, living near Brothertown, New York.

By an act approved March 3, 1839, a partition of their lands was to be made by commissioners, composed of their principal headmen, "in such manner as shall be in accordance with existing laws, customs, usages, or agreements of said tribe." After the partition they were to be citizens. Governor Dodge says, in the Indian Office Report for 1843 (p. 174), that they are advancing rapidly; "for good husbandry cannot be surpassed in Wisconsin," and there is no subsequent evidence to the contrary. The change in their case seems to have been in all respects for the better.

An act precisely similar was passed on the 3d March, 1843, for the benefit of the tockbridge Indians, whose past history and antecedents had been substantially the ame, and who it was said had an ardent desire to be made citizens of the republic. Globe, December 26, 1842, p. 83.)

The effect of that act seems to have been simply to increase dissensions previously xisting. It was repealed in August, 1846. Of the former act of 1843, Governor Dodge ays, on the same page of the report above cited, "about half the tribe availed themelves of its provisions. The residue protested against its execution." He adds that he feelings of the parties were so highly excited that it became impossible for them o live together.

Eleven years later Superintendent Huebschman, contrasting the "Stockbridge" act with the one previously passed with such good results for the Brothertown Indians, ays that "containing literally the same provisions" the consequences "were most isastrous to those whom it was intended to benefit" (Annual Report, 1854, p. 38), nd Commissioner Manypenny, on p. 2 of the next year's report, says, "the Brotherowns on Lake Winnebago have, to some extent, been affected by the strife and bitter eelings among their neighbors; beyond this, are living comfortably."

To remedy all this trouble two treaties have since been made and several bills enacted by Congress. But the two parties of Stockbridge Indians, citizen and tribal, reated by the act of 1843, still exist, as appears from the report for 1877. The only esson to be learned from their case is substantially the same as that derived from the Wyandotts, the Kickapoos, and the Shawnees, that where there is any material differnce of opinion in an Indian tribe on the question of either citizenship or division of and, any measure of enrollment which creates or classifies two parties has a tendency ither to produce or to increase discord.

Of the three remaining bands, the Miamies in Indiana, the Winnebagoes in Minnesota, and the Santee Sioux at Flandreau in Dakota, no particulars are given respecting the

MIAMIES OF INDIANA

beyond the fact stated in the fourth article of their treaty of June 5, 1854, that there were then 302 of them, and the additional fact shown every year in the statistical reports that there is held on trust for them in the Treasury $221,257.86, upon which they receive annually 5 per cent.

WINNEBAGOES OF MINNESOTA.

In the report for 1877, page 149, the Winnebago agent says that 160 half-breeds remaining in Minnesota in 1863 have been paid their proportion of the Winnebago funds, being doubtless those referred to on page 20 of the report for 1871 as having become citizens. Complaint is made in the last report of injustice being done to the tribe in the distribution, but nothing is said of its effect upon the recipients, or of their condition as citizens, whether it has proved to be an advantage or not.

SIOUX OF FLANDREAU.

The sixth article of a treaty concluded April 29, 1868, with the "different bands of the Sioux Nation," permits any one belonging to that nation to select a homestead to be held by certificate, and after three years' occupation, by patent, the holder to become a citizen of the United States.

In March, 1869, twenty-five families of "Santee" Sioux selected 160 acres each, under that article, on Big Sioux River, in Dakota. Commissioner E. P. Smith gives a favorable account of their proceedings in the report for 1874, pp. 41, 42. The report for 1877, pages 58 and 59, describes them as doing well, though they are still receiving aid from the government, having lost several crops by grasshoppers. Their agent thinks it will not be long before the government care over them will be confined to their education.

So long as they *do* require aid and the supervision of an agent, the experiment can hardly be regarded as complete.

But, assuming that they have passed the ordeal, and in all respects successfully, it should be remembered that the treaty under which they became citizens has been in force ten years, and makes the same provision for the entire race of Sioux Indians, numbering 55,044, as shown by the report for 1875, while the Flandreau band are rated at 359. It is true that the report for 1877 varies the proportions by putting the latter at 364 and the former at 33,783.* The number even among the Sioux who could stand

*Pages 390 and 396, Rep. for 1877. It is not easy to tell from the reports which bands are and which are not "Sioux," but the figures in the text are believed to represent the "tables" correctly.

the test of citizenship with homes in fee-simple is doubtless very much larger than 364.

The table subjoined enumerates fourteen bands or tribes upon which the experiment of citizenship with tenure in severalty has been tried. Out of these fourteen there is no evidence in the reports of the Commissioner of Indian Affairs to show that it has been completely successful in more than one—the Brothertown band, in Wisconsin. The Sioux of Flandreau may and probably will ultimately succeed in taking care of themselves. For the present they need government help. Of the Miamies in Indiana, and the Winnebago half-breeds in Minnesota, no accounts are given. Assuming that with them the change was in all respects beneficial, and adding them to the Flandreau Sioux and the Brothertown Indians, gives a total of four cases of success out of fourteen—the four giving a total of 1,226, out of an aggregate of 13,653—1,226 cases of success against 12,427 cases of failure.

Aggregate population of bands made citizens in whole or in part			13,653	

* On page 556 of 7 Statutes at Large the number of Brothertown Indians is stated at 360; of Stockbridge and Munsees, at 349.
† Printed in the "Argument of Col. E. C. Boudinot before the Committee on Territories, January 29, 1878."

It is not pretended that these figures are strictly accurate. They are taken chiefly from the annual reports of the Indian Office, which are often contradictory; but they represent faithfully the general spirit of those reports. Take for example the

MICHIGAN INDIANS,

the Ottawas and Chippewas, and the Chippewas of Saginaw; the statements concerning them vary materially. The latter are sometimes said to number 1,580, sometimes 2,000, sometimes 2,500; to avoid any possibility of exaggeration, the lowest number is given. Again, there are doubtless in both tribes individuals, perhaps a great many of them, who have been benefited by the change; but the accounts show unmistakably that as a whole they have been injured.

In four successive reports the Chippewas of Saginaw are described as the most civilized Indians in Michigan. Those for 1876 and 1877 show that they are retrograding, and in 1877 the front rank is given to another band, the Ottawas and Chippewas, who in their turn, are represented as losing heavily in property from the moment they had the control of their own affairs, and are said, in all the accounts, to be declining in education and intelligence. Both tribes are still under an agent. Three different persons have acted in that capacity during the last eight years. All three evidently wish to show the Indians in the most favorable light, but only one of them, Mr. Betts, claims any real progress. In his letters to the Indian Office, in 1874, and to the Board of Indian Commissioners, 1874 and 1875, he takes great credit to himself for their improvement over all former years, production being largely increased by his judicious expenditures of school funds for cattle, seeds, and farming implements. (Rep., 1874, p. 185.) He is convinced that money spent for them by an agent does five times as much good as if spent by themselves, which may be true, but is not consistent with the spirit of his letter to the Board of Indian Commissioners, two months later (November 21, 1874), quoted on page 8 of their report for 1874, to the effect that Indians thrown on their own resources make the better advancement in civilization, and that the policy of reservations and annuities is a stupendous failure, the "satisfactory results" among the Chippewas of Saginaw, and their "gratifying advance beyond any previous year," being due, as he tells the Indian Office, to his own expenditure of annuity moneys. (Report, 1874, p. 185.)

In 1875 he writes to the Board of Indian Commissioners (Rep., p. 106) that he had their lands allotted to them in severalty, which "has been an advantage to them. * * * Some shiftless ones have sold their lands, but white men have taken these lands and benefied the Indians by their example and showing them what can be done, and how to do it, in the way of farming; so that, though some have squandered their land, yet on the whole the Indians are the gainers."

Notwithstanding the "gratifying advance" effected by Mr. Betts, and the benefits gained by "squandering" their lands, none of the annual reports indicate any actual progress in either band as a whole, and the statistical tables show a change for the worse.

So far, then, as the 13,000 Indians enumerated in the table are concerned, 12,000 of them have been worsted by dissolving their tribal relations, becoming citizens, and holding their land in severalty; or, more accurately, the failures amount to 12,427 against 764 cases of reported success, and 462 from which no reports have been received, and in which success is therefore inferred.

On the other hand, the cases of improvement and progress under the opposite system of tribal relations and tenure in common are numerous and striking.

CANADIAN INDIANS.

The policy of the British Government in its dealings with American Indians has generally been regarded as eminently successful. A report upon the means employed in promoting their civilization was made by the United States consul at Hamilton, Ontario, in 1870, which was printed as Mis. Doc. 35, H. R., second session, Forty-first Congress. From that report it appears that the Canadian Parliament had repeatedly tendered citizenship on certain conditions to Indians desiring it, who could secure with it fifty acres of land and proportionate share of tribal funds, but would forfeit the right to a further voice in tribal proceedings. So far as the consul could learn, all such plans were likely to prove nugatory.

He adds that—

"Hitherto the original system of government by the Indians themselves, as well as the policy adopted toward them, has tended to maintain the improvident as well as the careful and industrious; to check the accumulation of wealth in the hands of individuals as well as to prevent the extreme of poverty.

"Those who are impatient of the slow progress made towards civilization will see reason to moderate their ardor when they reflect upon the long lapse of the many centuries through which our own race has attained its present pre-eminence" (p. 39).

On pages 5, 6, and 7 are accounts of the condition of the Six Nations, whose council-house, near Brantford, he visited. He says, "In dress, cleanliness, intelligence, and other marks of condition and character, the assemblage was at least equal to that of an ordinary town meeting in a good agricultural region." The Indians informed him (p. 8), through an interpreter, "that they were pagans, and yet adhered to their ancient institutions, holding the same opinion and practicing the same observances regarding religion and the Great Spirit as had been handed down to them from time immemorial."

These are the Indians described in the printed argument of the attorney for the railroad companies, Mr. Gardiner G. Hubbard,* as "the most civilized." Next to them he places the New York Indians; then the Indians of Wisconsin and Michigan, already referred to; and then the five nations inhabiting the Indian Territory. Following his classification, next to the Indians of Brantford, in Canada, are the

NEW YORK INDIANS.

It appears from the annual reports that efforts substantially the same as those tried in Canada have been made to induce the New York Indians to abandon the tribal character, become citizens, and to hold their lands by separate individual titles, and that they have shown the same reluctance to change as that evinced by the Canadian Indians.

Commissioner Walker, in the report for 1872, speaks in high terms of their progress in education and in agricultural skill, but says, "all six reserves are held and occupied by the Indians in common" (p. 16).

In the report for 1873, the agent, Mr. Sherman, replies to the question of Commissioner E. P. Smith, whether they are not prepared for citizenship, and whether steps should not be taken to bring them in condition with other people of New York. The reply resembles in character one of the objections urged by the Indians in the Territory, that their title depends upon the occupation of their lands as a tribe (page 174, Report for 1873).

The State of New York, he says, passed in 1847 a judicious law providing for allotment of Indian lands. But they have been averse to the system, fearing it might prove an entering-wedge to dispossess them. In 1872 (Rep., p. 200) the law was still in force; but the Indians do not avail themselves of its provisions.

The Tuscaroras, according to the same report (p. 201), have the best regulations for division of lands and protection of timber. The improved lands are "practically allotted to the individual adult Indians in fee, who can buy and sell only as between themselves."

Substantially the same "regulation" exists among the five principal nations in the Indian Territory. "Improvements" are owned by individual Indians or citizens of the tribe, and may be bought and sold only as between themselves.

Whatever their system may be, that it works well with the New York Indians is fully demonstrated by the annual reports of the Indian Bureau and of the Board of Indian Commissioners.

The Indian Office reports show in the statistical tables a gradual progressive increase in agricultural productions since 1871, when the production of grain and vegetables amounted to 150,255 bushels, besides 4,200 tons of hay, the aggregate of acres cultivated being 19,122; while in 1877 the number of bushels was 233,900, the hay 5,150 tons, and the acres cultivated 22,000. This was exclusive of fruit, which, in 1871, is stated to be 4,500 bushels of choice varieties of winter apples. In 1872 "one Indian on the Tuscarora Reservation realized a profit of $2,000 on the sale of peaches alone."

In 1873 10,000 bushels winter apples were sold.

In the same year the Board of Indian Commissioners speaks of one Indian, on his own farm, besides large crops of grain, having 500 bushels apples and 300 bushels peaches, besides other fruit, and owning 2 reapers, 1 mower, and 2 threshing-machines. The same board, in its report for 1874 (p. 74), gives the account of an inspecting visit by its secretary, in which he says, "It is surprising that they have done so much; that they have cleared and cultivated and improved lands which they do not own as individuals—whose tenure is not even secured to themselves by any law."

In its report for 1875, page 105, is the statement of the agent, Mr. Sherman, that the Indian population in his agency has increased 866 during the past ten years, and their wealth in individual property nearly doubled in the same time.

This last statement was based upon the State census returns, from which many details are furnished by the agent, as appears from the report for 1875, page 336. The number of Indians in 1875 was 4,955. They cultivated 22,989 acres, and raised, in

*Before the House Committee on Indian Affairs. 1st session 44th Congress.

A falling off of nearly a third in the number of scholars.

The produce in grain and vegetables was—

In 1871, of 4,906 New York Indians, 150,255 bushels.
In 1877, of 5,041 do. do. 233,900 do.

An increase of over one-half; and—

In 1871, of 8,685 Michigan Indians, 135,914 bushels.
In 1877, of 10,056 do. do. 52,750 do.

A falling off of nearly two-thirds.

The New York Indians also cut from four to five thousand tons of hay each The Michigan Indians cut 5,000 in 1871, and then dropped gradually down ever till the amount was reduced to 1,000 tons. Their farm animals fell off in a still g atio. In 1871 they owned 9,085 horses, cattle, and hogs; in 1877, only 1,050.

Comparing them with some of the bands in the Indian Territory, it appear the Seminoles numbered 2,300 in 1871, and 2,443 in 1877.

In 1871, cultivated 7,500 acres; raised 150,000 bushels corn; owned 34,500 animals.
In 1877, do. 13,000 do. do. 253,400 do. do. do. 44,650 do.

Indicating decided progress.

The reports from the several bands in the Quapaw Agency show, in some res still greater progress, the production of grain being more than three times as in 1877 as it was in 1871.

The accounts of the Michigan Indians are furnished in part by one who ha known them, first as superintendent of missions, then four years as agent, an wished to make a favorable impression—prides himself on the "gratifying adv they had made under his supervision. Yet during those four years the reports a diminished production in bushels, the aggregate being—

In 1872, of corn, 33,530 bushels; oats, 21,550 bushels; potatoes, 92,025 bushels.
In 1875, " do. 12,200 do. do. 10,150 do. do. 81,380 do.

The "gratifying advance" was in the single item of wheat; 7,550 bushels in against 5,400 bushels in 1872.

On the other hand, in the Fourth Annual Report of the Board of Indian Co sioners, for 1872, page 152, is a statement in detail showing the progress during the preceding four years by the Indians in the Indian Territory, not incl the five leading tribes, but restricted to those designated on page 14 of the sa port as uncivilized. It shows a considerable increase in production and live s It was prepared for and submitted by the executive committee of the Society of Fr to illustrate the good effect of the peace policy. It shows that the crop for l "increased about sevenfold over that of 1868, while the quantity and variety of farm and garden products generally are largely increased also. The simple fact they own ten times the number of cattle and hogs which they had four year indicates an appreciation that their true interest lies in giving up the [illegible]

Commissioners in their eighth and ninth reports, they will be found to contra-
e assertion of page 7 of the ninth report that "It is too plain for argument that
ple will make real progress in civilization without the incentive to labor and
rise that the right to individual ownership to property inspires."
ır from this being true, the statistics prove that the only "real progress in civ:
on" ever made by any considerale number of North American Indians has been
by those holding land in common—a fact which seems to have been completely
d by the board and by the several heads of the Indian Bureau and Interior De-
ent, who have so often recommended the division of Indian lands.
present condition of tribes holding in common, as compared with those holding
eralty, may be seen by the following exhibit compiled from the statistical tables
Indian Office Report for 1877:

1. *Statistics showing population, schools, and general condition of the—*

Of the Nebraska Indians	105	625	180	100	3,50
Of the Michigan Indians	100	(†)	60	25	25

* See note to foregoing table, "Statistics," No. 1. † Not stated.

And that in the same ratio there are—

For every thousand of the—	Acres cultivated.	Bushels grain raised.	Bushels vegetables raised.	Tons of hay cut.	Horses owned.	Cattle owned.	Hogs owned.
Aggregate Indian population of United States	1,160	22,960	2,300	600	800	880	69
Cherokees, Chickasaws, Creeks, and Seminoles	4,470	111,070	5,960	2,750	950	4,120	2,30
New York Indians	4,400	30,330	16,070	1,020	190	440	39
Nebraska Indians	1,500	29,400	4,400	560	540	130	19
Michigan Indians	200	2,050	3,180	100	50	25	30

Or to give a clearer view of the whole by contrasting the two extremes of the foregoing tables with the general average of all the United States Indians, and regarding the Michigan Indians as the unit or standard of comparison, the official returns show in matters of education a relative grade in—

Ability to read:	Michigan	Indians,	1.00.	Average	U. S.	Indians,	2.66.	Five	Nations,	2.68.
Children at school:	do.	do.	1.00.	do.	do.	do.	1.44.	do.	do.	3.84.
School expenditure:	do.	do.	1.00.	do.	do.	do.	5.38.	do.	do.	9.68.

In agriculture—

Acres cultivated:	Michigan	Indians,	1.	Average	U. S	Indians,	5.	Five	Nations,	22.
Grain raised:	do.	do.	1.	do.	do.	do.	11.	do.	do.	55.
Hay cut:	do.	do.	1.	do.	do.	do.	6.	do.	do.	27.
Horses:	do.	do.	1.	do.	do.	do.	16.	do.	do.	19.
Cattle:	do.	do.	1.	do.	do.	do.	35.	do.	do.	165.
Hogs:	do.	do.	1.	do.	do.	do.	16.	do.	do.	77.

These figures speak for themselves. They show that the only one of the classes specified that contains any large proportion of "citizens" holding lands by separate titles is the class which stands lowest under nine heads out of the twelve analyzed. Of the remaining three, they are somewhat above the average in the number of dwelling-houses and the production of vegetables. How they dress is not stated.

On the other hand, the class which stands at the head of nearly every division, and is really at the head of them all, the Five Nations, have made all their progress under the system of tribal relations and tenure in common.

The extent of that progress is summed up by the Board of Indian Commissioners in its report for 1872, page 13. After stating that they "had their lands devastated and their industries paralyzed during the war of the rebellion in the same relative proportion as other parts of the South, and have not fully recovered from the effects," the board adds that "the partially civilized tribes (the Five Nations), numbering about fifty thousand souls, have, in proportion to population, more schools and with a larger average of attendance, more churches, church members, and ministers, and spend far more of their own money for education than the people of any Territory of the United States. Life and property are more safe among them, and there are fewer violations of law than in the other Territories."

One other class, the

NEBRASKA GROUP,

consists of six different tribes, one of which, the Winnebago, holds its lands by patents issued to individuals in 1870. Yet it will be found on inspecting the Indian

Office tables that the Winnebagoes are considerably below the average of the Nebraska Indians, while another of the six tribes, the Iowas, who hold in common, are not only above that average, but are equal in some respects to the Five Nations and to the New York Indians, and in most points superior to the Flandreaux Sioux.

As this latter band only number 364, it is not included in the foregoing exhibits. In the tables relating to education, &c., it stands on the whole as high as any other. In stock animals, acres cultivated, and grain produced it is below, in other agricultural products above, the Nebraska group.

SCHOOL EXPENDITURES.

The school statistics are calculated to make a wrong impression in failing to show how the expenses are paid. The New York Indians have 220 children at school for every 1,000 of aggregate population. But the cost is borne chiefly by the State of New York, which extends to its Indian population the benefits of its school system. The Five Nations support their schools out of their own funds, the Cherokees and Choctaws having taken the lead in making special provision for that purpose as far back as their treaties of 1819 and 1820. Many of their children sent abroad to be educated are not included in the returns. Their aggregate expenditures for such purposes in 1877 was $137,775,* for a total population of 56,715, being nearly $2.50 per head. The aggregate expenditure in the United States for such purposes for 1876 was $84,005,333, being a little over $2 per capita.

The principal tribes in Michigan, the Ottawas and Chippewas, have no educational funds. It appears from the reports that their annuities have expired, and, being dependent upon church aid for instruction, they were not in 1872, according to Agent Betts, "in as encouraging a condition as they have been on account of a decline in the missionary enthusiasm."

More attention has been paid to these Indians than to any other, for the obvious reason that they include the largest number upon whom the experiments of citizenship have been tried, and also because they have been referred to in the reports of the Board of Indian Commissioners for 1874 as having "fully demonstrated the wisdom" of the policy of citizenship and severalty, and "abolishing all tribal relations." (Sixth Report, p. 17.)

It has been shown in the foregoing pages that the official returns do not confirm this view of the case. The full text of the annual reports of their agents indicates very plainly that such progress as they have made in civilization was made under the tribal system and before the division of their lands, and that since that division they have retrograded and in a measure gone back to the fishing pursuits, from which it seems to have been the object of their agent to divert them, and which the Indian Bureau has excluded from its statistical indications of improvement.

CHEROKEE, CHOCTAW, AND CREEK EXPERIENCE.

Besides the facts which appear in the statistical tables, others pointing the same way are referred to in the following extract from the memorial presented by the Indian delegates April 22, 1878:

"It is the conviction that disastrous consequences would result from the proposed changes which causes the nearly unanimous opposition to such measures on the part of the Five Nations. Their own experience tells them exactly what the system of allotment and citizenship means. Provisions for that purpose were made in the treaties of 1817 and 1819 with the Cherokees, of 1830 with the Choctaws, and of 1832 with the Creeks. Hundreds of Indians entitled to patents for land under those treaties have never secured a single acre. Many more whose rights were recognized by the government were shamefully wronged by the whites, and have to this day been unable to obtain relief or redress."

Allusion has been made on page 14 to these reservations. Further particulars concerning them are found in a letter from the Commissioner of Indian Affairs of January 14, 1878, who states in reply to questions of Hon. D. W. Voorhees respecting Cherokee and Choctaw reservations that 306 Cherokees took reservations under their treaty of 1817. "nearly all of whom, however, were deprived of the same by State laws, as was the case in Georgia, or by the general government."

He also states "that there were about 1,349 reservations taken under the fourteenth article of the Choctaw treaty of 1830, but the Indians were forced to abandon the larger portion of these reservations, and take land scrip in lieu thereof, under the provisions of the act of Congress approved August 23, 1842."

The second article of the Creek treaty of 1832 provides for the division of their lands east of the Mississippi. Each family was to have half a section.

*The delegates say the actual expenditure is much larger.

The proceedings in the House of Representatives reported in the Globe of July 1, 1836, pages 479 and 480, indicate that the frauds practiced upon the Creek Indians in connection with these reservations had driven them into "a state of hostility, of actual war." A resolution was adopted requesting the President to investigate the frauds.

Commissioners were appointed for the purpose, but the result of their labors does not appear to have been printed.

These Cherokee, Choctaw, and Creek experiences of the efforts of individual Indians to hold land in severalty all occurred in their old homes east of the Mississippi, and account in a great measure for their strong aversion to any further experiments in the same direction.

The word "reservations" in their treaties refers to land "reserved" and to be secured for individual Indians or families out of cessions to the United States made by the nation of which they were members. As now used it is generally applied to tracts set apart by the United States for tribes or bands collectively.

And to prevent misapprehension it should be remembered that the phrase "tenure in common," and all the references thereto in this paper, as distinguished from "tenure in severalty," relate exclusively to *title*, and not to *occupancy*.

The houses, farms, and other improvements of the Five Nations, and other Indians who have made any substantial progress in civilization, are owned and occupied, bought and sold among themselves just as such property would be among white people in any of the States. The ownership of the land, as distinguished from the improvements, is in the nation of which those claiming the improvements are citizens. Experience, they insist, has shown that it is better for all concerned that the ownership should still be so held, and that a transfer of title to individuals would be injurious in its effects.

EFFECT OF CHANGE IN TENURE UPON INDIAN TITLES.

The delegates also urge in their memorial that such a transfer would lead to a conflict with railroad companies claiming land-grants. They say that—

"Another serious objection to the proposed system of allotment and citizenship is found in the litigation which in case it is adopted must necessarily result from the land-grants to railroads running through the Indian Territory to take effect "whenever the Indian title shall be extinguished by treaty or otherwise."

"The Indian title is held by each nation over whose land the railroads pass. It will of course be contended—

"First, that when any one of those nations by the dissolution of its tribal relations ceases to exist; or,

"Second, when its title is transferred from the nation holding in common to individual members holding in severalty who have become citizens of the United States, and have thus practically ceased to be Indians, that the "Indian title" will necessarily be extinguished."

Their comments on this danger and on the nature of their tenure embody a correct idea of the title by which the Five Nations hold their country, and of the protection intended to be secured by its peculiar features.

"While deprecating any action that might lead to such litigation, the undersigned wish to place on record the conviction universally prevailing among their people that the Indian title rests on too firm a basis to permit them to doubt the ultimate result of a judicial test. It is true that they regard the railroad land-grants as a perpetual menace to the owners of the soil, and feel that they have been the main cause of the majority of the Territorial bills introduced during the last ten years. That the grants do harm rather than good the companies claiming them have begun to discover, and have signified their willingness to have them repealed. The undersigned trust that they will be, and that Congress will relieve their people from further risk of annoyance on that account.

"But whether those grants are repealed or not the undersigned feel confident that the courts will never decide that the Indian owners can be deprived of the soil without their own consent.

"Whatever words may have occasionally been used in describing the Indian title, on carefully sifting the controlling decisions, they will be found to concur in the opinion that the government interest in Indian lands is simply a right of pre-emption, or rather of purchase, and the history of the country from its earliest settlement shows that such lands have almost invariably been acquired by purchase from the original owners.

"The transfer of the main body of the southern nations to their present homes was preceded by the act of Congress of May 28, 1830, authorizing an exchange of territory based upon the idea of perpetual possession, with the assurance to the 'tribe or nation making the exchange that the United States will forever secure and guarantee to them and their heirs and successors the country so exchanged.'

"The same idea runs through the treaties made immediately before and after that act. The preamble to the treaty of 1828 expresses the 'anxious desire' of the government to secure to the Cherokees 'a permanent home which shall, under the most solemn guarantees, remain theirs forever.' Its second article agrees 'to guarantee it to them forever.'

"The preamble to the Creek treaty of 1833 states its objects to be to establish boundaries which will 'secure a permanent home to the whole Creek Nation and to the Seminoles'; and the same idea is expressed in the third and fourth articles of the treaty. The Choctaw title rests on the same basis of perpetuity, though its history is materially different. Their country was acquired by the second article of the treaty of 1820, which makes an unqualified grant, without limitation or restriction of any kind. (7 Statutes, 211.) In 1837 they sold an undivided interest in the same to the Chickasaws.

"In 1855 a treaty was made between the Choctaws, the Chickasaws, and the United States, by which the title was changed. The grant of 1820 was from the United States to the Choctaw Nation. The treaty of 1855 'forever secures and guarantees' their lands to 'the members of the Choctaw and Chickasaw tribes, their heirs and successors, to be held in common, so that each and every member of either tribe shall have an equal undivided interest in the whole.'

"Before this transfer to the 'members of the Choctaw and Chickasaw tribes' two patents had been issued to the Choctaw Nation, one by President Jackson, the other by President Tyler under the treaty of 1830, which provides for a special conveyance of the country previously granted in 1820. These patents conform to the treaty under which they were issued in describing a smaller area and in certain restrictions not in the original grant; but they had no effect in injuring the Choctaw title, as the binding force and superior validity of the treaty of 1820, which was made under authority previously given by Congress, and under which the higher grade of title was acquired, was in various ways acknowledged both by Congress and the treaty-making power down to 1855, when the convention between the Choctaws, the Chickasaws, and the United States, by its twenty-first article, was made to 'supersede and take the place of all former treaties.' Fortunately, that convention is so framed that, while providing for and recognizing to the fullest extent the national existence and government of both Choctaws and Chickasaws, their title is placed beyond the reach of interference in the event and because of tribal dissolution, should any such calamity befall them. So long as a single Choctaw or Chickasaw is left, or the heir or successor of a Choctaw or Chickasaw, and occupies the country described in the treaty of 1855 east of the ninety-eighth meridian, so long will the courts recognize and enforce the right to hold that country against all adverse claimants.

"The qualifying words in the Choctaw and Chickasaw treaty, and in the other treaties herein referred to, as applied to their title, obviously mean nothing more than the general principle under which, in the absence of legal representatives, land always reverts to the State, and by which it may be lost through a failure to occupy. The history of Indian legislation from the first settlement of the country shows that the restrictions upon alienation were meant for the benefit of the Indian, having their origin in the desire to guard against danger from the designs of evil-disposed white men. The wisdom of retaining those restrictions and the ancient safeguard of tenure in common as a protection against fraudulent devices the undersigned cannot doubt will be appreciated by every member of Congress who carefully examines the subject. Such examinations cannot fail to show the evils of the allotment system and of the proposed disintegration by making citizens of such tribal members as may desire it, which can only serve to stimulate efforts in behalf of a few individuals to divide national funds held for the good of the whole."

The

CONCLUSIONS

arrived at by your committee are—

1. That the bill under consideration conflicts with existing treaty stipulations.

2. That while the right to decide in the last resort that a treaty is no longer binding is undoubtedly lodged in Congress, the exercise of that right is a judicial act affecting the honor and dignity of the nation, requiring for its justification reasons which commend themselves to the principles of equity and good conscience, particularly where the parties to the compact with the United States are weak and powerless and depend solely on the good faith of the government.

3. That no such reasons exist for violating the treaty stipulations which reserve the Indian Territory exclusively for Indians and which secure to the Cherokees, Choctaws, Chickasaws, Creeks, and Seminoles the right of self-government under the restrictions of the United States Constitution.

4. That even if there were no opposing treaty stipulations—no objections—resting on good faith—it would be unwise and impolitic to throw the Indian country open to white settlers without the consent of the Indian owners.

5. That while official recommendations, some of them entitled to the highest re
are strongly in favor of making Indians citizens of the United States, and transf
their land titles from the national tenure in common to the individual ten
severalty, experience has shown that in the great majority of cases, such mea
instead of benefiting, have proved injurious to the Indian.

6. That experience fully demonstrates that the holding their lands in comm
the Indian tribes is an effectual safeguard against the worst effects of Indian im
dence. Apart from any considerations of justice or humanity, it would be u
and unstatesmanlike to adopt measures which, by destroying that safeguard,
be calculated to reduce the great mass of them, in opposition to their own e
protests, to a state of hopeless penury and degradation.

Respectfully submitted.

Exhibit of numerical loss sustained by eight Indian tribes before the allotment of their lands in severalty.

Kaskaskias, Peorias, &c	Number in 1838,	519;	in 1854,	259.	Loss in 16 years,	260.	Average annual loss	16.25,	equal to 3.13 per cent. on	519
Miamies	Number in 1846,	500;	in 1857,	230.	Loss in 11 years,	270.	Average annual loss	25.54,	equal to 4.9 per cent. on	500
Sacs and Foxes	Number in 1845,	2,278;	in 1862,	1,180.	Loss in 17 years,	1,098.	Average annual loss	64.6 ,	equal to 2.83 per cent. on	2,278
Ottawas	Number in 1830,	400;	in 1862,	208.	Loss in 32 years,	192.	Average annual loss	6. ,	equal to 1.5 per cent. on	400
Kansas	Number in 1847,	1,500;	in 1862,	775.	Loss in 15 years,	725.	Average annual loss	48.33,	equal to 3.22 per cent. on	1,500
Pottawatomies	Number in 1848,	3,235;	in 1863,	2,274.	Loss in 15 years,	961.	Average annual loss	64. ,	equal to 1.97 per cent. on	3,235
Shawnees	Number in 1839,	963;	in 1857,	789	Loss in 18 years,	174.	Average annual loss	9.66,	equal to 1.97 per cent. on	963
Wyandotts	Number in 1844,	585;	in 1855,	554.	Loss in 11 years,	31.	Average annual loss	2.81,	equal to .48 per cent. on	585
Totals		9,980		6,269		3,711		236.19	2.36	9,980

Exhibit of numerical loss sustained by the same tribes during the period their lands were held under the allotment system.

Kaskaskias, Peorias, &c	Number in 1854,	259;	in 1870,	164.	Loss in 16 years,	95.	Average annual loss	5.94,	equal to 2.29 per cent. on	259
Miamies	Number in 1837,	230;	in 1873,	106.	Loss in 16 years,	124.	Average annual loss	7.75,	equal to 3.36 per cent. on	230
Sacs and Foxes	Number in 1862,	1,180;	in 1868,	957.	Loss in 6 years,	223.	Average annual loss	37. ,	equal to 3.14 per cent. on	1,180
Ottawas	Number in 1862,	208;	in 1868,	151.	Loss in 6 years,	57.	Average annual loss	9.5 ,	equal to 4.56 per cent. on	208
Kansas	Number in 1862,	775;	in 1872,	593.	Loss in 10 years,	182.	Average annual loss	18.2 ,	equal to 2.34 per cent. on	775
Pottawatomies	Number in 1863,	2,274;	in 1868,	2,025.	Loss in 5 years,	249.	Average annual loss	49.8 ,	equal to 2.19 per cent. on	2,274
Shawnees	Number in 1857,	789;	in 1868,	585.	Loss in 11 years,	204.	Average annual loss	18.54,	equal to 2.35 per cent. on	789
Wyandotts	Number in 1855,	554;	in 1871,	428.	Loss in 16 years,	126.	Average annual loss	7.87,	equal to 1.42 per cent. on	554
Totals		6,269		5,009		1,260		154.60	2.46	6,269

Exhibit of numerical loss sustained by five of the above-named eight tribes after they had ceased to hold their lands in severalty.

Kaskaskias, Peorias, &c	Number in 1870,	164;	in 1881,	150.	Loss in 11 years,	14.	Average annual loss	1.27,	equal to .77 per cent. on	164
Miamies	Number in 1873,	072;	in 1881,	59.	Loss in 8 years,	13.	Average annual loss	1.62,	equal to 2.21 per cent. on	72
Ottawas	Number in 1868,	151;	in 1881,	109.	Loss in 13 years,	42.	Average annual loss	3.23,	equal to 2.13 per cent. on	151
Kansas	Number in 1872,	593;	in 1881,	303.	Loss in 9 years,	290.	Average annual loss	32.2 ,	equal to 5.43 per cent. on	593
Shawnees	Number in 1868,	585;	in 1880,	544.	Loss in 12 years,	41.	Average annual loss	3.41,	equal to .58 per cent. on	585
Totals		1,565		1,165		400		41.73	2.62	1,565

Exhibit of numerical increase in three of the above-named tribes while holding their lands in common after two of the three had ceased to hold in severalty.

Sacs and Foxes	Number in 1868,	957;	in 1880,	970.	Gain in 12 years,	13.	Average annual gain	1.08,	equal to .11 per cent. on	957
Pottawatomies	Number in 1865,	570;	in 1881,	750.	Gain in 16 years,	180.	Average annual gain	11.25,	equal to 1.97 per cent. on	570
Wyandotts	Number in 1871,	288;	in 1881,	314.	Gain in 10 years,	26.	Average annual gain	2.60,	equal to .9 per cent. on	288
Totals		1,815		2,034		219		14.93	.82	1,815

Recapitulation showing average annual percentage of numerical loss or gain in the foregoing tribes before, during, and after allotment.

APPENDIX C, 2.

Exhibit showing relative agricultural progress of the Prarie Band of Pottawatomies in 1870 and in 1880, as compared with the analysis on page 33, House Report No. 188, third session Forty-fifth Congress, of five different classes of Indians in the ratio of 1,000 of each class.

	Proportion per 1,000 of aggregate Indian population of the United States.	Proportion per 1,000 of Prairie Band of Pottawatomies in 1870.	Proportion per 1,000 of Prairie Band of Pottawatomies in 1880.	Largest number given in analytical table, proportion per 1,000.	Class of Indians to which figures in last column relate.
Number of houses occupied	89	38	235	221	Five Nations, Indian Territory.
Number of acres cultivated	1,160	319	4,522	4,470	Do.
Number of bushels grain raised	22,960	10,531	77,777	111,070	Do.
Number of bushels vegetables raised.	2,300	1,340	2,150	16,070	New York Indians.
Number of tons of hay cut	600	None.	5,777	2,750	Five Nations, Indian Territory.
Number of horses owned	800	749	2,555	950	Do.
Number of cattle owned	880	190	1,333	4,120	Do.
Number of hogs owned	480	416	2,813	2,330	Do.

APPENDIX D, 1.

Abstract from annual reports of the Indian Office, showing: 1st, Population; 2d, number of acres cultivated; 3d, bushels of grain and vegetables raised: 4th, tons of hay cut: and 5th, horses, cattle, and hogs owned by the Sioux of Flandreau, for each successive year from 1874 to 1881, both inclusive.

Year.	Population.	Acres cultivated.	Bushels raised.				Tons of hay cut.	Horses and mules.	Cattle.	Hogs.
			Corn.	Wheat.	Oats.	Vegetables.				
1874	312	193	440	472	.....	1,130	273	70	94	[illegible]
